Vaiśravaṇa. (P. Vessavaṇa; T. Rnam sras/Rnam thos kyi bu; C. Duowen tian/Pishamen tian; J. Tamonten/Bishamonten; K. Tamun ch'ōn/Pisamun ch'ōn 多聞天/毘沙門天). One of the four **LOKAPĀLA**, the kings of the four directions who reside on the four faces of Mount **SUMERU**. He is king of the north, and the northern continent of **UTTARAKURU**, and resides on the northern face of the central mountain, where he commands armies of **YAKSAs**. He is described in the Pāli canon as a stream-enterer (see **SROTAĀPANNA**), who was a devotee of the Buddha and a protector of his monks. Despite having a life span of ninety thousand years, Vaiśravaṇa, like all Buddhist divinities (**DEVA**), will eventually die and be reborn elsewhere, with another being reborn as his successor. Vaiśravaṇa is associated with the Indian gods of wealth **KUBERA** and Jambhala; the three were once individual deities who came to be identified with each other. Vaiśravaṇa may have originated as a Central Asian deity, perhaps in the kingdom of **KHOTAN**, where he was believed to have been the progenitor of the royal lineage. He is the main interlocutor in several chapters of the **SUVARNAPRABHĀSOTTAMASŪTRA**, which sets forth the duties of the lokapāla to the virtuous king and his state. His cult does not seem to have taken hold in China until the ninth century, which is the date of the earliest Chinese images of the divinity. A legend relates that during an invasion of Tang China from **ANXI** (viz., **PARTHIA**), the Chinese emperor enlisted the aid of **AMOGHAVAJRA**, who called upon Vaiśravaṇa to guard the city wall. By the middle of the Tang, images of the god and the other lokapālas were commonly placed at city gates. The cult of Vaiśravaṇa entered Japan by the Heian period, where, despite his presence in the esoteric tradition there, he took on the appearance of local gods and is regarded as a form of **HACHIMAN**. In Tibet, the conflation of Vaiśravaṇa, Kubera, Jambhala, and Pañcika is more complete than in East Asia. As a lokapāla, Vaiśravaṇa wears armor, carries a banner of victory, and holds a mongoose that is vomiting jewels (hence his popularity as a god of wealth).

vaiyāprtya(kara). [alt. vaiyāpatya(kara)] (P. veyyāvaccakara; T. zhal ta pa; C. zhishi/zhongzhu; J. shitsuji/shushu; K. chipsa/chungju 執事/衆主). In Sanskrit, lit.

“one who performs service,” viz., an “agent”; an administrative or supervisory officer who serves as “agent” for the [SAMGHA](#) in accepting donations from the laity and supervising the use of the financial items and valuables received by the monastery; this officer may also serve as a kind of personal assistant to the monks. The term *vaiyāpṛtyakara* appears in connection with the tenth rule of the “offenses involving forfeiture” ([NIHSARGIKA-PĀTAYANTIKA](#); P. *nissaggiyapācittiya*), where the “agent” is solicited to accept robe cloth on behalf of a monk; that agent may be either a Buddhist layman ([UPĀSAKA](#)) or an unordained monastic employee (*ārāmika*). In this role, the *vaiyāpṛtyakara* is closely related to the [KALPIKĀRAKA](#), a lay “steward” or “surrogate,” who receives donations on behalf of monks and converts them into appropriate requisites. There are also, however, references to ordained agents (*vaiyāpṛtyakarabhikṣu*), who supervise the storage of offerings as robes and other gifts on behalf of the monks until they are ready to use them. [DRAVYA MALLAPUTRA](#) was singled out by the Buddha as preeminent among his monk disciples in providing such service to the community of monks (*saṅghasya veyyāvacca*), specifically in apportioning lodging and distributing meals.

[vaiyavadānika](#). (T. *nām par byang ba*; C. *qingjing*; J. *shōjō*; K. *ch’ōngjōng* 清淨). In Sanskrit, an adjective formed from [VYAVADĀNA](#), “purification” or “cleansing,” contrasted with *sāṃkleśika* (from [SAMKLEŚA](#)), meaning impurity, defilement, stain, or pollution. Dharmas are understood to operate from two distinct and opposite modes of causation that condition one’s future—*sāṃkleśika* (or [SAMKLISTA](#)) dharmas leading to suffering and *vaiyavadānika* dharmas leading to the end of suffering. In the perfection of wisdom ([PRAJÑĀPĀRAMITĀ](#)) sūtras, 108 types of phenomena are declared to be empty (*śūnya*); they are divided into two broad categories, purification (*vaiyavadānika*) and defilement (*saṃkliṣṭa*), or the pure and the defiled. Fifty-five phenomena of the pure class are enumerated in the [MAHĀYĀNA](#), including, for example, the six perfections ([PĀRAMITĀ](#)), the eighteen types of emptiness ([ŚŪNYATĀ](#)), the thirty-seven factors of enlightenment ([BODHIPĀKSIKADHARMA](#)), and the eighteen unshared qualities of a buddha ([ĀVENIKA|BUDDHA|DHARMA](#)). The defiled class includes, for example, the five aggregates ([SKANDHA](#)), the six sense organs ([INDRIYA](#)), the six consciousnesses ([VIJÑĀNA](#)), and the twelve links of dependent origination ([PRATĪTYASAMUTPĀDA](#)). See also [VYAVADĀNA](#).

[Vajirañānavarorasa](#). (Thai. *Wachirayanwarorot*) (1860–1921). One of the most

influential Thai monks of the late-nineteenth and early-twentieth centuries; his name (given in its Pāli form here) is also rendered in the Thai vernacular as Wachirayanwarorot [alt. Wachirayan Warot]. The son of King Mongkut ([RĀMA IV](#)), after a youth spent in royal luxury, he was ordained as a monk in 1879. He distinguished himself as a scholar of the Buddhist scriptures and in 1892 became abbot of [WAT BOWONNIWET](#) [alt. Wat Bovoranives; P. Pavaranivesa], the leading monastery of the [THAMMAYUT](#) (P. Dhammayuttika) order. In 1893, he became patriarch of the order and served as supreme patriarch (saṅgharāja; S. [SAMGHARĀJAN](#)) of the Thai saṅgha (S. [SAMGHA](#)) from 1910 until his death. A distinguished scholar of Pāli, he was the author of many textbooks, including the definitive Thai primer on the Pāli [VINAYA](#) tradition, the *Vinayamukha* (“Gateway to the Discipline”), which he wrote in an (unsuccessful) attempt to bring together the two major sects of Thai Buddhism, the Thammuyut and the [MAHANIKAI](#). Vajirañāṇavarorasa also designed the modern monastic curriculum and reorganized the Thai ecclesiastical hierarchy. As an advisor to King Chulalongkorn ([RĀMA V](#)), he also sought to extend modern education into the provinces. Vajirañāṇavarorasa’s autobiography is considered the first work of the genre in Thai vernacular literature.

[Vajirapāni](#). (P). In Pāli, the name of a yakḥa (S. [YAKSA](#)) who is also sometimes identified with [INDRA](#). See [VAJRAPĀNI](#).

[vajra](#). (T. rdo rje; C. jingang; J. kongō; K. kŭngang 金剛). In Sanskrit, “adamant,” “diamond,” or “thunderbolt”; a magical weapon and common symbol of power, indestructibility, and immutability, especially in tantric Buddhism, which is known as the vajra vehicle ([VAJRAYĀNA](#)). The term is also employed to describe consummate meditative experiences, such as the [VAJROPAMASAMĀDHI](#), the “[SAMĀDHI](#) that is like a vajra.” ¶ Vajra is also the name of the ritual scepter commonly employed in tantric liturgies. When used in conjunction with a bell, the vajra symbolizes [UPĀYA](#) and the bell symbolizes [PRAJÑĀ](#), with the vajra held in the right hand and the bell in the left hand. There are several types of vajras used in tantric rituals, varying in both size and the number of “points” or prongs, usually ranging from one to nine on each side. The elements that constitute the vajra are given rich symbolic value. For example, in the case of a five-pointed vajra, when held vertically, the five lower points are said to represent either the five aggregates ([SKANDHA](#)) of mind and body or the five afflictions of desire, anger, ignorance, pride, and jealousy.

These five are transmuted through tantric practice into the five buddhas ([PAÑCATATHĀGATA](#)), represented by the five upper points. These are transmuted through the knowledge of emptiness, symbolized by the sphere that unites the upper and lower parts of the vajra. In some tantric texts, vajra is also a term for phallus.

[Vajrabhairava](#). (T. Rdo rje 'jigs byed; C. Buwei Jingang; J. Fui Kongō; K. P'ooe Kūmgang 怖畏金剛). In Sanskrit, “Indestructibly Frightening”; a tantric deity associated with [YAMĀNTAKA](#); both deities are considered to be wrathful forms of the bodhisattva [MAÑJUŚRĪ](#). Vajrabhairava likely derives from Śaiva sources; Śiva is also called Bhairava. Vajrabhairava is usually black or blue in color, and can be depicted with one or as many as nine faces, and thirty-two arms. The main Vajrabhairava root tantra, classified as a father tantra ([PITRTANTRA](#)) of the [ANUTTARAYOGATANTRA](#) class, is the *Śrīmadmahāvajrabhairavatantra*, also known as the *Saptakalpa* (“Vajrabhairava Root Tantra in Seven Chapters”); it is three hundred stanzas long and explicitly sets forth legitimate transformations of violence for altruistic purposes. It is said to have been brought from [UDDIYĀNA](#) by one Lalitavajra. The Tibetan Skyo tradition also asserts that the *Gtam rgyud kyi rtog pa* (“Legend chapter”) is a root tantra. Besides Lalitavajra, the adept Śrīdhara is closely associated with the practice and dissemination of the tantra. In Tibet there are six lineages originating from Cog gru Shes rab bla ma, [RWA LO TSĀ BA RDO RJE GRAGS PA](#) (the most widespread and influential tradition), Skyo ston 'Od 'byung (1126–1200), Gnyos lo tsā ba, Ba ri lo tsā ba, and Mal gyo lo tsā ba Blo gros grags. These are known as the Zhang, Rwa, Skyo, Gnyos, Ba ri, and Mal traditions. The cult of Vajrabhairava is common to the three new translation ([GSAR MA](#)) sects of Tibet. The [SA SKYA](#) sect considers Vajrabhairava to be one of the four principal tantric deities, alongside [HEVAJRA](#), [GUHYASAMĀJA](#), and [CAKRASAMVARA](#). He holds a similar position in the [DGE LUGS](#) sect, together with Guhyasamāja and Cakrasaṃvara. The main lineages of his introduction to Tibet are traced to [ATĪŚA DĪPAMKARASĪRĪJÑĀNA](#), Mal Lo tsā ba, and [RWA LO TSĀ BA](#). See also [YAMĀNTAKA](#).

[Vajrabhairavatantra](#). (S). See [VAJRABHAIRAVA](#).

[Vajrabodhi](#). (C. Jingangzhi; J. Kongōchi; K. Kūmgangji 金剛智) (671–741). Indian [ACĀRYA](#) who played a major role in the introduction and translation in China of seminal Buddhist texts belonging to the esoteric tradition or [MIJIAO](#) (see

[MIKKYŌ](#) and [TANTRA](#)); also known as Vajramati. His birthplace and family background are uncertain, although one source says that he was a south Indian native whose brāhmaṇa father served as a teacher of an Indian king. At the age of nine, he is said to have gone to the renowned Indian monastic university of [NĀLANDĀ](#), where he studied various texts of both the [ABHIDHARMA](#) and [MAHĀYĀNA](#) traditions. Vajrabodhi also learned the different [VINAYA](#) recensions of the eighteen [MAINSTREAM BUDDHIST SCHOOLS](#). It is said that Vajrabodhi spent the years 701–708 in southern India, where he received tantric initiation at the age of thirty-one from [NĀGABODHI](#) (d.u.), a south Indian [MAHĀSIDDHA](#) of the [VAJRAŚEKHARA](#) (see [SARVATATHĀGATATATTVASAMGRAHA](#)) line. He later traveled to Sri Lanka and then to [ŚRĪVIJAYA](#) before sailing to China, eventually arriving in the eastern Tang capital of Luoyang in 720. In 721, Vajrabodhi and his famed disciple [AMOGHAVAJRA](#) arrived in the western capital of Chang’an. Under the patronage of Emperor Xuanzong (r. 712–756), Vajrabodhi and Amoghavajra translated the [VAJRAŚEKHARASŪTRA](#) and other related texts. Vajrabodhi devoted his energy and time to spreading tantric Buddhism by establishing the [ABHISEKA](#) or initiation platforms and performing esoteric rituals. In particular, Vajrabodhi was popular as a thaumaturge; his performance of the rituals for rainmaking and curing diseases gained him favor at the imperial court; he even gave tantric initiation to the Tang emperor Xuanzong. During his more than twenty years in China, Vajrabodhi introduced about twenty texts belonging to the Vajraśekhara textual line. Vajrabodhi attracted many disciples; the Silla monk [HYECH’O](#) (704–87), known for his travel record [WANG O CH’ŌNCH’UK KUK CH’ŌN](#) (“Record of a Journey to the Five Kingdoms of India”), also studied with him. The Japanese [SHINGONSHŪ](#) honors Vajrabodhi as the fifth of the eight patriarchs in its lineage, together with Nāgabodhi and Amoghavajra.

[vajrācārya](#). (T. rdo rje slob dpon; C. jingang asheli/jingangshi; J. kongōajari/kongōshi; K. kŭmgang asari/kŭmgangsa 金剛阿闍梨/金剛師). In Sanskrit, “[VAJRA](#) master”; referring to a tantric [GURU](#) ([BLA MA](#)) who has mastered the tantric arts, received the appropriate initiations, and is qualified to confer initiations and dispense tantric teachings. He is traditionally listed as having ten qualities. ¶ The title vajrācārya is also awarded to a person who has received a specific set of initiations ([ABHISEKA](#)) in the [ANUTTARAYOGATANTRA](#) systems. Although numerous variations occur, the main sequence of initiations in [KRIYĀTANTRA](#), [CARYĀTANTRA](#), and [YOGATANTRA](#) are (1) the water initiation (udakābhiṣeka), (2) the crown initiation (mukuṭābhiṣeka), (3) the [VAJRA](#) initiation

(vajrābhiṣeka), (4) the bell initiation (ghaṇṭābhiṣeka), and (5) the name initiation (nāmābhiṣeka). One who has received these initiations is regarded as a vajrācārya. In the yogatantras, an additional initiation, called the vajrācārya initiation (vajrācāryābhiṣeka), is bestowed. In the anuttarayoga systems, this set of five or six is often condensed into one, becoming the first of four initiations, called the vajrācārya initiation or the vase initiation ([KALĀŚĀBHISEKA](#)). ¶ In the Newar Buddhism of Nepal, the name vajrācārya is also used by an endogamous caste of lay priests who perform a wide variety of rituals for the Buddhist community, including life-cycle rites, fire rituals, temple rituals, protective rites. They also perform tantric initiation for high-caste members of the Newar community. According to the anuttarayoga systems, one becomes a vajrācārya as a result of a series of initiations; in the Newar community, however, it is a hereditary category.

[Vajracchedikāprajñāpāramitāsūtra](#). (T. Rdo rje gcod pa shes rab kyi pha rol tu phyin pa'i mdo; C. Jingang jing; J. Kongōkyō; K. Kūmgang kyōng 金剛經). In Sanskrit, the “Diamond-Cutter Perfection of Wisdom Sūtra”; known in English as the “Diamond Sūtra” (deriving from its popular abbreviated Chinese title *Jingang jing*, as above), one of the most famous, widely read, and commented upon of all [MAHĀYĀNA](#) sūtras, together with two others that are also known by their English titles, the [SADDHARMAPUNDARĪKASŪTRA](#) (“Lotus Sūtra”) and the [PRAJÑĀPĀRAMITĀHRDAYASŪTRA](#) (“Heart Sūtra”). The “Diamond Sūtra” was composed in Sanskrit, probably sometime between the second and fourth centuries CE. Despite its fame, much of its meaning remains elusive, beginning with the title. In Sanskrit, it is *Vajracchedikāprajñāpāramitā*. The Sanskrit term [VAJRA](#) refers to a kind of magical weapon, sometimes described as a thunderbolt or a discus, and is said to be hard and unbreakable, like a diamond or adamant. Thus, the title might be rendered into English as “The Perfection of Wisdom That Cuts like a Diamond/Thunderbolt.” The sūtra opens with the Buddha residing in the [JETAVANA](#) with 1,250 monks and a large number of bodhisattvas. After returning from his begging round ([PINDAPĀTA](#)) and eating his meal, the Buddha is approached by the great [ARHAT SUBHŪTI](#), who asks him about the practice of the [BODHISATTVA](#). The Buddha says that a bodhisattva must vow to lead all beings in the universe into [NIRVĀNA](#), while fully recognizing that there are in fact no beings to be led into nirvāṇa. “If, Subhūti, a bodhisattva were to have the (mis)perception ([SAMJÑĀ](#)) of a self ([ĀTMAN](#)), a being ([SATTVA](#)), a living entity ([JĪVA](#)), or a person ([PUDGALA](#)), he is not to be called ‘a bodhisattva.’” This

is one of many famous statements in the sūtra, regarded by commentators as setting forth the doctrine of emptiness (although the technical term [ŚŪNYATĀ](#) does not appear in the sūtra), i.e., that all phenomena are falsely imagined to have a self, a soul, and an “own-being,” qualities that they, in fact, lack. Any meritorious deed, from the giving of a gift to the vow to free all beings, is not an authentic bodhisattva deed if it is tainted with the (mis)perception (*saṃjñā*) of a sign ([NIMITTA](#)) of selfhood: thus the perfection of the act of charity ([DĀNAPĀRAMITĀ](#)) means that true bodhisattva giving occurs when there is no conception of there being a donor, recipient, or gift—for that kind of giving would produce immeasurable merit. The Buddha asks Subhūti whether the Buddha is to be seen through the possession of the thirty-two physical marks of a superman ([MAHĀPURUSALAKSANA](#)) that adorn his body. Subhūti says that he is not, because what the Buddha has described as the possession of marks ([LAKSANA](#)) is in fact the nonpossession of no-marks. This formula of question and response, with the correct answer being, “A is in fact not A, therefore it is called A” is repeated throughout the text. The sūtra is not simply a radical challenge to the ordinary conception of the world, of language, and of thought; it is also a polemical Mahāyāna sūtra, seeking, like other such sūtras, to declare its supremacy and to promise rewards to those who exalt it. It is noteworthy that here, as in many other perfection of wisdom ([PRAJÑĀPĀRAMITĀ](#)) sūtras, the Buddha’s interlocutor is not a bodhisattva, but an arhat, the wise Subhūti, suggesting that even those who have completed the path to nirvāṇa still have more to learn. The Buddha predicts that this sūtra will be understood far into the future, even into the final five hundred years that the Buddha’s teaching remains in the world. At that time, anyone who has even a moment of faith in this sūtra will be honored by millions of buddhas. Indeed, even now, long before this point in the distant future, anyone who would teach just four lines of this sūtra to others would earn incalculable merit. In a statement that appears in other perfection of wisdom sūtras, the Buddha declares, “On whatever piece of ground one will proclaim this sūtra, that piece of ground will become an object of worship. That piece of ground will become for the world together with its gods, humans, and demigods a true shrine to be revered and circumambulated.” Scholars have seen in this statement the possibility that the perfection of wisdom sūtras were something of a “cult of the book,” in which the sūtra itself was worshipped, serving as a substitute for more traditional sites of worship, such as reliquaries ([STŪPA](#)). The sūtra suggests that such practices were not always condoned by others; the Buddha goes on to say that those who worship the sūtra

will be ridiculed for doing so, but by suffering ridicule they will destroy the great stores of negative [KARMA](#) accumulated over many lifetimes. The Buddha's exhortations seem to have been taken to heart. The recitation and copying of the sūtra was widely practiced across Asia; many copies of the sūtra were discovered at [DUNHUANG](#), and the earliest printed book in the world is a xylographic print of the Chinese translation of the *Vajracchedikāprajñāpāramitā* dated May 11, 868, that was found in the Dunhuang cache. On a rock cliff on the Chinese sacred mountain of Taishan, there is a massive carving of the *Vajracchedikāprajñāpāramitā* covering some 2,100 Sinographs in 21,000 square feet (2,000 sq. m.). Miracle tales of the benefits of reciting and copying the sūtra were also told across Asia. The *Vajracchedikāprajñāpāramitā* also played an important role in the [CHAN](#) traditions of East Asia: e.g., it was the scripture that the fifth patriarch [HONGREN](#) expounded to [HUINENG](#), bringing him to enlightenment and enabling Huineng to be his successor as the sixth patriarch ([LIUZU](#)) of Chan.

[Vajradākatantra](#). (T. Rdo rje mkha' 'gro rgyud). A [YOGINĪTANTRA](#) of the [ANUTTARAYOGATANTRA](#) class, named after the deity Vajradāka ("Vajra Hero"), a form of [VAJRASATTVA](#) with four faces and four arms. It is counted as one of the five explanatory tantras (S. vyākhyātantra; T. bshad rgyud) of the [CAKRASAMVARATANTRA](#). The text is employed in Tibet especially for its instructions on the performance of fire ([HOMA](#)) rituals.

[Vajradhara](#). [alt. Vajradhāra] (T. Rdo rje 'chang; C. Jingangchi; J. Kongōji; K. Kūmgangji 金剛持). "Vajra Holder"; an important buddha of the tantric systems, where he appears in some texts as an [ĀDIBUDDHA](#) (primordial buddha). He is closely related to [VAJRAPĀṆI](#); indeed, Vajrapāṇi and Vajradhara may have originally been two names for the same deity (the Chinese translations of the two deities' names are the same). Vajradhara is the principal deity in many father-class tantras and is the chief buddha for the [MAHĀMUDRĀ](#) traditions. Vajradhara is said to have revealed the [MAHĀMUDRĀ](#) teachings to [TILOPA](#); they were then transmitted in succession to [NĀROPA](#), then to [MAR PA](#), and then to [MILA RAS PA](#). Vajradhara is sometimes referred to as the sixth buddha, representing the quintessence of the five buddhas ([PAÑCATATHĀGATA](#)) and the five buddha families. In Tibetan Buddhism, he is one of two buddhas considered as both a primordial buddha (ādibuddha) and as a [DHARMAKĀYA](#); the other is the buddha [SAMANTABHADRA](#), the primordial buddha of [RNYING MA](#). Vajradhara is the

primordial buddha of the three new, or [GSAR MA](#), sects, [SA SKYA](#), [BKA' BRGYUD](#), and [DGE LUGS](#). Vajradhara is typically depicted as dark blue, with one head and two arms, dressed as a [SAMBHOGAKĀYA](#), seated in [VAJRAPARYAṅKA](#), holding a [VAJRA](#) in each hand (or a vajra in his right and a bell in his left), which are crossed at his chest in the [VAJRAHŪMKĀRA](#) pose. He is sometimes depicted surrounded by the eighty-four [MAHĀSIDDHAS](#). When he is depicted with a consort, she is usually [VAJRAVĀRĀHĪ](#). See also [FEILAI FENG](#).

[vajradhātu](#). (S). See [KONGŌKAI](#).

[vajrahūmkāra](#). (T. rdo rje hūm mdzad). Sanskrit term for a position found in tantric iconography, sometimes called the “posture of embracing,” in which the hands of the deity (often holding a [VAJRA](#) and a bell) are crossed at the chest. If the deity is in sexual embrace with a consort, the hands are crossed behind the consort, embracing her. If there is no consort, the hands are crossed over the chest of the deity.

[vajrakanā](#). (T. rdo rje gzegs ma). In Sanskrit, lit. “diamond slivers”; a term used to describe one of the chief reasonings used by [NĀGARJUNA](#) in the [MŪLAMADHYAMAKĀRIKĀ](#). A critique of production ([UTPĀDA](#)), it argues that a given thing does not intrinsically exist because of not being produced (1) from itself, (2) from something that is intrinsically different from itself, (3) from something that is both itself and intrinsically different from itself, or (4) without cause.

[Vajrakīlaya](#). (T. Rdo rje phur pa). In Sanskrit, “Vajra Dagger,” a tantric buddha worshipped primarily by the [RNYING MA](#) and [BKA' BRGYUD](#) sects of Tibetan Buddhism. He is the deification of the [KĪLA](#) (see [PHUR PA](#)), the ritual dagger used in tantric ceremonies. In the rituals involving the use of the [kīla](#), the tantric dagger is typically used to subdue a ritual site, to subjugate the local demon by pinning him or her to the ground; the [MANDALA](#) is thus planted and established on top of the offending demon. The dagger may be stabbed into a three-sided box, the triangle representing the violent tantric activity of liberation, or into an effigy. As a deity, Vajrakīlaya originally held the same duties as the ritual dagger: to protect the borders of ritual space and to pin down and destroy enemies, human or otherwise. This tradition may derive in part from the ancient Indian myth of Indrakīla, in which the serpent Vṛtra is pinned and stabilized by a mythic “peg” ([kīla](#)). Vajrakīlaya is found in the major early tantra systems as

well as the [GUHYASAMĀJATANTRA](#) and the [SARVATATHĀGATATATTVASAMGRAHA](#), which contains his mantra and places him in the center of a [MANDALA](#), although throughout his status is inferior to that of the buddhas and bodhisattvas. It is only in the Vajrakīlaya tantras that the deity attains the status of a buddha. These texts are reputed to be eighth-century translations from Indic languages, transmitted in Tibet by [PADMASAMBHAVA](#). The tantras form a substantial section of the [RNYING MA'I RGYUD 'BUM](#), but BU STON rejected the Indian origin of the tantras and left them out of the [BKA' 'GYUR](#). Defenders of the tradition cite the fact that ['BROG MI SHĀKYA YE SHES](#) wrote that he saw the eight-syllable Vajrakīla [MANTRA](#) at the [BODHGAYĀ STŪPA](#). In addition, [SA SKYA PANDITA](#) discovered a Sanskrit fragment of the *Vajrakīlamūlatantrakhaṇḍa* at [BSAM YAS](#), and [ŚĀKYAŚRĪBHADRA](#) confirmed that the cycle had existed in India. Although no East Asian tradition of Vajrakīlaya exists, some scholars have suggested an identification with Vajrakumāra; tantras concerning this deity were brought to China in the eighth century by [AMOGHAVAJRA](#), but this identification is disputed. Vajrakīlaya is wrathful, with three faces with three eyes each, and six or more hands holding various instruments in addition to the kīla. He is said to dispel obstacles to progress on the path to enlightenment and to the swift attainment of both mundane and supramundane goals.

vajrakula. (T. rdo rje rigs; C. jingang bu; J. kongōbu; K. kŭmgang pu 金剛部). In Sanskrit, “[VAJRA](#) family” or “vajra lineage”; one of the three or five tantric lineages. In the three-lineage (TRIKULA) system, the lineages are the vajra lineage, the lotus lineage ([PADMAKULA](#)), and the buddha lineage ([BUDDHAKULA](#)). This system appears in such works as the [MAHĀVAIROCANĀBHISAMBODHISŪTRA](#) and the [SUSIDDHIKARASŪTRA](#). In the five-lineage ([PAÑCAKULA](#)) system, found in the [GUHYASAMĀJA](#) and other [ANUTTARAYOGATANTRAS](#), the five are the vajra lineage, the lotus lineage, the jewel lineage ([RATNAKULA](#)), the action lineage ([KARMAKULA](#)), and the tathāgata lineage ([TATHĀGATAKULA](#)). The buddha associated with the vajra lineage is [AKSOBHYA](#) or [VAJRASATTVA](#). See also [MAÑJUŚRĪKĪRTI](#); [ŚAMBHALA](#). Each of the five families is associated with one of the five [SKANDHAS](#), five wisdoms ([JÑĀNA](#)), five afflictions ([KLEŚA](#)), five elements, and five colors. For the vajra family, these are the consciousness ([VIJÑĀNA](#)) skandha, the mirrorlike wisdom ([ĀDARŚAJÑĀNA](#)), the affliction of anger, the element water, and the color white.

Vajrapāni. (P. Vajirapāṇi; T. Phyag na rdo rje; C. Jingangshou pusa; J.

Kongōshu bosatsu; K. Kūmgangsu posal 金剛手菩薩). In Sanskrit, “Holder of the [VAJRA](#)”; an important bodhisattva in the [MAHĀYĀNA](#) and [VAJRAYĀNA](#) traditions, who appears in both peaceful and wrathful forms. In the Pāli suttas, he is a [YAKSA](#) (P. yakkha) guardian of the Buddha. It is said that whoever refuses three times to respond to a reasonable question from the Buddha would have his head split into pieces on the spot; carrying out this punishment was Vajrapāṇi’s duty. In such circumstances, Vajrapāṇi, holding his cudgel, would be visible only to the Buddha and to the person who was refusing to answer the question; given the frightening vision, the person would inevitably then respond. Vajrapāṇi is sometimes said to be the wrathful form of [ŚAKRA](#), who promised to offer the Buddha protection if the Buddha would teach the dharma; he thus accompanies the Buddha as a kind of bodyguard on his journeys to distant lands. Vajrapāṇi is commonly depicted in [GANDHĀRA](#) sculpture, flanking the Buddha and holding a cudgel. In the early Mahāyāna sūtras, Vajrapāṇi is referred to as a yakṣa servant of the bodhisattvas, as in the [ASTASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#). In the [SUVARNAPRABHĀSOTTAMASŪTRA](#), he is called the “general of the yakṣas” (yakṣasenādhipati), and is praised as a protector of followers of the Buddha. In the [SADDHARMAPUNĀRĪKASŪTRA](#), [AVALOKITEŚVARA](#) explains that one of the forms that he assumes to convert sentient beings is as Vajrapāṇi. In later Mahāyāna and early tantric Buddhism, Vajrapāṇi becomes a primary speaker in important sūtras and tantras, as well as a principal protagonist in them, and comes to be listed as one of the “eight close sons” (*[UPAPUTRA](#)), the principal bodhisattvas. In the [MAÑJUŚRĪMŪLAKALPA](#), as leader of the vajra family ([VAJRAKULA](#)), he flanks [ŚĀKYAMUNI](#) in the [MANDALA](#). In the [SARVATATHĀGATATATTVASAMGRAHA](#), his transition from “general of the yakṣas” to “the supreme lord of all tathāgatas” is played out through his subjugation of Maheśvara (Śiva). At the command of the buddha [VAIROCANA](#), Vajrapāṇi suppresses all of the worldly divinities of the universe and brings them to the summit of Mount [SUMERU](#), where they seek refuge in the three jewels ([RATNATRAYA](#)). Only Maheśvara refuses to submit to the uddha. Through Vajrapāṇi’s recitation of a [MANTRA](#), Maheśvara loses his life, only to be reincarnated in another world system, where he eventually achieves buddhahood. Vajrapāṇi’s yakṣa origins continue in his wrathful aspects, most common in Tibet, such as the three-eyed Caṇḍa Vajrapāṇi. It is in this form that he is part of a popular triad with Avalokiteśvara and [MAÑJUŚRĪ](#) known as the “protectors of the three families” (T. RIGS GSUM MGON PO). These three bodhisattvas are said to be the physical manifestation of the wisdom (Mañjuśrī),

compassion (Avalokiteśvara), and power (Vajrapāṇi) of all the buddhas. Vajrapāṇi is also said to be the bodhisattva emanation of the buddha [AKSOBHYA](#) and the chief bodhisattva of the vajra family. He himself has numerous forms and emanations, including Mahābāla (who may have developed from his early attendant Vajrapuruṣa), Vajrasattva, Vajradhara, Vajrahūmkāra, Ucchuṣma, Bhūtaḍāmara, and Trailokyavijaya. Vajrapāṇi is closely related especially to [VAJRADHARA](#), and indeed Vajradhara and Vajrapāṇi may have originally been two names for the same deity (the Chinese translations of the two deities' names are the same). Vajrapāṇi's [MANTRA](#) is om vajrapāṇi hūṃ phaṭ. He is also known as Guhyakādhipati, or “Lord of the Secret.” The secret (guhyaka) originally referred to a class of yakṣas that he commanded, but expanded in meaning to include secret knowledge and mantras. Vajrapāṇi is the protector of mantras and those who recite them, and is sometimes identified as the bodhisattva responsible for the collection, recitation, and protection of the [VIDYĀDHARAPITAKA](#).

[vajraparyāṅka](#). (T. rdo rje skyil krung; C. jingang jiafuzuo; J. kongōkafuza; K. kūmgang kabujwa 金剛跏趺坐). In Sanskrit, “[VAJRA](#) posture”; a seated position, often known (mistakenly) as the “lotus posture” in English (see discussion below), in which the left foot rests on the right thigh and the right foot rests on top on the left thigh. The Sanskrit name is said to derive from the stability and indestructibility of the posture, which is like a vajra. [ŚĀKYAMUNI](#) is said to have adopted this posture prior to his enlightenment experience under the [BODHI TREE](#), and images of the historical buddha, as well as other enlightened figures, are commonly depicted in this position. Widely adopted as a basis for the practice of seated meditation throughout the Buddhist world, the vajraparyāṅka is occasionally known simply as the “meditation posture.” It is often confused with the [PADMĀSANA](#) (lotus posture), where the positions of the left and right feet are reversed; this position is predominantly used in Hindu forms of yoga. See also [ĀSANA](#).

[Vajraputra](#). [alt. Vajrīputra] (T. Rdo rje mo'i bu; C. Fasheluofuduoluo; J. Batsujarahotsutara; K. Pōlsarabultara 伐闍羅弗多羅). The Sanskrit name of the eighth of the sixteen [ARHAT](#) elders ([SODĀŚASTHAVIRA](#)), who were charged by the Buddha with protecting his dispensation until the advent of the next buddha, [MAITREYA](#). He resides in Bolanu zhou (the Sanskrit transcription of a region said to translate into Chinese as “reverence”), with 1,100 disciples. In the Chinese tradition, Vajraputra is said to have been a hunter who kept the precept against

killing after he was ordained. Once he attained arhatship, two lion cubs came to him in appreciation for his efforts to stop the killing of animals. Vajraputra constantly brought the two cubs with him wherever he went after that, thus earning the nickname “Laughing Lions Arhat.” Not long after the Buddha’s [PARINIRVĀNA](#), Vajraputra is said to have attended a sermon [ĀNANDA](#) was delivering to some local villagers. As he listened to Ānanda speak, Vajraputra realized that Ānanda was not yet enlightened, and encouraged him to continue with his meditation deep in the forest. This goad was said to have been vital to Ānanda’s spiritual growth. In [CHANYUE GUANXIU](#)’s standard Chinese depiction, Vajraputra is portrayed with aquiline nose and deep-set eyes, sitting on a rock, his upper body bare, with both arms crossing over his left knee, and palms hanging down. He sits leaning slightly to the right, as if reading a sūtra that sits next to him on the rock.

[vajrasamādhī](#). (S). See [VAJROPAMASAMĀDHĪ](#).

[*Vajrasamādhisūtra](#). (S). See [KŪMGANG SAMMAE KYŌNG](#).

[vajrāsana](#). (T. rdo rje gdan; C. jingang zuo; J. kongōza; K. kŭmgangjwa 金剛座). In Sanskrit, “diamond seat,” or “vajra throne.” The term vajrāsana has three main denotations: the seat under the [BODHI TREE](#) where [ŚĀKYAMUNI](#) achieved enlightenment; a synonym for the [VAJRAPARYAṅKA](#) posture; and, especially in Tibetan texts, the designation for the site of Śākyamuni’s enlightenment and hence, more generally, [BODHGAYĀ](#). See [BODHIMANDA](#).

[Vajrasattva](#). (T. Rdo rje sems dpa’; C. Jingang saduo; J. Kongōsatta; K. Kŭmgang sal’ta 金剛薩埵). In Sanskrit, lit. “[VAJRA](#) Being”; a tantric deity widely worshipped as both an [ĀDIBUDDHA](#) and a buddha of purification. Vajrasattva is sometimes identified as a sixth buddha in the [PAÑCATATHĀGATA](#) system, such as in the [SARVATATHĀGATATATTVASAMGRAHA](#), where he is also identical to [VAJRAPĀṆĪ](#). Vajrasattva also occasionally replaces [AKSOBHYA](#) in the same system, and so has been considered an emanation of that buddha. As an ādibuddha, he is identical with [VAJRADHARA](#). He is also one of the sixteen bodhisattvas of the vajradhātumaṇḍala. In the trikula system, an early tantric configuration, Vajrasattva is the buddha of the [VAJRAKULA](#), with [VAIROCANA](#) the buddha of the [TATHĀGATAKULA](#) and Avalokiteśvara the head of the [PADMAKULA](#). East Asian esoteric Buddhism considers Vajrasattva to be the second patriarch of the esoteric teachings; [VAIROCANA](#) taught them directly to Vajrasattva, who

passed them to [NĀGĀRJUNA](#), who passed them to [VAJRABODHI](#)/VAJRAMATI, who taught them to [AMOGHAVAJRA](#), who brought them to China in the eighth century. In Tibet, worship of Vajrasattva is connected to [YOGATANTRA](#) and [ANUTTARAYOGATANTRA](#), such as the twenty-fifth chapter of the *Abhidhanottaratantra*, in which he is known as the Heruka Vajrasattva. He is particularly famous in Tibet for his role in a practice of confession and purification in which one repeats a hundred thousand times the hundred-syllable [MANTRA](#) of Vajrasattva. These repetitions (with the attendant visualization) are a standard preliminary practice (T. [SNGON 'GRO](#)) required prior to receiving tantric instructions. The mantra is: om vajrasattva samayam anupālaya vajrasattva tvenopatiṣṭha dr̥dho me bhava sutoṣyo me bhava supoṣyo me bhava anurakto me bhava sarvasiddhiṃ me prayaccha sarvakarmasu ca me cittam śreyah kuru hūṃ ha ha ha ha hoḥ bhagavan sarvatathāgatavajra mā me muñca vajrī bhava mahāsamayasattva āḥ hūṃ. Unlike many mantras that seem to have no semantic meaning, Vajrasattva's mantra may be translated as: “Om Vajrasattva, keep your pledge. Vajrasattva, reside in me. Make me firm. Make me satisfied. Fulfill me. Make me compassionate. Grant me all powers. Make my mind virtuous in all deeds. hūṃ ha ha ha ha ho. All the blessed tathāgatas, do not abandon me, make me indivisible. Great pledge being. āḥ hūṃ.”

***[Vajraśekharasūtra](#)**. (T. Rdo rje rtse mo; C. Jingangding jing; J. Kongōchōkyō; K. Kūmgangjōng kyōng 金剛頂經). In Sanskrit, “Sūtra on Vajra Peak”; also called the *Vajraśekharatantra*, the reconstructed Sanskrit title derived from the Chinese translations of the first chapter of the [SARVATATHĀGATATATTVASAMGRAHA](#) made by [VAJRABODHI](#) and [AMOGHAVAJRA](#) during the Tang dynasty. The full text of the *Sarvatathāgatatattvasaṃgraha* was not translated into Chinese until Dānapāla completed his version in 1015 CE. In addition to these translations, a number of associated ritual manuals and commentaries containing the title “Vajraśekhara” are included in the Chinese Buddhist canon. The *Vajraśekhara* refers to a composite text of eighteen individual scriptures in a hundred thousand stanzas said to have been lost before it reached China. Based in part on a summary of the individual sūtras and tantras comprising the text that Amoghavajra composed, some scholars have speculated that the complete *Vajraśekhara*, in whatever form it originally took, represented the first esoteric Buddhist canon, beginning with the *Sarvatathāgatatattvasaṃgraha* and including the [GUHYASAMĀJATANTRA](#), among other works. Other scholars have questioned the claim that the text ever existed at all. The *Vajraśekhara* is one of two (or three) central texts in the

esoteric tradition ([MIKKYŌ](#)) of Japan. In Tibet, the title *Vajrasēkaratantra* (*Rgyud rdo rje rtse mo*) is the name of an explanatory yoga tantra connected to the *Sarvatathāgatattvasaṃgraha*, which is used as a major source in Tibetan delineations of the tantric vows.

[Vajravārāhī](#). (T. Rdo rje phag mo). One of the most common forms of [VAJRAYOGINĪ](#), an important female tantric deity associated especially with the [CAKRASAMVARATANTRA](#) of the [ANUTTARAYOGATANTRA](#) class, popular in all sects of Tibetan Buddhism, where she is a consort of the central deity. Vārāhī means sow, referring to the goddess’s characteristic porcine head protruding from the right side of her face. She likely derives from the Hindu goddess Vārāhī, depicted with a head of a boar; she is the counterpart of Vārāha, the incarnation of Viṣṇu who took the form of a boar. In the case of Vajravārāhī, she is typically (although not invariably) depicted with a human face but with a boar’s head (sometimes quite small) visible on the right side of her face, contributing in part to her wrathful aspect. She is usually depicted as red in color, naked in a dancing pose, standing on the body of Bhairava. She holds a cleaver in her right hand and skull cup in her left, and is adorned with a garland of fifty severed heads. Beginning perhaps as one of a number of wrathful [YOGINĪ](#)s situated as protectors on the outer circles of the [MANDALA](#), she moved toward the center as one of the consorts of the central deity in the [HEVAJRATANTRA](#) and became the main consort of [HERUKA](#) in the Cakrasaṃvara cycle, where she also appears without a consort as the “sole heroine” (*ekavirā*) in the center of the maṇḍala.

[Vajravidāraṇadhāraṇī](#). (T. Rdo rje rnam par ’joms pa shes bya ba’i gzungs; C. Rangxiang jingang tuoluoni jing; J. Kongō saisai darani/Esō kongō daranikyō; K. Kūṃgang ch’oeswae tarani/Yangsang kūṃgang tarani kyōng 金剛摧碎陀羅尼/壞相金剛陀羅尼經). Lit., “Dhāraṇī of the Adamantine Pulverizer”; a [DHĀRANĪ](#) scripture probably composed sometime between the late-seventh and early-eighth centuries, which enjoyed great popularity in India and Tibet. There are two late Chinese translations, one by Maitrībhadra (C. Cixian, fl. tenth century), the other by the central Asian monk Shaluoba (1259–1314). There are a few Tibetan commentaries on the text attributed to such Indian tantric Buddhist masters who went to Tibet as [ŚĀNTARAKSITA](#) (725–788), Buddhaguhya (fl. eighth century), and [PADMASAMBHAVA](#) (fl. eighth century). The text states that [VAJRAPĀNĪ](#)’s wrathful form strikes fear into all sentient beings, which stops them from performing evil actions, destroys their ignorance and defilements, and

protects them from any suffering. The text also lists various other practical benefits that accrue from reciting it, such as curing illness, longevity, and good fortune, and recommends reciting it between twenty-one and a hundred times. Due to its popularity, the *Vajravidāraṇadhāraṇī* itself became deified, and Vajravidāraṇa was worshipped as one of the manifestations of Vajrapāṇi.

vajrayāna. (T. rdo rje theg pa; C. jingang sheng; J. kongōjō; K. kŭmgang sŭng 金剛乘). In Sanskrit, “adamantine vehicle” or “thunderbolt vehicle”; a general term used to refer to tantric Buddhism, especially in distinction to [HĪNAYĀNA](#) and [MAHĀYĀNA](#). The vajrayāna, however, is considered by its adherents to be not a separate vehicle but a form of the Mahāyāna; such adherents would speak instead of the three vehicles ([TRĪYĀNA](#)) of hīnayāna, [PĀRAMITĀYĀNA](#), and vajrayāna, with the latter two referring respectively to an exoteric and an esoteric path by which the bodhisattva achieves buddhahood, with the pāramitāyāna set forth in the Mahāyāna sūtras and the vajrayāna set forth in the tantras. Traditional etymologies of the term typically evoke the [VAJRA](#) to refer to the unbreakable and indivisible quality of two factors, typically method ([UPĀYA](#)) and wisdom ([PRAJÑĀ](#)). See [TANTRA](#).

vajrayoga. (T. rdo rje rnal 'byor). In Sanskrit, “adamantine yoga”; a system of yogic practice associated with the [KĀLACAKRATANTRA](#), as transmitted in Tibet by Gyi jo Lo tsā ba Zla ba'i 'od-zer, the tantra's earliest translator, during the eleventh century. It is counted as one of the “eight conveyances that are lineages of achievement” (sgrub brgyud shing rta chen po brgyad).

Vajrayoginī. (T. Rdo rje rnal 'byor ma). The most important of the [DĀKINĪ](#) in the [VAJRAYĀNA](#), associated especially with the “mother tantras” ([MĀTRĪTANTRA](#)) of the [ANUTTARAYOGA](#) class. She is also the most important of the female [YI DAM](#). Her visualization is central to many tantric [SĀDHANAS](#), especially in the practice of [GURUYOGA](#), in which the meditator imagines himself or herself in the form of Vajrayoginī in order to receive the blessings of the [GURU](#). She is also visualized in [GCOD](#) and GTUM MO practice. Her worship seems to originate with the [CAKRASAMVARATANTRA](#) and is popular in all sects of Tibetan Buddhism. Vajrayoginī plays a special role in the “six yogas of [NĀROPA](#)” ([NĀ RO CHOS DRUG](#)), where she is known as Nā ro mkha' spyod ma (Kachōma). She is closely associated with [VAJRAVĀRĀHĪ](#), the consort of [CAKRASAMVARA](#). In her most common form, she stands in the [ĀLĪDHA](#) posture, holding a [KATVĀNGA](#) and a skull cup.

vajropamasamādhi. (T. rdo rje lta bu'i ting nge 'dzin; C. jingang yu ding/jingang sanmei; J. kongōyujō/kongōzanmai/kongōsanmai; K. kūmgang yu chōng/kūmgang sammae 金剛喻定/金剛三昧). In Sanskrit, “adamantine-like concentration,” sometimes called simply the “adamantine concentration” ([VAJRASAMĀDHI](#)); a crucial stage in both [SARVĀSTIVĀDA ABHIDHARMA](#) and [MAHĀYĀNA](#) presentations of the path ([MĀRGA](#)). The experience of vajropamasamādhi initiates the “path of completion” ([NISTHĀMĀRGA](#)) or the “path where no further training is necessary” ([AŚAIKSAMĀRGA](#)), the fifth and final stage of the five-path schema ([PAÑCAMĀRGA](#)). The arising of this concentration initiates a process of abandonment ([PRAHĀNA](#)), which ultimately leads to the permanent destruction of even the subtlest and most persistent of the ten fetters ([SAMYOJANA](#)), resulting in the “knowledge of cessation” ([KSAYAJÑĀNA](#)) and, in some presentations, an accompanying “knowledge of nonproduction” ([ANUTPĀDAJÑĀNA](#)), viz., the knowledges that the fetters are destroyed and can never again recur. At that point, depending on the path that has been followed, the meditator becomes an [ARHAT](#) or a buddha. Because it is able to destroy the very worst of the fetters, this concentration is said to be “like adamant” (vajropama). The vajropamasamādhi thus involves both an “uninterrupted path” ([ĀNANTARYAMĀRGA](#)) and a path of liberation ([VIMUKTIMĀRGA](#)) and serves as the crucial transition point in completing the path and freeing oneself from [SAMSĀRA](#). In the [MAHĀPARNIRVĀNASŪTRA](#), this special type of concentration is closely associated with seeing the buddha-nature ([BUDDHADHĀTU](#); [FOXING](#)) and achieving the complete, perfect enlightenment ([ANUTTARASAMYAKSAMBOODHI](#)) of the buddhas.

Vakkali. (S. *Vālkali?; C. Pojiali; J. Bakari; K. Pagari 婆迦梨). Pāli proper name of an eminent [ARHAT](#) declared by the Buddha to be foremost among his monk disciples who who aspire through faith ([ŚRADDHĀDHIMUKTA](#), P. saddhādhimutta). According to the Pāli account, he was a learned brāhmaṇa from Sāvatti (S. [ŚRĀVASTI](#)) who became a devoted follower of the Buddha from the very moment he saw him. Because of his extraordinary faith-cum-affection, Vakkali was so enraptured by the Buddha that he used to follow him around. He took ordination so that he could always remain close to the Buddha; when he was not in the Buddha’s presence, he spent his time thinking about him. The Buddha admonished him not to be infatuated with the corruptible body of the Buddha, stating that he who sees the dharma, sees the Buddha. Vakkali could not be

dissuaded, however, and finally the Buddha ordered him out of his presence, in an attempt to shock (saṃvega) Vakkali into awakening. Accounts differ as to what happened next. According to one story, Vakkali was greatly saddened and resolved to hurl himself from the top of Vulture Peak ([GRDHRAKŪTA](#)). Knowing this, the Buddha appeared to him and recited a stanza. Filled with joy, Vakkali rose into the air and attained arhatship. In another account, Vakkali retired to Vulture Peak to practice meditation but fell ill from his arduous, but ultimately unsuccessful, efforts. The Buddha visited him to encourage him, and Vakkali finally attained arhatship. The best-known account states that Vakkali fell ill on his way to visit the Buddha. The Buddha told Vakkali that he was assured of liberation and that there was therefore nothing for him to regret. The Buddha departed and proceeded to Vulture Peak, while Vakkali made his way to Kālasīla. At Vulture Peak, the divinities informed the Buddha that Vakkali was about to pass away. The Buddha sent a message telling him not to fear. Vakkali responded that he had no desire for the body or the aggregates, and committed suicide with a knife. When the Buddha saw his body, he declared that Vakkali had attained [NIRVĀNA](#) and had escaped [MĀRA](#)'s grasp. The commentary to the last account remarks that, at the moment of his suicide, Vakkali was in fact deluded in thinking he was already an [ARHAT](#), hence his evil intention of killing himself. Even so, the pain of the blade so shocked his mind that in the moments just before his death he put forth the effort necessary to attain arhatship. See also [ŚRADDHĀ](#).

[vākkarman](#). (P. vacīkamma; T. ngag gi las; C. yuye; J. gogō; K. ōp 語業). In Sanskrit, lit. “verbal action”; verbal deeds that create wholesome or unwholesome effects in the future. Speech (vāk) is one of the three conduits or “doors” ([TRIDVĀRA](#)) through which action ([KARMAN](#)) occurs, along with the body ([KĀYA](#)) and the mind ([CITTA](#)). According to the [ABHIDHARMA](#), physical actions, words, and thoughts are all capable of producing karman that is either virtuous ([KUŚALA](#)) or unvirtuous ([AKUŚALA](#)). Unvirtuous verbal deeds include lying, divisive speech, harsh speech, and senseless speech. Virtuous verbal deeds include speaking truthfully, speaking harmoniously, speaking kindly, and speaking sensibly.

[Vakula](#). (S). See [BAKKULA](#).

[Valabhī](#). [alt. Vallabhī]. Sanskrit name of a city in western India (in the modern state of Gujarat) that flourished under the Maitraka kings (475–775) and was the

site of an important Buddhist monastery. Said to rival [NĀLANDĀ](#) in fame, Valabhī was known especially as a center of [ŚRĀVAKAYĀNA](#) learning, with each of the [MAINSTREAM BUDDHIST SCHOOLS](#) represented. However, the [MAHĀYĀNA](#) was also taught there, as were Brahmanical and secular subjects. Two important figures of the [YOGĀCĀRA](#) school, [GUNAMATI](#) and [STHIRAMATI](#), were said to have held prominent positions at Valabhī before they proceeded to Nālandā. In the late seventh century, [XUANZANG](#) found approximately six thousand monks residing there in about a hundred monastic buildings.

[vālavyajana](#). (P. vījanī; T. rlung yab; C. fuzi; J. hossu; K. pulcha 拂子). In Sanskrit, “fly whisk” or “chowrie”; a yak-tail fan that Buddhist monks used to keep flies and mosquitoes away, also called a cāmara. The chowrie is presumed to have originally been used among adherents of the [JAINA](#) tradition to shoo away flies without injuring them, and it came to be used widely throughout India. In the Chinese [CHAN](#) tradition, the fly whisk (which in East Asia is usually made from a horse tail) became a symbol of the office or privilege of a Chan master and is one of the accoutrements he traditionally holds in formal portraits. “Taking up the fly whisk” ([BINGFU](#)) is, by metonymy, a term used to refer to a formal Chan sermon delivered by a master. See also [FUZI](#).

[Vallabhī](#). See [VALABHĪ](#).

[Vallée Poussin, Louis de la](#). See [LA VALLÉE POUSSIN, LOUIS DE](#).

[Vammikasutta](#). (C. Yiyu jing; J. Giyukyō; K. Ŭiyu kyōng 蟻喻經). In Pāli, the “Anthill” or “Termite Mound Discourse,” the twenty-third sutta ([SŪTRA](#)) contained in the [MAJJHIMANIKĀYA](#) (two separate [SARVĀSTIVĀDA](#) recensions appear in the Chinese translation of the [SAMYUKTĀGAMA](#), as well as an unidentified recension in the Chinese translation of the [EKOTTARĀGAMA](#)); preached by the Buddha at Sāvattī (S. [ŚRĀVASTĪ](#)) in connection with a riddle presented to him by the monk Kumāra-Kassapa (S. [KUMĀRA-KĀŚYAPA](#)). Kumāra-Kassapa had been approached by a divinity ([DEVA](#)), who gave him a riddle comprising fifteen questions that he asked to be delivered to the Buddha for solution. The Buddha solved the riddle, identifying its cryptic elements as symbols and metaphors for points of Buddhist doctrine. The first riddle concerned an anthill that gave off fumes during the night and flames during the day. The anthill represents the body with its apertures. The flames it gives off during the day are bodily actions, while its fumes at night are the thoughts and

worries about the day's activities that disturb one in the evening.

vamsa. In Pāli, lit. “lineage,” but generally referring to a semi-historical “chronicle”; an important genre of Pāli literature that typically recounts the life of the Buddha, the establishment of the saṅgha (S. [SAMGHA](#)), and the first Buddhist council ([SAMGĪTI](#); see [COUNCIL, FIRST](#)) after the Buddha's death. Depending upon the particular purpose of the chronicle, the work will then go on to describe such things as the transmission of the dharma to a particular place, the founding of a monastery, the tracing of a monastic lineage back to the first council, the enshrinement of a relic, and/or the patronage of the saṅgha by a pious king. The most famous Sinhalese chronicles include the [MAHĀVAMSA](#), or “Great Chronicle” (which has been periodically augmented since the fifth century); the [DĪPAVAMSA](#), or “Chronicle of the Island (of Sri Lanka)”; and the [THŪPAVAMSA](#), or “Chronicle of the [STŪPA](#).” Other important examples of the genre are the Thai [JINAKĀLAMĀLĪ](#) (“Garland of the Epochs of the Conqueror”) and the Burmese [SĀSANAVAMSA](#) (“Chronicle of the Dispensation”).

Vamśa. (S). See [VATSAGOTRA](#).

Vanapatthasutta. (C. Lin jing; J. Ringyō; K. Im kyōng 林經). In Pāli, the “Discourse on Forest Dwelling”; the seventeenth sutta in the [MAJJHIMANIKĀYA](#) (a separate [SARVĀSTIVĀDA](#) recension appears as [SŪTRA](#) nos. 107–108 in the Chinese translation of the [MADHYAMĀGAMA](#)); preached by the Buddha to a gathering of monks in the [JETAVANA](#) grove in the town of Sāvatti (S. [ŚRĀVASTĪ](#)). The Buddha describes the suitable conditions for a monk to practice meditation. Should he find a place suitable for neither material support (e.g., alms food, robes, lodgings) nor meditation practice, he should abandon that place. Should he find a place suitable for material support but not practice, he should abandon that place also. Should he find a place suitable for meditation practice but not for support, he should remain there. Should he find a place suitable for material support and meditation practice, he should take up lifelong residence there.

Vanavāsi. One of nine adjacent lands (paccantadesa) converted to Buddhism by missionaries dispatched by the elder [MOGGALIPUTTATIṢṢA](#) at the end of the third Buddhist council ([SAMGĪTI](#); see [COUNCIL, THIRD](#)) held in Pāṭaliputta (S. [PĀTALIPUTRA](#)) during the reign of [AŚOKA](#) in the third century BCE. Vanavāsi is located in south India and was converted by the elder Rakkhita, who preached the *Anamatagga-Saṃyutta* while floating in the air. The third Buddhist council at

Pāṭaliputta and the nine Buddhist missions are known only in Pāli sources and are first recorded in the c. fourth-century [DĪPAVAMSA](#).

[Vanavāsin](#). (P. Vanavāsī; T. Nags na gnas; C. Fanaposi zunzhe; J. Batsunabashi sonja; K. Pöllabasa chonja 伐那婆斯尊者). Sanskrit proper name of the fourteenth of the sixteen [ARHAT](#) elders ([SODĀŚASTHAVIRA](#)), who were charged by the Buddha with protecting his dispensation until the advent of the next buddha, [MAITREYA](#). He abides on Habitable Mountain (C. Kezhushan) with 1,400 disciples. In the Chinese tradition, he was said to have been born during a heavy downpour, which made a racket as the raindrops hit the plantain leaves. After ordaining, he also often diligently studied under the plantain trees, thus earning him the nickname “Plantain Arhat” (Bajiao Luohan). In [CHANYUE GUANXIU](#)’s standard Chinese depiction, Vanavāsin sits in meditation in a cave, with his eyes closed, wearing a robe across his shoulders with both hands hidden in the sleeves. East Asian images also portray him seated next to a vase, his hands together in [AÑJALIMUDRĀ](#). In Tibetan iconography, he holds a chowrie ([VĀLAVYAJANA](#)).

[Vāṅgīśa](#). [alt. Vāgīśa] (P. Vaṅgīśa; T. Ngag dbang; C. Poqishe; J. Bagisha; K. Pagisa 婆耆舍). Sanskrit proper name of an eminent [ARHAT](#) declared by the Buddha to be foremost among his monk disciples in eloquent expression ([PRATIBHĀNA](#)). According to Pāli sources, he was a learned brāhmaṇa proficient in the Vedas who became renowned for his ability to determine the destiny of the deceased by tapping his fingers on their skulls. Vaṅgīśa was much sought after and earned a great deal of money for his prognostications. One day he encountered Sāriputta (S. [ŚĀRIPUTRA](#)), who spoke to him of the Buddha’s qualities. Intrigued, Vaṅgīśa resolved to meet the Buddha, much to the consternation of his associates. Knowing of Vaṅgīśa’s fame as a prognosticator, the Buddha gave him the skull of an [ARHAT](#) and asked him to determine the dead saint’s rebirth. Vaṅgīśa was unable to determine the deceased’s whereabouts and, determined to discover the secret, joined the order as a monk. His preceptor was Nigrodhakappa. When his preceptor died, Vaṅgīśa asked the Buddha about his destiny, to which the Buddha replied that Nigrodhakappa had entirely passed away. Vaṅgīśa had been filled with doubt, for he knew that his preceptor had died with his hands curled up, which was not characteristic of an arhat; but in the case of Nigrodhakappa, this was due only to force of habit. Vaṅgīśa attained arhatship by contemplating the thirty-two impure parts of the body. Upon attaining his goal, he went to the Buddha and sang his praises in eloquent verse.

From that time onward he became known as an exceptionally skilled poet, and for that won preeminence as foremost in eloquent expression (pratibhāna). There are several verses ascribed to him in the *Vaṅgīsa-Saṃyutta* of the [SAMYUTTANIKĀYA](#) and in the [THERAGĀTHĀ](#) (“Verses of the Elders”): the verses describe his inner struggle against such obstacles as sensuality and conceit, as well as his praise of the Buddha and such eminent disciples as Śāriputra and [MAHĀMUDGALYAYANA](#). According to the [APADĀNA](#), a collection of biographical stories in the Pāli canon, he was given the name Vaṅgīsa because he was born in Vaṅga (modern Bengal) and also because he was a master (P. *isi*; S. *ṛṣi*) of the word (vacana).

[Van Hanh](#). (萬行) (d. 1025). An influential monk during the Vietnamese Ly dynasty (1010–1225); his family name was Nguyễn. Vạn Hạnh was a native of Cổ Pháp Village, Thiên Đức Prefecture, in northern Vietnam. The [THIÊN UYỂN TẬP ANH](#) reports that at the age of twenty-one, he left home to become a monk and served the monk Thiên Ông of Lục Tổ monastery. After Thiên Ông passed away, Vạn Hạnh devoted himself to the practice of [DHĀRANĪ](#) (spells or mnemonic codes) and [SAMĀDHI](#). King Lê Đại Hành (r. 980–1005), founder of the Former Lê dynasty (980–1009), greatly revered him and relied on his prophecies in political and diplomatic matters. When Lê Ngọa Triều (r. 1005–1009), the last king of the Lê dynasty, appeared to be a cruel tyrant, Vạn Hạnh masterminded the overthrow of the latter and helped Lý Công Uẩn ascend the throne to establish the Lý dynasty (1010–1225). Vạn Hạnh remains the most beloved eminent monk among modern Vietnamese Buddhists. In his honor, in 1964, the first nonmonastic Buddhist university was established in Saigon and named after him. Vạn Hạnh University was the first Vietnamese university to be established following the model of an American liberal arts college.

[varadamudrā](#). (T. mchog sbyin gyi phyag rgya; C. shiyuan yin; J. segan'in; K. siwŏn in 施願印). In Sanskrit, “gesture of generosity” or “gesture of granting boons”; a [MUDRĀ](#) usually formed with the right hand and commonly found in the iconography of peaceful deities. The varadamudrā is formed with the palm held outward with the fingers outstretched and pointing down. Occasionally, the thumb and index finger may touch lightly, forming a circle.

[vargacārin](#). (T. tshogs spyod; C. buxing; J. bugyō; K. puhaeng 部行). In Sanskrit, lit. “congregator”; one of the two types of [PRATYEKABUDDHAS](#), together with [KHADGAVISĀNAKALPA](#). Although pratyekabuddhas are renowned for living

“solitary like a rhinoceros [horn]” (as indicated by the term *khadgaviṣāṇakalpa*), congregating *pratyekabuddhas* instead reside together with others in a community. Like all *pratyekabuddhas*, it is said that this type achieves enlightenment without relying on a teacher in their last lifetime, does not teach the *dharma*, and appears in the world only during a period when there is no *buddha*.

varsā. [alt. *varṣa*, *vārṣika*] (P. *vassa*; T. *dbyar gnas*; C. *anju*; J. *ango*; K. *an'gō* 安居). In Sanskrit, “rains” and, by extension, “rains retreat”; a three-month period generally beginning the day after the full-moon day of the eighth lunar month (usually July) and concluding on the full moon of the eleventh lunar month (usually October), during which time monks are required to remain in residence in one place. According to tradition, the Buddha instructed monks to cease their peregrinations during the torrential monsoon period in order to prevent the killing of insects and worms while walking on muddy roads. However, the practice of observing a rains retreat was likely adopted from other mendicant **ŚRAMANA** sects in ancient India at the time of the Buddha. The residences established for use during the rains retreat are called *varṣāvāsa* or “rains abode,” and the institution of the rains retreat (and the consequent need for more permanent shelter) probably led to the development of formal monasteries (**VIHĀRA**). During this three-month period, monks are expected to continue their studies and practice. They are not permitted to leave their monasteries except for essential tasks, and then for no more than seven nights. Occasions that permit the monk to be temporarily absent from his monastery include urgent personal matters, such as illness or death of one’s parents; an invitation to preach the *dharma*; or the donation of a **VIHĀRA** or land or other property to the **SAMGHA** or an individual monk. If for any reason the residence requirement is not kept, the monk is not eligible to receive a robe donation (**KATHINA**) at the end of the rains retreat. The *varsā* is an important chronological marker, with monastic seniority measured by the number of rain retreats one has completed. In Thailand, where it is customary for all males to be ordained as novices for at least a brief period of their lives, the three months of the rains retreat is often chosen as a particularly auspicious time to undertake this commitment. The end of the retreat is marked by the *kaṭhina*, or “cloth” ceremony, in which laypeople present gifts to the monks, including cloth for new robes.

vāsanā. (T. *bag chags*; C. *xunxi/xiqi*; J. *kunjū/jikke*; K. *hunsŭp/sŭpki* 薰習/習氣).

In Sanskrit, literally, “perfumings,” hence “predispositions,” “habituations,” “latent tendencies,” or “residual impressions” (and sometimes seen translated overliterally from the Chinese as “habit energies”); subtle tendencies created in the mind as a result of repeated exposure to positive or negative objects. Vāsanā are described as subtle forms of the afflictions ([KLEŚA](#)), which hinder the attainment of buddhahood. According to the [DAZHIDU LUN](#) (**Mahāprajñāpāramitāsāstra*), [ARHATS](#) remain subject to the influence of the vāsanā—for example, [ŚARIPUTRA](#)’s anger and [NANDA](#)’s staring at beautiful women—just as the scent of incense remains behind in a censer even after all the incense has burned away. Thus, only the buddhas have removed all such latent tendencies. In the [YOGĀCĀRA](#) system, the vāsanā “perfume” the “seeds” ([BĪJA](#)) of wholesome and unwholesome actions that are implanted in the storehouse consciousness ([ĀLAYAVIJÑĀNA](#)). The [CHENG WEISHI LUN](#) (**Vijñaptimātratāsiddhi*) lists the following three types of vāsanā: (1) linguistic predispositions (C. mingyan xiqi), the impressions created by concepts and expressions through which one evaluates his experience; (2) grasping-at-self predispositions (C. wozhi xiqi), impressions fostered by grasping at false notions of a perduring self ([ĀTMAGRĀHA](#)), which create an attachment to I and mine; and (3) cause-of-existence predispositions (C. youzhi xiqi), impressions that engender wholesome and unwholesome karmic retributions, which lead to continued rebirth in [SAMSĀRA](#).

[vaśīkaraṇa](#). (T. dbang du bya ba/dbang po’i las). In Sanskrit, “controlling”; also called bhāgyacāra, “activities of control”; one of the four types of activities ([CATURKARMA](#)) set forth in the Buddhist tantras. The other three are activities of increase ([PAUSTIKA](#)) to increase prosperity, lengthen life, etc.; pacifying activities ([ŚĀNTIKA](#)) that purify the negativity that appears in such forms as hindrances and illness; and violent or drastic measures ([ABHICĀRA](#)) such as killing and warfare. Vaśīkaraṇa may be through physical force, but is more often done through [MANTRAS](#) or ritual; it brings control and influence over persons and situations.

[vaśitā](#). (T. dbang bo; C. zizai; J. jizai; K. chajae 自在). In Sanskrit, “mastery,” or “autonomy”; a list of ten types of mastery or autonomy developed by a [BODHISATTVA](#), viz., of one’s life span, action ([KARMA](#)), necessities of life, determination, aspiration, magical powers, birth, dharma, mind, and wisdom.

[Vāspa](#). (P. Vappa; T. Rlangs pa; C. Pofu; J. Bafu; K. Pabu 婆敷). Sanskrit proper name of one of the monks who belonged to the so-called group of five

([PAÑCAVARGIKA](#); [BHADRAVARGĪYA](#))—viz., [KAUNDINYA](#) [alt. Ājñāta-Kauṇḍiya], [AŚVAJIT](#), [VĀSPA](#), [MAHĀNĀMAN](#), and [BHADRIKA](#)—who were converted by the Buddha at the Deer Park ([MRGADĀVA](#)) in [SĀRNĀTH](#). When the sage [ASITA](#) predicted that the infant bodhisattva, [SIDDHĀRTHA GAUTAMA](#), would one day become a buddha, Vāspa and four other brāhmaṇas headed by Kauṇḍinya became ascetics in anticipation of Siddhārtha’s own renunciation. They practiced austerities with him for six years until Siddhārtha renounced asceticism. Dismayed with what they regarded as his backsliding, the five ascetics left him and took up residence in the Deer Park at [RSIPATANA](#). After his enlightenment, the Buddha went there and preached to the five ascetics, and each of them attained enlightenment. The Pāli canon describes their enlightenment as proceeding in two stages: first, when the Buddha preached the [DHAMMACAKKAPPAVATTANASUTTA](#) (S. [DHARMACAKRAPRAVARTANASŪTRA](#)) (“Discourse Setting in Motion the Wheel of the Dharma”), Kauṇḍinya became a stream-enterer ([SROTAĀPANNA](#)) and in the subsequent days the other four did as well; and second, when the Buddha preached the ([ANATTALAKKHANASUTTA](#); S. **Anātmalakṣaṇasūtra*) (“Discourse on the Mark of Nonself”), they all attained complete liberation as [ARHATS](#).

[vastujñāna](#). (T. gzhi shes; C. yiqiexiang zhi; J. issaisōchi; K. ilch’esang chi 一切相智). In Sanskrit, “knowledge of bases” ([VASTU](#)), in the [PRAJÑĀPĀRAMITĀ](#) literature, referring to knowledge that the bases ([SKANDHA](#), [ĀYATANA](#), [DHĀTU](#), etc.) described in mainstream Buddhist sources lack any semblance of a personal self. It is one of the three knowledges (along with [SARVĀKĀRAJÑATĀ](#) and [MĀRGAJÑATĀ](#)) set forth in the [ABHISAMAYĀLAMKĀRA](#), a commentary on the [PAÑCAVIMŚATISĀHASRIKĀPRAJÑĀPĀRAMITĀSŪTRA](#) that describe the [MAHĀYĀNA](#) path and result. In the *Abhisamayālamkāra*, the vastujñāna is more commonly called just [SARVAJÑATĀ](#) (“all-knowledge”). When it is not informed by skillful means ([UPĀYA](#)), that is, great compassion ([MAHĀKARUNĀ](#)), it is understood negatively as the practice of a [ŚRĀVAKA](#) or [PRATYEKABUDDHA](#) that leads to their inferior goal of [NIRVĀNA](#) and must be forsaken. When it is informed by skillful means, it is an essential component both of the practice of a bodhisattva (*mārgajñatā*), and of a buddha’s knowledge (*sarvākārajñatā*). As an authentic knowledge of nonself gained through a direct understanding of the four noble truths, it is possessed by those who have reached the path of vision ([DARŚANAMĀRGA](#)).

Vasubandhu. (T. Dbyig gnyen; C. Shiqin; J. Seshin; K. Sech'in 世親) (fl. c. fourth or fifth centuries CE). One of the most influential authors in the history of Buddhism, and the only major figure to make significant contributions to both the [MAINSTREAM BUDDHIST SCHOOLS](#) and [MAHĀYĀNA](#). In Tibetan Buddhism, Vasubandhu is counted as one of the “six ornaments” (T. rgyan drug), along with [NĀGĀRJUNA](#), [ĀRYADEVĀ](#), [ASAṄGA](#), [DIGNĀGA](#), and [DHARMAKĪRTI](#). There has been considerable speculation about his dates, so much so that [ERICH FRAUWALLNER](#) proposed that there were two different Vasubandhus. This theory has been rejected, but there is still no consensus on his dates, with most scholars placing him in the fourth or fifth century CE. Vasubandhu is said to have been born in Puruṣapura in [GANDHĀRA](#) (identified with Peshawar in modern Pakistan), as the brother or half brother (with the same mother) of Asaṅga. He was ordained as a monk in a [SARVĀSTIVĀDA](#) school and studied [VAIBHĀSIKA ABHIDHARMA](#) philosophy in [KASHMIR–GANDHĀRA](#), as well as the tenets of the rival [SAUTRĀNTIKA](#) school. At the conclusion of his studies, he composed his first and what would be his most famous work, the *Abhidharmakośa*, or “Treasury of the Abhidharma.” In over six hundred stanzas in nine chapters, he set forth the major points of the Vaibhāṣika system. He then composed a prose autocommentary, the [ABHIDHARMAKOŚABHĀSYA](#), in which he critiqued from a Sautrāntika perspective some of the Vaibhāṣika positions that he had outlined in the verses. These two texts would become two of the most influential texts on the abhidharma in the later history of Buddhism on the subcontinent and beyond, serving, for example, as the root texts for abhidharma studies in Tibet and as the foundational text for the Kusha (Kośa) school of early Japanese Buddhism. At some point after his composition of the *Kośa*, he encountered his half brother Asaṅga, author of at least some of the texts collected in the [YOGĀCĀRABHŪMI](#), who “converted” him to the Mahāyāna. After his conversion, Vasubandhu became a prolific author on Mahāyāna materials, helping especially to frame the philosophy of the Yogācāra school. Major works attributed to him include the [VIMŚATIĀ](#), or “Twenty [Stanzas]” and the [TRIMŚIKĀ](#), or “Thirty [Stanzas],” two works that set forth succinctly the basic philosophical positions of the Yogācāra. The *Triṃśikā* was, together with [DHARMAPĀLA](#)’s commentary to the text, the basis of [XUANZANG](#)’s massive commentary, the [CHENG WEISHI LUN](#) (**Vijñaptimātratāsiddhi*), which was the foundational text for the [FAXIANG ZONG](#) of East Asian Yogācāra. In his [TRISVABHĀVANIRDEŚĀ](#), Vasubandhu also set forth the central doctrine of the Yogācāra, the “three natures” ([TRISVABHĀVA](#)), of imaginary ([PARIKALPITA](#)), dependent ([PARATANTRA](#)), and consummate

([PARINISPANNA](#)). His [VYĀKHYĀYUKTI](#) set forth principles for the exegesis of passages from the sūtras. He is also credited with commentaries on a number of Mahāyāna sūtras, including the [AKṢAYAMATINIRDEŚĀ](#), the [SADDHARMAPUNĀRĪKASŪTRA](#), and the [DAŚABHŪMIKASŪTRA](#) (with his commentary serving as the basis of the [DI LUN ZONG](#) in China), as well as commentaries on three of the five treatises of [MAITREYA](#), the [MAHĀYĀNASŪTRĀLAMKĀRA](#), the [MADHYĀNTAVIBHĀGA](#), and the [DHARMADHARMATĀVIBHĀGA](#). He also wrote a commentary on Asaṅga's [MAHĀYĀNASAMGRAHA](#). His [KARMASIDDHIPRAKARANA](#), or “Investigation Establishing [the Correct Understanding] of [KARMA](#),” examines the theory of action in light of the Yogācāra doctrine of the [ĀLAYAVIJÑĀNA](#). The [PAÑCASKANDHAPRAKARANA](#), or “Explanation of the Five Aggregates,” presents a somewhat different view of the five aggregates ([SKANDHA](#)) than that found in his *Abhidharmakośabhāṣya* and thus probably dates from his Mahāyāna period; it is a reworking of the presentation of the five aggregates found in Asaṅga's [ABHIDHARMASAMUCCAYA](#). In addition to the *Abhidharmakośabhāṣya* and the *Viṃśatikā*, a third text of his was highly influential in East Asia. It is a commentary on the larger [SUKHĀVATĪVYŪHA](#), whose Sanskrit title might be reconstructed as the **Sukhāvātīvyūhopadeśa*. However, the work is known only in Chinese, as the [JINGTU LUN](#), and its attribution to Vasubandhu has been called into question. Nonetheless, based on this traditional attribution, Vasubandhu is counted as an Indian patriarch of the [PURE LAND](#) schools of East Asia. ¶ In Tibet, a *brhātīkā* commentary on the [ŚATASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#) and a *paddhati* on three [PRAJÑĀPĀRAMITĀ](#) sūtras (T. *Yum gsum gnod 'joms*) are attributed to Vasubandhu, although his authorship is disputed.

[Vasumitra](#). (T. Dbyig bshes; C. Shiyou; J. Seu; K. Seu 世友) (d.u.). A prominent scholar of the [SARVĀSTIVĀDA](#) school in [KASHMIR](#), possibly during the second century CE. His [SAMAYABHEDOPARACANACAKRA](#) is an important source of information on the various schools and subschools of mainstream Nikāya Buddhism in India. He is also credited with composing the [PRAKARANAPĀDA](#), one of the “six feet” of the [ABHIDHARMAPITAKA](#) of the [SARVĀSTIVĀDA](#), which first introduces the categorization of dharmas according to the more developed Sarvāstivāda lists of [RŪPA](#), [CITTA](#), [CAITTA](#), [CITTAVIPRAYUKTASAMSKĀRA](#), and [ASAMSKṚTA](#) dharmas; it also adds a new listing of [KUŚĀLAMAHĀBHŪMIKA](#), or factors always associated with wholesome states of mind. Vasumitra is frequently cited in the [ABHIDHARMAMAHĀVIBHĀSĀ](#), the massive abhidharma

exegesis of the [VAIBHĀSIKA](#) school of the Sarvāstivāda, but it is unclear whether the scholar mentioned in the *Abhidharmamahāvibhāṣā* and the author of the texts mentioned earlier are the same figure. Vasumitra is also credited with composing a (now-lost) commentary to the [ABHIDHARMAKOŚABHĀSYA](#), which, if true, would move his dates forward into the fourth century.

[Vatsā](#). [alt. Vamśā] (P. Vamśa; T. Gnas ma; C. Bacuo [guo]; J. Bassa[koku]; K. Palch'a [kuk] 跋蹉[國]). One of the sixteen great states ([MAHĀJANAPADA](#)) in ancient India, and one of three powerful kingdoms of the Gaṅgā (Ganges) river valley at the time of Buddha, together with [MAGADHA](#) and [KOŚALA](#). Vatsā was located south of the Gaṅgā River, in what is today the Indian state of Uttar Pradesh, and had its capital at Kauśāmbī. During the time of the Buddha, Udayāna was king of Vatsā and a follower of the Buddha. See also [UDĀYANA BUDDHA](#).

[Vatsagotra](#). [alt. Vatsa, Vamśa] (P. Vacchagotta; C. Pocha; J. Basa; K. Pach'a 婆差). In Sanskrit, lit. “Calf Ancestry,” an [ARHAT](#) and disciple of the Buddha. According to Pāli accounts, where he is known as Vacchagotta, he was a wandering mendicant of great learning who was converted and attained arhatship in a series of encounters with the Buddha. Numerous discourses in the Pāli [SUTTAPITAKA](#) concern metaphysical questions that Vacchagotta poses to the Buddha; an entire section of the [SAMUYUTTANIKĀYA](#) is devoted to these exchanges. In other suttas, he raises similar questions in conversations with such important disciples of the Buddha as Mahāmoggallāna ([MAHĀMAUDGALYĀYANA](#)) and [ĀNANDA](#). Vacchagotta's gradual conversion is recorded in a series of discourses contained in the [MAJJHIMANIKĀYA](#). In the *Tevijja-Vacchagottasutta*, he rejoices at the words of the Buddha. In the *Aggi-Vacchagottasutta*, Vacchagotta has a renowned exchange concerning ten “indeterminate questions” ([AVYĀKRITA](#))—is the world eternal or not eternal, infinite or finite, what is the state of the [TATHĀGATA](#) after death, etc. The Buddha refuses to respond to any of the questions, and instead offers the simile of extinguishing fire to describe the state of the tathāgata after death: just as after a fire has been extinguished, it would be inappropriate to say that it has gone anywhere, so too after the tathāgata has extinguished each of the five aggregates (P. khandha; S. [SKANDHA](#)), he cannot be said to have gone anywhere. At the conclusion of the discourse, Vacchagotta accepts the Buddha as his teacher. In the *Mahāvaccagottasutta*, he is ordained by the Buddha and attains in sequence all the knowledges possible

for one who is not yet an arhat. The Buddha instructs him in the practice of tranquility (P. samatha; S. [ŚAMATHA](#)) and insight ([VIPASSANĀ](#); S. [VIPAŚYANĀ](#)) whereby he can cultivate the six superknowledges (P. abhiññā; S. [ABHIJÑĀ](#)); Vacchagotta then attains arhatship. ¶ The [DAZHIDU LUN](#) (**Mahāprajñāpāramitāsāstra*) identifies the Vacchagotta of the Pāli suttas with Śreṇika Vatsagotra, the namesake of what in [MAHĀYĀNA](#) sources is called the [ŚRENIKA HERESY](#). The locus classicus for this heresy appears in the [MAHĀPARINIRVĀNASŪTRA](#). There, when Śreṇika raises the question about whether there is a self or not, the Buddha keeps silent, so Śreṇika himself offers the fire simile, but with a very different interpretation than the Buddha’s. He compares the physical body and the eternal self to a house and its owner: even though the house may burn down in a fire, the owner is safe outside the house; thus, the body and its constituents ([SKANDHA](#)) may be impermanent and subject to dissolution, but not the self. In other Sanskrit sources, Vatsagotra also seems to refer to the figure most typically known as Vatsa (T. Be’u) or Vaṃśa, a student of the ascetic Kāśyapa.

[Vātsīputrīya](#). (P. Vajjiputtakā/Vajjiputtiyā; T. Gnas ma’i bu pa; C. Duzi bu; J. Tokushibu; K. Tokcha pu 犢子部). One of the traditional eighteen schools of “mainstream” (i.e., non-[MAHĀYĀNA](#)) Indian Buddhism, which takes its name from its leader, Vātsīputra. An offshoot of the [SARVĀSTIVĀDA](#) school, it is remembered primarily as one of the schools labeled by others as [PUDGALAVĀDA](#), or “proponents of the person,” that is, the apparently heretical position that there is a “person” ([PUDGALA](#)) with qualities that are “inexpressible” (avācya), which transmigrates from lifetime to lifetime. This position was criticized by exegetes in virtually all rival Buddhist schools, and earned a long critique in the ninth chapter of [VASUBANDHU](#)’s [ABHIDHARMAKOŚABHĀSYA](#), where it was denigrated as the assertion of a permanent self or soul ([ĀTMAN](#)). In their defense, the Vātsīputrīyas argued that the pudgala was neither the same as nor different from the five aggregates ([SKANDHA](#))—viz., that the pudgala was in an “indeterminate” relationship vis-à-vis the skandhas—thus conforming to the Buddha’s dictum that there was no self to be discovered among the aggregates. For the Vātsīputrīyas, it was argued that it was necessary to posit the existence of the pudgala in order to account for personal continuity over the course of a single lifetime, karmic continuity over the course of multiple lifetimes, and, ultimately, so that there would be something that would attain [NIRVĀNA](#) upon the cessation of the aggregates. However, recognizing the special nature of their view of the

person, the Vātsīputrīya posited it as a fifth category of dharmas in addition to the standard four of the Sarvāstivāda school, viz., (1)–(3) conditioned factors ([SAMSKRTADHARMA](#)) belonging to the three time periods of past, present, and future; (4) an unconditioned factor ([ASAMSKRTADHARMA](#)), which for the Vātsīputrīyas, like the [STHAVIRANIKĀYA](#), included only nirvāṇa; and (5) “inexpressible dharmas” (S. *avācyadharmas; C. bukeshuo fa), a category exclusive to the Vātsīputrīyas, which included the notion of a pudgala. Despite the apparent heresy of this position, Chinese pilgrims reported the prominence in India of schools that held this view. The Vātsīputrīya spawned four additional mainstream schools: the Dharmottarīya, Bhadrāyānīya, [SAMMITIYA](#), and Śaṅṅarika.

[Vatṭagāmaṇi Abhaya](#). A Sinhalese king (r. 43 and 29–17 BCE) whose reign witnessed, tradition claims, a number of major developments in Sri Lankan Buddhism, including the first attempt to compile the Pāli canon (P. tipitaka; S. [TRIPITAKA](#)), and its Sinhalese commentaries ([ATTHAKATHĀ](#)) in written form; this event, which is said to have occurred at a cave named Ālokalena, is considered to mark the first written transcription of a complete Buddhist canon. The [DĪPAVAMSA](#) and [MAHĀVAMSA](#) state that a gathering of [ARHATS](#) had decided to commit the body of texts to writing out of fear that they could no longer be reliably memorized and passed down from one generation to the next. In the first year of his reign, Vatṭagāmaṇi Abhaya was deposed by a coalition of the forces of seven Daṃḍa (Tamil) warriors and forced into exile for fourteen years. During that time, he was aided by a monk named Mahātissa. In gratitude for the assistance, when he regained the throne, Vatṭagāmaṇi sponsored the construction of the [ABHAYAGIRI](#) monastery, which he donated to the monk. But Mahātissa had been expelled from the [MAHĀVIHĀRA](#) for misconduct, so the disciples of Mahātissa then dwelling at the Abhayagiri monastery seceded from the Mahāvihāra fraternity and established themselves as a separate fraternity. The Abhayagiri fraternity that arose during the reign of Vatṭagāmaṇi flourished as a separate monastic sect in Sri Lanka until the twelfth century CE.

[Vatthūpamasutta](#). (C. Shuijing fanzhi jing; J. Suijōbonjikyō; K. Sujōng pōmji kyōng 水淨梵志經). In Pāli, the “The Simile of the Cloth Discourse”; the seventh sutta in the [MAJJHIMANIKĀYA](#) (a separate [SARVĀSTIVĀDA](#) recension appears as the ninety-third [SŪTRA](#) in the Chinese translation of the [MADHYAMĀGAMA](#), as well as an unidentified recension in the Chinese translation of the [EKOTTARĀGAMA](#));

preached by the Buddha to a group of disciples in the [JETAVANA](#) grove in the town of Sāvatti (S. [ŚRĀVASTĪ](#)). The Buddha describes the difference between a pure mind and a defiled mind by citing the example of cloth: just as only a clean cloth will absorb dye properly, so only a pure mind will be receptive to the dharma. The Buddha then lists a set of seventeen imperfections that defile the mind, which the monk must learn to abandon in order to gain confidence in the three jewels ([RATNATRAYA](#)) and ultimately liberation.

[vāyu](#). [alt. vāyudhātu] (P. vāyu/vāyo; T. rlung; C. fengda; J. fūdai; K. p'ungdae 風大). In Sanskrit and Pāli, lit. “wind” or “air,” viz., the property of “motion” or “movement”; one of the four major elements ([MAHĀBHŪTA](#)) or “principal elementary qualities” of which the physical world of materiality ([RŪPA](#)) is composed, along with earth (viz., solidity, [PṚTHIVĪ](#); P. paṭhavī), water (viz., cohesion, [ĀPAS](#); P. āpo), and fire (viz., temperature, warmth, [TEJAS](#); P. tejo). “Wind” is defined as “that which is light and moving” and thus can refer not only to the wind, air, and breath but also to the general property of motion. Because wind also has the ability to convey things (viz., earth), has relative temperature (viz., fire), and has a certain tangibility (viz., water), the existence of all the other three elements may also be inferred even in that single element. In the physical body, the wind element is associated with the lungs and the intestinal system.

[vedalla](#). (S. vaidalya). In Pāli, “extended” scriptures. See [VAIPULYA](#).

[vedanā](#). (T. tshor ba; C. shou; J. ju; K. su 受). In Sanskrit and Pāli, “sensation” or “sensory feeling”; the physical or mental sensations that accompany all moments of sensory consciousness. Sensations are always understood as being one of three: pleasurable, painful, or neutral (lit. “neither pleasant nor unpleasant”). Sensation is listed as one of the ten “mental factors of wide extent” ([MAHĀBHŪMIKA](#)) in the [SARVĀSTIVĀDA ABHIDHARMA](#), one of the five “omnipresent” ([SARVATRAGA](#)) “mental constituents” ([CAITTA](#)) in the [YOGĀCĀRA](#) system, and one of the seven universal mental factors (lit. mental factors common to all) (sabbacittasādhāraṇa cetasika) in the Pāli [ABHIDHAMMA](#). It is said universally to accompany all moments of sensory consciousness. Sensation is also listed as the second of the five aggregates ([SKANDHA](#)) and the seventh constituent in the twelvefold chain of dependent origination ([PRATĪTYASAMUTPĀDA](#)). The “contemplation of sensations” (S. vedanānupaśyanā, P. vedanānupassanā) is the second of the four foundations of mindfulness (S.

[SMRTYUPASTHĀNA](#), P. satipatṭhāna) and involves being mindful (see S. [SMRTI](#), P. sati) of physical and mental sensations that are pleasurable, painful, and neutral.

vehicle. See [YANA](#).

Venugrāmaka. (P. Beluvagāmaka/Veḷugāma; T. 'Od ma can gyi grong; C. Zhulincong; J. Chikurinsō; K. Chungnimch'ong竹林叢). In Sanskrit, “Bamboo Town,” near the city of [VAIŚĀLI](#); remembered as the town where the Buddha spent his last rains retreat ([VARŚĀ](#)) prior to his passage into [PARINIRVĀNA](#). Because there was a famine in the region, making it difficult for the local population to support a large group of monks, the Buddha went to Venugrāmaka accompanied only by [ĀNANDA](#). During their sojourn there, the Buddha, already eighty, became seriously ill. However, he did not want to die without addressing the [SAMGHA](#) one last time, and, by using his powers of concentration ([SAMĀDHI](#)) to reduce the physical discomfort, the disease abated. It was while staying at Venugrāmaka that the Buddha made two famous statements to Ānanda. According to the Pāli [MAHĀPARINIBBĀNASUTTANTA](#), when the Buddha expressed his wish to address the saṃgha, Ānanda assumed that the Buddha had a teaching he had not yet delivered to the monks. The Buddha replied that he was not one who taught with a “teacher’s fist” (P. ācariyamuttḥi) or “closed fist,” holding back some secret teaching, but that he had in fact revealed everything. The Buddha also said that he was not the head of saṃgha and that after his death each monk should “be an island unto himself,” with the [DHARMA](#) as his island and his refuge.

Venuvanavihāra. (P. Veḷuvanavihāra; T. 'Od ma'i tshal; C. Zhulin jingshe; J. Chikurin shōja; K. Chungnim chōngsa 竹林精舍). In Sanskrit, “Bamboo Grove Monastery”; the name of a monastery in a grove of the kingdom of [MAGADHA](#), to the north of the capital, [RAJAGRHA](#), that King [BIMBISĀRA](#) offered to the Buddha as a residence for himself and his monks. The Venuvana was the first [ARĀMA](#) or park offered to the Buddha after his enlightenment, and the Buddha subsequently allowed monks to accept an ārāma offered by a layperson. It was during the Buddha’s residence at Venuvana that [ŚĀRIPUTRA](#) and [MAHĀMAUDGALYĀYANA](#) entered the order. The Buddha is said to have passed his second, third, and fourth rains retreat there, in a [VIHĀRA](#) built by Kalandaka and offered to the Buddha. Venuvana is often mentioned in the scriptures as the location where the Buddha taught many sūtras, prescribed many rules of the [VINAYA](#), and recounted many [JĀTAKA](#) tales. [ĀNANDA](#) is said to have lived at the Bamboo Grove after the

Buddha's death.

Verañjakasutta. In Pāli, the “Discourse to the Verañjakas,” the forty-second sutta in the Pāli [MAJJHIMANIKĀYA](#) (there is an untitled [SARVĀSTIVĀDA](#) recension included in the Chinese translation of the [SAMYUKTĀGAMA](#)); preached by the Buddha to a group of brāhmaṇa householders from Verañja while he dwelt in the [JETAVANA](#) grove in the town of Sāvatti (S. [ŚRĀVASTĪ](#)). The Buddha describes for them the ten demeritorious actions that lead to unhappiness and unfortunate rebirths and the ten virtuous actions that lead to happiness and fortunate rebirths. The ten unvirtuous actions are analyzed into three kinds of bodily misdeed: (1) killing and violence, (2) stealing, and (3) sexual misconduct; four kinds of verbal misdeed: (4) falsehood, (5) malicious gossip, (6) harsh speech, and (7) meaningless prattle; and three kinds of mental misdeed: (8) covetousness, (9) ill will, and (10) wrong views. The ten meritorious actions are explained as abstaining from the ten demeritorious actions. The Buddha then describes the fortunate rebirths among humans and the divinities that may be expected by those who live righteously and perform meritorious actions. The sutta is parallel in content to the [SĀLEYAKASUTTA](#), the forty-first sutta in the *Majjhimanikāya*.

Vesākha. (P). See [WESAK](#).

Vessantara. (S. Viśvantara/Viśvaṃtara; T. Thams cad sgröl; C. Xudana; J. Shudainu/Shudaina; K. Sudaena 須大拏). Pāli name of a prince who is the subject of the most famous of all [JĀTAKA](#) tales; he was the [BODHISATTVA](#)'s final existence before he took rebirth in [TUSITA](#) heaven, where he awaited the moment when he would descend into Queen [MĀYĀ](#)'s womb to be born as Prince [SIDDHĀRTHA](#) and eventually become [GAUTAMA](#) Buddha. During his lifetime as Prince Vessantara, the bodhisattva (P. bodhisatta) fulfilled the perfection (P. pāramī; S. [PĀRAMITĀ](#)) of generosity ([DĀNA](#); see also [DĀNAPĀRAMITĀ](#)). The story is found in Sanskrit in Āryaśura's [JĀTAKAMĀLĀ](#) and Kṣemendra's *Avadānakalpalatā*, with the same main features as in the Pāli version. The story enjoys its greatest popularity in Southeast Asia, so the Pāli version is described here. ¶ The bodhisattva was born as the crown prince of Siviraṭṭha, the son of King Sañjaya and Queen Phusatī of the kingdom of Jetuttara. On the day of his birth, a white elephant named Paccaya was also born, who had the power to make rain. When Vessantara was sixteen, he married a maiden named Maddī, with whom he had a son and a daughter, Jāli and Kanhajinā. Once, when Kaliṅga was suffering a severe drought, brāhmaṇas from that kingdom requested that Vessantara give them his

white elephant to alleviate their plight. Vessantara complied, handing over to them his elephant along with its accessories. The citizens of Jetuttara were outraged that he should deprive his own kingdom of such a treasure and demanded his banishment to the distant mountain of Vaṅkagiri. His father, King Sañjaya, consented and ordered Vessantara to leave via the road frequented by highwaymen. Before his departure, Vessantara held a great almsgiving, in which he distributed seven hundred of every type of thing. Maddī insisted that she and her children accompany the prince, and they were transported out of the city on a grand carriage pulled by four horses. Four brāhmaṇas begged for his horses, which he gave. Gods then pulled his carriage until a brāhmaṇa begged for his carriage. Thereafter, they traveled on foot. Along the way crowds gathered, some even offering their kingdoms for him to rule, so famous was he for his generosity. At Vaṅkagiri, they lived in two hermitages, one for Vessantara and the other for his wife and children. These had been constructed for them by Vissakamma, architect of the gods. There, they passed four months until one day an old brāhmaṇa named Jūjaka arrived and asked for Jāli and Kanhajinā as slaves. Vessantara expected this to occur, so he sent his wife on an errand so that she would not be distressed at the sight of him giving their children away. Jūjaka was cruel, and the children ran away to their father, only to be returned so that Vessantara's generosity could be perfected. When Maddī returned, she fainted at the news. Then, Sakka ([ŚAKRA](#)), king of the gods, assumed the form of a brāhmaṇa and asked for Maddī; Vessantara gave his wife to the brāhmaṇa. The earth quaked at the gift. Sakka immediately revealed his identity and returned Maddī, granting Vessantara eight boons. In the meantime, Jūjaka, the cruel brāhmaṇa, traveled to Jetuttara, where King Sañjaya bought the children for a great amount of treasure, including a seven-storied palace. Jūjaka, however, died of overeating and left no heirs, so the treasure was returned to the king. Meanwhile, the white elephant was returned because the kingdom of Kaliṅga could not maintain him. A grand entourage was sent to Vaṅkagiri to fetch Vessantara and Maddī, and when they returned amid great celebration they were crowned king and queen of Siviraṭṭha. In order that Vessantara would be able to satisfy all who came for gifts, Sakka rained down jewels waist deep on the palace. When Vessantara died, he was born as a god in tuṣita heaven, where he awaited his last rebirth as Siddhattha Gotama, when he would become a buddha. ¶ As a depiction of the virtue of dāna, the story of Vessantara is one of the most important Buddhist tales in Thailand and throughout Southeast Asia and is depicted on murals throughout the region. Thai retellings of the *Vessantara-*

Jātaka, known also as the *Mahāchat*, or “Great Jātaka,” are found in the many Thai dialects and consist of thirteen chapters. The story is popular in Thailand’s north and especially in the northeast, where virtually every monastery (excluding forest monasteries) holds a festival known as the Bun Phra Wet, usually in February or March, at which the entire story is recited in one day and one night. Laypeople assist in decorating their local monastery with trunks and branches of banana trees to represent the forest to which Vessantara was banished after giving away his kingdom’s auspicious elephant. They also present offerings of flowers, hanging decorations, balls of glutinous rice, and money. The festival includes, among other things, a procession to the monastery that includes local women carrying long horizontal cloth banners on which the Vessantara story is painted. The merit earned by participating in the festival is linked to two beliefs: (1) that the participant will be reborn at the time of the future buddha, [MAITREYA](#), known in Thai as Phra Si Ariya Mettrai (P. Ariya Metteyya), and (2) that the community, which remains primarily agricultural, will be blessed with sufficient rainfall.

[Vessantara-Jātaka](#). See [VESSANTARA](#).

[Vibhajyavāda](#). (P. Vibhajjavāda; T. Rnam par phye ste smra ba; C. Fenbieshuo bu; J. Funbetsusetsubu; K. Punbyölsöl pu 分別說部). In Sanskrit, “Distinctionist”; one of the “mainstream” (i.e., non-Mahāyāna) schools of Indian Buddhism. The Vibhajyavāda was one of the branches of the [STHAVIRANIKĀYA](#), which, according to [BUDDHAGHOSA](#), emerged at the time of the third Buddhist council (see COUNCIL, THIRD), around 240 BCE; the Sthaviranikāya also comprises a number of other schools, including the [DHARMAGUPTAKA](#), whose [VINAYA](#) was predominant in East Asia; the [THERAVĀDA](#) of Sri Lanka and Southeast Asia traces itself to the Sthaviranikāya. Inscriptional evidence indicates that the Vibhajyavāda thrived in [KASHMIR](#), [GANDHĀRA](#), and [BACTRIA](#), where the name may have been used to describe several of the branches of the Sthaviranikāya, including the Dharmaguptaka, [MAHĪŚĀSAKA](#), and [KĀŚYAPIYA](#). Doctrinally speaking, the Vibhajyavāda’s name derives from the distinction made between phenomena or factors ([DHARMA](#)) that exist and do not exist. The Sarvāstivāda (“those who hold that everything exists”) asserted that dharmas exist in all three temporal modes of past, present, and future. In contrast, the Vibhajyavāda (and many other mainstream schools) made a distinction among past, present, and future dharmas, asserting that, while present dharmas obviously exist, no future

dharmas exist, and the only past dharmas that exist are past actions that have yet to produce their karmic effects. Thus, the term vibhajjavāda is sometimes used in a more generic sense, referring not to a specific school, but to all mainstream schools that made a distinction among dharmas of the past, present, and future. In addition, the Vibhajjavāda is said to have held that thought is pure in its nature; that form ([RŪPA](#)) still occurs in the immaterial realm ([ĀRŪPYADHĀTU](#)); that there is no intermediate state ([ANTARĀBHAVA](#)) between death and rebirth; that [PRATĪTYASAMUTPĀDA](#) and the path ([MĀRGA](#)) are unconditioned ([ASAMSKRTA](#)); and that an [ARHAT](#) cannot retrogress on the path. The Pāli term Vibhajjavāda is sometimes used as a synonym for Theravāda, in the more general sense of those who hold that reality should be understood by discriminating between positive and negative positions. In the [KATHĀVATTHU](#) of the Pāli [ABHIDHAMMAPITAKA](#), the venerable [MOGGALIPUTTATIṢṢA](#) declared that the Buddha was a vibhajjavādī, or “teacher of analysis,” since it is only through critical investigation and reasoning that an adept can begin to develop true insight, discriminating among positions rather than taking a one-sided position.

[Vibhaṅga](#). [alt. Vibhaṅgappakaraṇa]. In Pāli, “Analysis”; the second of the seven books that together constitute the [ABHIDHAMMAPITAKA](#) of the Pāli canon. Since most of this book concerns subject matter introduced in the abhidhammapitaka’s first book, the [DHAMMASAṄGANĪ](#), the *Vibhaṅga* is often spoken of as a supplement to, or a commentary on, the *Dhammasaṅgaṇī*. The *Vibhaṅga*, however, applies different methods of analysis and includes a number of additional definitions and terms. The text is comprised of eighteen chapters (vibhaṅga), each of which presents a self-contained discourse on the following topics, in this order: the aggregates (P. khandha; S. [SKANDHA](#)), sense bases ([ĀYATANA](#)), elements ([DHĀTU](#)), truths (P. sacca; S. [SATYA](#)), faculties ([INDRIYA](#)), conditioned origination (P. paṭiccasamuppāda; S. [PRATĪTYASAMUTPĀDA](#)), foundations of mindfulness (P. [SATIPATTHĀNA](#); S. [SMRTYUPASTHĀNA](#)), right effort (P. sammappadhāna; S. [SAMYAKPRAHĀNA](#)), bases of psychic or supernatural powers (P. iddhipāda; S. [RDDHIPĀDA](#)), factors of enlightenment (P. bojjhaṅga; S. [BODHYAṄGA](#)), the eightfold path (P. magga; S. [MĀRGA](#)), mental absorption (P. [JHĀNA](#); S. [DHYĀNA](#)), the boundless states (P. appammaññā; S. [APRAMĀNA](#)), training rules (P. sikkhāpada; S. [ŚIKSĀPADA](#)), analytical knowledges (P. paṭisambhidā; S. [PRATISAMVID](#)), various types of knowledge (P. ñāṇa; [JÑĀNA](#)), minor topics (P. khuddhakavatthu), including an inventory of afflictions, and “the heart of the teaching” (P. dhammahadaya). Most, but not all, of these

chapters are divided into three parts. First, they analyze the subject using the same method as the [SUTTAS](#), often by simply quoting material directly from the suttas. Next, they analyze the subject using a typical [ABHIDHARMA](#) methodology—offering synonyms and numerical lists of categories, classes, and types of the phenomena. Finally, most treatments culminate in a catechistic series of inquiries (pañhāpucchaka). In this series of questions, the subject is analyzed by way of a set of “matrices” or “categories” (P. *mātikā*; S. [MĀTRKĀ](#)) established in the *Dhammasaṅgaṇī*. Many commentaries have been written on the Pāli *Vibhaṅga*, the most popular of which is [BUDDHAGHOSA](#)’s [SAMMOHAVINODANĪ](#), which was written in the fifth century.

[vicāra](#). (T. dpyod pa; C. si; J. shi; K. sa 伺). In Sanskrit and Pāli, “sustained thought,” “sustained attention,” “imagination,” or “analysis”; one of the forty-six mental factors ([CAITTA](#)) according to the [VAIBHĀSIKA](#) school of [SARVĀSTIVĀDA ABHIDHARMA](#), one of the fifty-one according to the [YOGĀCĀRA](#) school, and one of the fifty-two in the Pāli [ABHIDHAMMA](#). Although etymologically the term contains the connotation of “analysis,” vicāra is polysemous in the Buddhist lexicon and refers to a mental activity that can be present both in ordinary states of consciousness and in meditative absorption ([DHYĀNA](#)). In ordinary consciousness, vicāra is “sustained thought,” viz., the continued pondering of things. It is listed as an indeterminate mental factor ([ANİYATA-CAITTA](#)) because it can be employed toward either virtuous or nonvirtuous ends, depending on one’s intention and the object of one’s attention. Vicāra as a mental activity typically follows [VITARKA](#), wherein vitarka is the “initial application of thought” and vicāra the “sustained thought” that ensues after one’s attention has already adverted toward an object. In the context of meditative absorption, vicāra may be rendered as “sustained attention” or “sustained application of attention.” With vitarka the practitioner directs his focus toward a chosen meditative object. When the attention is properly directed, the practitioner follows by applying and continuously fixing his attention on the same thing, deeply experiencing (or examining) the object. In meditative absorption, vicāra is one of the five factors that make up the first dhyāna (see [DHYĀNĀṄGA](#)). According to the [VISUDDHIMAGGA](#), “applied thought” (P. vitakka; S. vitarka) is like a bee flying toward a flower, having oriented itself toward its chosen target, whereas “sustained attention” (vicāra) is like a bee hovering over that flower, fixating on the flower.

***vicārabhāvanā.** (T. dpyad sgom). In Sanskrit, “analytical meditation”; a general term for those forms of meditation that involve discursive reflection on points of Buddhist doctrine, as opposed to the focus of the mind upon a single object. An example of such analytical meditation would be the investigation of the constituents of mind and body in search of the self or systematic reflection on the certainty of death and the uncertainty of the time of death. The term is often paired with ***STHĀPYABHĀVANĀ**, “stabilizing meditation” (T. ’jog sgom), the one-pointed concentration on a single object without discursive reflection. In instructions on meditation practice, there is often advice to alternate these two forms of meditation, first arriving at a conclusion or conviction through analytical meditation and then focusing on that conclusion through stabilizing meditation, resulting eventually in **VIPĀŚYANĀ**.

vicikitsā. (P. vicikicchā; T. the tshom; C. yi; J. gi; K. ūi 疑). In Sanskrit, “doubt” or “skepticism”; classified as one of the six root afflictions (**MŪLAKLEŚA**) in the **SARVĀSTIVĀDA** school of **ABHIDHARMA** and the **YOGĀCĀRA** school, and one of the fourteen unwholesome mental factors (akusala-cetasika) in the Pāli abhidhamma, where it takes the form of doubt about such matters as the **FOUR NOBLE TRUTHS**, the effects of actions (**KARMA**), or the efficacy of the path (**MĀRGA**). Doubt is also classified as the second of ten “fetters” (**SAMYOJANA**) that keep beings bound in **SAMSĀRA**. It is also classified as one of five “hindrances” (**NĪVARANA**) that prevent the mind from attaining meditative absorption (**DHYĀNA**); skeptical doubt is the factor that hinders sustained thought (**VICĀRA**) among the five constituents of meditative absorption (**DHYĀNĀṄGA**). Doubt is a two-pointedness of mind that renders the mind unable to engage in virtuous action, just as one is unable to sew with a pronged needle. It is characterized by wavering and manifests itself as indecision. The counteragent (**PRATIPAKSA**) to vicikitsā is wisdom (**PRAJÑĀ**), assisted by such specific practices as studying the scriptures. This state of doubt is temporarily allayed with the attainment of the first meditative absorption (dhyāna) and is permanently eliminated upon attaining the stage of stream-enterer (**SROTAĀPANNA**). Cf. **YIJING**.

videha. (T. lus ’phags po; C. pitihe; J. bidaika; K. pijeha 毘提訶). The Sanskrit and Pāli proper name of one of the four island continents arrayed according to traditional Buddhist cosmology in the four cardinal directions around Mount **SUMERU**; also referred to as pūrvavideha. Videha is the eastern continent and is semicircular in shape. Its inhabitants, classified as humans (**MANUSYA**) among the

six types of beings who inhabit [SAMSĀRA](#), are said to be twice as tall as the inhabitants of our southern continent of [JAMBUDVĪPA](#) and to have a life span of up to 250 years.

vidhi. (T. cho ga; C. yigui; J. giki; K. ũigwe 儀軌). In Sanskrit, “rite”; a term that is used for Vedic and other rituals. In Buddhism, and in particular tantric Buddhism, vidhi is sometimes used interchangeably with [PŪJĀ](#) but can also refer to those elements of a [SĀDHANA](#) that are more overtly ceremonial, such as the making of offerings, the drawing of [MANDALA](#), the performance of [MUDRĀ](#) or of sacred dances, and the playing of music, as opposed to the more introspective elements of a sādhanā, such as the practice of visualization, meditation, or the silent repetition of [MANTRA](#).

vidyā. (P vijjā; T. rig pa/rig ma; C. ming; J. myō; K. myōng 明). In Sanskrit, lit. “knowledge,” a polysemous term with a wide range of denotations in Buddhist literature. Vidyā appears frequently in the sūtra literature of the [MAINSTREAM BUDDHIST SCHOOLS](#) (as in the title of the Pāli [TEVIJĀSUTTA](#)), where it encompasses what might be called conventional knowledge of the world gained through investigation and analysis, as well as the salvific knowledge of the nature of reality gained through the practice of meditation (see [TRIVIDYĀ](#)). In Pāli commentarial literature, vidyā carries connotations of investigation, observation, and correct theories; thus, in some contexts, it is translated as “science” and appears in a number of important lists, such as the [PAÑCAVIDYĀ](#). In tantric literature, it takes on a further meaning of esoteric and occult knowledge (and hence is sometimes translated as “spell”), as in the term [VIDYĀDHARA](#). Vidyā is also used in tantric literature to refer to a sexual consort. Its negation, [AVIDYĀ](#), lit., “non-knowledge,” is the most common term for the fundamental ignorance that is the root cause of suffering.

vidyādhara. (P. vijjādhara; T. rig pa ’dzin pa; C. chiming; J. jimyō; K. chimyōng 持明). In Sanskrit, lit. “keeper of knowledge.” Knowledge ([VIDYĀ](#)) in this context has the denotation of knowledge of sacred lore and magic, such that a vidyādhara functions as a kind of sorcerer or thaumaturge. The term is used to refer to tantric deities as well as to human tantric masters, such as the [MAHĀSIDDHAS](#), whose great powers derived from their knowledge of [MANTRAS](#). As the repository of tantric knowledge, the tantric corpus was sometimes called the [VIDYĀDHARAPITAKA](#). See also [WEIKZA](#).

vidyādharaṭṭaka. (T. rig 'dzin sde snod; C. chiming zang; J. jimyōzō; K. chimyōng chang 持明藏). In Sanskrit, the “collection of the keepers of knowledge”; a term used to refer collectively to the Buddhist [TANTRAS](#), which were said to have been collected by the tantric thaumaturges ([VIDYĀDHARA](#)). The tantras are said to constitute a fourth [PITAKA](#)—in addition to the [SŪTRA](#), [VINAYA](#), and [ABHIDHARMA](#) piṭakas—called the vidyādharaṭṭaka.

vidyāsthāna. (P. vijjāṭṭhāna; T. rigs pa'i gnas; C. ming chu; J. myōsho; K. myōng ch'ō 明處). In Sanskrit, lit. “abode of knowledge,” but often translated as “science,” especially in the context of the five traditional sciences of ancient India, which a [BODHISATTVA](#) is also expected to master. These five sciences ([PAÑCAVIDYĀ](#)) are śabda, which includes grammar and composition; hetu [alt. [PRAMĀNA](#)], or logic; cikitsā, or medicine; śilpakarma, which includes the arts and mathematics; and adhyātmavidyā, the “inner science,” which in the case of Buddhism was said to be knowledge of the [TRIPITAKA](#) and the twelve categories of scriptures ([DVĀDAŚĀṄGA\[PRAVACANA\]](#)).

Vigrahavyāvartanī. (T. Rtsod pa bzlog pa; C. Huizheng lun; J. Ejōron; K. Hoejaeng non 廻諍論). In Sanskrit, “Refutation of Objections”; one of the major works of [NĀGĀRJUNA](#) and considered as part of his philosophical corpus ([YUKTIKĀYA](#)). The work, which is preserved in Sanskrit, Tibetan, and Chinese, has seventy stanzas; there is also an autocommentary by the author. The work appears to have been composed after the [MŪLAMADHYAMAKAKĀRIKĀ](#), responding to objections that might be raised to arguments in that text; hence, the title “Refutation of Objections.” As in the case of the *Mūlamadhyamakakārikā*, the opponent is presumably an adherent of the [ABHIDHARMA](#), although it is directed specifically to Naiyāyika-type arguments. Perhaps the most famous objection and response comes at the beginning of the text. In the first stanza of the work, the opponent states that, if it is true, as Nāgārjuna claims, that all things lack intrinsic nature ([SVABHĀVA](#)), then Nāgārjuna’s own statement must also lack intrinsic nature, in which case the statement cannot deny the intrinsic nature of things. In the famous twenty-ninth stanza, Nāgārjuna responds, “If I had some thesis ([PRATIJÑĀ](#)), I would incur that fault; because I have no thesis, I am faultless.” The autocommentary explains that there can be no thesis when all things are empty, utterly quiescent, and naturally pristine. Therefore, because he has no thesis, no mark of a thesis is entailed by his previous statement that all things lack intrinsic nature. The text is widely quoted by later commentators,

both in India and in Tibet.

viḥāra. (T. gtsug lag khang/dgon pa; C. zhu/jingshe; J. jū/shōja; K. chu/chōngsa 住/精舍). In Sanskrit and Pāli, lit. “abode”; the term commonly used for a dwelling place for monks and nuns, and thus typically translated as “monastery.” In the story of the life of the Buddha, in the early days of the saṃgha the monks had no fixed abode but wandered throughout the year. Eventually, the Buddha instructed monks to cease their peregrinations during the torrential monsoon period in order to prevent the killing of insects and worms while walking on muddy roads. The residences established for use during the rains retreat (**VARṢĀ**) are called varṣāvāsa or “rains abode,” and the institution of the rains retreat (and the consequent need for more permanent shelter) probably led to the development of formal monasteries. According to the **VINAYA**, a viḥāra must be donated to the **SAMGHA** and, once accepted, it may never be given back, but remains in perpetuity the property of the order. There are various rules and recommendations concerning the layout of a viḥāra. According to the Pāli **VINAYA**, a viḥāra may be plastered and decorated, but never using figures of human beings. It may have three kinds of rooms, upper, large, and small. These rooms are typically arrayed around a central courtyard that often enshrined a sapling of a **BODHI TREE** or a **STŪPA**. The viḥāra should have a refectory and a place for storing water, and it may be surrounded by a wall. It should be neither too near nor too far from a town or village and be suitable for gathering alms but secluded enough to be conducive to study and contemplation. A viḥāra may be constructed for the use of the entire congregation of monks or nuns or for personal use. If a proposed viḥāra for an individual monk is large or grand, permission for its construction must first be granted by the saṃgha. The Indian state of Bihar takes its name from the many Buddhist viḥāras that were once scattered throughout the region. See also entries on specific monasteries.

viḥiṃsā. (T. rnam par ’tshē ba; C. hai; J. gai; K. hae 害). In Sanskrit, lit. “harmfulness,” sometimes translated as “injury,” “cruelty,” or “harmful intention”; one of the forty-six mental concomitants (**CAITTA**) according to the **VAIBHĀSIKA** school of **SARVĀSTIVĀDA ABHIDHARMA** and one of the fifty-one according to the **YOGĀCĀRA** school. As the opposite of “harmlessness” or “nonviolence” (**AHIMSĀ**), viḥiṃsā is the ill will that wishes for, or causes, suffering to come to others. Viḥiṃsā is listed among the fifth of the six categories of caitta, the secondary afflictions (**UPAKLEŚĀ**), which are not

compatible with spiritual progress. Vihimsā is also considered to be one of the possible derivative emotions of “aversion” ([DVESA](#)) and cannot exist independently of that latter mental state. The antidote to this volition to bring harm to others is the development of loving-kindness ([MAITRĪ](#)).

Vijaya. The first Āryan king of Sri Lanka. According to the [MAHĀVAMSA](#), Vijaya led a band of seven hundred followers exiled from north India to Sri Lanka in the sixth century BCE. The capital he founded was named Tambapaṇṇi, whence one of the names for the island, Tambapaṇṇi Dīpa. Vijaya and his followers were known as Sīhaḷa, after an epithet of his father, Sīhabāhu or “lion-armed,” who was the offspring of a lion and a human princess. For this reason, the island also came to be known as Sīhaḷa Dīpa or “Lion Island.”

vijñāna. (P. viññāṇa; T. nam par shes pa; C. shi; J. shiki; K. sik 識). In Sanskrit, “consciousness”; a term that technically refers to the six types of sensory consciousness ([VIJÑĀNA](#)): eye, or visual, consciousness ([CAKSURVIJÑĀNA](#)); ear, or auditory, consciousness ([ŚROTRAVIJÑĀNA](#)); nose, or olfactory, consciousness ([GHRĀNAVIJÑĀNA](#)); tongue, or gustatory, consciousness ([JHVĀVIJÑĀNA](#)); body, or tactile, consciousness ([KĀYAVIJÑĀNA](#)); and mental consciousness ([MANOVIJÑĀNA](#)). These are the six major sources of awareness of the phenomena ([DHARMA](#)) of our observable universe. Each of these forms of consciousness is produced in dependence upon three conditions ([PRATYAYA](#)): the “objective-support condition” ([ĀLAMBANAPRATYAYA](#)), the “predominant condition” ([ADHIPATIPRATYAYA](#)), and the “immediately preceding condition” ([SAMANANTARAPRATYAYA](#)). When used with reference to the six forms of consciousness, the term vijñāna refers only to [CITTA](#), or general mentality, and not to the mental concomitants ([CAITTA](#)) that accompany mentality. It is also in this sense that vijñāna constitutes the fifth of the five [SKANDHAS](#), while the mental concomitants are instead placed in the fourth aggregate of conditioning factors ([SAMSKĀRA](#)). The six forms of consciousness figure in two important lists in Buddhist epistemology, the twelve sense fields ([ĀYATANA](#)) and the eighteen elements ([DHĀTU](#)). With the exception of some strands of the [YOGĀCĀRA](#) school, six and only six forms of vijñāna are accepted. The Yogācāra school of [ASAṄGA](#) posits instead eight forms of vijñāna, adding to the six sensory consciousnesses a seventh afflicted mentality ([KLISTAMANAS](#)), which creates the mistaken conception of a self, and an eighth foundational or storehouse consciousness ([ĀLAYAVIJÑĀNA](#)).

[Vijñānakāya\[pādaśāstra\]](#). (T. Rnam shes kyi tshogs; C. Shishen zu lun; J. Shikishinsokuron; K. Siksin chok non 識身足論). In Sanskrit, “Collection on Consciousness”; a book from the middle stratum of the [SARVĀSTIVĀDA ABHIDHARMAPĪṬAKA](#), which is traditionally listed as the second of the six ancillary texts, or “feet” (pāda), of the [JÑĀNAPRASTHĀNA](#), the central treatise or body (śārīra) of the Sarvāstivāda abhidharmapiṭaka. Authorship of the text is attributed to Devaśarman, and it is presumed to have been composed during the latter half of the first century CE. It is extant only in a complete translation into Chinese made by [XUANZANG](#) and his translation team at [DAC’ENSI](#) in 649. The *Vijñānakāya* is the only one of the six pādaśāstras that provides an elaborate proof of the veracity of the eponymous Sarvāstivāda position that dharmas exist in the past, present, and future, and its treatments are the foundation for the refinements of this position in later [VAIBHĀSIKA](#) materials. The *Vijñānakāya* is also the only canonical Sarvāstivāda treatise that critiques the mistaken belief in a person ([PUDGALA](#)). The extensive refutation of the [PUDGALAVĀDA](#) position found in the appendix (chapter nine) to [VASUBANDHU](#)’s [ABHIDHARMAKOŚABHĀSYA](#) relies heavily on the *Vijñānakāya*’s content and approach. The *Vijñānakāya* also offers an elaborate analysis of fourteen types of causes ([HETU](#)); in addition, it provides the first listing of the four types of conditions ([PRATYAYA](#)), especially in connection with the arising of sensory consciousness. By bringing causation theory to the forefront of abhidharma philosophy, the *Vijñānakāya* occupies a crucial place in the evolution of the Sarvāstivāda abhidharma. The *Vijñānakāya*’s closest analogue in the Pāli [ABHIDHAMMA](#) literature is the [DHĀTUKATHĀ](#).

[vijñānānantyāyatana](#). (P. viññāṇañcāyatana; T. rnam shes mtha’ yas skye mched; C. shi wubian chu; J. shikimuhenjo; K. sik mubyōn ch’ō 識無邊處). In Sanskrit, “sphere of infinite consciousness”; the second (in ascending order) of the four levels of the immaterial realm ([ĀRŪPYADHĀTU](#)) and the second of the four immaterial absorptions ([ĀRŪPYĀVACARADHYĀNA](#)). It is “above” the first level of the immaterial realm, called infinite space ([AKĀŚĀNANTYĀYATANA](#)), and “below” the third and fourth levels, “nothingness” ([ĀKIMCANYĀYATANA](#)) and “neither perception nor nonperception” ([NAIVASAMJÑĀNĀSAMJÑĀYATANA](#)). It is a realm of rebirth as well as a meditative state that is entirely immaterial (viz., there is no physical, or form [[RŪPA](#)], component to existence), in which the mind seems to expand to the point that it is essentially infinite. Beings reborn in this realm are thought to live as long as forty thousand eons ([KALPA](#)). However, as a

state of being that is still subject to rebirth, even the realm of infinite consciousness remains part of [SAMŚĀRA](#). Like the other levels of the realm of subtle materiality ([RŪPADHĀTU](#)) and the immaterial realm, one is reborn in this state by achieving the specific level of meditative absorption of that state in the previous lifetime. One of the most famous and influential expositions on the subject of these immaterial states comes from the [VIŚUDDHIMAGGA](#) of [BUDDHAGHOSA](#), written in the fifth century. Although there are numerous accounts of Buddhist meditators achieving immaterial states of [SAMĀDHI](#), they are also used polemically in Buddhist literature to describe the attainments of non-Buddhist [YOGINS](#), who mistakenly identify these exalted states within saṃsāra as states of permanent liberation from rebirth. See also [DHYĀNASAMĀPATTI](#); [DHYĀNOPAPATTI](#).

[vijñānaskandha](#). (P. viññāṇakhandha; T. rnam shes kyi phung po; C. shiyun/shiyin; J. shikiun/shikion; K. sigon/sigŭm 識蘊/識陰). In Sanskrit, the “consciousness aggregate”; the fifth of the five aggregates of being ([SKANDHA](#)). The vijñānaskandha refers to the six types of consciousness ([VIJÑĀNA](#), viz., the visual, auditory, olfactory, gustatory, tactile, and mental consciousnesses) but not to the various mental concomitants ([CAITTA](#)) that accompany them, which are placed in the fourth aggregate, [SAMSKĀRA](#). See [VIJÑĀNA](#).

[Vijñānavāda](#). [alt. Vijñānavādin] (T. Rnam par shes pa smra ba; C. Weishi zong; J. Yuishikishū; K. Yusik chong 唯識宗). In Sanskrit, “Proponent of Consciousness”; an alternative designation for the [YOGĀCĀRA](#) school, emphasizing the central role of the exposition of consciousness ([VIJÑĀNA](#)) in the tenets of the school. The school’s cardinal doctrine is that the objects of experience are of the nature of representation-alone ([VIJÑĀPTIMĀTRATĀ](#)), also referred to as “mind only” ([CITTAMĀTRA](#)). See [YOGĀCĀRA](#); [FAXIANG ZONG](#).

[vijñapti](#). (T. rnam par rig byed; C. shi; J. shiki; K. sik 識). In Sanskrit, “representation,” “designation,” or “imputation”; a term especially important in the [YOGĀCĀRA](#) school, where it indicates the subjective nature of the objects of experience, emphasizing the role of consciousness ([VIJÑĀNA](#)) in the identification, naming, and ontological status of the constituents of the external world. The term appears in the title of perhaps the most influential Indian Yogācāra treatise for East Asian Buddhism, the [CHENG WEISHI LUN](#) ([*VIJÑĀPTIMĀTRATĀSIDDHI](#); “Demonstration of Representation-Only”), which presents the philosophical positions of the sixth-century Yogācāra master

[DHARMAPĀLA](#) (530–561).

[vijñaptimātratā](#). (T. *mam par rig pa tsam nyid*; C. *weishi*; J. *yuishiki*; K. *yusik 唯識*). In Sanskrit, “mere-representation” or “mere-designation”; the cardinal doctrine of the [YOGĀCĀRA](#) school, viz., that the objects of experience are mere projections of consciousness ([VIJÑĀNA](#)). Thus, all objects are mere representations and all categories are mere designations. No object is the natural basis of its name; rather, the mind itself instead designates the object. The term *Vijñaptimātra* is used as an alternative designation of the Yogācāra school, especially as represented in the works of [VASUBANDHU](#), [STHIRAMATI](#), and [DHARMAPĀLA](#), with particular emphasis on the doctrine of the three natures ([TRISVABHĀVA](#)). Indeed, the term appears in the title of perhaps the most influential Indian Yogācāra treatise for East Asian Buddhism, the [CHENG WEISHI LUN](#) (S. **Vijñaptimātratāsiddhi*; “Demonstration of Representation-Only”) by the sixth-century Yogācāra master [DHARMAPĀLA](#) (530–561). It is the Chinese translation of *vijñaptimātratā* (*weishi*) thought that became the primary source of Yogācāra philosophy in East Asia.

[*Vijñaptimātratāsiddhi](#). (S). See [CHENG WEISHI LUN](#).

[vikalpa](#). (P. *vikappa*; T. *mam par rtog pa*; C. *fenbie*; J. *funbetsu*; K. *punbyōl 分別*). In Sanskrit, “[false] discrimination,” “imagining,” or “conception”; the discriminative activities of mind, generally portrayed in the negative sense of fantasy and imagination, and often equivalent to “conceptual proliferation” ([PRAPAÑCA](#)). *Vikalpa* refers to the conceptual activities of the mental consciousness ([MANOVIJÑĀNA](#)), a mediated mental activity that operates through the medium of generic images ([SĀMĀNYALAKSANA](#)). *Vikalpa* is often opposed to the immediate knowledge provided by direct perception ([PRATYAKSA](#)). The direct perception of reality is therefore commonly described as [NIRVIKALPA](#), or “free from thought.” ¶ Three types of conceptual discrimination ([TRIVIKALPA](#)) are typically described in the literature. (1) Intrinsic discrimination ([SVABHĀVAVIKALPA](#)), which refers to the initial advertence of thought ([VITARKA](#)) and the subsequent sustained attention ([VICĀRA](#)) to a perceived object of the six sensory consciousnesses ([VIJÑĀNA](#)), that is, the discrimination of present objects, as when visual consciousness perceives a visual object. (2) Conceptualizing discrimination ([ABHINIRŪPANĀVIKALPA](#)), which refers to discursive thought on ideas that arise in the sixth mental consciousness when it adverts toward a mental object that is associated with any of the three time periods of past,

present, or future. (3) Discrimination involving reflection on past events ([ANUSMARANAVIKALPA](#)), which refers to discriminative thought involving the memory of past objects. ¶ There is a wide range of opinion as to the value of vikalpa (in the sense of “thought” or “conception”) in the soteriological progress. Some traditions would hold that the structured use of conceptual and logical analysis (and especially the use of inference, or [ANUMĀNA](#)) is a necessary prerequisite to reaching a state beyond all thought. Such a position is advocated in the Indian philosophical schools and in those that favor the so-called gradual path to enlightenment. In the stages of the path to enlightenment, all forms of meditation prior to the attainment of the path of vision ([DARŚANAMĀRGA](#)) are “conceptual” and thus entail vikalpa. Other schools radically devalue all thought as an obstacle to the understanding of the ultimate and would claim that the nonconceptual, described in some cases as “no-thought” (C. [WUNIAN](#)), is accessible at all times. Such an approach, most famously expounded in the [CHAN](#) traditions of Asia, is associated with the so-called sudden path to enlightenment (see [DUNWU](#)). ¶ In the [YOGĀCĀRA](#) school, vikalpa is described specifically as the “discriminative conception of apprehended and apprehender” ([GRĀHYAGRĀHAKAVIKALPA](#)), referring to the misconception that there is an inherent bifurcation between a perceiving subject (grāhaka) and its perceived objects (grāhya). This bifurcation occurs because of false imagining ([ABHŪTAPARIKALPA](#)), the tendency of the relative phenomena ([PARATANTRA](#)) to be misperceived as divided into a perceiving self and a perceived object that is external to it. By relying on these false imaginings to construct our sense of what is real, we inevitably subject ourselves to continued suffering ([DUHKHA](#)) within the cycle of birth-and-death ([SAMŚĀRA](#)). Overcoming this bifurcation leads to the nondiscriminative wisdom ([NIRVIKALPAJÑĀNA](#)), which, in the five-stage path ([PAÑCAMĀRGA](#)) system, marks the inception of the path of vision (darśanamārga), where the adept sees reality directly, without the intercession of concepts. The elimination of grāhyagrāhakavikalpa proceeds from the less to the more subtle. It is easier to realize that a projected object is a projection than to realize that a projecting subject is as well; among projected objects, it is easier to realize that afflicted ([SAMKLIŚTA](#)) dharmas (the [SKANDHAs](#) and so on) are projections than to realize that purified ([VYAVADĀNA](#)) dharmas (the five paths and so on) are as well; and among subjects it is easier to realize that a material subject (a mental substratum and so on) is a projection than to realize that a nominally existing subject (a nominally existing self and so on) is. This explanation of vikalpa, common in the [PRAJÑĀPĀRAMITĀ](#) commentarial tradition, influenced the theory of

the [SAMPANNAKRAMA](#) (completion stage) in [ANUTTARAYOGA](#) (highest yoga) [TANTRA](#), where prior to reaching enlightenment the four sets of vikalpas are dissolved with their associated [PRĀNAS](#) in the central channel ([AVADHŪTI](#)).

Vikramaśīla. (T. Rnam gnon ngang tshul). A monastery and monastic university in the northern region of ancient [MAGADHA](#), in the modern Bihar state of India, located along the Ganges River in the Bhagalpur District of Bihar, about 150 miles east of [NĀLANDĀ](#). King Dharmapāla of the Pāla dynasty founded Vikramaśīla between the late eighth and early ninth centuries and appointed his teacher, Buddhajñānapāda, to be abbot of the monastic university. Throughout its existence, leaders of the Pāla dynasty supported the teachers, students, and maintenance of the institution. There were six areas of religious study, supplemented by such secular subjects as grammar, metaphysics, and logic. The two monastic universities of Vikramaśīla and Nālandā had a great deal of scholarly interaction, and, like Nālandā, Vikramaśīla served as a model for Tibetan monasteries. There were more foreign students at Vikramaśīla than at Nālandā, and the monastery is said to have been large enough to accommodate around ten thousand resident students, including specific dormitories for visiting Tibetan students. Vikramaśīla also housed a substantial library, where texts were both stored and recopied by students and teachers. By the tenth century CE, Vikramaśīla had outgrown even Nālandā, reaching its peak in the eleventh century, and offered a famous [PRAJÑĀPĀRAMITĀ](#) curriculum. The monastery became the focus of tantric scholarship during this period, and pilgrims came to study from many regions of Asia. During the reign of King Nayapāla, in the eleventh century, [ATIŚA DĪPAMKARĀŚRĪJÑĀNA](#) was considered the greatest scholar at the monastery. Other famous scholars also taught there, including [JITĀRI](#), [JÑANAŚRĪMITRA](#), [NĀROPA](#) (briefly), and [RATNĀKARĀŚANTI](#). Vikramaśīla was attacked by Muslim armies between 1199 and 1203 CE. During the same period, [ODANTAPURĪ](#) was also attacked, and the surviving scholars and students were forced to flee. Many scholars escaped to Nepal and Tibet, saving many texts from their libraries. [ŚĀKYAŚRĪBHADRA](#) was the last abbot of Vikramaśīla, and also the last to flee to Tibet from the monastery, arriving in 1204.

viksepa. (P. vikkhepa; T. mam par g.yeng ba; C. sanluan; J. sanran; K. sallan 散亂). In Sanskrit, “distraction”; the movement of the mind away from the object of observation or a lack of mental balance that disturbs concentration. It is one of the forty-six mental concomitants ([CAITTA](#)) according to the [VAIBHĀSIKA](#) school

of [SARVĀSTIVĀDA ABHIDHARMA](#) and one of the fifty-one according to the [YOGĀCĀRA](#) school, which lists it as one of the twenty secondary afflictions ([UPAKLEŚA](#)).

vimalā. (T. dri ma med pa; C. ligou di; J. rikuji; K. igu chi 離垢地). In Sanskrit, “immaculate” or “stainless”; the name of the second of the ten bodhisattva stages, or [BHŪMI](#). On this bhūmi, the bodhisattva engages in the perfection of morality ([ŚĪLAPĀRAMITĀ](#)) and is unstained by even subtle types of unwholesome actions performed by body, speech, or mind. It is said that from this bhūmi onward, the bodhisattva is untainted by killing, stealing, sexual misconduct, lying, divisive speech, harsh speech, senseless prattle, covetousness, harmful intent, or wrong views, even during dreams. He performs the ten virtues of protecting life, giving gifts, maintaining sexual ethics, speaking truthfully, speaking harmoniously, speaking kindly, speaking sensibly, nonattachment, helpful intent, and right views without the slightest taint of a conception of self ([ĀTMAGRAHA](#)). The bodhisattva remains on this stage until he is able to enter into all worldly forms of [SAMĀDHI](#).

Vimalakīrti. (T. Dri med grags pa; C. Weimojie; J. Yuimakitsu; K. Yumahil 維摩詰). Sanskrit proper name of a mythical Indian Buddhist layman. He is the subject of an eponymous sūtra that describes his victories in debates with elite [MAHĀYĀNA BODHISATTVAS](#). See [VĪMALAKĪRTINIRDEŚA](#).

Vimalakīrtinirdeśa. (T. Dri med grags pas bstan pa'i mdo; C. Weimo jing; J. Yuimagyō; K. Yuma kyōng 維摩經). In Sanskrit, “Vimalakīrti’s Instructions”; one of the most beloved Indian Mahāyāna sūtras, renowned especially for having a layman, the eponymous [VĪMALAKĪRTI](#), as its protagonist. The text probably dates from around the second century CE. Among the seven translations of the sūtra into Chinese, the most famous is that made by [KUMĀRAJĪVA](#) in 406. His translation seems to have been adapted to appeal to Chinese mores, emphasizing the worldly elements of Vimalakīrti’s teachings and introducing the term “filial piety” into the text. The sūtra was also translated by [XUANZANG](#) in 650. The sūtra was translated into Tibetan twice, the more famous being that of Chos nyid tshul khrims in the ninth century. It has also been rendered into Sogdian, Khotanese, and Uighur. The original Sanskrit of the text was lost for over a millennia until a Sanskrit manuscript was discovered in the [PO TALA](#) palace in Tibet in 2001. The narrative of the sūtra begins with the Buddha requesting that his leading [ŚRĀVAKA](#) disciples visit his lay disciple Vimalakīrti, who is ill. Each demurs,

recounting a previous meeting with Vimalakīrti in which the layman had chastised the monk for his limited understanding of the dharma. The Buddha then instructs his leading bodhisattva disciples to visit Vimalakīrti. Each again demurs until [MAÑJUŚRĪ](#) reluctantly agrees. Vimalakīrti explains that his sickness is the sickness of all sentient beings, and goes on to describe how a sick bodhisattva should understand his sickness, emphasizing the necessity of both wisdom ([PRAJÑĀ](#)) and method ([UPĀYA](#)). A large audience of monks and bodhisattvas then comes to Vimalakīrti's house, where he delivers a sermon on "inconceivable liberation" (acintyavimokṣa). Among the audience is [ŚĀRIPUTRA](#), the wisest of the Buddha's śrāvaka disciples. As in other Mahāyāna sūtras, the eminent śrāvaka is made to play the fool, repeatedly failing to understand how all dichotomies are overcome in emptiness ([ŚŪNYATĀ](#)), most famously when a goddess momentarily transforms him into a female. Later, a series of bodhisattvas take turns describing various forms of duality and how they are overcome in nonduality. Vimalakīrti is the last to be invited to speak. He remains silent and is praised for this teaching of the entrance into nonduality. The sūtra is widely quoted in later literature, especially on the topics of emptiness, method, and nonduality. It became particularly famous in East Asia because the protagonist is a layman, who repeatedly demonstrates that his wisdom is superior to that of monks. Scenes from the sūtra are often depicted in East Asian Buddhist art.

[Vimalamitra](#). (T. Dri med bshes gnyen). An Indian master revered in Tibet as one of the chief figures in the transmission of the [RDZOGS CHEN](#) teachings of the [RNYING MA](#) sect, especially of the "heart drop" ([SNYING THIG](#)) tradition. He is said to have received rdzogs chen teachings from both Jñānasūra and [ŚRĪSIMHA](#). According to legend, Vimalamitra transmitted these teachings to Tibet when he was invited (when he was supposedly already two hundred years old) to come to Tibet by King [KHRI SRONG LDE BTSAN](#), arriving either before or after the king's death in 799. He remained in Tibet for thirteen years, before leaving for China. While in Tibet, he collaborated in the translation of a number of texts from Sanskrit into Tibetan, including the [GUHYASAMĀJATANTRA](#), the [GUHYAGARBHATANTRA](#), and the [PRAJÑĀPĀRAMITĀHRDAYASŪTRA](#) ("Heart Sūtra"). Vimalamitra is especially renowned for his transmission of the teachings of the "instruction class" ([MANG NGAG SDE](#)), which were gathered in a collection named after him, the [BLMA SNYING THIG](#). He is also said to have concealed treasure texts (gter ma) at a hermitage above [BSAM YAS](#) monastery. The works attributed to

him preserved in the Tibetan canons are all tantric in subject matter, with two exceptions, a commentary on the SĀPTASĀHASRIKĀPRAJÑĀPĀRAMITĀSŪTRA (“Perfection of Wisdom in Seven Hundred Lines”) and a commentary on the *Prajñāpāramitāhṛdayasūtra*. Both are straightforward exegetical works, which prompted the Tibetan historian ’Gos lo tsā ba to report in his [DEB THER SNGON PO](#) (“Blue Annals”) that these commentaries were not the product of the tantric master revered in Rnying ma, and that in fact there must have been two Vimalamitras.

[Vimalaprabhā](#). (T. Dri med ’od). In Sanskrit, “Stainless Light,” the most important commentary on the [KĀLACAKRATANTRA](#). It is traditionally attributed to Puṇḍarīka, one of the kings of [ŚAMBHALA](#).

[Vīmaṃsakasutta](#). (C. Qiu jie jing; J. Gugekyō; K. Kuhae kyōng 求解經). In Pāli, “Discourse on Investigation”; the forty-seventh sutta in the [MAJJHIMANIKĀYA](#) (a separate [SARVĀSTIVĀDA](#) recension appears as the 186th [SŪTRA](#) in the Chinese translation of the [MADHYAMĀGAMA](#)); delivered by the Buddha to a gathering of monks in the [JETAVANA](#) grove at the town of Sāvatti ([ŚRĀVASTĪ](#)). In this sutta, the Buddha describes specific means by which it may be determined whether or not the [TATHĀGATA](#) has in fact attained buddhahood. He directs the inquirer to rely on what he has seen and heard to determine whether the tathāgata possesses any defiled states, mixed states, or impure states; whether he possesses wholesome states; and whether he is free from the dangers of renown and fame, free from fear and sexual passion, and free from contempt for others due to their failings. Finally the Buddha states that the monk gains true confidence in the three jewels ([RATNATRAYA](#)) by learning the Buddha’s teachings and confirming their truth through direct experience born of practice.

[Vimānavatthu](#). In Pāli, “Accounts of the Celestial Abodes,” the sixth book of the Pāli [KHUDDAKANIKĀYA](#). The text contains accounts of the heavenly abodes (P. vimāna, lit. “mansion, palace”) of various divinities ([DEVA](#)), which they acquired as rewards for meritorious deeds performed in previous lives. Its eighty-three stories were told to Moggallāna ([MAHĀMAUDGALYĀYANA](#)) and other saints during their sojourns in celestial realms, who in turn related them to the Buddha. The *Vimānavatthu* appears in the Pali Text Society’s English translation series as *Stories of the Mansions*.

[vimokṣa](#). (P. vimokkha; T. rnam par thar pa; C. jietuo; J. gedatsu; K. haet’al 解脫)

). In Sanskrit, “liberation” or “deliverance”; the state of freedom from rebirth, achieved by the [ŚRĀVAKA](#), [PRATYEKABUDDHA](#), or [BODHISATTVA](#) paths ([MĀRGA](#)). In mainstream Buddhist literature, this liberation is said to be of three types, corresponding to the three “doors to deliverance” ([VIMOKSAMUKHA](#)): (1) emptiness ([ŚUNYATĀ](#)), (2) signlessness ([ĀNIMITTA](#)), and (3) wishlessness ([APRANIHITA](#)). Another set of eight grades of liberation (vimokṣa) is associated with the attainment of meditative absorption ([DHYĀNA](#)). In Pāli sources, these grades refer to eight levels in the extension of consciousness that accompany the cultivation of increasingly more advanced states of dhyāna (P. [JHĀNA](#)). The eight grades are (1) the perception of material form ([RŪPA](#)) while remaining in the subtle-materiality realm; (2) the perception of external material forms while not perceiving one’s own form; (3) the development of confidence through contemplating the beautiful; (4) passing beyond the material plane with the idea of “limitless space,” one attains the plane of limitless space ([ĀKĀŚĀNANTYĀYATANA](#)), the first level of the immaterial realm; (5) passing beyond the plane of limitless space with the idea of “limitless consciousness,” one attains the plane of limitless consciousness ([VIJÑĀNĀNANTYĀYATANA](#)); (6) passing beyond the plane of limitless consciousness with the idea “there is nothing,” one attains the plane of nothingness ([ĀKIÑCANYĀYATANA](#)); (7) passing beyond the plane of nothingness one attains the plane of neither perception nor nonperception ([NAIVASAMJÑĀNĀSAMJÑĀYATANA](#)); and (8) passing beyond the plane of neither perception nor nonperception one attains the cessation of consciousness (viz., [NIRODHASAMĀPATTI](#)). In the Mahāyāna [ABHIDHARMA](#), it is said that the first two grades enable bodhisattvas to manifest different forms for the sake of others, the third controls their attitude toward those forms (by seeing that beauty and ugliness are relative), and the remaining five enable them to live at ease in order to help others.

[vimoksamārga](#). (S). See [VIMUKTIMĀRGA](#).

[vimokṣamukha](#). (P. vimokkhamukha; T. mnam par thar pa’i sgo; C. jietuo men; J. gedatsumon; K. haet’al mun 解脫門). In Sanskrit, “gates to deliverance,” or “doors of liberation”; three points of transition between the compounded ([SAMSKRTA](#)) and un compounded ([ASAMSKRTA](#)) realms, which, when contemplated, lead to liberation ([VIMOKSA](#)) and [NIRVĀNA](#): (1) emptiness ([ŚUNYATĀ](#)), (2) signlessness ([ĀNIMITTA](#)), and (3) wishlessness ([APRANIHITA](#)). The three are widely interpreted. In mainstream Buddhist materials, emptiness

(śūnyatā) entails the recognition that all compounded ([SAMSKRTA](#)) things of this world are devoid of any perduring self ([ĀTMAN](#)) and are thus unworthy objects of clinging. By acknowledging emptiness, the meditator is thus able to turn away from this world and instead advert toward nirvāṇa, which is uncompounded ([ASAMSKRTA](#)). Signlessness (ānimitta) is a crucial stage in the process of sensory restraint ([INDRIYASAMVARA](#)): as the frequent refrain in the [SŪTRAS](#) states, “In the seen, there is only the seen,” and not the superimpositions created by the intrusion of ego ([ĀTMAN](#)) into the perceptual process. Signlessness is produced through insight into impermanence ([ANITYA](#)) and serves as the counteragent ([PRATIPAKSA](#)) to attachments to anything experienced through the senses; once the meditator has abandoned all such attachments to the senses, he is then able to advert toward nirvāṇa, which ipso facto has no sensory signs of its own by which it can be recognized. Wishlessness is produced through insight into suffering ([DUHKHA](#)) and serves as the counteragent ([PRATIPAKSA](#)) to all the intentions (āśaya) and aspirations ([PRANIDHĀNA](#)) one has toward any compounded dharma. As the Buddha’s famous simile of the raft also suggests, the adept must finally abandon even the attachment to the compounded religious system that is Buddhism in order to experience nirvāṇa, the summum bonum of the religion. Once the meditator has abandoned all such aspirations, he will then be able to advert toward nirvāṇa, which ipso facto has nothing to do with anything that can be desired ([VAIRĀGYA](#)). ¶ In the [ABHIDHARMAKOŚABHĀSYA](#), the three are explained in terms of three types of concentration ([SAMĀDHI](#)) on the sixteen aspects of the [FOUR NOBLE TRUTHS](#). The four aspects of the first truth, of suffering ([DUHKHASATYA](#)), are impermanence, misery, emptiness, and selflessness. The four aspects of the second truth, origination ([SAMUDAYASATYA](#)), are cause, origination, strong production, and condition. The four aspects of the third truth, cessation ([NIRODHASATYA](#)), are cessation, pacification, exaltedness, and emergence. The four aspects of the fourth truth, path ([MĀRGASATYA](#)), are path, suitability, achievement, and deliverance. According to the *Abhidharmakośabhāṣya*, the samādhi associated with signlessness observes the four aspects of cessation; the samādhi of emptiness observes emptiness and selflessness, two of the four aspects of suffering; and the samādhi of wishlessness observes the remaining ten aspects. ¶ In [YOGĀCĀRA](#) texts, such as the [MAHĀYĀNASAMGRAHA](#), emptiness, wishlessness, and signlessness are related to the three natures ([TRISVABHĀVA](#)) of the imaginary ([PARIKALPITA](#)), the dependent ([PARATANTRA](#)), and the consummate ([PARINISPANNA](#)), respectively. In the [MAHĀYĀNASŪTRĀLAMKĀRA](#), it is said that the samādhi of emptiness

understands the selflessness of persons and phenomenal factors ([DHARMA](#)), the samādhi of wishlessness views the five aggregates ([SKANDHA](#)) as faulty, and the samādhi of signlessness views nirvāṇa as the pacification of the aggregates. Elsewhere in that text, the three are connected to the four seals ([CATURMUDRĀ](#)) that certify a doctrine as Buddhist. The statements “all compounded factors are impermanent” and “all contaminated things are suffering” are the cause of the samādhi of wishlessness. “All phenomena are devoid of a perduring self” is the cause of the samādhi of emptiness. “Nirvāṇa is peace” is the cause of the samādhi of signlessness. According to another interpretation, emptiness refers to the lack of a truly existent entity in phenomena, signlessness refers to the lack of a truly existent cause, and wishlessness refers to the lack of a truly existent effect.

[Viṃśatikā](#). (T. Nyi shu pa; C. Weishi ershi lun; J. Yuishiki nijūron; K. Yusik isip non 唯識二十論). The “Twenty,” also known as *Viṃśatikāvijñaptimātratāsiddhikārikā*, the “Twenty Stanzas Proving Representation-Only,” one of the most influential independent (i.e., noncommentarial) works of the fourth-or fifth-century Indian master [VASUBANDHU](#). A short work in twenty verses, it outlines the basic position of the [YOGĀCĀRA](#) regarding the status of external objects, arguing that such objects do not exist apart from the consciousness that perceives them. He argues, for example, that the fact that objects appear to exist in an external world is not proof of that existence, since an external world also appears to exist in dreams. Therefore, all external phenomena are merely projections of consciousness ([VIJÑĀNA](#)) and thus are representation-only ([VIJÑAPTIMĀTRATĀ](#)).

[vimśatiprabhedasamgha](#). (T. dge 'dun nyi shu; C. ershi sengqie/shengwen cidi; J. nijūsōgya/shōmonshidai; K. isip sūngga/sōngmun ch'aje 二十僧伽/聲聞次第). In Sanskrit, “the twenty varieties of the [SAMGHA](#)” or “twenty members of the community”; a subdivision of the eight noble persons ([ASTĀRYAPUDGALA](#)) into twenty based on different faculties ([INDRIYA](#)) and the ways in which they reach [NIRVĀNA](#); a subdivision used in Mahāyāna works, particularly in the [PRAJÑĀPĀRAMITĀ](#) literature, as a template to further identify as many as forty-eight [ĀRYA BODHISATTVAS](#). Only those who have reached the noble path ([ĀRYAMĀRGA](#)) or the religious life (śrāmaṇya) that begins with the path of vision ([DARŚANAMĀRGA](#)) are included in this idealized samgha. The twenty varieties are based on the eight noble persons, two for each of the four fruits of the noble path or religious life ([ĀRYAMĀRGAPHALA](#); [ŚRĀMANYAPHALA](#)). The four fruits, from lowest to highest, are stream-enterer ([SROTAĀPANNA](#)), once-returner ([SAKRDĀGĀMIN](#)), nonreturner ([ANĀGĀMIN](#)), and worthy one ([ARHAT](#)). For each there is one who enters ([SROTAĀPANNAPRATIPANNAKA](#), etc.) and one who abides ([SROTAĀPANNAPHALASTHA](#), etc.) in a particular fruition. This list also includes the seven noble persons (P. ariyapuggala; S. [ĀRYAPUDGALA](#)) as found in the [MAJJHIMANIKĀYA](#). They are (1) the follower of faith (P. saddhānusāri; S. [ŚRADDHĀNUSĀRIN](#)); (2) the one liberated through faith (P. saddhāvimutta; S. [ŚRADDHĀVIMUKTA](#)); (3) the bodily witness (P. kāyasakkhi; S. [KĀYASĀKSIN](#)); (4) the one liberated both ways (P. ubhatobhāgavimutta; S. [UBHAYATOBHĀGAVIMUKTA](#)); (5) the follower of the dharma (P. dhammānusāri; S. [DHARMĀNUSĀRIN](#)); (6) the one who has attained understanding (P. diṭṭhippatta; S. [DRSTIPRĀPTA](#)); and (7) the one liberated through wisdom (P. paññāvimutta; S. [PRAJÑĀVIMUKTA](#)).

The list of the twenty according to the [MAHĀVYUTPATTI](#) is:

1. Stream-enterer ([SROTAĀPANNA](#))
2. One who takes up to seven existences ([SAPTAKRDBHAVAPARAMA](#))
3. One who goes from family to family ([KULAMKULA](#))
4. Once-returner ([SAKRDĀGĀMIN](#))
5. One who has a single obstacle ([EKAVICITA](#))
6. Nonreturner ([ANĀGĀMIN](#))
7. One who achieves nirvāṇa in the intermediate state ([ANTARĀPARINIRVĀYIN](#))
8. One who achieves nirvāṇa at birth ([UPAPADYAPARINIRVĀYIN](#))
9. One who achieves nirvāṇa through effort ([SĀBHISAMSKĀRAPARINIRVĀYIN](#))
10. One who achieves nirvāṇa without effort ([ANABHISAMSKĀRAPARINIRVĀYIN](#))
11. One who goes higher ([ŪRDHVASROTAS](#))
12. Bodily witness ([KĀYASĀKSIN](#))
13. Follower through faith

- ([ŚRADDHĀNUSĀRIN](#)) 14. Follower through doctrine ([DHARMĀNUSĀRIN](#))
 15. One who has aspired through faith ([ŚRADDHĀDHIMUKTA](#)) 16. One who attains through seeing ([DRSTIPRĀPTA](#)) 17. One who is liberated dependent upon particular occasions ([SAMAYAVIMUKTA](#)).
 18. One who is liberated regardless of occasion ([ASAMAYAVIMUKTA](#)) 19. One who is liberated through wisdom ([PRAJÑĀVIMUKTA](#)) 20. One who is liberated through both ways ([UBHAYATOBHĀGAVIMUKTA](#))

Of these twenty, the first three are subdivisions of the first fruit, the next two of the second fruit, the sixth to twelfth of the third fruit, and the last two subdivisions of the fourth fruit of the [ARHAT](#). The remaining are more general categories. For detailed explanations, see each individual entry.

[vimukti](#). (P. vimutti; T. rnam par grol ba; C. jietuo; J. gedatsu; K. haet'al 解脱). In Sanskrit, "liberation." See [VIMOKSA](#).

[vimuktimārga](#). (T. rnam par grol ba'i lam; C. jietuodao; J. gedatsudō; K. haet'alto 解脱道). In Sanskrit, "path of liberation"; a technical term that refers to the second of a two-stage process of abandoning the afflictions ([KLEŚA](#)). As one proceeds from the path of vision ([DARŚANAMĀRGA](#)) to the adept path where there is nothing more to learn ([AŚAIKSAMĀRGA](#)), the kleśas are abandoned in sequence through repeated occasions of yogic direct perception ([YOGIPRATYAKSA](#)), consisting of two moments. The first is called the [ĀNANTARYAMĀRGA](#) (uninterrupted path), in which the specific kleśa or set of kleśas is actively abandoned; this is followed immediately by the [vimuktimārga](#) [alt. [vimokṣamārga](#)], which is the state of having abandoned, and thus being liberated from, the kleśa.

[Vimuktisena](#). [alt. Ārya Vimuktisena] (T. Grol sde). An Indian scholar-monk (likely from the sixth century CE) who is the author of the first extant commentary (vṛtti) on the [ABHISAMAYĀLAMKĀRA](#), a work associated with the name of [MAITREYA](#) or [MAITREYANĀTHA](#), the most influential [PRAJÑĀPĀRAMITĀ](#) commentary for Indian and Tibetan Buddhism. Vimuktisena connects the *Abhisamayālaṃkāra* to the [PAÑCAVIMŚATISĀHASRIKĀPRAJÑĀPĀRAMITĀ](#) ("Perfection of Wisdom in Twenty-five Thousand Lines"), making the otherwise cryptic *Abhisamayālaṃkāra* comprehensible. In scholastic Tibetan Buddhism his name is linked with the Yogācāra-Madhyamaka synthesis, but Vimuktisena's view is more closely aligned to [MADHYAMAKA](#), without the distinctive

terminology associated with the [PRAMĀNA](#) school of [DIGNĀGA](#) and [DHARMAKĪRTI](#).

***Vimuttimagga.** (T. Rnam grol gyi bstan bcos; C. Jietuodao lun; J. Gedatsudōron; K. Haet’alto non 解脫道論). In Pāli, “Treatise on the Path to Liberation”; an Indian [ABHIDHARMA](#) treatise attributed to Upatissa (S. *Upatisya). The *Vimuttimagga* was composed sometime prior to the fifth century, perhaps in northern India. It is no longer extant in its Indian recension, but was translated into Chinese in its entirety in 505; portions were also translated into Tibetan. The original language of the text is uncertain, and is usually known by its putative Pāli title (its Sanskrit reconstruction would be **Vimuktimārga*). It is clear that the work was known to the Pāli exegete [BUDDHAGHOSA](#), who made use of it in composing his [VISUDDHIMAGGA](#), although he does not cite it by name. Like the *Visuddhimagga*, the **Vimuttimagga* sets forth the path in terms of the three trainings in morality (P. *sīla*; S. [ŚĪLA](#)), meditation ([SAMĀDHI](#)), and wisdom (P. *paññā*; S. [PRAJÑĀ](#)). The **Vimuttimagga* is, however, a much shorter text, omitting the illustrative stories Buddhaghosa offers and including a more succinct section on *prajñā*. While the *Visuddhimagga* is regarded as a text delivering the doctrine of the conservative [MAHĀVIHĀRA](#) branch of the Sri Lankan Pāli tradition, the **Vimuttimagga* is thought to represent instead the views of the [ABHAYAGIRI](#) sect, a school that was influenced by [MAHĀYĀNA](#) thought.

vinaya. (T. ’dul ba; C. lü; J. ritsu; K. yul 律). In Sanskrit and Pāli, “discipline”; the corpus of monastic regulations, especially that directed at fully ordained monks ([BHIKSU](#)) and nuns ([BHIKSUNĪ](#)). The term is used by extension for those texts in which these codes are set forth, which form the “basket of the discipline” ([VINAYAPITAKA](#)) in the Buddhist canon ([TRIPITAKA](#)). According to an account in the *Sifen lü kaizongji*, by the Chinese vinaya master [DAOXUAN](#) (596–667), [UPAGUPTA](#), the fifth successor in the Buddha’s lineage about a century following his death, had five major disciples, who were said to have established their own schools based on their differing views regarding doctrine; these five also redacted separate recensions of the [VINAYA](#), which the Chinese refer to as “five recensions of the vinaya” (Wubu lü). These five vinayas are (1) the “Four-Part Vinaya” (C. [SIFEN LÜ](#); S. **Cāturvargīyavinaya*) of the [DHARMAGUPTAKA](#) school; (2) the “Ten-Recitations Vinaya” (C. *Shisong lü*; S. **Daśādhyāyavinaya*; [alt. **Daśabhāṇāvāravīnaya*]) of the [SARVĀSTIVĀDA](#) school; (3) the “Five-Part Vinaya” (C. *Wufen lü*; S. **Pañcavargikavinaya*) of the [MAHĪŚĀSAKA](#) school and

the **Prātimokṣavinaya* of the [KĀŚYAPĪYA](#) school; (4) the *[MAHĀSĀMGHIKA VINAYA](#) of the [MAHĀSĀMGHIKA](#) school; and (5) the [MŪLASARVĀSTIVĀDA VINAYA](#). All five of these recensions are extant in Chinese translation, but the *Sifen lü* (“Four-Part Vinaya”) of the Dharmaguptakas came to dominate the conduct of ecclesiastical affairs in East Asian Buddhism. The only vinaya to survive intact in an Indian language is the Pāli vinaya used in the [STHAVIRANIKĀYA](#) tradition; this vinaya compilation was unknown to the Chinese Tradition. The largest vinaya of them all, the Mūlasarvāstivāda vinaya, is a massive collection that is some four times longer than any of the other recensions. The entire collection is available in its Tibetan translation; portions of this vinaya were also translated in Chinese, and substantial fragments of its original Sanskrit version have survived. ¶ The vinayas are a rich source of Buddhist history because they describe the occasion surrounding the formulation of each of the myriads of rules of conduct and deportment promulgated by the Buddha. It is said that the Buddha made a new rule only after the commission of an infraction that would need to be prevented in the future, so the vinayas are careful to recount, in sometimes embarrassing detail, the specific events leading up to the Buddha’s formulation of the rule. These accounts therefore provide important insights into issues facing the monastic institutions of India. The principal rules of monastic life are contained in the [PRĀTIMOKSA](#), which presents rosters of offenses of varying gravity, with penalties ranging from expulsion from the order for the most serious to mere confession for the more minor ones. The most serious offenses, called [PĀRĀJIKA](#), or “defeat,” and requiring expulsion according to some vinaya traditions, were four for monks: sexual misconduct (defined in the case of a monk as the penetration of an orifice to the depth of a mustard seed), theft, the killing of a living being, and lying about spiritual attainments. (Even for such serious misdeeds, however, some vinayas prescribe procedures for possible reinstatement; see [ŚIKSĀDATTAKA](#).) In the Mūlasarvāstivāda vinaya, there were 253 total rules to be followed by monks, 364 for nuns. The majority of these rules were matters of etiquette and decorum meant to ensure harmonious relations within the monastic institution and with lay patrons. The *prātimokṣa* was recited fortnightly in the [UPOSADHA](#) ceremony. A second major part of the vinaya is the [VIBHAṄGA](#), or explanation of each rule, explaining the circumstances of its formulation and the conditions under which a violation does and does occur. A third part was called the [VINAYAVASTU](#) or [KHANDAKA](#), separate sections (ranging between seventeen and twenty in number) on various topics such as ordination, the rains retreats, bedding, robes, and the use of medicine.

Although sometimes regarded simply as a collection of regulations, the various vinaya texts are an essential part of Buddhist literature. Many of the vinayas, but especially the Mūlasarvāstivāda vinaya, also include enormous numbers of narrative tales and ancillary materials, including texts that in other traditions would have been collected in the [SŪTRAPITAKA](#).

[Vinayamūlasūtra](#). Another name for [GUNAPRABHA](#)'s [VINAYASŪTRA](#). See [VINAYASŪTRA](#).

[vinayapitaka](#). (T. 'dul ba'i sde snod; C. lüzang; J. ritsuzō; K. yulchang 律藏). In Sanskrit and Pāli, “basket of discipline” or the “collection of discipline”; one of the three “baskets” ([TRIPITAKA](#)), or divisions of Buddhist scripture, together with the [SŪTRAPITAKA](#) and the [ABHIDHARMAPITAKA](#). Although typically presumed to include just the rules and regulations of monastic conduct, the vinayapitaka is actually one of the richest sources for understanding Buddhist practice and institutions in India. It is said that the Buddha instituted a new rule only after the commission of some form of misconduct that he sought to prevent in the future, so the vinayas are careful to recount in great detail the circumstances leading up to the Buddha's promulgation of the rule. The vinayapitaka is therefore composed largely of narratives, some of considerable length; one of the earliest biographies of the Buddha appears in the vinaya of the [MŪLASARVĀSTIVĀDA](#) school (see [MŪLASARVĀSTIVĀDA VINAYA](#)). According to tradition, the redaction of the vinayapitaka occurred at the first Buddhist council ([SAMGĪTI](#); see [COUNCIL, FIRST](#)), shortly after the Buddha's death, when a group of [ARHAT](#)s assembled to recite the Buddha's teachings. There, the monk [UPALI](#), considered an expert in the monastic code, was called upon to recite the vinaya. However, assuming that such a recitation occurred, disputes soon arose over what was allowable conduct according to the rules and regulations included in the vinayapitaka. At the time of his death, the Buddha told [ĀNANDA](#) that, after his death, the minor rules could be disregarded. At the first council, he was asked what those minor rules were, and Ānanda admitted that he had failed to ask. All rules were therefore retained, and his failure to ask was one of his errors requiring a confession of wrongdoing. The eventual division into the traditional eighteen [MAINSTREAM BUDDHIST SCHOOLS](#) often centered on questions of vinaya practice and conduct. There is, therefore, no single vinayapitaka, but a number of vinayapitakas, with the precise content determined by the specific Indian school. To give one example, the Pāli vinayapitaka, which was perhaps redacted around the first century CE, is

composed of the following three major divisions: (1) [SUTTAVIBHAṄGA](#) (S. *sūtravibhaṅga*; cf. [VINAYAVIBHAṄGA](#)), which includes the *pāṭimokkha* (S. [PRĀTIMOKSA](#)) code with explanations and commentary, including the *mahāvibhaṅga* with the rules for monks and the *bhikkhuṇīvibhaṅga* with the rules for nuns; (2) [KHANDHAKA](#) (S. *skandhaka*; cf. [VINAYAVASTU](#)), which is subdivided between the [MAHĀVAGGA](#), which includes chapters on such topics as the procedure for the ordination of monks, the fortnightly observances (P. *uposatha*; S. [UPOSADHA](#)), the rains retreat, the use of clothing, food, medicine, and so forth, and the [CŪLAVAGGA](#), which includes a variety of judicial rules, procedures for the ordination of nuns, and accounts of the first and second Buddhist councils; and (3) [PARIVĀRA](#), an appendix that provides a summary and classification of the rules of monastic conduct. ¶ Numerous vinaya texts were translated into Chinese, including complete (or near-complete) vinayapiṭakas associated with five of the mainstream schools of Indian Buddhism. In the order of their translation dates, these five are (1) “Ten-Recitations Vinaya” (C. *Shisong lü*; C. **Daśabhāṇavāravīnaya*; **Daśādhyāyavīnaya*) of the [SARVĀSTIVĀDA](#) school, perhaps composed sometime between the first and third centuries CE and translated into Chinese between 404 and 409 CE; (2) [DHARMAGUPTAKA](#) vinaya, the renowned “Four-Part Vinaya” ([SIFEN LÜ](#)), translated between 410 and 412 CE, which becomes the definitive recension of the vinaya in the East Asian traditions and the focus of scholarship in the different East Asian vinaya schools (see [NANSHAN LÜ ZONG](#), [DONGTA LÜ ZONG](#), [RISSHÜ](#)); (3) [MAHĀSĀMGHIKA](#) vinaya (*Mohesengji lü*), composed between 100 and 200 CE and translated between 416 and 418; (4) [MAHĪMŚĀSAKA](#) vinaya, or the “Five-Part Vinaya” (*Wufen lü*), perhaps composed in the first century BCE and translated between 422 and 423; and (5) the [MŪLASARVĀSTIVĀDA](#) vinaya, perhaps composed in the fourth or fifth century CE and translated into Chinese between 703 and 713. (The complete Tibetan translation of this vinaya becomes definitive for Tibetan Buddhism). ¶ It is important to note that the texts contained in the vinayapiṭaka of any school have served as just one source of the monastic code. In China, no complete recension of any Indian vinaya was translated until the beginning of the fifth century. (Indeed, none of the surviving recensions of the vinayas of any Buddhist school can be dated prior to the fifth century CE.) When the Indian vinayas were translated into Chinese, for example, their regulations were viewed as being so closely tied to the customs and climate of India that they were sometimes found either incomprehensible or irrelevant to the Chinese. This led to the composition of indigenous Chinese monastic codes,

called *guishi* (“regulations”) or [QINGGUI](#) (“rules of purity”), which promulgated rules of conduct for monks and nuns that accorded more closely with the realities of life in East Asian monasteries. In Tibet, the [VINAYASŪTRA](#) by [GUNAPRABHA](#), a medieval Indian summary of the much larger Mūlasarvāstivāda vinaya, was the primary source for the monastic code, but each monastery also had its own regulations ([BCA’ YIG](#)) that governed life there. See also [PRĀTIMOKSASŪTRA](#).

[Vinayasūtra](#). (T. ’Dul ba’i mdo). In Sanskrit, “Discourse on Discipline”; a work on the monastic code by the Indian master [GUNAPRABHA](#), who is dated between the fifth and seventh century CE. Despite its title, the work is not a [SŪTRA](#) (in the sense of a discourse ascribed to the Buddha), but instead is an authored work composed of individual aphoristic statements (sūtras). The text offers a summary or condensation of the massive [MŪLASARVĀSTIVĀDA VINAYA](#). At approximately one quarter the length of this massive vinaya collection, Guṇaprabha’s abridgment seems to have functioned as a kind of primer on the monastic code, omitting lengthy passages of scripture and providing the code of conduct to which monks were expected to subscribe. In this sense, the text is an important work for determining what monastic practice may actually have been like in medieval India. The *Vinayasūtra* became the most important vinaya text for Tibetan Buddhism, being studied in all of the major sects. In the [DGE LUGS](#), it is one of the five books (GZHUNG LNGA) that served as the basis of the monastic curriculum. The detailed commentaries on the *Vinayasūtra* by the Pāla dynasty writer Dharmamitra (early ninth century) and the [BKA’ GDAM PA](#) master Tsho sna ba Shes rab bzang po’s (b. thirteenth century) were widely studied.

[vinayavastu](#). (T. ’dul ba’i gzhi; C. pinaiye shi; J. binayaji; K. pinaya sa 毘奈耶事). In Sanskrit, “foundation of the vinaya”; that section of the Sanskrit vinayas that corresponds to the [KHANDHAKA](#) (S. skandhaka) in the Pāli vinaya. This section consists of separate chapters (ranging in number from seventeen to twenty) on individual topics related to monastic life, including the procedures for ordination, the proper performance of the rains retreat, the [KATHINA](#) ceremony, and rules concerning the acquisition, use, and disposal of monastic robes ([CĪVARA](#)), foodstuffs, and medicines.

[vinayavibhaṅga](#). (T. ’dul ba mam par ’byed pa; C. Genben Shuoyiqieyoubu pinaiye; J. Konpon Setsuissaiubu binaya; K. Kūnbon Sōrilch’eyubu pinaya 根本說一切有部毘奈耶). In Sanskrit, lit. “Differentiation of the Discipline”; a major

division of Sanskrit [VINAYA](#) literature, corresponding to the [SUTTAVIBHAṄGA](#) in the Pāli [VINAYAPITAKA](#). The primary foci of such sections are the disciplinary rules for monks ([PRĀTIMOKSA](#)), the exact number of which varies according to the tradition. The vinayavibhaṅga of the [MŪLASARVĀSTIVĀDA](#) vinaya (to which the Sinographs above correspond), for example, lists 253 such rules. Each rule is accompanied by a description of the appropriate response to its violation. These sanctions may range from possible expulsion from the order, as with the rules of “defeat” ([PARAJIKA](#)), to simple confession of the misdeed during the fortnightly recitation of the rules ([UPOSADHA](#)). The narrative form used to convey these rules follows that of most other vinaya literature, describing the circumstances that led to the Buddha’s declaration of a particular rule. Just as the Pāli vinaya begins with a section of this type, the vinayas of the [SARVĀSTIVĀDA](#) and Mūlasarvāstivāda schools also begin with sections entitled vinayavibhaṅga. In both of these vinayas, a formal listing of the rules is followed by commentary and narratives that explain each rule more fully. These accounts provide important and often surprising insights into the concerns of Indian Buddhist monastic life.

[Vinītaruci](#). (V. Tỳ Ni Đa Lưu Chi 毗尼多流支) (d. 594). The Sanskrit name of an Indian monk who is traditionally regarded as the founder of the first school of [THIÊN \(CHAN\)](#) in Vietnam. The Vietnamese genealogical history [THIÊN UYỂN TẬP ANH](#) records that Vinītaruci was a brāhmaṇa from south India who wandered throughout India as a young man searching for the essence of the Buddhist teaching. He is reputed to have arrived in China in 574, where he went to see the third Chan patriarch [SENGCAN](#), who offered him instruction before advising him to go south. Vinītaruci then traveled to Zhizhi monastery in Guangzhou, where he remained for six years and translated many Buddhist texts. In 580, he arrived in Vietnam and settled at Pháp Vân monastery, where he subsequently transmitted the mind-seal (XINYIN) to Pháp Hiển (died 626), who carried on this Chan lineage associated with the third patriarch. He passed away sometime in 595. The Vinītaruci mentioned in the *Thiền Uyển Tập Anh* is undoubtedly the same Indian monk whose name is mentioned in Chinese Buddhist literature as a translator; however, it remains unclear whether Vinītaruci ever really came to Vietnam, as the Vietnamese Buddhist tradition reports. In any case, there are no historical grounds for the claim that he was the founding patriarch of a Chan lineage in Vietnam or to attribute to him the teaching style emblematic of the Southern school of Chan ([NAN ZONG](#)), which

did not appear until centuries after his death.

vinīyata. (T. yul nges; C. biejing [xinsuo]; J. betsuikyō [no shinjo]; K. pyōlgyōng [simso] 別境[心所]). In Sanskrit, “determinative,” or “object-specific”; the second of the six categories of mental concomitants ([CAITTA](#)) according to the hundred dharmas ([BAIFA](#)) schema of the [YOGĀCĀRA](#) school, along with the omnipresent ([SARVATRAGA](#)), the wholesome ([KUŚALA](#)), the root afflictions ([MŪLAKLEŚA](#)), the secondary afflictions ([UPAKLEŚA](#)), and the indeterminate ([ANİYATA](#)). There are five mental factors in the category of determinative mental concomitants; their function is to aid the mind in ascertaining or determining its object. The five are aspiration or desire-to-act ([CHANDA](#)), determination or resolve ([ADHIMOKṢA](#)), mindfulness ([SMṚTI](#)), concentration ([SAMĀDHI](#)), and wisdom ([PRAJÑĀ](#)). According to [AŚAṄGA](#), these five determinative factors accompany wholesome (kuśala) states of mind, so that if one is present, all are present.

vipāka. (T. nam par smin pa; C. guobao/yishu; J. kahō/ijuku; K. kwabo/isuk 果報/異熟). In Sanskrit and Pāli, lit. “ripening,” thus “maturation,” “fruition,” or “result”; referring specifically to the “maturation” of past deeds ([KARMA](#)). Vipāka refers to any mental phenomenon that occurs as a result of a morally wholesome or unwholesome volitional action performed by body, speech, or mind, either in this or previous lives. Fruitions can be divided between those that occur during the lifetime in which the deed is performed, those that occur in the lifetime immediately following the lifetime in which the deed is performed, and those that occur two or more lifetimes later. Although the fruition is the result of a wholesome or unwholesome act, the vipāka itself is always morally neutral and manifests itself as something pleasant or painful that is either physical or mental. Vipāka is a subset of the related term “fruition” ([PHALA](#)); in the context of moral cause and effect, the ripening of moral causes is called the [VIPĀKAPHALA](#), which is one of the five types of effects or fruitions (phala) described in the [VAIBHĀSIKA](#) school of [SARVĀSTIVĀDA ABHIDHARMA](#); in that context vipākaphala is limited to effects, such as the body and so on, that last from the first moment to the last moment of a life. In the [MAHĀYĀNA](#) in general, the term also appears (with other forms of the verbal root √pac, “to cook”) in the sense of “maturation,” to refer to the power of buddhas and [BODHISATTVA](#)s to “ripen” beings in their progress along the path ([MĀRGA](#)).

vipākahetu. (T. nam smin gyi rgyu; C. yishu yin; J. ijukuin; K. isuk in 異熟因). In Sanskrit and Pāli, lit. “ripening cause”; the “retributive cause” that leads to

either wholesome or unwholesome karmic retribution ([VIPĀKAPHALA](#)); one of the six types of causes ([HETU](#)) described in the [VAIBHĀSIKA](#) school of [SARVĀSTIVĀDA ABHIDHARMA](#) and by [VASUBANDHU](#) in the [ABHIDHARMAKOŚABHĀSYA](#). The vipākahetu refers to the karmic seeds of either wholesome ([KUŚĀLA](#)) deeds ([KARMA](#)) that are tainted by ignorance ([AVIDYĀ](#)), or of unwholesome ([AKUŚĀLA](#)) deeds; neutral actions cannot serve as retributive causes. These deeds have the potency to ripen, even at some point in the distant future, as vipākaphala, specifically as the aggregates ([SKANDHA](#)) of a future lifetime, producing the physical body ([RŪPA](#)), the six types of consciousness ([VIJÑĀNA](#)), and sensations ([VEDANĀ](#)). According to some schools, the retributive cause is essentially identical to volition ([CETANĀ](#)), since it is the force that initiates action. The goal of the eightfold path ([ĀRYĀSTĀṄGAMĀRGA](#)) is to end the generation of such causes and thereby exhaust the karmic forces that bind one to [SAMŚĀRA](#).

[vipākaphala](#). (T. nam smin gyi 'bras bu; C. yishu guo; J. ijukuka; K. isuk kwa 異熟果). In Sanskrit, lit. “ripened fruit,” viz., “retributive effect”; one of the five types of effects or fruitions ([PHALA](#)) described in the [VAIBHĀSIKA](#) school of [SARVĀSTIVĀDA ABHIDHARMA](#), as well as by [VASUBANDHU](#) in the [ABHIDHARMAKOŚABHĀSYA](#). These are karmic effects of either wholesome ([KUŚĀLA](#)) deeds ([KARMA](#)) that are tainted by ignorance ([AVIDYĀ](#)), or of unwholesome ([AKUŚĀLA](#)) deeds; neutral actions do not produce ripened effects. These effects, the results of the [VIPĀKAHETU](#), ripen, even at some point long after the performance of the specific deed, as the aggregates ([SKANDHA](#)) of a future lifetime, producing the physical body ([RŪPA](#)), the six types of consciousness ([VIJÑĀNA](#)), and sensations ([VEDANĀ](#)). The vipākaphala is the ultimate and inevitable effect of the “retributive cause” (vipākahetu): in a metaphor used in the tradition, the retributive cause is the seed that grows into the fruit-bearing tree that is the retributive effect.

[vipakṣa](#). [alt. vipakṣabhūta] (T. mi mthun phyogs; C. yipin/suoduizhi; J. ihon/shotaiji; K. ip'um/sodaech'i 異品/所對治). In Sanskrit, “opposite class”; referring to a category that is the opposite of another category, such that one must be absent for the other to be present. The term appears especially in two contexts in Buddhist literature. First, in Buddhist logic ([HETUVIDYĀ](#)), vipakṣa is one of three terms: [PAKṢA](#) (logical subject), [SAPAKṢA](#) (similar instance), and vipakṣa (dissimilar instance). For example, in the syllogism ([PRAYOGA](#)) “sound is impermanent because it is produced,” sound is the pakṣa. A pot would be an

example or sapakṣa (a “similar instance” or “in the similar class;” knowledge that a pot breaks because it is produced can be extended to sound). Space would be a counterexample or vipakṣa (a dissimilar instance or in the dissimilar class; knowledge that it is not produced because it is permanent can be extended to exclude a sound from the dissimilar class because it is articulated and produced). Second, in Buddhist literature on the practice of the path ([MĀRGA](#)), vipakṣa is contrasted with [PRATIPAKṢA](#) (“counteracting force” or “antidote”) to the afflictions ([KLEŚA](#)). For example, the opposing class of hatred ([DVESA](#)) is counteracted by loving-kindness ([MAITRĪ](#)), such that meditation on loving-kindness temporarily displaces hatred from the mind but does not permanently remove it, as does a pratipakṣa.

[vipariṇāmaduḥkhatā](#). (P. vipariṇāmadukkha; T. ’gyur ba’i sdug bsngal; C. huaiku; J. eku; K. koego 壞苦). In Sanskrit, “suffering associated with change”; the second of the three types of suffering, along with [DUHKHADUHKHATĀ](#) (“physical and mental suffering”) and [SAMSKĀRADUHKHATĀ](#) (“suffering intrinsic to conditioned existence itself”). This type of suffering is defined as feelings of mental and physical pleasure that inevitably turn into pain if the activity that produces them is continued indefinitely, such as overindulging in delicious food, staying out in the sun too long, or sitting in the same posture for hours on end. The Buddhist claim is that pain and pleasure are qualitatively different: painful feelings will continue to be painful unless some further action is taken to assuage the pain, whereas pleasurable feelings will become painful if one persists in engaging in the activity that produces the pleasure. For example, after walking for a long distance, walking becomes painful, at which point it is pleasurable to sit down. After sitting for a long period of time, sitting becomes painful, and it is pleasurable to stand up and walk. Feelings of pleasure are thus a type of suffering, because they will inevitably revert to pain. An example is pouring cold water on a burn; after a moment of relief, the burning sensation will return. In the same way, feelings of pleasure are merely a brief lessening of pain.

[viparyāsa](#). (P. vipallāsa; T. phyin ci log; C. diandao; J. tendō; K. chōndo 顛倒). In Sanskrit, lit. “inversion,” but referring to “perverted,” “corrupted,” or “inverted” views (the Chinese translation diandao literally means “upside down”) or simply “error.” There is a standard list of four “inverted views” that cause sentient beings to remain subject to the cycle of rebirth ([SAMŚĀRA](#)). The four are (1) to view as pleasurable what is in fact painful or suffering ([DUHKHA](#)),

(2) to see as permanent what is in fact impermanent ([ANITYA](#)), (3) to see as pure what is in fact impure ([AŚUBHA](#)), and (4) to see as having self what is in fact devoid of self ([ANĀTMAN](#)). These four inversions are corrected through insight into the true nature of reality, which prompts the realization that the aggregates ([SKANDHA](#)) are in fact suffering, impermanent, impure, and devoid of self. In the [TATHĀGATAGARBHA](#) literature, these four putatively correct views are in turn said also to be inversions from the standpoint of the tathāgatagarbha, which is said to possess four perfect qualities ([GUNAPĀRAMITĀ](#)): bliss, permanence, purity, and selfhood.

vipassanā. In Pāli, “insight” (see also S. [VIPĀŚYANĀ](#)). Insight is defined as the direct intuition of the three marks (P. tilakkhaṇa; S. [TRILAKSANA](#)) of existence that characterize all phenomena: P. aniccā (S. [ANITYATĀ](#)) or impermanence, dukkha (S. [DUHKHA](#)) or suffering, and anatta (S. [ANĀTMAN](#)) or nonself. Insight associated with the attainment of any of the eight noble paths and fruits (P. ariyamaggaphala; S. [ĀRYAMĀRGAPHALA](#)) or associated with the attainment of cessation ([NIRODHASAMĀPATTI](#)) is classified as supramundane (P. lokuttara; S. [LOKOTTARA](#)); that which is not associated with the noble paths and fruits is classified as mundane (P. lokiya; S. [LAUKIKA](#)). The classical commentarial paradigm pairs vipassanā with samatha (S. [ŚAMATHA](#)), or tranquillity, these two together being described as the two wings of Buddhist meditative cultivation ([BHĀVANĀ](#)). Vipassanā, when fully developed, leads to enlightenment ([BODHI](#)) and nibbāna (S. [NIRVĀNA](#)); samatha when fully developed leads to the attainment of [JHĀNA](#) (S. [DHYĀNA](#)), or meditative absorption, and the attainment of certain supranormal powers (P. abhiññā; S. [ABHIJÑĀ](#)). While the formal training in vipassanā meditation does not require the prior attainment of either jhāna or abhiññā, the mind must nevertheless have achieved a modicum of pacification through “threshold concentration” ([UPACĀRASAMĀDHI](#)) as a prerequisite for successful vipassanā practice. The [VISUDDHIMAGGA](#) lists eighteen main types of vipassanāñāṇa (S. vipaśyanājñāna), or insight knowledge, of (1) impermanence (aniccānupassanā), (2) suffering (dukkhānupassanā), (3) nonself (anattānupassanā), (4) aversion (nibbidānupassanā), (5) dispassion (virāgānupassanā), (6) extinction (nirodhānupassanā), (7) abandoning (paṭinissaggānupassanā), (8) waning (khayānupassanā), (9) disappearing (vayānupassanā), (10) change (vipariṇāmānupassanā), (11) signlessness (animittānupassanā), (12) wishlessness (apaṇihitānupassanā), (13) emptiness (suññatānupassanā), (14) higher wisdom regarding phenomena

(adhīpaññādhāmmavipassanā), (15) knowledge and vision that accords with reality ([YATHĀBHŪTAJÑĀNADARŚANA](#)), (16) contemplation of danger (ādīnavānupassanā), (17) contemplation involving reflection (paṭisaṅkhānupassanā), and (18) turning away (vivaṭṭanānupassanā). While the terms samatha and vipassanā do appear in sutta discussions of meditative training—although far more often in the later [KHUDDAKANIKĀYA](#) sections of the canon—they figure most prominently in the [ABHIDHAMMA](#) and the later commentarial literature. The systems of vipassanā training taught today are modern constructs that do not antedate late-nineteenth century Burma (see [LEDI SAYADAW](#); [MAHASI SAYADAW](#)); they are, however, derived from, or at least inspired by, commentarial or scriptural precedents. Two of the most successful vipassanā organizations outside Asia are the Insight Meditation Society and the loosely knit group of centers teaching S. N. Goenka’s vipassana meditation; the former originates with [AJAHN CHAH BODHIÑANA](#) (1917–1992) of the Thai forest tradition and the latter with the Burmese teacher U [BA KHIN](#) (1899–1971). See also [YATHĀBHŪTAJÑĀNADARŚANA](#).

[vipassanādhura](#). In Pāli, lit., “the burden of insight,” in the sense of the obligation to develop insight through formal meditation training. The term is often contrasted with [GANTHADHURA](#), “the burden of book,” in the sense of the obligation to study. In the later [THERAVĀDA](#) tradition, these two duties have been seen as two vocations open to monks, viz., contemplative practice and doctrinal study. See also [PATIPATTI](#).

[vipassanāñāna](#). In Pāli, “insight knowledge”; see [VIPASSANĀ](#).

[vipassanāñāṇikasamādhi](#). In Pāli, “concentration of insight knowledge”; a commentarial term used to refer to a form of concentration that is developed through attending to the arising and passing away of the present thought-moment or object, when such concentration has successfully removed all distractions. It is equal in intensity to the “threshold concentration” ([UPACĀRASAMĀDHI](#)) that is cultivated in the course of practicing tranquillity meditation (P. samathabhāvanā; see [SAMATHA](#)). Vipassanāñāṇikasamādhi, when fully developed, leads to the attainment of the paths (P. magga; S. [MĀRGA](#)) and fruits ([PHALA](#)) of liberation, whereas upacārasamādhi, when fully developed, leads only to the attainment of “absorptive concentration” ([APPANĀSAMĀDHI](#)), which is synonymous with “meditative absorption” (P. [JHĀNA](#); S. [DHYĀNA](#)).

[vipassanūpakkilesa](#). In Pāli, “defilement of insight”; according to the [VISUDDHIMAGGA](#), ten experiences that occur to the diligent practitioner of meditation as natural concomitants of insight training ([VIPASSANĀ-BHĀVANĀ](#)). If the practitioner should become attached to any of these experiences, they become a hindrance to further progress along the path to liberation and thus would be deemed defilements of insight. The ten experiences are (1) a vision of radiant light (P. obhāsa; S. avabhāsa), (2) knowledge (P. ñāṇa; S. [JÑĀNA](#)), (3) physical rapture (P. pīti; S. [PRĪTI](#)), (4) tranquillity (P. passaddhi; S. [PRAŚRABDHI](#)), (5) mental ease or bliss ([SUKHA](#)), (6) determination (P. adhimokkha; S. [ADHIMOKSA](#)), (7) energy (P. paggaha; S. pragraha), (8) heightened awareness (P. upaṭṭhāna; S. upasthāna), (9) equanimity (P. upekkhā; S. [UPEKSĀ](#)), and (10) delight (P. nikanti; S. nikānti). As long as the mind is disturbed through attachment to the ten defilements of insight, it will be unable to comprehend the three marks of existence (P. tilakkhaṇa; S. [TRILAKSANA](#)) of impermanence P. (anicca; S. [ANITYA](#)), suffering (P. dukkha; S. [DUHKHA](#)), and nonself (P. anatta; S. [ANĀTMAN](#)), the knowledge of which is the content of enlightenment ([BODHI](#)). These ten defilements may cause the practitioner to believe that he has already attained enlightenment as a stream-enterer ([SROTAĀPANNA](#)), a once-returner ([SAKRDĀGĀMIN](#)), a nonreturner ([ANĀGĀMIN](#)), or a worthy one ([ARHAT](#)), when in fact he has not. Infatuation with the defilements is overcome by understanding them for what they are, as mere impermanent by-products of meditation. This understanding is developed through perfecting the “purity of knowledge and vision of what is and is not the path” ([MAGGĀMAGGAÑĀNADASSANAVISUDDHI](#)), which is the fifth of seven “purities” ([VISUDDHI](#)) to be developed along the path to liberation.

[vipaśyanā](#). (P. vipassanā; T. lhag mthong; C. guan; J. kan; K. kwan 觀). In Sanskrit, “insight”; a technical term for an understanding of reality (either conceptual or nonconceptual) at a level of mental concentration equal to or exceeding that of [ŚAMATHA](#). The presence of vipaśyanā is the distinguishing feature of the wisdom that derives from meditation ([BHĀVANĀMAYĪPRAJÑĀ](#)). Such insight is required to destroy the various levels of afflictions ([KLEŚA](#)) and to proceed on the path to liberation ([VIMOKSA](#)) from [REBIRTH](#). See also [VIPASSANĀ](#); [MOHE ZHIGUAN](#); [XIUXI ZHIGUAN ZUOCHAN FAYAO](#).

[Vipaśyin](#). (P. Vipassī; T. Rnam gzigs; C. Piposhi fo; J. Bibashi-butso; K. Pibasi pul 毘婆尸佛). Sanskrit proper name of the sixth of the seven buddhas of antiquity

([SAPTATATHĀGATA](#)), who directly precede [ŚĀKYAMUNI](#); Vipasyin is also listed as the nineteenth of twenty-five buddhas mentioned in the [BUDDHAVAMSA](#). In the Pāli tradition, his story is first recounted in the [MAHĀPADĀNASUTTA](#) in the [DĪGHANIKĀYA](#). There, it is said that Vipassī's father was Bandhumā and his mother was Bandhumatī. He was born in the Khema park and belonged to the Kondañña clan. During his time, the human life span was eighty thousand years. He dwelt as a householder for eight thousand years and possessed three palaces named Nanda, Sunanda, and Sirmā, one for each of the three seasons. His wife's name was Sutanā, and he had a son named Samavattakkhandha. When he renounced the world, he left his house in a chariot, after which he practiced austerities for eight months. As with all [BODHISATTVAS](#), Vipassī abandoned austerities as unprofitable when he realized that they did not lead to enlightenment. He attained buddhahood under a pātali (S. pātali) tree. In the description of his enlightenment, he is shown contemplating dependent origination ([PRATĪTYASAMUTPĀDA](#)), but in a chain of ten rather than the standard twelve links. He preached his first sermon in the Khema Deer Park to his brother Khandha and to Tissa, the son of his family's priest. These two became his chief monk disciples. His chief nun disciples were Candā and Candamittā, and his attendant was named Asoka. His chief lay disciples were the laymen Punnabbasummitta and Nāga, and the laywomen Sirimā and Uttarā. He died at the age of eighty thousand in the Sumittārāma, and over his relics was erected a reliquary ([STŪPA](#)) seven leagues high. The bodhisattva who was to become [GAUTAMA](#) Buddha was at that time a [NĀGA](#) king named Atula.

[viprayuktasamskāra](#). (S). See [CITTAVIPRAYUKTASAMSKĀRA](#).

[vīra](#). (T. dpa' bo; C. yongmeng; J. yūmyō; K. yongmaeng 勇猛). In Sanskrit and Pāli, "hero"; a common epithet of the Buddha. The word is also used for a bodhisattva skilled in tantric practices who accompanies a [DĀKINĪ](#) during the [GANACAKRA](#) (tantric feast) ritual. Ekavīra (T. Dpa' bo gcig pa), "Solitary Hero," is a form of [YAMĀNTAKA](#) widely practiced in Tibet and is used in general to describe the depiction of a male tantric deity without a consort.

[virati](#). (T. spong ba; C. li; J. ri; K. i 離). In Sanskrit and Pāli, lit. "abstinence," "seclusion"; a polysemous term in both Sanskrit and Buddhist literature. In its Buddhist usages, virati generally refers to the separation or detachment from mental afflictions ([KLEŚA](#)) and false conceptualizations ([VIKALPA](#)); it may also indicate a desire to leave behind such afflictions. In Pāli literature, virati

indicates three specific types of abstention, viz., from wrong speech, wrong action, and wrong livelihood. In [SARVĀSTIVĀDA](#) thought, virati results from a positive sense of perplexity about one's state in the world, and from it arises the soteriologically indispensable [NIRVEDA](#), “disgust with the world” or “disillusionment.” Two kinds of seclusion (C. [ERZHONG YUANLI](#)) are also discussed in the Chinese tradition: physical seclusion (shen yuanli) and the seclusion of the mind (xin yuanli). Removing oneself from a distracting, unwholesome, and disquieting environment by leaving it behind constitutes physical seclusion. Seclusion of the mind usually refers to “guarding one's senses” ([INDRIYASAMVARA](#)) with mindfulness so that the mind will neither cling to, not be repulsed by, sensory stimuli; it also refers to the “withdrawal” from sensory stimulations and the consolidation of attention during meditative states (see [DHYĀNA](#)).

Virūdhaka. (P. Virūḥhaka [alt. Viḍūḍabha]; T. 'Phags skyes po; C. Zengzhang tian; J. Zōjōten; K. Chŭngjang ch'ōn 增長天). Sanskrit proper name of one of the four [LOKAPĀLA](#), the kings of the four directions who reside on the four sides of Mount [SUMERU](#). He is king of the south and resides on the southern face of the central mountain, where he is lord of the kumbhaṇḍas. ¶ Virūḍhaka (corresponding to the Pāli transcription Viḍūḍabha) is also the proper name of a king of [KOŚALA](#) at the time of the Buddha; he was the son of the Buddha's patron, [PRASENAJIT](#), and usurped his father's throne. When Prasenajit ascended the throne, he requested a wife from the [ŚĀKYA](#) tribe. The Śākyaas instead sent a maidservant, claiming that she was from a noble family, and she eventually gave birth to Virūḍhaka. As a boy, he visited [KAPILAVASTU](#) and learned of his low birth. Realizing that his father had been deceived, he vowed to take revenge upon the Śākyaas. After his father's death, he led an army against Kapilavastu, destroying the Śākya kingdom and slaughtering its inhabitants. A violent storm caused a flood during the night, and Virūḍhaka and his warriors, who were sleeping in the riverbed, were swept away. See also [CĀTURMAHĀRĀJAKĀYIKA](#).

Virūpa. (Bi rū pa). Sanskrit proper name of one of the eighty-four [MAHĀSIDDHAS](#), particularly revered in the [SA SKYA](#) sect of Tibetan Buddhism. Very little can be said with certainty about his life (whether he was a historical figure is open to question), but he may have lived at the end of the tenth century CE. He is said to have been a monk and a distinguished scholar of [NĀLANDĀ](#) monastery (in some sources, [SOMAPURA](#)), who was originally named

Dharmapāla, devoting himself to scholastic study during the day and tantric practice at night. He recited the [MANTRA](#) of [CAKRASAMVARA](#) for years, but, unable to make any progress in his practice, he threw his rosary into the latrine. That night, the goddess [NAIRĀTMYĀ](#), appeared to him in a dream, instructing him to retrieve his rosary. Over the course of six nights, she conferred initiations and instructions that allowed him to attain the sixth bodhisattva [BHŪMI](#). She also gave him a text, which is otherwise unknown in Sanskrit, whose Sanskrit title might be reconstructed as **Mārgaphalamūlaśāstra*, the “Root Treatise on the Path and Its Fruition.” Dharmapāla subsequently began to engage openly in tantric practices and was expelled from the monastery and branded “deformed” or “ugly” (virūpa), whence he derived his name. Among the many stories told about him, perhaps the most famous tells of his stopping in a tavern to drink. When the tavern keeper demanded payment, he offered her the sun instead, using his ritual dagger to stop the sun in its course. The sun did not move for three days, during which time Virūpa consumed huge amounts of drink. In order to set the sun on its course, the king agreed to pay his bill. Virūpa eventually encountered two [YOGINS](#) who became his disciples: Ḍombiheruka and Kṛṣṇacārin. In the eleventh century, the Tibetan scholar [SA CHEN KUN DGA' SNYING PO](#) of the 'Khon clan is said to have had a vision of Virūpa in which he received transmission of the **Mārgaphalamūlaśāstra*. This became the foundation for the [LAM 'BRAS](#) teachings of the Sa skya sect, where Virūpa is regarded as a buddha, equal in importance to Nāropa for the [BKA' RGYUD](#) sect. His most famous work is his [RDO RJE TSHIG RKANG](#) (“Vajra Verses”).

[Virūpākṣa](#). (P. Virupakkha; T. Mig mi bzang; C. Guangmu tian; J. Kōmokuten; K. Kwangmok ch'ōn 廣目天). One of the four [LOKAPĀLA](#), the kings of the four directions who reside on the four sides of Mount [SUMERU](#). He is king of the west and resides on the western face of the central mountain, where he is lord of the [NĀGAs](#).

[vīrya](#). (P. viriya; T. brtson 'grus; C. jingjin; J. shōjin; K. chōngjin 精進). In Sanskrit, “energy,” “effort”; an enthusiasm to perform virtuous acts, which serves as the antidote to laziness. Since, by definition, the term refers to a delight in virtue, striving for nonvirtuous ends would not be considered “energy.” The connotations of the term include the willingness to undertake virtuous deeds, the delight in the performance of virtuous deeds, a lack of discouragement, a commitment to success, and a dissatisfaction with minimal virtues. Deemed

essential to progress on the path, vīrya is a constituent of many numerical lists. Vīrya is the second of the five spiritual faculties ([INDRIYA](#)) and counters the hindrance ([NĪVARANA](#)) of sloth and torpor ([STYĀNA-MIDDHA](#)). It is counted as one of the eleven wholesome mental concomitants ([KUŚALA-CAITTA](#)) and constitutes the fourth of the six perfections ([PĀRAMITĀ](#)).

[vīryapāramitā](#). (P. viriyapāramī; T. brtson 'grus kyi pha rol tu phyin pa; C. jingjin boluomiduo; J. shōjinharamita; K. chōngjin paramilta 精進波羅蜜多). In Sanskrit, “the perfection of energy [alt. effort, vigor]”; the fourth of the six [alt. ten] perfections ([PĀRAMITĀ](#)) cultivated on the [BODHISATTVA](#) path. It is perfected on the fourth of the ten stages ([DAŚABHŪMI](#)) of the bodhisattva path, [ARCISMATĪ](#) (radiant), where the flaming radiance of the thirty-seven factors pertaining to enlightenment ([BODHIPĀKSIKADHARMA](#)) becomes so intense that it incinerates all the obstructions and afflictions, giving the bodhisattva inexhaustible energy in his quest for enlightenment. When the six perfections are divided based on whether they are associated with the accumulation of merit ([PUNYASAMBHĀRA](#)) or of wisdom ([JÑĀNASAMBHĀRA](#)), the perfection of energy is associated with both.

[Viśākha](#). (P. Visākha; T. Sa ga; C. Pishequ; J. Bishakya; K. Pisagō 毗舍佉). A wealthy merchant of [RĀJAGRHA](#) and husband of the female [ARHAT DHAMMADINNĀ](#); he should be distinguished from [VIŚAKHĀ](#) (s.v.), the foremost donor among laywomen. According to the Pāli account, Viśākha accompanied King [BIMBISĀRA](#) on a visit to the Buddha during the latter’s first sojourn at Rājagaha ([RĀJAGRHA](#)) after his enlightenment. Upon hearing the Buddha preach, Viśākha became a stream-enterer ([SROTAĀPANNA](#)) and, subsequently, a once-returned ([SAKRĀGĀMIN](#)) and a nonreturner ([ANĀGĀMIN](#)). Once he became a nonreturner, his behavior toward his wife Dhammadinnā changed, and once she learned the reason, Dhammadinnā requested permission to renounce the world and enter the order as a nun. Impressed by his wife’s piety, he informed Bimbisāra, who arranged for her to be carried to the nunnery on a golden palanquin. After Dhammadinnā attained arhatship, Viśākha asked her questions pertaining to dharma, all of which she expertly answered. He reported this to the Buddha, who praised her for her skill in teaching. Viśākha and Dhammadinnā were husband and wife during the time of Phussa (S. Puṣya) Buddha (the twenty-first of the thousand buddhas) when, as a treasurer, he had arranged an offering of alms for Phussa Buddha and his disciples. Viśākha was a renowned teacher in his own right and is mentioned as one of seven lay disciples who each

had five hundred followers.

Viśākhā. (P. Visākhā; T. Sa ga ma; C. Pishéqumu/Luzimu; J. Bishakyamo/Rokushimo; K. Pisagōmo/Nokchamo 毗舍佉母/鹿子母). Prominent female lay disciple of the Buddha (and to be distinguished from the Buddhist layman [VIŚAKHA](#)); in the [AṄGUTTARANIKĀYA](#), the Buddha declares her to be foremost among laywomen who minister to the order. According to the Pāli account, Visākhā was born into a wealthy family and was converted by the Buddha at the age of seven, when he visited her native city of Bhaddiya. Visākhā had been dispatched by her grandfather, Meṇḍaka, with five hundred chariots, five hundred companions, and five hundred slaves to approach the Buddha and listen to him preach. Upon hearing his sermon, Visākhā became a stream-enterer ([SROTAĀPANNA](#)). Later, Visākhā was married to the son of a wealthy merchant named Migāra, who dwelt in the city of Sāvatti ([ŚRĀVASTĪ](#)) and was a follower of the Nigaṇṭhas (S. [NIRGRANTHA](#); see [JAINA](#)). Although she was a dutiful wife and daughter-in-law, Visākhā was offended by the nakedness of the Nigaṇṭha ascetics and refused to show them respect. When criticized for her attitude, she threatened to return to her parents' house. Although sorely distressed by his daughter-in-law's behavior, Migāra consented to listen to a sermon by the Buddha if she would consent to remain in his family. Upon hearing the Buddha preach, Migāra became a stream-enterer ([SROTAĀPANNA](#)), and remained forever grateful to Visākhā, even giving her the sobriquet Migāramātā, "Migāra's Mother." Visākhā fed five hundred monks in her home daily, and was constant in her attentions to the monastic community in Sāvatti. She fulfilled a long-held wish when she had a grand monastery built to the east of the city named Migāramātupāsāda (S. [MRGĀRAMRTUPRĀSĀDA](#)), which she visited with her children, grandchildren, and great grandchildren. The Buddha related how, in previous lives, Visākhā had ministered to the needs of the Buddhas Padumuttara (S. Padmottara) and Kassapa (S. [KAŚYAPA](#)). Visākhā was said to have died at the age of 120, although she always looked to be a maiden of sixteen. She was endowed with phenomenal strength, and the people of Sāvatti believed that she brought good fortune to their city. Visākhā is upheld by the tradition as the ideal laywoman.

visamyogaphala. (T. bral ba'i 'bras bu; C. liji guo; J. rikeka; K. igye kwa 離繫果). In Sanskrit, "separation effect"; a term used to describe liberation from rebirth and the reality of [NIRVĀNA](#). This is one of the five effects ([PHALA](#))

enumerated in the [VAIBHĀSIKA](#) school of [SARVĀSTIVĀDA ABHIDHARMA](#) and the [YOGĀCĀRA](#) system. Liberation ([VIMOKṢA](#)) and nirvāṇa are forms of cessation ([NIRODHA](#)) and as such are unconditioned phenomena ([ASAMSKRTADHARMA](#)) and permanent ([NITYA](#)) because they do not change moment by moment. Specifically, they are classified as “analytical cessations” ([PRATISAMKHYĀNIRODHA](#)), that is, states of cessation that arise through the process of insight. In the Buddha’s delineation of the [FOUR NOBLE TRUTHS](#) (catvāry āryasatyāni), the third truth of cessation ([NIRODHASATYA](#)) is followed by the fourth truth of the path ([MĀRGASATYA](#)). Later commentators would explain that cessation and path stand in a relationship of effect and cause, respectively. However, this is not possible in the literal sense, because an impermanent and conditioned phenomenon such as the path cannot serve as the cause for a permanent and unconditioned phenomenon such as cessation. In order to preserve this distinction but nonetheless acknowledge the role of religious practice in bringing about the state of nirvāṇa, the Vaibhāsika school proposed the category of viṣaṃyogaphala, which is essentially an effect that has no cause. Thus, the practice of the path leads to a permanent separation from the [KLEŚAS](#), and because that state of separation is permanent, it not formally the effect of a cause.

[viśaya](#). (P. visaya; T. yul; C. jing; J. kyō; K. kyōng 境). In Sanskrit, lit. “sphere” or “object”; in epistemology, a general term for the object of a sensory consciousness ([VIJÑĀNA](#)). Various types of such objects are described in works on logic and epistemology, with distinctions made between the objects perceived by the five sensory consciousnesses and the objects perceived by the mental consciousness ([MANOVIJÑĀNA](#)).

[Viśiṣṭacāritra](#). (C. Shangxing; J. Jōgyō; K. Sanghaeng 上行). In Sanskrit, “Exemplary Practices”; the leader of the four [BODHISATTVA](#)s of the earth to whom [ŚĀKYAMUNI](#) Buddha transfers the quintessence of the [SŪTRA](#) in the [SADDHARMAPUNĀRIKASŪTRA](#) (“Lotus Sūtra”). Viśiṣṭacāritra is said to represent the “true self” aspect of the buddha-nature ([FOXING](#)). Viśiṣṭacāritra has special significance for the Japanese [NICHIRENSHŪ](#) schools, because [NICHIREN](#) himself believed that his proselytization work had fulfilled the charge that Śākyamuni had given the bodhisattva. Thus, some Nichiren schools assume that their founder is the reincarnation of Viśiṣṭacāritra.

[viśuddhabuddhaksetra](#). (T. dag pa’i zhing khams; C. qingjing foguotu; J.

shōjōbukkōkudo; K. ch'ōngjōng pulgukt'o 清淨佛國土). In Sanskrit, lit. “purified buddha-field”; an important concept in Mahāyāna Buddhism and closely synonymous with some denotations of the East Asian term [JINGTU](#) (“[PURE LAND](#)”). According to certain [MAHĀYĀNA](#) texts, when a bodhisattva achieved buddhahood, the merit that he accumulated over the course of the path fructifies not only as the body, speech, mind, and activities of a buddha but also as the physical environment of that buddha as well. That physical environment is called a “buddha-field.” These lands may be either “impure” or “pure,” depending upon a number of factors, the most common of which is whether the land does or does not include three baleful destinies ([DURGATI](#)) of animals ([TIRYAK](#)), ghosts ([PRETA](#)), and hell denizens ([NĀRAKA](#)). The most famous of these pure buddha-fields is [SUKHĀVATĪ](#), the land of the buddha [AMITĀBHA](#). See also [BUDDHAKSETRA](#).

visuddhi. [alt. visuddha] (P. visuddhi; T. nām par dag pa; C. qingjing; J. shōjō; K. ch'ōngjōng 清淨). In Sanskrit, “purity”; of which two types are enumerated: innate purity (prakṛti or svabhāvaviśuddhi) and purity free of temporary or adventitious stains (āgantukamalaviśuddhi). The former is the natural state of the mind (see [PRABHĀSVARA](#)) as in the Pāli [ĀṄGUTTARANIKĀYA](#): “The mind, O monks, is luminous (P. pabhassara), but is defiled by adventitious defilements” (pabhassaraṃ idaṃ bhikkhave cittaṃ, tañ ca kho āgantukehi upakkilesehi upakkiliṭṭhaṃ). The latter is the mind when the path ([MĀRGA](#)) has cleansed it of hindrances (see [NĪVARANA](#); [ĀVARANA](#)). In Pāli, there are seven purities (visuddhi) that must be developed along the path leading to liberation. The list of seven purities is first enumerated in the [MAJJHIMANIKĀYA](#) and forms the outline for both [BUDDHAGHOSA](#)'s [VISUDDHIMAGGA](#) and Upatissa's earlier *[VIMUTTAMAGGA](#). The seven purities are likened to seven carriages that one takes in sequence to reach seven progressive goals. Thus, (1) the purity of morality (P. sīlavisuddhi; see S. [ŚĪLAVISUDDHI](#)) leads to its goal of (2) the purity of mind ([CITTAVISUDDHI](#)), and the purity of mind leads to its goal of (3) purity of understanding or views ([DITTHIVISUDDHI](#)). The purity of understanding leads to its goal of (4) purity of overcoming doubt ([KAṆKHĀVITARANAVISUDDHI](#)), and the purity of overcoming doubt leads to its goal of (5) the purity of knowledge and vision of what is and is not the path ([MAGGĀMAGGAÑĀNADASSANAVISUDDHI](#)). The purity of knowledge and vision of what is and is not the path leads to its goal of (6) knowledge and vision of progress along the path ([PATIPADĀÑĀNADASSANAVISUDDHI](#)), and knowledge and vision of progress along the path leads to its goal of (7) the purity of knowledge and vision ([ÑĀNADASSANAVISUDDHI](#)). The goal of this last

purity is liberation through the attainment of any of the four supramundane paths (P. ariyamagga; S. [ĀRYAMĀRGA](#)).

[Visuddhimagga](#). In Pāli, “Path of Purity”; the definitive Pāli compendium of Buddhist doctrine and practice, written by the exegete [BUDDHAGHOSA](#) at the [MAHĀVIHĀRA](#) in [ANURĀDHAPURA](#), Sri Lanka, in the fifth century CE. The work serves as a prolegomenon to the soteriological content of the entire Pāli canon in terms of the three trainings in morality (P. sīla; S. [ŚĪLA](#)), concentration ([SAMĀDHI](#)), and wisdom (P. paññā; S. [PRAJÑĀ](#)). These are the “three trainings” (P. tisikkhā; S. [TRISIKSĀ](#)) or “higher trainings” (P. adhisikkhā; S. adhisikṣā). In his use of this organizing principle for his material, Buddhaghosa is clearly following Upatissa’s earlier *[VIMUTTIMAGGA](#), which is now extant only in a Chinese translation. Buddhaghosa had originally come to Sri Lanka from India in order to translate the Sinhalese commentaries ([ATTHAKATHĀ](#)) to the Pāli canon back into the Pāli language. It is said that, in order to test his knowledge, the Mahāvihāra monks first gave him two verses and ordered him to write a commentary on them; the *Visuddhimagga* was the result. Legend has it that, after completing the treatise, the divinities hid the text so that he would be forced to rewrite it. After a third time, the divinities finally relented, and when all three copies were compared, they were found to be identical, testifying to the impeccability of Buddhaghosa’s understanding of the doctrine. The commentaries that Buddhaghosa was then allowed to edit and translate make numerous references to the *Visuddhimagga*. The text contains a total of twenty-three chapters: two chapters on precepts, eleven on meditation, and ten on wisdom. In its encyclopedic breadth, it is the closest equivalent in Pāli to the [ABHIDHARMAMAHĀVIBHĀSĀ](#) of the [SARVĀSTIVĀDA](#) school of [ABHIDHARMA](#). The post-fifth century CE exegete [DHAMMAPĀLA](#) wrote a Pāli commentary to the *Visuddhimagga* titled the [PARAMATTHAMAÑJŪSĀ](#) (“Container of Ultimate Truth”), which is also often referred to in the literature as the “Great Subcommentary” (*Mahāṭīkā*).

[Viśvamtara](#). (S). See [VESSANTARA](#).

[Vitakkasanthānasutta](#). (C. Zengshangxin jing; J. Zōjōshingyō; K. Chūngsangsim kyōng 增上心經). In Pāli, “Discourse on Removing Distracting Thoughts,” the twentieth sutta in the [MAJJHIMANIKĀYA](#) (a separate [SARVĀSTIVĀDA](#) recension appears as the 101st [SŪTRA](#) in the Chinese translation of the [MADHYAMĀGAMA](#)); preached by the Buddha to an assembly of monks at

the [JETAVANA](#) grove in the town of Sāvatti (S. [ŚRĀVASTĪ](#)). The Buddha teaches five methods that can be used to overcome unwholesome, distracting thoughts (P. vitakka; S. [VITARKA](#)) that may arise during the course of meditation. These methods include replacing the unwholesome thought with a wholesome thought, contemplating the danger of the unwholesome thought, ignoring the unwholesome thought, progressively stilling the process of thought formation, and forcibly suppressing the unwholesome thought through the application of concentration. An analogous treatment of five methods of controlling thoughts also appears in the [YOGĀCĀRABHŪMIŚĀSTRA](#).

[vītarāgapūrvīn](#). (T. chags bral sngon song; C. xian liyu ren; J. senriyokunin; K. sŏn iyok in 先離欲人). In Sanskrit, “one already free from attachment,” that is, one who has eliminated the afflictions ([KLEŚA](#)) that cause rebirth in the sensual realm ([KĀMADHĀTU](#)) prior to reaching the path of vision ([DARŚANAMĀRGA](#)); a general designation used in [ABHIDHARMA](#) to describe a set of the twenty members of the [ĀRYASAMGHA](#) (see [VIMŚATIPRABHEDASAMGHA](#)). The vītarāgapūrvīn are said to be those who do not gain each of the four fruits of the noble path ([ĀRYAMĀRGAPHALA](#)) in a series, but leap over one or more before reaching [NIRVĀNA](#). See [SROTAĀPANNAPHALAPRATIPANNAKA](#); [SAKRDĀGĀMIPHALASTHA](#).

[vitarka](#). (P. vitakka; T. rtog pa; C. xun; J. jin; K. sim 尋). In Sanskrit, “thoughts,” “applied thought,” or “applied attention”; one of the forty-six mental concomitants ([CAITTA](#)) according to the [VAIBHĀSIKA](#) school of [SARVĀSTIVĀDA ABHIDHARMA](#), one of the fifty-one according to the [YOGĀCĀRA](#) school, and one of the fifty-two in the Pāli [ABHIDHAMMA](#). Although etymologically the term contains the connotation of “investigation,” vitarka is polysemous in the Buddhist lexicon and refers to a mental activity that could be present both in ordinary states of consciousness as well as during meditative absorption ([DHYĀNA](#)). Generically, vitarka can simply denote thoughts, and specifically “distracted thoughts,” as in the [VITAKKASANTHĀNASUTTA](#). In ordinary consciousness, it is perhaps best translated as “applied thought” or “initial application of thought” and refers to the momentary advertence toward the chosen object of attention. Vitarka is listed in the [ABHIDHARMA](#) as an indeterminate mental factor ([ANİYATA-CAITTA](#)), because it can be employed toward either virtuous or nonvirtuous ends, depending on one’s intentions and the object of one’s attention. In meditative absorption, vitarka is one of the five constituents ([DHYĀNĀṄGA](#)) that make up the first [DHYĀNA](#), and is perhaps best

translated in that context as “applied attention” or “initial application of attention.” In dhyāna, vitarka involves directing one’s focus onto the single chosen meditative object. According to the Pāli [VISUDDHIMAGGA](#), “applied attention” is like a bee flying toward a flower, having oriented itself toward its chosen target, whereas “sustained attention” ([VICĀRA](#)) is like a bee hovering over that flower, having closer contact with and fixing itself upon the flower.

[vitarkamudrā](#). (C. anwei yin; J. anniin; K. anwi in 安慰印). In Sanskrit, “gesture of instruction” or “gesture of discussion.” Vitarkamudrā is formed with a combination of gestures: the right palm faces outward, fingers up near the shoulder in the [ABHAYAMUDRĀ](#), and the left palm faces out, fingers down by the knee in the [VARADAMUDRĀ](#). Typically, the thumb and index finger of each hand also touch lightly, forming circles, while the rest of the fingers are splayed outward. This is a common gesture in Buddhist iconography, and the pose is often seen used with images of [BHAIŠAJYAGURU](#), [VAIROCANA](#), [AMITĀBHA](#), [MAÑJUŚRĪ](#), and even [AVALOKITEŚVARA](#). This gesture is also sometimes called the vyākhyānamudrā, “the gesture of explanation.”

[vivartakalpa](#). (P. vivatṭakappa; T. chags pa’i bskal pa; C. chengjie; J. jōkō; K. sōnggōp 成劫). In Sanskrit, “eon of formation” or “eon of creation”; one of the four periods in the cycle of the creation and destruction of a world system, according to Buddhist cosmology. These are the eon of formation (vivartakalpa), the eon of abiding ([VIVARTASTHĀYIKALPA](#)), the eon of dissolution ([SAMVARTAKALPA](#)), and the eon of nothingness ([SAMVARTASTHĀYIKALPA](#)). According to the [ABHIDHARMAKOŚABHĀSYA](#), each of the four eons lasts for twenty intermediate eons. The eon of formation begins when a wind begins to blow in space, impelled by the [KARMA](#) of sentient beings. A circle of wind forms, followed by a circle of water, followed by a circle of golden earth. The entire world system of the sensuous realm ([KĀMADHĀTU](#)) then forms, including Mount [SUMERU](#), the four continents and their subcontinents, the heavens, and the hells (see [BHĀJANALOKA](#)). These are then populated by beings (see [SATTVALOKA](#)), reborn in the various realms as a result of their previous karma. When all realms of the world system have been populated, the eon of formation ends and the eon of abiding begins.

[vivartasthāyikalpa](#). (P. vivatṭatthāyikappa; T. gnas pa’i bskal pa; C. zhujie; J. jūkō; K. chugōp 住劫). In Sanskrit, “eon of abiding,” or “eon of duration”; one of the four periods in the cycle of the creation and destruction of a world system,

according to Buddhist cosmology. The others are: the eon of formation ([VIVARTAKALPA](#)), the eon of abiding (vivartasthāyikalpa), the eon of dissolution ([SAMVARTAKALPA](#)), and the eon of nothingness ([SAMVARTASTHĀYIKALPA](#)). According to the [ABHIDHARMAKOŚABHĀSYA](#), each of the four eons lasts twenty intermediate eons. The eon of formation begins when a wind begins to blow in space, impelled by the karman of sentient beings. A circle of wind forms, followed by a circle of water, followed by a circle of golden earth. The entire world system of the sensuous realm ([KĀMADHĀTU](#)) and the first [DHYĀNA](#) of the realm of subtle materiality ([RŪPADHĀTU](#)) then forms (see [BHĀJANALOKA](#)), which is then populated by beings (see [SATTVALOKA](#)) who are reborn there as a result of their previous [KARMAN](#). When all realms of the world system have been populated, the eon of formation ends and the eon of abiding begins. At the beginning of the eon of abiding, the human life span is said to be “infinite” and decreases until it eventually reaches ten years of age. It then increases to eighty thousand years, before decreasing again to ten years. It takes one intermediate eon for the life span to go from ten years to eighty thousand years to ten years again. The eon of abiding is composed of twenty eons, beginning with the intermediate eon of decrease (in which the life span decreases from “infinite” to ten years), followed by eighteen intermediate eons of increase and decrease, and ending with an intermediate eon of increase, when the life span increases from ten years to eighty thousand years, at which point the next eon, the eon of dissolution, begins. [ŚĀKYAMUNI](#) Buddha appeared when the life span was one hundred years. It is said that [MAITREYA](#) will come when the human life span next reaches eighty thousand years.

viveka. (T. dben pa; C. yuanli; J. onri; K. wŏlli 遠離). In Sanskrit and Pāli, “seclusion,” “aloofness,” “solitude.” In Buddhist meditative literature, viveka refers to the “aloofness” that occurs as a result of becoming increasingly focused on a meditative object and thus more “secluded” from the things of the sensual world. In the [NIDDESA](#) of the Pāli [KHUDDAKANIKĀYA](#), three kinds of viveka are described: kāyaviveka, or “physical seclusion”; cittaviveka, or “mental seclusion;” and upadhiviveka, or “seclusion from the substrata of rebirth ([UPADHI](#)),” viz., the five aggregates ([SKANDHA](#)) and/or the afflictions ([KLEŚA](#)). Kāyaviveka is actual physical separation from family, friends, and distracting sense objects; cittaviveka is when meditative practitioners remain “aloof” or “secluded” from greed ([RĀGA](#)), hatred ([DVEṢA](#)), and delusion ([MOHA](#)). In some [MAHĀYĀNA](#) texts, the slavish pursuit of viveka is explained as a violation of the

bodhisattva ideal, because the devotion to solitude impedes the bodhisattva's vow to save others from their suffering. In Buddhist tantras, such as the [GUHYASAMĀJATANTRA](#), the practice of the three isolations of body (kāyaviveka), speech ([VĀGVIVEKA](#)), and mind (cittaviveka) precedes the practice of illusory body ([MĀYĀKĀYA](#)), clear light ([PRABHĀSVARA](#)), and union ([YUGANADDHA](#)).

[Vô Ngôn Thông](#). (無言通) (d. 826). Vietnamese monk regarded by tradition as the founder of the second principal school of [THIÊN \(CHAN\)](#) in Vietnam. According to the Vietnamese genealogical history, [THIÊN UYÊN TẾP ANH](#), Vô Ngôn Thông originally came from Guangzhou (China) and entered the Buddhist order at Shuanglinsi in Wuzhou. Because he was known for his ability to silently comprehend and realize the nature of things, his contemporaries called him “Wordless Realization” (V. Vô Ngôn Thông; C. Wuyantong). He is reputed to have studied under [BAIZHANG HUIHAI](#). In 820, Vô Ngôn Thông came to Kiền Sơ Monastery in northern Vietnam and took up residence there to practice Chan. He generally sat facing the wall (see [BIGUAN](#)), without uttering a word. A disciple, Cầm Thành, served him for many years and received the transmission of his full teaching.

[Vṛjiputrika](#). (P. Vajjiputtakā; C. Baqizi; J. Batsugishi; K. Palgija 跋耆子). In Sanskrit, “Sons of Vṛji”; a group of monks condemned at the second Buddhist council ([SAMGĪTI](#); see [COUNCIL, SECOND](#)), the council at [VAIŚĀLI](#), for what were judged to be ten violations of the [VINAYA](#), the most serious of which was accepting gold and silver from the laity. Other violations included carrying a provision of salt, using a fringed sitting mat, eating after noon, eating meals from two different villages on the same day, and performing an ecclesiastical act ([SAMGHAKARMA](#)) without a sufficient number of monks being present. According to Pāli sources, after their condemnation, these monks seceded to form the [MAHĀSĀMGHIKA](#) school. See also [VĀTSĪPUTRĪYA](#); [YAŚAS](#).

[Vulture Peak](#). See [GRDHRAKŪTAPARVATA](#).

[vyākaraṇa](#). (P. veyyākaraṇa; T. lung bstan pa; C. shouji/piqieliuo; J. juki/bigara; K. sugi/pigara 授禮/毘伽羅). In Sanskrit, “prediction” or “prophecy”; a statement made by a buddha indicating the course of future events, especially regarding when, where, and with what name a [BODHISATTVA](#) will become a buddha. The most famous instance of such prophecy in the [MAHĀYĀNA](#) sūtras appears in the [SADDHARMAPUNḌARĪKASŪTRA](#) (“Lotus Sūtra”), where the Buddha makes

predictions that the great [ARHATS](#), beginning with [ŚĀRIPUTRA](#), will all eventually achieve buddhahood. ¶ [Vyākaraṇa](#) is also used to refer to one of the nine ([NAVAṄGA](#)) (Pāli) or twelve ([DVĀDAŚĀṄGA\[PRAVACANA\]](#)) (Sanskrit) categories ([AṄGA](#)) of Buddhist scripture according to their structure or literary style, where it refers to prophetic teachings or expositions. In the ninefold Pāli division, [BUDDHAGHOSA](#) defines [veyyākaraṇa](#) as something of a default category, which comprises the entire [ABHIDHAMMAPITAKA](#), all suttas that do not contain verses, and any teaching of the Buddha that does not fall into any of the other eight categories.

[Vyākhyāyukti](#). (T. Rnam par bshad pa'i rigs pa). In Sanskrit, “Principles of Exegesis,” a treatise by [VASUBANDHU](#) preserved only in Tibetan translation. In the broadest sense, the text deals with scriptural interpretation, touching on a wide range of related issues, including the authenticity of the [MAHĀYĀNA](#) sūtras as the word of the Buddha ([BUDDHAVACANA](#)), which Vasubandhu upholds. The work is a companion to another work by Vasubandhu, the *Vyākhyāyuktisūtrakhaṇḍaśata* (“One Hundred Extracts from the Sūtras for the Principles of Exegesis”), a collection of 109 passages presented without identification and without comment, all of which derive from “mainstream” (that is, non-Mahāyāna) sources, in most cases from the canon of the [MŪLASARVĀSTIVĀDA](#). These passages serve as the basis for the discussion in the *Vyākhyāyukti*, which states that sūtras are to be explained according to (1) their purpose, (2) their summarized meaning, (3) their sense, (4) their sequence, and (5) objections and responses. In discussing the sense or meaning of a sūtra passage, he considers thirteen terms that have multiple meanings, including [DHARMA](#), [RŪPA](#), and [SKANDHA](#). In his explication of technical terminology, Vasubandhu explains four distinct aspects of “the meaning of the words” (*padārtha*): synonyms (*paryāya*), definition (*lakṣaṇa*), etymology (*nirukti*), and their subdivisions (*prabheda*; perhaps implying subsidiary meanings, or “connotations,” in this context). In the course of the discussion, several Mahāyāna sūtras are quoted. The work was influential in late Indian scholastic circles, eliciting a commentary by Guṇamati; it was also cited by such scholars as [HARIBHADRA](#). It was highly praised by such luminaries as [SA SKYA PANDITA](#) and [BUSTON](#) in Tibet, where it was used to establish principles for the translation of Buddhist texts from Sanskrit into Tibetan. See also [NETTIPAKARANA](#); [PETAKOPADESA](#); [SANFEN KEJING](#).

vyāpāda. (T. gnod sems; C. chen; J. shin; K. chin 瞋). In Sanskrit and Pāli, “malice” or “ill will”; the ninth of ten unwholesome courses of action ([AKUŚALA-KARMAPATHA](#)), referring to the hateful wish that harm will befall another. The ten courses of action are divided into three groups according to whether they are performed by the body, speech, or mind. Malice is classified as an unwholesome mental action ([AKUŚALA-KARMAN](#)), and forms a triad along with covetousness ([ABHIDHYĀ](#)) and wrong views ([MITHYĀDRSTI](#)). Only extreme forms of defiled thinking are deemed an unwholesome course of mental action, such as the covetous wish to misappropriate someone else’s property, the harmful intent to hurt someone, or the adherence to pernicious doctrines. Lesser forms of defiled thinking are still unwholesome (akuśala), but do not constitute a course of action. ¶ “Malice” is also listed as one of the five hindrances ([NĪVARANA](#)) to [DHYĀNA](#), obstructing the dhyāna factor of rapture ([PRĪTI](#)). Malice is fostered by unwise attention ([AYONIŚOMANASKĀRA](#)) to objects causing aversion and is removed through frequent wise attention to loving-kindness ([MAITRĪ](#)), developing the meditation on loving-kindness, and recognizing the fact that every person’s actions are his or her own and acknowledging the futility of anger. Malice is countered by faith ([ŚRADDHĀ](#)), the first of the five spiritual faculties ([INDIYA](#)), and by the enlightenment factors ([BODHYAṄGA](#)) of physical rapture (prīti) and equanimity ([UPEKSĀ](#)). “Malice” is also included among the ten fetters ([SAMYOJANA](#)) and is completely overcome only upon becoming an [ARHAT](#).

vyāpti. (T. khyab pa; C. bian/bianzhi; J. hen/henshi; K. p’yōn/p’yōnji 遍/遍至). In Sanskrit, “pervasion” or “concomitance”; a term used in logic to indicate the relation that obtains between the reason and the predicate in a correct syllogism ([PRAYOGA](#)). There is positive concomitance (anvaya) and negative concomitance ([VYATIREKA](#)). For example, in order for the syllogism ([PRAYOGA](#)) “Sound is impermanent because of being produced” to be correct, it must be true that whatever is impermanent must necessarily be produced. That is, the category of the reason must either be coextensive with or subsume the category of the predicate. In Tibetan monastic debate, the term figures in one of three answers that the defender of a position may give. When presented with a syllogism or consequence ([PRASAṄGA](#)) by the challenger, the defender may (1) accept the thesis (’dod), (2) state that the reason is not a quality of the subject (rtags ma grub), or (3) state that there is no pervasion between the reason and the predicate (ma khyab).

vyatireka. (T. ldog pa; C. lizuofa; J. risahō; K. ijakpōp 離作法). In Sanskrit, in Buddhist logic, “exclusion” or negative concomitance, as compared with positive concomitance (anvaya); in the syllogism ([PRAYOGA](#)) “Sound is impermanent because of being produced,” the negative concomitance is whatever is permanent is not produced; the positive concomitance is whatever is produced is impermanent. The term also is used in the discussion of “reverse” (vyāvṛtta; T. ldog pa), a term that occurs in epistemology and logic treatises to describe how thought (as opposed to direct perception, viz., [PRATYAKSA](#)) apprehends its object via a negative route, whereby, for example, the idea of “chair” is arrived at through the exclusion of everything that is “nonchair.” This “non-nonchair” would be called the “reverse” (vyāvṛtta) of chair and the object of the concept of “chair.” See also [APOHA](#).

vyavadāna. (P. vodāna; T. nram byang; C. jing; J. jō; K. chōng 淨). In Sanskrit, “purification” or “cleansing”; often contrasted with [SAMKLEŚA](#), meaning impurity, defilement, stain, or pollution. This vyavadāna/samkleśa dichotomy is used in a variety of ways. These are understood to be two distinct and opposite modes of causation that condition one’s future—one leading to suffering and other to the end of suffering. A being’s consciousness ([VIJNĀNA](#)) is constantly entering into either the process of purification (vyavadāna) or defilement (samkleśa), depending upon actions and thoughts at any given moment. The process of purification may be undertaken by way of morality ([ŚĪLA](#)), concentration ([SAMĀDHI](#)), or wisdom ([PRAJÑĀ](#)). Purification is evidenced by the resultant presence of tranquillity ([PRAŚRABDHI](#)). In some [MAHĀYĀNA](#) texts, it is emphasized that the ultimate result of the process of purification is the realization that all phenomena ([DHARMA](#)) are ultimately devoid of any distinction between pure and impure. The term vyavadāna may also be used independently of samkleśa, as, for example, where a [BODHISATTVA](#)’s understanding of the [DHARMA](#) is said to be vyavadāna—pure and without blemish.

vyavahāra. (T. tha snyad; C. sudi/yanyu; J. zokutai/gongo; K. sokche/ōnō 俗諦/言語). In Sanskrit, “convention” or “designation”; often with the connotation of something superficial. Generally, this term refers to matters involved with the mundane or worldly realm, as opposed to those of the sacred or supramundane realm. Vyavahāra has two general applications in a Buddhist context. First, it is used to indicate the established social conventions, experiences, and practices of the quotidian world. In Buddhism, these conventions are contrasted with the

strict moral practices that conform to the ultimate truth ([PARAMĀRTHASATYA](#)) perceived by noble beings ([ĀRYA](#)). In this sense of a “conventional truth,” vyavahārasatya is synonymous with [SAMVṚTISATYA](#). Second, and rather more commonly, this term is used in the context of language and discourse to indicate those conventional words used by ordinary, unenlightened beings to designate reality as they (mis)understand it. Here, again, the terms and the objects that they designate are merely conventional truths (samvṛtisatya); the term vyavahārasatya sometimes is used as a synonym. Since, according to the doctrine of emptiness ([ŚŪNYATĀ](#)), all phenomena are devoid of any inherent, unchanging nature, the linguistic expressions used to designate the things of this world are purely conventional designations and cannot contain or communicate the true nature of those phenomena. Through the power of their practice, buddhas and [BODHISATTVA](#)s have an inherent understanding of all such linguistic expressions (see [NIRUKTI](#); [PRATIBHĀNA](#)) and use that knowledge to communicate the [DHARMA](#) to unenlightened beings. Buddhas and bodhisattvas, however, understand both the true and ineffable nature of the language they use, as well as the phenomena that language is meant to describe.

[Vyavahārasiddhi](#). (T. Tha snyad grub pa). In Sanskrit, “Proof of Convention”; a work attributed to [NĀGARJUNA](#); it is no longer extant, but six stanzas are cited by [ŚĀNTARAKSITA](#) in his [MADHYAMAKĀLAMKĀRAVṚTTI](#). The verses state that a [MANTRA](#) is composed of letters just as a medicine is composed of ingredients, but the mantra and the medicine are neither the same as nor different from the elements of which they are comprised. Because they are dependently arisen, they cannot be said to be either existent or nonexistent; instead, they exist conventionally. This fact is true of all phenomena, including cessation ([NIRODHA](#)), which were set forth by the Buddha for specific purposes.

[vyaya](#). (T. 'jig pa; C. mie; J. metsu; K. myōl 滅). In Sanskrit and Pāli, “disintegration” or “destruction”; a close synonym of [ANITYA](#), viz., “desinence” or “impermanence.” In the [SARVĀSTIVĀDA ABHIDHARMA](#), “disintegration” or “desinence” constitutes the final of the four characteristics ([CATURLAKSANA](#)) of compounded phenomena ([SAMSKRTADHARMA](#)), along with production or origination ([JĀTI](#)), continuance or maturation ([STHITI](#)), and “senescence” or decay ([JARĀ](#)). Vyaya refers to the inevitable tendency of all compounded things to disintegrate, once the cause and conditions that sustain them vanish. The various abhidharma systems disagree as to whether these four conditioned characteristics

are natural qualities inherent in all compounded things; or whether they are external factors that act upon those things, such as through “forces dissociated from thought” ([CITTAVIPRAYUKTASAMSKĀRA](#)). They also disagree as to whether the four occur successively over a period of time or whether they are four perspectives on a single instant ([KSANA](#)).

[Wachirayanwarorot](#). [alt. Wachirayan Warot] (Thai) (1860–1921). See [VAJIRAÑĀNĀVARORASA](#).

[wajō](#). (和上). An alternate Japanese transcription of the Sanskrit term [UPĀDHYĀYA](#), or “preceptor,” which is also pronounced kashō in the [TENDAISHŪ](#). This term is often interchangeable with [OSHŌ](#). See [HESHANG](#).

[wall contemplation](#). See [BIGUAN](#).

[Wanfosi](#). (J. Manbutsuji; K. Manbulsā 萬佛寺). In Chinese, “Monastery of Myriad Buddhas”; located outside the western gate of the old city wall of Chengdu in Sichuan province; currently only an archeological site. The monastery was founded during the Eastern Han period (25–220 CE) and survived through the end of the Ming dynasty (1368–1644), changing its name several times in the course of its history. It was known as Anpusi during the Liang dynasty (502–556), [JINGZHONGSI](#) during the Tang dynasty (618–907), Jingyinsi during the Song dynasty (960–1279), and Zhulinsi, Wanfusi, and, finally, Wanfosi, during the Ming dynasty (1368–1644), after which it fell into disrepair. Since the rediscovery of the site in 1882, some two hundred sculptures and other sacred objects have been uncovered during successive excavations, most of which are currently kept in the Sichuan Provincial Museum. The sculptures date mainly from the North–south Dynasties through the Tang periods. During the Tang, when the monastery was known as Jingzhongsi, it was the residence of the early [CHAN](#) monk [CHŌNGJUNG MUSANG](#) (680–756, alt. 684–762), a Korean monk from the Unified Silla dynasty (668–935), whose prosperous Sichuan Chan lineage came to be known as the [JINGZHONG ZONG](#) line. His toponym Chōngjung (Jingzhong) comes from this monastery of Jingzhongsi.

[Wangnyunsa](#). (王輪寺). In Korean, “Royal Wheel Monastery”; a major doctrinal ([KYO](#)) monastery located on Mt. Songak in the Koryŏ capital of Kaesŏng. It was one of the ten monasteries built in the capital in 919 by Wang Kŏn (T’aejo, r. 918–943), the first king of the Koryŏ dynasty, in conjunction with his policy to establish his new state on the foundations of the religious power of Buddhism. This monastery was the site for the ecclesiastical examinations ([SŪNGKWA](#)) for monks in the Doctrinal (Kyo) school, which were established during the reign of

King Kwangjong (r. 949–975). Such important Koryŏ Kyo monks as the state preceptor (KUKSA) Chigwang Haerin (984–1067) and the royal preceptor (WANGSA) Hyedŏk Sohyŏn (1038–1096) were appointed to their positions after taking the examinations at Wangnyunsa. Although Wangnyunsa seems not to have been as heavily patronized by the royal family as some of the other monasteries in Kaesŏng, the *Koryŏsa* (“History of Koryŏ”) notes a number of religious ceremonies that were held there during the dynasty. The monastery burned to the ground in 1236 during the Mongol invasion of the Korean peninsula and was subsequently rebuilt in 1275 by King Ch’ungnyŏl (r. 1274–1308). Wangnyunsa seems to have received special patronage during the reign of King Kongmin (r. 1351–1374). After his queen Noguk’s (d. 1365) death, Kongmin sited her memorial hall of Inhŭi chŏn at Wangnyunsa; his own memorial hall, Hyemyŏng chŏn, was built in 1376 at the west of the campus, the last reference to the monastery to appear in Korean historical materials. See also [KWANGMYŎNGSA](#).

[Wang o Ch’ŏnch’ukkuk chŏn](#). (C. Wang wu Tianzhuguo zhuan 往五天竺國傳). In Korean, “Memoir of the Pilgrimage to the Five Regions of India”; composed by the Korean monk-pilgrim [HYECH’O](#) (d.u.; c. 704–780). After being ordained in Korea, Hyech’o left for China sometime around 721 and spent perhaps three years on the mainland before departing for India (the Ch’ŏnch’ukkuk of the title) via the southern sea route in 724. After landing on the eastern coast of the subcontinent, Hyech’o subsequently spent about three years on pilgrimage to many of the Buddhist sacred sites, including [BODHGAYĀ](#), [KUSINAGARĪ](#), and [SĀRNĀTH](#), and on visits to several of the major cities in north central India. He then traveled in both southern and western India before making his way toward the northwest, whence he journeyed on into [KASHMIR](#), [GANDHĀRA](#), and Central Asia. Making his way overland across the Central Asian [SILK ROAD](#), Hyech’o arrived back in Chinese territory in December of 727, where he spent the rest of his life. Like other pilgrims before him, Hyech’o kept detailed notes of his pilgrimage, and his travelogue does not differ significantly in terms of style and content from the earlier and more famous records left by [FAXIAN](#) and [XUANZANG](#); unfortunately, unlike their works, only fragments of his account survive. His text is largely organized according to the kingdoms, regions, and pilgrimage sites that Hyech’o visited. Hyech’o offers a general description of the geography, climate, economy, customs, and religious practices of each place he visited, and, when necessary, he clarifies whether [MAHĀYĀNA](#), [HĪNAYĀNA](#), or some

combination of the two traditions was practiced at a specific site. Although Hyech'o is known to have been the disciple of [VAJRABODHI](#) and [AMOGHAVAJRA](#), considered by some as patriarchs of esoteric Buddhism, he makes no mention in his travelogue of tantric texts or practices. Hyech'o does note the dilapidated state of some major [STŪPAS](#) and monasteries, the advance of the Turkic tribes into Buddhist areas, and the absence of any Buddhist practice in Tibet at that early date. In these and other respects, Hyech'o's memoir serves as a valuable resource for the study of Buddhism and regional history along the Silk Road.

[Wang Rixiu](#). (王日休) (d. 1173). Chinese lay Buddhist during the Song dynasty (960–1279), who played an important role in revitalizing the [PURE LAND \(JINGTU\)](#) tradition, also known by his Buddhist name of Longshu. Although Wang was an accomplished Confucian scholar, he renounced all aspiration for civil office and instead devoted himself to pure land devotions, charitable activities, and a daily regimen of one thousand prostrations. Wang is best known as the author of *Longshu zhengguan jingtu wen* ("Longshu's Extended Writings on the Pure Land"), written in 1160, an extensive compendium of materials on the [SUKHĀVATĪ](#) pure land of [AMITĀBHA](#), drawn from sūtras, commentarial writings, and biographical materials, with Wang's own exegeses. The collection offers practical instructions on how to have faith, and achieve rebirth, in the pure land, as well as a series of edifying tales about the successful rebirths and miracles that others generated through their own devotions.

[wangshen](#). (J. bōshin; K. mangsin 亡身). In Chinese, lit., "loss of body," viz., "self-immolation." See [SHESHEN](#).

[wangsheng](#). (J. ōjō; K. wangsang 往生). In Chinese, "going to rebirth"; referring especially to rebirth in [AMITĀBHA](#)'s [PURE LAND](#) of [SUKHĀVATĪ](#). In its broadest sense, the term is sometimes used to refer to rebirth in either the three realms of existence ([LOKADHĀTU](#)) or other buddhas' or [BODHISATTVAS](#)' pure lands, such as the [ABHIRATI](#) pure land of the buddha [AKSOBHYA](#) or the [TUSITA](#) heaven of the bodhisattva [MAITREYA](#). The term has a distinctive usage in the East Asian [PURE LAND](#) traditions, however, where it refers specifically to rebirth in sukhāvātī. The seminal pure land sūtra, the [SUKHĀVATĪVYŪHASŪTRA](#), regards this kind of rebirth as the achievement of the stage of nonretrogression (S. [AVAIVARTIKA](#)), one of the stages of the [BODHISATTVA](#) path. The *Wangsheng lun zhu*, a commentary by [TANLUAN](#) on [VASUBANDHU](#)'s [WULIANGSHOU JING YOUNPOTISHE YUANSHENG JI](#) (**Aparimitāyuhṣūtropadeśa*), says that rebirth in sukhāvātī is to be distinguished

from the cycle of rebirth in the three realms of existence, because birth in the pure land frees one from any prospect of subsequent rebirths in [SAMSĀRA](#). In order to go to rebirth in sukhāvātī, the pure land tradition offered the simple practice of chanting the buddha Amitābha’s name (C. [NIAN FO](#); K. yōmbul; J. [NENBUTSU](#); see also [NAMU AMIDABUTSU](#)). Ritual practices associated with taking rebirth in the pure land also include the deathbed recitation of the name of Amitābha, which is introduced in the *Sukhāvātīvyūhasūtra* as the eighteenth of the forty-eight vows that [DHARMAKĀRA](#) made before he attained enlightenment. According to this vow, a person may be reborn in sukhāvātī by sincerely calling out Amitābha’s name a mere ten times. The quality of rebirth in the pure land will be dependent on the practitioner’s level of achievement, viz., as superior, average, or inferior. Superior disciples are those who arouse the thought of enlightenment ([BODHICITTA](#)) and maintain mindfulness of Amitābha, while cultivating meritorious qualities. Average disciples are those who arouse the thought of enlightenment and maintain mindfulness of Amitābha, but who do not cultivate meritorious qualities to the same extent as do superior disciples. Inferior disciples are those who arouse the thought of enlightenment and maintain mindfulness of Amitābha, but who have not yet consistently begun to cultivate meritorious qualities. Several collections of testimonials regarding the efficacy of wangsheng practice exist in China, including the seventh-century *Wangsheng zhuan* by Jiakai (fl. c. 627) and the [FAYUAN ZHULIN](#) by Daoshi (d. 683).

[Wangsheng Jingtu zhuan](#). (往生淨土傳). In Chinese, “Biographies of Those Who Have Gone to Rebirth in the Pure Land.” See [JINGTU ZHUAN](#).

[Wang Wei](#). (J. Ō I; K. Wang Yu 王維) (701–761). Chinese poet, painter, and musician during the Tang dynasty and close associate of masters in the early [CHAN](#) school; his cognomen was Mojie. In 721, Wang Wei passed the imperial civil service examination and was appointed as assistant director of the Imperial Music Office. By 759, shortly after the An Lushan rebellion, he had risen to the high bureaucratic rank of right assistant director of the Department of State Affairs. Wang Wei is known to have maintained close relationships with several major figures in the thriving Chan tradition and wrote the funerary inscriptions for such monks as [JINGJUE](#) (683–c. 760), author of the [LENGQIE SHIZI JI](#), and the sixth patriarch ([LIUZU](#)) [HUINENG](#). Although there is no direct evidence of Buddhist influences in his writing, it is commonly asserted that his close

relations with these Chan figures contributed to Wang Wei's subtle and reflective descriptions of nature in his landscape poetry.

wangxiang. (J. mōzō; K. mangsang 妄想). In Chinese, “deluded thoughts,” “fantasies,” viz., thoughts that arise from ignorance ([AVIDYĀ](#)), craving ([TRSNĀ](#)), conceptualization ([VIKALPA](#)), or inverted views ([VIPARYĀSA](#)), which must be eliminated in order to achieve enlightenment. The Chinese term corresponds variously to such Sanskrit terms as [PARIKALPITA](#) (imaginary), [VIKALPA](#) (thought or conception), and [KALPANĀ](#) (conceptual construction). In Korean [SŎN](#) Buddhism, distracting thoughts or fantasies that arise during meditation practice, no matter how salutary, are denigrated as mangsang. The term has also entered vernacular Korean to mean “daydreaming,” “flights of fancy,” or even “paranoia.”

Wangyal, Geshe. (1901–1983). Tibetan monk-scholar of the [DGE LUGS](#) sect who played an important role in the transmission of Tibetan Buddhism to the United States. He was born in the region of Kalmykia of Czarist Russia, whose Mongol population practiced Tibetan Buddhism, and became a novice monk at the age of six. He was selected by [AGVAN DORZHIEV](#) to continue his studies in [LHA SA](#), enrolling at the Sgo mang college of '[BRAS SPUNGS](#) monastery in 1922. After nine years of study, he traveled to Beijing and then to Calcutta, where he was hired to serve as translator for Sir Charles Bell (1870–1945), British political officer for Sikkim, Bhutan, and Tibet, during his travels in China and Manchuria. In India, he met the British mountaineer Marco Pallis, with whom he spent four months in England in 1937. With the Chinese invasion of Tibet, he left Tibet for India, coming to the United States in 1955 at the invitation of the Kalmyk community of New Jersey. In 1958, he founded the Lamaist Buddhist Monastery of America, known in Tibetan as the Bslab gsum bshad grub gling (Labsum Shedrup Ling), in Freewood Acres, New Jersey, the first Tibetan Buddhist monastery in the United States. At the monastery and subsequently at Retreat House (later named Tibetan Buddhist Learning Center) in Howell, New Jersey, he brought a number of monks to the United States and gave teachings to a large number of students, several of whom went on to become scholars of Buddhism. His full name was Dge bshes Ngag dbang dbang rgyal.

Wanshan tonggui ji. (J. Manzen dōkishū; K. Mansŏn tonggwi chip 萬善同歸集). In Chinese, “The Common End of Myriad Good Practices,” in three rolls; a primer of Buddhist thought and practice composed by the Song-dynasty [CHAN](#)

master [YONGMING YANSHOU](#) (904–975). Written largely in catechistic style, the *Wanshan tonggui ji* relies heavily upon scriptural quotations to answer questions raised concerning everything from meditation and making offerings of flowers to reciting the name of the buddha [AMITĀBHA](#) (see [NIANFO](#)). The overall message of the text is that all practices done properly return to the “true mark” of reality (shixiang), and this message is often interpreted as supporting the notion of “the unity of Chan and the teachings” (Chan jiao yizhi) and that of “sudden awakening (followed by) gradual cultivation” ([DUNWU JIANXIU](#)).

[Wanshousi](#). (萬壽寺). In Chinese, “Long Life Monastery”; located on Mt. Jing, Hangzhou prefecture, in present-day Zhejiang province of China; the first of the so-called “five mountain” (wushan, cf. [GOZAN](#)) monasteries of the [CHAN](#) tradition in China. Wanshousi, also known as Jingshansi, was established by the Chan master [FAQIN](#) during the Tianbao reign (742–756) of the Tang dynasty. During the Song dynasty, the monastery was designated as a public monastery, or “monastery of the ten directions” ([SHIFANG CHA](#)), and was renamed on several occasions as Chengtian Chanyuan (Upholding Heaven Chan Cloister), Nengren Chansi (Śākyamuni Chan Monastery), and Xingsheng Wanshou Chansi (Flourishing of Holiness, Long Life Chan Monastery). Wanshousi attracted many eminent abbots, such as [DAHUI ZONGGAO](#) and [WUZHUN SHIFAN](#), and flourished under their supervision. The famous Japanese pilgrims [DŌGEN KIGEN](#) and [ENNI BEN'EN](#) also studied at Wanshousi. The monastery was destroyed in a conflagration at the end of the Yuan dynasty but was reconstructed during the Hongwu era (1368–1398) of the Ming dynasty. Largely through the efforts of the abbot Nanshi Wenxiu and others, Wanshousi regained some of its past glory.

[Wanthadipani](#). (P. Vamsadīpanī). In Burmese, “Lamp on the History [of the Religion]”; the first of four Burmese thathanawin, or Buddhist chronicles, that were composed in Burma (Myanmar) during the Konbaung dynasty (1752–1885). Written c. 1799 in the Burmese language by the monk Mehti [SAYADAW](#), the text records the history of the [THERAVĀDA](#) saṅgha (S. [SAMGHA](#)) from its inception during the lifetime of the Buddha, through cycles of decline and restoration in ancient India, Sri Lanka, and Burma, up through a reformation of the Burmese saṅgha begun at the capital [AMARAPURA](#) in 1784, of which Mehti Sayadaw himself was a leader. The text relies heavily on the Pāli chronicles [SAMANTAPĀSĀDIKĀ](#) and [MAHĀVAMSA](#) for its account of the ancient tradition in India and Sri Lanka. It takes its material for the history of Buddhism in Burma

among the Pyu, Myamma (ethnic Burmans), and Mon peoples from a variety of indigenous sources, including the [KALYĀNĪ INSCRIPTIONS](#) (1479), the [YAZAWIN-KYAW](#) (1502), and U Kala's [MAHAYAZAWIN-GYI](#) (c. 1730). The text concludes with an account of Mehti Sayadaw's missionary activities in the city of Taungoo, where he was dispatched to propagate the new monastic reforms among the local saṅgha.

[Warren, Henry Clarke](#). (1854–1899). One of the first American scholars of Buddhism, known for his translations from the Pāli; born in Boston, Massachusetts, in 1854. Warren suffered a crippling injury as a result of a childhood fall that left him with permanent spinal damage and excruciating physical pain throughout his life. After graduating from Harvard University in 1879, Warren studied with the eminent Sanskrit scholar Charles Lanman at Johns Hopkins University and, together with Lanman, founded the Harvard Oriental Series. Warren visited Oxford in 1884, where he met T. W. [RHYS-DAVIDS](#) and joined the [PĀLI TEXT SOCIETY](#) around the time of its foundation; he also made a substantial financial donation to the organization. Warren's best known work is an extensive anthology of Pāli materials, *Buddhism in Translations*, published in 1896 as the third volume in the Harvard Oriental Series. He also published an edition of [BUDDHAGHOSA](#)'s [VISUDDHIMAGGA](#) as volume 41 in that series. Warren died in Cambridge, Massachusetts, at the age of forty-five as a result of his debilitating spinal injury.

[wat](#). In Thai, Khmer, and Lao, the most common term for a [VIHĀRA](#) or monastic complex. Wat is derived from the Pāli term vatta, meaning “practice, function, observance,” which by extension comes to be interpreted as a “place where practice is performed,” and thus a “monastery” (wat). Although Pāli regulations technically require a complex to have at least three monks in residence to be classified as a vihāra, the term wat is used in Thailand to refer to the deserted ruins of monasteries as well as to Hindu temples and Christian churches.

[Wat Arun](#). In Thai, “Monastery of the Dawn,” deriving from the Sanskrit and Pāli Aruṇa, the personification of dawn; located in Bangkok on the west bank of the Chao Phraya River. After defeating the Burmese in 1767, King Taksin (Boromrāja IV) is said to have arrived at the Wat Makok (“Olive Monastery”) at dawn and renamed it Wat Jaeng (“Bright Monastery”). King [RĀMA IV](#) bestowed on the monastery its present name. The monastery is best known today for its tall prang, or Khmer-style tower, which was constructed during the reigns of kings

Rāma II and Rāma III. The central tower is 250 feet tall and symbolizes Mount [SUMERU](#). The temple was briefly the seat of the Emerald Buddha (see [PHRA KAEW MORAKOT](#)) before the image was moved to [WAT PHRA KAEW](#) in 1784.

[Wat Benchamabophit](#). In Thai, “Monastery of the Fifth King,” deriving from the Sanskrit Pañcamapavitra, with pañcama (Thai, benchama) meaning fifth, and pavitra (Thai, bophit/bophitra) meaning holy or beneficent one, a synonym for “king”; the monastery is commonly known in English as the “Marble Temple.” Located in Bangkok, it is one of the most renowned modern monasteries in Thailand. Construction began in 1900 at the request of the eponymous [RĀMA V](#) (Chulalongkorn), and the complex is built from Italian marble. It houses a large bronze statue of the Buddha called Phra Phuttha Chinnarat (Buddhajinarāja), which is a replica of the original. The ashes of Rāma V are enshrined under the image.

[Wat Bowonniwet](#). [alt. Wat Bovoranives]. In Thai, “Monastery of Excellent Abode” (P. Pavaranivesa); the royal monastery that is the Bangkok headquarters of the [THAMMAYUT](#) sect of Thai Buddhism. Built in 1829, it is most famous as the monastery where Prince Mongkut, the future king [RĀMA IV](#) and leader of the Thammayut reform movement, served as abbot, beginning in 1836, before he ascended the throne in 1851. The future king lived as a monk (his ordination name was Vajirañāṇa) for twenty-seven years, fourteen of which he spent as abbot of this monastery, before he returned to lay life in order to assume the throne of the Chakri dynasty. Subsequent members of the royal family have served the traditional period of temporary ordination as monks of this monastery; his son, the eminent scholar-monk [VAJIRAÑĀNAVĀRORASA](#) (1860–1921), was the long-time abbot of the monastery. The main temple enshrines the buddha image called Phra Phuttha Chinnasi (Buddhajinaśrī), said to date from 1357. Wat Bowonniwet is also the home of Mahamakut Buddhist University, one of Thailand’s two public Buddhist universities.

[Water and Land Ceremony](#). See [SHUILU HUI](#).

[Wat Mahathat](#). In Thai, “Monastery of the Great Relic” (P. Mahādhātu); the abbreviated name of several important Thai monasteries. ¶ Wat Mahathat in the ancient Thai capital of [AYUTHAYA](#) was constructed in 1374 and served as the seat of the [SAṄGHARĀJA](#) of the Kamavasi (P. Gā mavāsi, lit. “city-dweller”) sect. The temple complex was expanded and restored several times before the city was

sacked by the Burmese in 1767; it remains in ruins. Excavations in 1956 unearthed relics. ¶ Wat Phra Mahathat Woromaha Vihan (P. Mahādhātuvaramahāvihāra), located in Nakhon Si Thammarat and thus also known as [WAT PHRA THAT NAKHON SI THAMMARAT](#), was founded c. 757 CE and was originally a [ŚRĪVĪJAYA MAHĀYĀNA](#) Buddhist monastery. Its famous [STŪPA](#), modeled on the [MAHĀTHŪPA](#) in Sri Lanka, was built in the early thirteenth century to house a tooth relic of the Buddha brought back from the island. ¶ The best-known of the contemporary wats with this name, Wat Mahathat Yuwaraja Rangsarit Raja Woromaha Wihan (P. Mahādhātuyuvarāja [Thai, Rangsarit] Rājavarāmāhāvihāra), dates from the Ayuthaya period (when it was called Wat Salak), and was named the relic temple for Bangkok in 1803. Because of its location near the palaces, it has often been used for royal ceremonies. Mahachulalongkornrajavidyalaya, Thailand's largest Buddhist university, was located on its grounds until 2008, when the main campus was moved to Wangnoi, Ayuthaya.

[Wat Pho](#). In Thai, “Monastery of Awakening” (P. [BODHI](#)); also known as Wat Phra Chetuphon (P. [JETAVANA](#)); the oldest and largest monastery in Bangkok, constructed in the sixteenth century and occupying twenty acres of land. It was extensively rebuilt in 1781 by King Rāma I and renovated in the first half of the nineteenth century by King Rāma III. The site also houses Thailand's largest reclining buddha image and the largest number of buddha images in the country. The reclining buddha image, constructed in the reign of King Rāma III, is 153 feet (forty-six meters) long and fifty feet (fifteen meters) high. Modeled out of plaster around a brick core, the image is finished in gold leaf, with mother-of-pearl inlay in the eyes. The feet display the 108 different auspicious characteristics of a buddha. In all, the monastery contains over a thousand buddha images, many from the ruins of the former capitals of [AYUTHAYA](#) and [SUKHOTHAI](#), and a total of ninety-five [STŪPA](#)s of various sizes. Other features are a series of 152 marble slabs depicting the second half of the epic Rāmākian story (the Thai version of the Hindu epic the *Rāmāyaṇa*), as well as numerous chapels, rock gardens, statues, and bell towers. Sometimes referred to as Thailand's first university, Wat Pho also contains an encyclopedic collection of engravings and paintings dealing with astrology, botany, herbal medicine, massage, and yoga. The wat is still a center for teaching traditional Thai massage.

[Wat Phra Kaew](#). [alt. Wat Phra Kaeo]. In Thai, “Temple of the Emerald

Buddha,” perhaps the most famous Buddhist temple in Thailand, located on the grounds of the royal palace in Bangkok. Much of the construction had been completed when Rāma I moved the Thai capital to Bangkok in 1785. It is a large-walled complex, containing dozens of golden pagodas, many shrines, and two libraries. Unlike most other Buddhist temples in Thailand, the complex does not include monastic quarters because of its location inside the palace grounds. The temple is best known as the site of the Emerald Buddha, or [PHRA KAEW MORAKOT](#), the most sacred buddha image in Thailand; Kaew is an indigenous Thai word for “glass” or “translucent”; morakot derives from the Sanskrit word for emerald (S. marakata).

[Wat Phra Pathom Chedi](#). (P. Paṭhamacetī). In Thai, “Temple of the First Reliquary”; the monastery built at the site of what is said to be the tallest Buddhist [CAITYA](#) (P. cetī) in the world at over 394 feet (120 meters); located in the Thai town of Nakhon Pathom. See [PHRA PATHOM CHEDI](#).

[Wat Phra Phutthabat](#). In Thai, “Monastery of the Buddha’s Footprint” (P. [BUDDHAPĀDA](#)); a Thai monastery located in Saraburi province. In the seventeenth century, a hunter encountered a large puddle of water that appeared to be a footprint of the Buddha (buddhapāda). Once this identification was verified, a monastery was built to enshrine the footprint. Visiting this monastery is considered a source of great merit, and it is traditional for the Thai king to make an annual pilgrimage to the site to pay homage to the relic.

[Wat Phra Thammakai](#). (Thai). See [DHAMMAKĀYA](#).

[Wat Phra That Doi Suthep](#). In Thai, “Monastery of the Relic at Mt. Sudeva” (‘That’ is the Thai word for relic [P. dhātu], Suthep is the Thai pronunciation of the Pāli proper name Sudeva, and Doi is a non-Thai northern word for mountain). A famous mountain monastery in northern Thailand, built on a site that has long been considered sacred and the home of guardian spirits. According to legend, the site was chosen in 1371 CE by a white elephant that was sent out by local monks to find an auspicious location for enshrining a relic ([DHĀTU](#); [ŚARĪRA](#)). The site has been expanded several times with the addition of buildings, murals, bells, and parasols. See also [KHRUBA SI WICHAI](#).

[Wat Phra That Nakhon Si Thammarat](#). In Thai, “Monastery of the Relic (P. Dhātu) in Nakhon Si Thammarat” (P. *Nagara-Sīri-Dhammarāja), also known as

Wat Phra Mahathat Woramaha Wihan (Mahādhātuvaramahāvihāra); the oldest and most revered Buddhist site in southern Thailand. The monastery dates to 757 CE and was originally a [ŚRĪVIJAYA MAHĀYĀNA](#) Buddhist monastery. Its famous [STŪPA](#), modeled on the [MAHĀTHŪPA](#) in Sri Lanka, was built in the early thirteenth century to house a tooth relic brought back from the island. See also [WAT MAHATHAT](#).

[Wat Phra That Phanom](#). In Thai, “Monastery of the Relic (P. [DHĀTU](#)) in the city of Phanom” (Phanom is the Lao and Khmer term for mountain); the most revered Buddhist shrine in northeast Thailand, located in the town of Nakhon Phanom. The [STŪPA](#) on the site has a history dating back some fifteen hundred years, according to some local traditions, while other legends claim that it was originally built in 535 BCE, eight years after the death of the Buddha, as a reliquary for his breastbone. The structure is Lao in style, with a square base surmounted by slender tapering vertical columns in the shape of an elongated lotus bud. Its present appearance dates from 1977, after its predecessor collapsed under heavy rains in 1975, and is modeled after [WAT THAT LUANG](#) in Vientiane, Laos.

[Wat Phu](#). [alt. Wat Phou; Vat Phu]. In Lao, “Mountain Monastery”; an important Khmer monastery complex located in Champassak province on the Mekong River in southern Laos. The first monastery was probably constructed in the fifth century CE, although the surviving structures (now largely in ruins) date from the eleventh through the thirteenth centuries. Originally a Śaiva temple, the ruins contain a shrine to Śiva’s bull Nandin, as well as pediments depicting [INDRA](#), Kṛṣṇā, and Viṣṇu. The temple complex was converted to Buddhist use in the thirteenth century, with Buddhist images added to many of the shrines. In 2001, the site was designated a UNESCO World Heritage Site.

[Wat Suthat Thepwararam](#). [alt. Wat Suthat]. In Thai, “Beautiful Noble Garden of the Devas” (P. Sudassanadevavarārāma); an important Thai monastery in Bangkok, founded by King Rāma I in 1807. It houses an image of the Buddha seated in the “earth-touching” ([BHŪMISPARŚAMUDRĀ](#)) pose. The image, known as Phra Sisakayamuni (derived from Śrī-[ŚĀKYAMUNI](#)), is considered the largest (over twenty-five feet tall) and oldest bronze buddha image in Thailand; it was brought from [SUKHOTAI](#) by boat. The monastery is also known for its intricately carved wooden doors, created during the reign of Rāma II (r. 1809–1824) and now housed in the National Museum, and its murals of the Buddha’s previous

lives, from the reign of Rāma III (r. 1824–1851). The large ordination hall of the monastery is considered one of the most beautiful in Thailand. The temple grounds also contain twenty-eight pagodas, representing the twenty-eight buddhas of the auspicious eon. The temple is the traditional seat of the brāhmaṇa priest who oversees important Thai royal ceremonies, such as the annual plowing ceremony. In front of the monastery is a giant swing, once used in an annual festival in which young men tried to swing high enough to retrieve a sack of gold suspended at a height of seventy-five feet. The festival was banned in the 1930s because of the number of deaths that resulted from the competition.

Wat That Luang. In Lao, “Monastery of the Royal [STŪPA](#)”; located in the Laotian capital of Vientiane, it is one of the most important Buddhist sites in Laos. According to legend, the original monastery was founded by monks sent by [AŚOKA](#) in the third century BCE. Relics from the early twelfth century have been uncovered, although these may derive instead from a site in modern-day northern Thailand. The prestige of That Luang may have been enhanced due to its proximity to earlier Buddhist sites. The present monastery was constructed on a small hill south of the city in 1818 during the reign of King Manthaturat (r. 1817–1836). It is said to have been built partially from branches of a [BODHI TREE](#) located near Wat Keo Fa. The large bronze and gilded buddha in the nave was transferred from the now defunct Wat Aham Mungkhun, located a short distance from That Luang. That Luang has long been one of the important ritual sites in Laos for Buddhist, folk, and royal ceremonials. There are two large [STŪPAS](#) on the grounds. The golden funerary stūpa in front of the main hall contains the ashes of the popular and last crowned Laotian king, Sisavang Vong (r. 1904–1959). The grand stūpa, which towers over the rear of the main hall, dates from 1818 and is said to contain relics ([DHĀTU](#); [ŚARĪRA](#)) of the Buddha. The wat also contains a number of smaller stūpas that contain ashes of kings, other members of the royal family, and a variety of other dignitaries. The wat has one of Vientiane’s larger communities of monks and novices.

Wat Traimit. In Thai, “Monastery of the Three Friends” (S. Traimitra), so named because it was founded by three friends who emigrated from southern China; its full name is Wat Traimit Wittayaram Wora Wihan (S. Traimitravidyārāmaṅgaravihāra). This monastery is located in the Thai capital of Bangkok and is commonly known in English as “The Temple of the Golden Buddha.” It contains what is said to be the world’s largest gold buddha image,

named Phra Phuttha Maha Suwan Patimakon (P. Buddhamahāsuvannaṇapaṭimā), seated in the “earth-touching” ([BHŪMISPARŚAMUDRĀ](#)) pose. The image itself is almost ten feet tall and is claimed to be composed of over five tons of solid gold. The statue, in the [SUKHOTHAI](#) style, is believed to have been originally installed in the ancient Thai capital of Sukhothai, perhaps in the thirteenth century. In order to protect it from being plundered by Burmese invaders, it was covered with a layer of plaster. The plastered statue was eventually installed in Wat Phraya Krai during the reign of King Rāma III (r. 1824–1851). When that monastery fell into disrepair around 1931, the image was placed in storage. When it was being moved to its present location in the mid-1950s, the plaster cracked, revealing the golden buddha image inside.

[Watts, Alan](#). (1915–1973). A widely read British Buddhist writer. Born in Kent, Watts was inspired to study Buddhism after reading such works as W. E. Holmes’ *The Creed of the Buddha*. At the age of fifteen, he declared himself a Buddhist and wrote to the Buddhist Lodge of the Theosophical Society in London, becoming a student and protégé of the head of the Lodge (later the Buddhist Society), [CHRISTMAS HUMPHREYS](#). At the age of nineteen, Watts wrote his first book, *The Spirit of Zen*, largely a summary of the writings of [DAISETZ TEITARO SUZUKI](#). Shortly thereafter, he assumed the editorship of the journal *Buddhism in England* (later to become *The Middle Way*). In 1938, he married the American Eleanor Everett, the daughter of Ruth Fuller Everett (later, [RUTH FULLER SASAKI](#)). They immigrated to the United States during World War II (Watts, a pacifist, did not serve) and lived in New York, where Watts studied briefly with Shigetsu Sasaki, a Japanese artist and Zen practitioner known as Sokeian. Watts gave seminars in New York and published a book entitled *The Meaning of Happiness*. Shortly after his wife had a vision of Christ, Watts decided to become a priest and entered Seabury-Western Theological Seminary near Chicago. He became an Episcopal priest and served for five years as chaplain at Northwestern University, ultimately resigning from the priesthood shortly after his wife had their marriage annulled. He later worked for six years at the newly founded American Academy of Asian Studies in San Francisco. He published *The Way of Zen* in 1957, followed by *Nature, Man, and Woman* in 1958, and *Psychotherapy East and West* in 1961. He supported himself as a popular author and speaker and played a leading role in popularizing Buddhism and Zen until his death in 1973.

weikza. [alt. weikza-do]. In Burmese, a “wizard,” deriving from the Pāli vijjādhara (S. [VIDYĀDHARA](#)). In Burmese popular religion, the weikza is portrayed as a powerful thaumaturge possessed of extraordinarily long life, whose abilities derive from a mastery of tranquillity meditation (P. samatha; S. [SAMATHA](#)) and a variety of occult sciences such as alchemy (B. ekiya), incantations (P. manta; S. [MANTRA](#)), and runes (B. ing, aing). Collectively, these disciplines are called weikza-lam or “the path of the wizard.” Training in this path is esoteric, requiring initiation by a master (B. saya), and votaries typically are organized into semisecret societies called weikza-gaing (P. vijjāgaṇa). Although concerned with the acquisition of supernatural powers and an invulnerable body, these attributes are ultimately dedicated to the altruistic purpose of assisting good people in times of need and protecting the Buddha’s religion from evil forces. In this regard, weikza practitioners often act as healers and exorcists, and in the modern era weikza-sayas with large followings are among the country’s notables, who have built monumental pagodas and restored national shrines. The perfected weikza has the ability to live until the advent of the future buddha Metteya (S. [MAITREYA](#)), at which time he can choose to pass into nibbāna (S. [NIRVĀNA](#)) as an enlightened disciple (P. sāvaka arahant; S. [ŚRĀVAKA ARHAT](#)), vow to become himself a solitary buddha (P. paccekabuddha; S. [PRATYEKABUDDHA](#)) or a perfect buddha (P. sammāsambuddha; S. [SAMYAKSAMBUDHA](#)), or simply continue living as a weikza. Weikza practitioners typically eschew the practice of insight meditation (P. [VIPASSANĀ](#); S. [VIPAŚYANĀ](#)) on the grounds that this might cause them to attain nibbāna too quickly. Although largely domesticated to the prevailing worldview of Burmese [THERAVĀDA](#) orthodoxy, weikza practice and orientation ultimately derive from outside the Pāli textual tradition and show striking similarities to the Buddhist [MAHĀSIDDHA](#) tradition of medieval Bengal.

Weimojie suoshuo jing zhu. (J. Yuimakitsu shosetsukyōchū; K. Yumahil sosŏl kyōng chu 維摩詰所說經註). An influential commentary on the [VIMALAKĪRTINIRDEŚĀ](#). The commentary is attributed to [KUMĀRAJĪVA](#), but it was actually written by his disciple [SENG ZHAO](#), who recorded the interpretations of his teacher and combined them with those offered by other of Kumārajīva’s disciples, such as [DAOSHENG](#) and Daorong. The commentary offers a paragraph-by-paragraph analysis of the sūtra and follows the order of Kumārajīva’s Chinese translation of the sūtra. It is the first of the many commentaries on this famed rendering of the *Vimalakīrtinirdeśa* and is still the most frequently cited.

[weinuo](#). [alt. weina] (S. *karmadāna/*karmādāna; T. las su bsko ba; J. ina/ino; K. yuna 維那/唯那). In Chinese, “rector”; a term designating either the process of overseeing, or the specific supervisor of, such crucial monastic activities as apportioning dwellings, managing the refectory, arranging sleeping quarters, cleaning the monastery grounds, *etc.* According to various [VINAYA](#) codes and Chinese pilgrimage accounts such as [YIJING](#)’s [NANHAI JIGUI NEIFA ZHUAN](#), it was the rector’s duty to strike instruments, such as gongs or chimes ([GHANTA](#)), to remind others of the monastic schedule. Assemblies, meals, and services were conducted with the help of the rector’s announcements. Because of his formal role in maintaining the monastic schedule, the rector may have thus come to serve as the principal supervisor or manager of daily activities in the monastery. The Sanskrit term *karmadāna does not appear in the extant corpus of Indian Buddhist literature, although it is attested in the [MAHĀVYUTPATTI](#) Sanskrit-Tibetan lexicon, and the reconstruction is confirmed in Chinese transcriptions. In India, however, karmadāna may not necessarily have referred to a specific monastic office, but rather to the general act of “assigning” (lit. giving, [DĀNA](#)) “duties” (lit. action, viz., [KARMA](#)) within the monastery. The Chinese term weinuo, however, clearly refers to a monastic office. The term is typically parsed as a combination of a lexical translation and phonetic transcription, and means something like “regulating (wei) the [dā]na,” an interpretation related to the literal sense of the Sanskrit term as “assigning duties,” and becomes used in East Asian Buddhism as the specific title of a monastic administrator who delegates responsibilities within the monastery—and thus a “rector.” According to the Chinese monastic codes ([QINGGUI](#)), the rector was responsible for all matters regarding the [SAMGHA](#) and especially the saṃgha hall ([SENGTANG](#)). The rector not only was in charge of the physical maintenance of the hall itself, but he also was called upon to settle issues, such as the determination of relative seniority or the appropriate punishment for transgressions committed by residents of the saṃgha hall. The rector had the responsibility for appointing various low-ranking positions within the monastery, such as attendants, and conducted the tea ceremony. The weinuo also was in charge of leading the formal chanting at daily services, which involved much use of gongs and percussion instruments; weinuo is thus sometimes translated as functionally equivalent to the Western monastic office of “precentor,” the leader of the monastic choir. In Korean monasteries, the yuna serves as a “rector” in that he has formal responsibility for enforcing discipline, making work assignments, and arranging the time for group work; in addition, however, he also serves as nominal head of the meditation compound

in the monastery and spiritual advisor to the meditation monks.

Weishan jingce. (J. Isan Kyōsaku [alt. Keisaku]; K. Wisan Kyōngch'aek 滙山警策). See [GUIZHAN JINGCE](#).

Weishan Lingyou. (J. Isan Reiyū; K. Wisan Yōngu 滙山靈祐) (771–853). Alternate Chinese pronunciation of [GUIZHAN LINGYOU](#), cofounder of the [GUIYANG ZONG](#) [alt. Weiyang zong] of the mature [CHAN](#) tradition. See [GUIZHAN LINGYOU](#).

Weituo tian. (J. Idaten; K. Wit'a ch'ōn 韋駄天). A Buddhist guardian deity, who is especially popular in East Asia, where he is often designated as a [BODHISATTVA](#) (pusa) or divinity ([DEVA](#); C. tian). Weituo is connected to the god Kārtikeya, also known as Skanda, whom the Buddhist tradition appropriated from the Hindu pantheon. Kārtikeya, the six-headed son of Śiva, is a Hindu god of war who helps defend the gods; in Buddhism, he became one of the many guardian deities who protect the dispensation, its sacred objects, and its sacred spaces. Weituo is the spirit commander of the thirty-two divine generals subordinate to the four heavenly kings ([CATURMAHĀRĀJA](#); see [LOKAPĀLA](#)), as well as one of the eight generals under [VIRŪDHAKA](#), the heavenly king of the southern quarter of the world. He is also identified with [KUMĀRABHŪTA](#) (C. Dongzhen). His East Asian name “Weituo” is apparently a mistaken Sinographic transcription from “Sijiantuo” or “Jiantuo tian,” both Chinese transcriptions of Skanda. Weituo’s role as a dharma protector ([DHARMAPĀLA](#)) is reflected in a story from the *Daoxuan lüshi gantong lu* (“Preceptor Daoxuan’s Record of Miraculous Stories,” c. seventh century), written by the Chinese [VINAYA](#) master [DAOXUAN](#) (596–667), which relates that Weituo was instructed by the dying Buddha to protect the dharma whenever it was disturbed by demonic forces ([MĀRA](#)). From the Tang dynasty onward in China, Weituo was considered the guardian of monasteries and Buddhist practitioners, as well as a symbol of fierce determination in spiritual training. One of Weituo’s specific roles was to protect the [STŪPAS](#) that enshrine the Buddha’s relics ([ŚARĪRA](#)). In a popular story involving Weituo, a group of malevolent demons steals one of the Buddha’s tooth relics immediately following his death and cremation. Weituo battles the demons, saves the relic, and thereby earns a reputation as a fierce protector of the dharma. Weituo is typically depicted as a young man in full armor, with the headgear of a Chinese general. He is also often shown leaning on his weapon, sometimes a sword, but usually a [VAJRA](#). In many East Asian monasteries,

Weituo's image is found to one side of, and facing, the Buddha image in the main shrine hall ([TAEÜNG CHÖN](#)). Weituo is also seen in the company of, and sometimes back to back with, [AVALOKITEŚVARA](#) and [MAITREYA](#). His visage also frequently appears at the end of Chinese editions of the [SŪTRAS](#), as a reminder of his role in protecting the dharma.

[Weixin jue](#). (J. Yuishinketsu; K. Yusim kyŏl 唯心訣). In Chinese, “Essentials of Mind Only”; an exposition on [CITTAMĀTRA](#) by the [CHAN](#) master [YONGMING YANSHOU](#). In this short treatise, Yongming launched a critique of more than 120 differing Buddhist positions, and argued instead that these variant views are but manifestations of a single, true mind. By cutting through to this mind, Yongming argued that all conceptual dichotomies (e.g., gain and loss, right and wrong, sudden and gradual) would be brought to an end and an inconceivable awakening would be attained.

[weixin jingtu](#). (J. yuishin no jōdo; K. yusim chŏngt'o 唯心淨土). In Chinese, “the mind-only [PURE LAND](#)”; an interpretation of the pure land influential in the [PURE LAND](#), [CHAN](#), [HUAYAN](#), [TIANTAI](#), and esoteric schools; synonymous with the phrase “[AMITĀBHA](#) Buddha of one's own nature/mind” (zixing Mituo/weixin Mituo/jixin Mituo). Rather than seeing Amitābha's pure land of [SUKHĀVATĪ](#) as a physical land located to the west of our world system, this interpretation suggests that the pure land is actually identical to, or coextensive with, the mind itself. One understanding of this interpretation is that the concept of “pure land” is simply a metaphor for the innate brilliance and eternity of one's own mind. In this case, “the mind-only pure land” stands in distinction to the idea of the pure land as an objective reality, and many pure land exegetes rejected this interpretation for implying that the pure land existed only metaphorically. In other interpretations, a pure land is understood to manifest itself differently to beings of different spiritual “grades.” In this case, “mind-only pure land” is the highest level, which is accessible or visible only to those enlightened to the true nature of the mind; by contrast, the objectively real pure land is an emanation of the true pure land that manifests itself to unenlightened practitioners, but nonetheless is still a literal realm into which one could be reborn. In this case, “the mind-only pure land” is one level of the pure land, which does not, however, negate the reality of an external pure land. Such an interpretation was more amenable to pure land devotees and was sometimes incorporated into their exegetical writings.

Weiyang zong. (J. Igyōshū; K. Wiang chong 滙仰宗). Alternate Chinese pronunciation of the [GUIYANG ZONG](#), one of the so-called “five houses” (wu jia; see [WU JIA QI ZONG](#)), or distinct lineages, that developed within the mature [CHAN](#) tradition during the late-Tang dynasty. See [GUIYANG ZONG](#).

Wencheng. (T. Rgya mo bza’ kong jo, C. Wencheng gongzhu 文成公主) (d. 680). The Tang-dynasty Chinese princess who married the Tibetan king [SRONG BTSAN SGAM PO](#). Although she was in fact a person of little historical significance, she figures prominently in competing Tibetan and Chinese versions of the introduction of Buddhism into Tibet and of Sino-Tibetan relations. According to Tibetan sources, she was given in marriage to the Tibetan king under threat of invasion and became one of the king’s five wives: three Tibetans, one Nepalese, and one Chinese. The Nepalese and Chinese brides were Buddhists and converted their husband to the faith. Each also brought a buddha image as part of their dowry. Princess Wencheng brought the [JO BO SHĀKYAMUNI](#), eventually housed in the [JO KHANG](#) in [LHA SA](#), and considered the most sacred buddha image in Tibet. The Nepalese princess [BHRKUTĪ](#) brought the [JO BO MI BSKYOD RDO RJE](#), housed at [RA MO CHE](#). The journey of the Chinese princess and her statue was fraught with difficulties, as the giant demoness (srin mo), whose supine body is the landscape of Tibet, tried to impede their progress. As a result, the king built a series of temples to pin down her body ([MTHA’ ’DUL GTSUG LAG KHANG](#)). Later sources would identify the Chinese princess as an incarnation of the bodhisattva [TARĀ](#). Chinese sources depict the princess as a kind of cultural ambassador, helping to introduce Han culture into the wilds of Tibet and convincing her husband to abandon a variety of barbaric customs. This view of Princess Wencheng has been promoted in various Chinese media (including martial arts films) since the Chinese invasion of Tibet in 1950. Contrary to both versions, it appears that Princess Wencheng arrived at the Tibetan court as a twelve-year-old girl, intended as the bride of Srong btsan sgam po’s son, who had died by the time that she arrived. Srong btsan sgam po, by then an old man, made her one of his wives, dying himself a few years later. She did not produce a royal heir and does not seem to have played a significant role at court.

wenda. (J. mondō; K. mundap 問答). In Chinese, lit. “question and answer”; pedagogical technique used in the [CHAN](#) (J. [ZEN](#); K. [SŎN](#)) school that involves an “exchange” or “dialogue” between a Chan master and a disciple regarding the Buddhist teachings. The exchange often consists of questions from the disciple

and the master's response, but sometimes the master would also question the disciple to check his or her level of understanding and attainment. The master's answers are typically not a theoretical or discursive response to the question, but instead will employ logical contradiction, contextual inappropriateness, and illocutionary uses of language in order to challenge the understanding of the student. The master's answer might not even be a verbal response at all but might instead employ "the stick and the shout" ([BANGHE](#)) as a way of goading the student out of his conventional ways of comprehension. The ultimate goal is to prompt not mere intellectual understanding but an experience of awakening (C. [WU](#); J. [SATORI](#)). The recorded sayings ([YULU](#)) of eminent Chan masters often include a section on their wenda. These wenda constitute a major part of the [GONG'AN](#) literature of the Chan tradition, and the practice of wenda is itself performed using phrases drawn from the gong'an texts. During the Song dynasty in China, Chan monks were appointed to monastic positions, such as "interrogating monk" (wenseng) or "Chan receptionist" (chanke), whose responsibility was to ask questions of the master on behalf of the congregation, transforming wenda into a formal, ritualized occasion.

[Wenyan](#). (C) (文偃). See [YUNMEN WENYAN](#).

[Wenyi](#). (C) (文益). See [FAYAN WENYI](#).

[wenzi Chan](#). (J. monjizen; K. muncha Sŏn 文字禪). In Chinese, "lettered Chan"; a designation coined by [JUEFAN HUIHONG](#) (1071–1128) during the Northern Song dynasty (960–1127) to refer to a literati style of Chan exegesis that valorized belle lettres, and especially poetry, in the practice of [CHAN](#). Huihong himself traces the origins of "lettered Chan" to the "five ranks" ([WUWEI](#)) of [CAOSHAN BENJI](#) (840–901), although Caoshan himself attributes the five ranks to his teacher [DONGSHAN LIANGJIE](#) (807–869); in these ranks, Huihong finds the first evidence within the Chan tradition that the manipulation of language in the analysis of the sayings attributed to the ancient Chan masters can bring about awakening. This style of Chan is especially emblematic of monks in the [HUANGLONG PAI](#) collateral lineage of the [LINJI ZONG](#).

[Wesak](#). (S. Vaiśākha; P. Vesākha; T. Sa ga zla ba). A modern rendering of Vesākha, the Pāli name for the fourth lunar month of the traditional Indian calendar (thus corresponding to April–May in the solar calendar); by extension, the term refers to the important event(s) in the life of the Buddha that occurred

during that month and to their annual commemoration. According to the [THERAVĀDA](#) and Tibetan traditions, it was on the full moon of the fourth lunar month that the Buddha was born, was enlightened, and passed into [PARINIRVĀNA](#). This date is therefore the most important in the Buddhist calendar of many traditions. Wesak is widely celebrated across much of the Buddhist world, but especially in Southeast Asia, where it is considered an especially important time to perform meritorious deeds. According to many East Asian traditions, the full moon of the fourth lunar month marks only the date of the Buddha's birth, with his enlightenment and passage into [PARINIRVĀNA](#) occurring in the twelfth and eleventh lunar months, respectively; Wesak is therefore not nearly as important in the East Asian calendar as it is in Southeast Asia and Tibet.

[wisdom derived from reflection/analysis](#). See [CINTĀMAYĪPRAJÑĀ](#).

[Wŏlchŏngsa](#). (月精寺). In Korean, “Lunar Essence Monastery”; the fourth district monastery ([PONSA](#)) of the contemporary [CHOGYE CHONG](#) of Korean Buddhism, located on Odaesan (see [WUTAISHAN](#)) in Kangwŏn province. The monastery's history is closely linked to the [VINAYA](#) master [CHAJANG](#) (fl. c. 590–658). While Chajang was on pilgrimage at Wutaishan in China, he came across a mysterious old monk who interpreted a prophetic dream he had had and gave him relics (K. sari; S. [ŚARĪRA](#)) of the buddha to take back to Korea with him. Seven days later, a dragon told him to return to Odaesan in Korea to build a monastery; in 643, Chajang arrived at Odaesan, where he eventually constructed Wŏlchŏngsa. Wŏlchŏngsa's main shrine hall, Chŏkkwang chŏn (Calm Radiance Hall), enshrines an image of [ŚĀKYAMUNI](#) as well as a mysterious statue that was found

in the diamond pond south of the monastery. This statue, delicately carved in a style common to the eleventh century, is believed to be of [BHAIŚAJYAGURU](#). In front of the main hall is a nine-story octagonal pagoda, fifty feet (15.2 meters) high, that was constructed in the tenth century. Skillfully carved and multiangled, it is representative of Koryŏ-era [STŪPAS](#). In front of the stūpa is a seated [BODHISATTVA](#), perhaps [MAÑJUŚRĪ](#), making an offering. The statue has been carved with detailed attention to ornamental accessories and clothing. The Chŏngmyŏl pogung (Precious Basilica of Calm Extinction) houses the relics of the Buddha that Chajang brought back to Korea and is one of four major shrine halls in Korea that does not enshrine a buddha image (the relics take the place of an image). One of Wŏlchŏngsa's most famous residents during the twentieth century was the monk [HANAM CHUNGWŎN](#) (1876–1951), who helped save some of its buildings from soldiers who had been ordered to burn them down during the Korean War (seventeen buildings were unfortunately burned and had to be reconstructed). Sangwŏnsa, one of Wŏlchŏngsa's branch monasteries ([MALSA](#)), is famous among Korean monasteries for its spectacular scenery and is a popular tourist stop.

[Wŏlmyŏn](#). (K) (月面). See [MAN'GONG WŎLMYŎN](#).

[womb maṇḍala](#). See [TAIZŌKAI](#).

[Wŏnbulgyo](#). (圓佛教). In Korean, “Wŏn Buddhism” or “Consummate Buddhism”; a modern Korean new religion, founded in 1916 by [PAK CHUNGBIN](#) (1891–1943), later known by his sobriquet [SOT'AESAN](#). Based on his enlightenment to the universal order of the “one-circle image” (IRWŎNSANG), Sot'aesan sought to establish an ideal world where this universal order could be accomplished in and through ordinary human life, rather than the specialized institution of the monastery. After perusing the scriptures of various religions, Sot'aesan came to regard the teachings of Buddhism as the ultimate source of his enlightenment and in 1924 named his new religion the Pulpŏp Yŏn'gu hoe (Society for the Study of the Buddhadharma); this organization was later renamed Wŏnbulgyo in 1947 by Sot'aesan's successor and the second prime Dharma master of the religion, Chŏngsan, a.k.a. Song Kyu (1900–1962). Since the tenets and institutions of Wŏnbulgyo are distinct from those of mainstream Buddhism in Korea, the religion is usually considered an indigenous Korean religion that is nevertheless closely aligned with the broader Buddhist tradition. Sot'aesan used the “one-circle image” as a way of representing his vision of the

Buddhist notion of the “[DHARMAKĀYA](#) buddha” (pöpsinbul), which was reality itself; since this reality transcended all possible forms of conceptualization, he represented it with a simple circle, an image that is now displayed on the altar at all Wönbulgyo temples. Sot’aesan’s religious activities were also directed at improving the daily lot of his adherents, and to this end he and his followers established thrift and savings institutions and led land reclamation projects. Wönbulgyo has focused its activities on the three pillars of religious propagation (kyohwa), education (kyoyuk), and public service (chasön): for example, the second prime master Chöngsan established temples for propagation, schools such as Wön’gwang University for education, and social-welfare facilities such as hospitals and orphanages. These activities, along with international proselytization, were continued by his successors Taesan, Kim Taegö (1914–1998), who became the third prime master in 1962, Chwasan, Yi Kwangjöng (b. 1936), who became the fourth prime master in 1994, and Kyöngsan, Chang Ŭngch’öl (b. 1940), who became the fifth prime master in 2006. The two representative scriptures of Wönbulgyo are the *Wönbulgyo chöngjön* (“Principal Book of Wön Buddhism”), a primer of the basic tenets of Wönbulgyo, which was published by Sot’aesan in 1943, and the *Taejonggyöng* (“Scripture of the Founding Master”), the dialogues and teachings of Sot’aesan, published in 1962 by his successor Chöngsan. Wönbulgyo remains an influential religious tradition in Korea, especially in the Chölla region in the southwest of the peninsula; in addition, there currently are over fifty Wönbulgyo temples active in over fourteen countries.

[Wönch’ük](#). (T. Wen tsheg; C. Yuance; J. Enjiki 圓測) (613–695). In Korean, “Consummate Keeness”; Silla-dynasty monk renowned for his expertise in Sanskrit and [YOGĀCĀRA](#) doctrine, who was influential in Chinese and in later Tibetan Buddhism. Wönch’ük is said to have left for Tang-dynasty China at the age of fifteen, where he studied the writings of [PARAMĀRTHA](#) and the *She lun*, or [MAHĀYĀNASAMGRAHA](#), under Fachang (567–645). Wönch’ük later became the disciple of the Chinese pilgrim-translator [XUANZANG](#) who, in accordance with the new Yogācāra teachings of [DHARMAPĀLA](#) that he had brought back from India (see [FAXIANG ZONG](#)), denounced the existence of the ninth “immaculate consciousness” ([AMALAVIJÑĀNA](#)), which Paramārtha had advocated, and taught instead the innate impurity of the eighth “storehouse consciousness” ([ĀLAYAVIJÑĀNA](#)). These crucial doctrinal issues are said to have caused a split between the major disciples of Xuanzang: Wönch’ük and his followers came to

be known as the Ximing tradition in honor of Wōnch'ūk's residence, [XIMINGSI](#), and was said to have been more open to positions associated with the earlier [SHE LUN ZONG](#); and the lineage of his fellow student and major rival [KUIJI](#) (632–682), which came to be known as the Ci'en tradition after Kuiji's monastery, Da [CI'ENSI](#), and honed more rigidly to Xuanzang and Dharmapāla's positions. Wōnch'ūk's famed *Haesimmilgyōng so* (C. *Jieshenmi jing shu*), his commentary on Xuanzang's translation of the [SAMDHINIRMOCANASŪTRA](#), includes traces of Wōnch'ūk's earlier training in She lun zong thought and Paramārtha's expositions on the controversial notion of amalavijñāna. Wōnch'ūk regarded the amalavijñāna as simply another name for the inherent purity of the ālayavijñāna, but, unlike Xuanzang, he considered the ālayavijñāna to be essentially pure in nature. He also disagreed with Xuanzang's contention that the [ICCHANTIKA](#) could not attain buddhahood. Hence, his work seems to be an attempt to reconcile the divergences between the old Yogācāra of Paramārtha and the new Yogācāra of Xuanzang. Wōnch'ūk's commentary to the *Samdhinirmocanasūtra* was extremely popular in the Chinese outpost of [DUNHUANG](#), where [CHOS GRUB](#) (Ch. Facheng; c. 755–849) translated it into Tibetan during the reign of King [RAL PA CAN](#) (r. 815–838). Only nine of the ten rolls of the commentary are still extant in Chinese; the full text is available only in its Tibetan translation, which the Tibetans know as the “Great Chinese Commentary” (Rgya nag gi 'grel chen) even though it was written by a Korean. Five centuries later, the renowned Tibetan scholar [TSONG KHA PA](#) drew liberally on Wōnch'ūk's text in his major work on scriptural interpretation, [LEGS BSHAD SNYING PO](#). Wōnch'ūk's views were decisive in Tibetan formulations of such issues as the hermeneutical stratagem of the three turnings of the wheel of the dharma ([DHARMAKAPRAVARTANA](#)), the nine types of consciousness ([VIJÑĀNA](#)), and the quality and nature of the ninth “immaculate” consciousness (amalavijñāna). Exegetical styles subsequently used in all the major sects of Tibetan Buddhism, with their use of elaborate sections and subsections, may also derive from Wōnch'ūk's commentary. Consequently, Wōnch'ūk remains better known and more influential in Tibet than in either China or Korea. Wōnch'ūk also wrote a eulogy to the [PRAJÑĀPĀRAMITĀHRDAYASŪTRA](#), and commentaries to the [RENWANG JING](#) and Dharmapāla's [*VIJÑĀPTIMĀTRATĀSIDDHI](#), the latter of which is no longer extant.

[Wōndon sōngbul non](#). (圓頓成佛論). In Korean, “The Perfect and Sudden Attainment of Buddhahood”; posthumous publication on the convergence of

[HWAŎM](#) (C. [HUAYAN](#)) and [SŎN](#) (C. [CHAN](#)) thought and practice by the mid-Koryŏ reformer [POJO CHINUL](#) (1158–1210). The *Wŏndon sŏngbul non* is said to have been found in a wooden box belonging to Chinul after his death and published posthumously by his disciple [CHIN'GAK HYESIM](#). The text provides Chinul's most sustained presentation of his views on Hwaŏm thought and practice, which were profoundly influenced by [LI TONGXUAN](#)'s (635–730) idiosyncratic commentary on the [AVATAMSAKASŪTRA](#), the [HUAYAN JING HELUN](#). Chinul seeks to demonstrate that the sudden understanding-awakening (K. haeo; C. [JIEWU](#); viz., knowing that one is a buddha) is attained at the first level of the ten stages of faith (sipsin), which were usually thought to be a preliminary stage of training, rather than at the first arousing of the thought of enlightenment ([BODHICITTOTPĀDA](#)), which occurred at the first of the ten stages of abiding (sipchu). Chinul supports this argument by drawing on the Hwaŏm concept of “nature origination” ([XINGQI](#)), which he finds superior to the alternative Hwaŏm theory of the conditioned origination of the dharmadhātu ([FAJIE YUANQI](#)). This Hwaŏm understanding at the very inception of practice that one is endowed with the fundamental nature of buddhahood is compared to the [CHAN](#) and [SŎN](#) notion of “seeing one's nature and attaining buddhahood” ([JIANXING CHENGFO](#)). But because Chan/Sŏn does not sanction the prolix conceptual descriptions of this experience that are found in the Hwaŏm school, it is the true “perfect and sudden” school. See also [YUANDUN JIAO](#).

[Wŏn'gam Kuksa](#). (K) (圓鑑國師). See [MIRAM CH'UNGJI](#).

[Wŏn'gwang](#). (C. Yuanguang 圓光) (542–640). In Korean, “Consummate Brilliance”; Silla-dynasty monk known as an early exponent of the [VINAYA](#) tradition in Korea. Wŏn'gwang went to the Chinese kingdom of Chen and studied various texts such as the [*TATTVASIDDHI](#) and the [MAHĀPARINIRVĀNASŪTRA](#). After the fall of the Chen dynasty, Wŏn'gwang traveled to Chang'an, where he attended lectures on [ASAṄGA'S MAHĀYĀNASAMGRAHA](#) delivered by the monk Tanqian (542–607). Wŏn'gwang returned to Korea in 600 and devised a set of lay precepts known as the “five secular injunctions” (Sesok ogye) at the request of two “flower youths” (hwarang) named Kwisan (d.u.) and Ch'uhang (d.u.). These injunctions adapted Confucian and Buddhist moral codes to the needs of a militant society involved in the ongoing peninsular reunification wars. The five are (1) loyalty, (2) filial piety, (3) trust, (4) not killing wantonly, and (5) not retreating in battle.

According to his biography in the [HAEDONG KOSŬNG CHŎN](#), Wŏn'gwang was also a renowned thaumaturge and tamer of autochthonous spirits. He passed away at the royal monastery of [HWANGNYONGSA](#). Two commentaries on the [TATHĀGATAGARBHASŪTRA](#), the *Taebangdŭng yŏraejanggyŏng so* and *Yŏraejanggyŏng sagi*, are attributed to Wŏn'gwang, but neither is extant.

[Wŏnhyo](#). (C. Yuanxiao; J. Gangyō 元曉) (617–686). In Korean, “Break of Dawn”; famous monk of the Silla dynasty and probably one of the two most important monks in all of Korean Buddhist history, who was renowned for both his scholastic achievements and his efforts to propagate Buddhism among the common people. He is reputed to have written over one hundred commentaries, of which some twenty are extant. According to the hagiographical accounts of Wŏnhyo in the [SONG GAOSENG ZHUAN](#) and the [SAMGUK YUSA](#), Wŏnhyo tried, but failed, to travel to China with his friend [ŬISANG](#) in order to study with the Chinese translator and [YOGĀCĀRA](#) exegete [XUANZANG](#). While on the road, Wŏnhyo is said to have attained enlightenment after a traumatic experience in which he discovered that the earthen sanctuary in which the two travelers had taken refuge one stormy night was in fact a tomb. This experience prompted his awakening that all things are created by mind, which led Wŏnhyo to realize that he did not need to continue on to China in order to understand Buddhism. (Ŭisang did travel to the mainland, where he studied with the early [HUAYAN](#) exegete [ZHIYAN](#).) As the legends about Wŏnhyo's enlightenment experience evolve, this story becomes even more horrific: Wŏnhyo is said to have discovered that the sweet water he drank in the tomb to slake his thirst was actually offal rotting in a skull, a traumatic experience that immediately prompted his realization that the mind creates all things. Wŏnhyo spent much of his life writing commentaries to the many new translations of Buddhist scriptures then being introduced into the Korean peninsula. A brief affair with the widowed princess of Yosŏk palace led to the birth of a son, who would grow up to become the famous literatus, Sŏl Ch'ong (c. 660–730), the creator of Idu (“clerical writing”), the earliest Korean vernacular writing system. After the affair, Wŏnhyo changed into lay clothes and traveled among the peasantry, singing and dancing with a gourd he named Unhindered (Muae) and practicing “unconstrained conduct” (K. *muae haeng*; C. [WU'AL XING](#)). ¶ In Wŏnhyo's many treatises, he pioneered a hermeneutical technique he called “reconciling doctrinal controversies” ([HWAJAENG](#)), which seeks to demonstrate that various Buddhist doctrines, despite their apparent differences and inconsistencies, could be

integrated into a single coherent whole. This “ecumenical” approach is pervasive throughout Wŏnhyo’s works, although its basic principle is explained chiefly in his *Simmun hwajaeng non* (“Ten Approaches to the Reconciliation of Doctrinal Controversy,” only fragments are extant), [TAESŬNG KISILLON SO](#) (“Commentary to the ‘Awakening of Faith According to the Mahāyāna’”), and [KŬMGANG SAMMAEGYŎNG NON](#) (“Exposition of the [VAJRASAMĀDHISŪTRA](#)”). Wŏnhyo was versed in the full range of Buddhist philosophical doctrines then accessible to him in Korea, including [MADHYAMAKA](#), [YOGĀCĀRA](#), Hwaŏm, and [TATHĀGATAGARBHA](#) thought, and hwajaeng was his attempt to demonstrate how all of these various teachings of the Buddha were part of a coherent heuristic plan within the religion. Since at least the twelfth century, Wŏnhyo’s hwajaeng exegesis has come to be portrayed as characteristic of a distinctively Korean approach to Buddhist thought.

[wŏnju](#). (C. yuanzhu; J. inju 院主). In Korean, lit. “chief of the campus”; the preferred term in Korean monasteries for the “prior.” See [JIANYUAN](#).

[Wŏnmyo Yose](#). (圓妙了世) (1163–1240). In Korean, “Consummate Sublimity, Knower of the World”; monk during the mid-Koryŏ dynasty, who is considered an influential figure in the revitalization of the Korean [CH’ŎNT’AE](#) (C. [TIAN TAI](#)) tradition. Yose also played a major role in the popularization of a movement known as the PAENGYŎN KYŎLSA, or White Lotus retreat society (see also [JIESHE](#); [BAILIAN SHE](#)). Yose was ordained by the monk Kyunjŏng (d.u.) at the monastery of Ch’ŏllaksa in present-day Hapch’ŏn. In 1185, he passed the clerical examinations ([SŬNGKWA](#)) and led a retreat at a monastery known as Changyŏnsa on Mt. Yŏngdong. The eminent [SŎN](#) monk [POJO CHINUL](#) is known to have sent Yose a letter with a poem at that time, inviting Yose to his “Samādhi and Prajñā retreat society” ([CHŎNGHYE KYŎLSA](#)) at Kŏjosa. Yose subsequently joined the society and practiced Sŏn meditation with Chinul, but left the society when Chinul moved the society to the monastery of Kilsangsa (present-day [SONGGWANGSA](#)). With the support of some prominent lay followers, Yose restored a group of dilapidated buildings on Mt. Mandŏk and established a White Lotus Society there in 1211. Yose continued to reside at the site after the restoration was completed five years later in 1216. He was posthumously awarded the title of state preceptor (K. kuksa; C. [GUOSHI](#)) and given the funerary name Wŏnmyo. He is the reputed author of the *Samdaebu chŏryo*, which is no longer extant.

Wōnyung chong. (圓融宗). In Korean, “Consummate Interfusion school”; an alternate name for the Hwaōm (C. [HUAYAN](#)) school in Korea. See [KYO](#).

World Fellowship of Buddhists. The first international Buddhist organization, founded in Colombo, Sri Lanka, in 1950, by representatives from twenty-seven countries, and headed by [GUNAPALA PIYASENA MALALASEKERA](#) (1899–1973). Although most Buddhist traditions around the world are actively involved in the organization, [THERAVĀDA](#) Buddhists of Southeast Asia have traditionally played a central role: all its previous and current headquarters have been located in countries where the Theravāda tradition predominates (e.g., Sri Lanka, Myanmar, and Thailand) and all its presidents have also come from those countries. The WFB has more than 130 regional centers in over thirty countries, including India, Australia, the United States, Korea, Japan, and some African and European countries. The organization aims to promote the teachings of the Buddha, strengthen collegiality among Buddhists of different national traditions, and contribute to world peace by participating in social, educational, and humanitarian activities. The current headquarters is located in Bangkok, Thailand.

wu. (J. satori; K. 오 悟) In Chinese, “awakening,” “enlightenment”; one of the common Chinese translations for the Sanskrit term [BODHI](#) (awakening); often seen in English through its indigenous Japanese pronunciation of [SATORI](#). The precise content of this awakening differs according to the various schools of Buddhism. In the East Asian tradition, wu could typically involve a gradual awakening ([JIANWU](#)), but it is more commonly associated with “sudden awakening” ([DUNWU](#)), especially in the [CHAN ZONG](#) (J. [ZEN](#); K. [SŎN](#)). Sudden awakening refers to the view that the mind is inherently enlightened (cf. “buddha-nature,” or [FOXING](#)) and thus does not need to be purified of its afflictions ([KLEŚA](#)) in order for that buddha-nature to be realized. Gradual awakening, by contrast, refers to the view that enlightenment is the result of a process of purifying the mind of its afflictions over a series of stages, which may take several lifetimes to complete. The Chan scholiasts [GUIFENG ZONGMI](#) and [POJO CHINUL](#), following earlier taxonomies of awakening in the [HUAYAN ZONG](#), distinguish between two kinds of awakening: an initial sudden understanding-awakening ([JIEWU](#)), i.e., the instant when one first comes to know that one is innately a buddha; and, following a lengthy period of gradual cultivation (jianxiu), a final realization-awakening ([ZHENGWU](#)), when one is able fully to act

on the potential inherent in one's initial awakening and not only *be* a buddha but also *act* like one. This description of the soteriological process is called sudden awakening followed by gradual cultivation (see [DUNWU JIANXIU](#)). Chan authors discuss many other possible permutations in this awakening and cultivation binary, including gradual cultivation/gradual enlightenment, sudden awakening/sudden cultivation, *etc.* Although the [SUDDEN-GRADUAL ISSUE](#) is most commonly associated with the [CHAN](#) school, there are precedents in Indian Buddhism. The so-called [BSAM YAS DEBATE](#), or Council of Lha sa, that took place in Tibet at the end of the eighth century is said to have pitted the Indian monk [KAMALAŚĪLA](#) against the Chan monk Heshang [MOHEYAN](#) in a debate over the issue of whether enlightenment occurs gradually or suddenly.

[wu](#). (J. mu; K. mu 無). In Chinese, a Sinograph meaning “not have,” “without,” “no,” and, as a philosophical term, “nonbeing,” “nothingness.” Exegetes in the Dark Learning ([XUANXUE](#)) school of Chinese philosophy, which was influential in early Chinese Buddhist thought, first explored the philosophical implications of the term wu. Based on their reading of the *Daode jing* (“The Way and Its Power”), a seminal Daoist classic traditionally attributed to the legendary Laozi, they interpreted wu as meaning either (1) “nonexistence” or “nonbeing,” in distinction to the Sinograph you, viz., “existence,” or “being”; or (2) the metaphysical substratum of the universe, viz., “nothingness,” which transcended the dichotomy of you and wu. Wu in this second denotation did not indicate simply voidness or negation; it rather referred to the source of the [DAO](#) itself or the principle underlying all existence. In this sense, wu was inseparable from you, the phenomenal expressions of the dao. This wu was termed “original nothingness” (benwu), because it served as the ultimate foundation of the myriad of existing things in the universe, and thus represented a preconceptual reality that transcended dichotomous existence (you). Wang Bi (226–249), traditionally regarded as the founder of Xuanxue, defined a person who attained wu as a sage (shengren). ¶ Early Chinese Buddhist thinkers, such as [DAO'AN](#) (312–385) and Zhu Fatai (320–387), drew on this Xuanxue concept of benwu to render the Buddhist concept of emptiness ([ŚŪNYATĀ](#)); [SENGZHAO](#) (374–414) in his [ZHAO LUN](#) also equates the original nothingness (benwu) with the dharma-nature ([DHARMATĀ](#)). As Chinese Buddhists gradually refined their understanding of the Buddhist notion of emptiness, prompted especially by the influence of [KUMĀRAJĪVA](#)'s translations of the [PRAJÑĀPĀRAMITĀ](#) texts, this rendering of śūnyatā as wu was ultimately replaced by the new term kong (emptiness). ¶ In

the context of the [CHAN ZONG](#), wu was often used to emphasize the mental state of nonattachment. However, ever since the character wu (pronounced mu in Japanese and Korean) was singled out by Chan master [DAHUI ZONGGAO](#) as a meditative topic ([HUATOU](#)) in Chan practice, Chan adepts began to use “wu” as an aid in their “questioning meditation” ([KANHUA CHAN](#)). This meditative topic was derived from a popular [GONG’AN \(KŌAN\)](#) attributed to [ZHAOZHOU CONGSHEN](#): “Does a dog have buddha nature, or not?” Zhaozhou answered, “wu” (“no,” lit. “it does not have it”). The Sinograph wu was also a frequent subject of monochrome brushstroke calligraphy, which was and is still often hung on the walls of the abbot’s quarters ([FANGZHANG](#)) in Chan monasteries. See [WU GONG’AN](#); [GOUZI WU FOXING](#).

wu’ai xing. (J. mugegyō; K. muae haeng 無礙行). In Chinese, “unhindered action” or “unconstrained conduct”; one of the types of practice of a [BODHISATTVA-MAHĀSATTVA](#), as expounded especially in the [AVATAMSAKASŪTRA](#), referring to a conduct that is not constrained by the restrictions of customary morality or mundane societal expectations. Other related terms that are described as unhindered include “unhindered physicality” (wu’ai shen), “unhindered [SAMĀDHI](#)” (wu’ai sanmei), “unhindered wisdom” (wu’ai zhi), “unhindered dharma” (wu’ai fa), “unhindered path” (wu’ai dao), etc. The actions of a bodhisattva-mahāsattva conform to those of the buddhas themselves and any merit forthcoming from them are freely transferred (huixiang) to other sentient beings to help them with their salvation; for this reason, their actions are free from any kinds of hindrances. The [MAHĀYĀNASAMGRAHA](#) (*She Dasheng lun*) also explains “unhindered action” as the merit of a buddha, which is obtained through the purest of wisdom. Unhindered action sometimes refers to a particular stage or practice of a bodhisattva-mahāsattva: the [BODHISATTVABHŪMI](#) (*Pusa shanjie jing*) presents it as the tenth of the twelve conducts of a bodhisattva-mahāsattva, along with such advanced practices as the signless practice, untainted practice, practice-less practice, and contented practice. In this context, unhindered action refers to the stage where a bodhisattva cultivates the realm of reality ([DHARMADHĀTU](#)) that transcends all discrimination and teaches the true dharma ([SADDHARMA](#)) for the sake of innumerable sentient beings. This status is said to correspond specifically to the ninth of the ten bodhisattva stages ([DAŚABHŪMI](#)), and the bodhisattva on this stage is described as being endowed with four types of analytical knowledges ([PRATISAMVID](#)), which in Chinese were known as the four “unhindered knowledges” (C. si wu’ai jie): i.e., unhindered knowledge of

(1) phenomena ([DHARMA](#)), viz., one makes no mistakes in one’s teachings; (2) meaning ([ARTHA](#)), viz., to be unhindered with regard to the content and meaning of one’s teachings; (3) etymology or language ([NIRUKTI](#)), viz., the ability to comprehend all languages; and (4) eloquence ([PRATIBHĀNA](#)), viz., ease in offering explanations. [CHENGGUAN](#) (738–839) states in his massive [HUAYAN JING SHU](#) (“Commentary to the [AVATAMSAKASŪTRA](#)”) that the bodhisattva is able to abide in unhindered action (lit. “unhindered abiding”) because he no longer has any cognitive obstructions ([JÑEYĀVARANA](#)). The practice of unconstrained conduct has been a prominent, if controversial, feature of Korean Buddhism throughout its history. Several eminent Korean monks were known as practitioners of unconstrained conduct, including [WŎNHYO](#) (617–686), Chinmuk (1562–1633), and [KYŎNGHŎ SŎNGU](#) (1849–1912), and they followed ways of life that disregarded the standards of conduct typically incumbent upon ordained monks.

[Wubai wenlun shiyi](#). (C) (五百問論釋疑). See [FAHUA WUBAI WENLUN](#).

[wuchong xuanyi](#). (J. gojūgengi; K. ojung hyŏnŭi 五重玄義). In Chinese, “five layers of profound meaning” according to the [Tiantai](#) school. See [FAHUA WUCHONG XUANYI](#).

[wudao song](#). (J. godōju; K. odo song 悟道頌). In Chinese, lit. “hymn on awakening to the way ([DAO](#))”; an “enlightenment hymn.” See [YIJL](#).

[wufa](#). (J. gohō; K. obŏp 五法). In Chinese, “the five [aspects of] dharmas.” According to various Chinese scholastic traditions, deriving from translations of the [LAṅKĀVATĀRASŪTRA](#) and [YOGĀCĀRA](#) materials, these five delineate the full ontological and epistemological range of all dharmas: phenomena ([SHI](#)), characteristics (xiang), conceptual discrimination (fenbie), correct knowledge of the way things are (zhengzhi), and suchness ([ZHENRU](#)). The first three aspects are called “factors associated with delusion/unenlightenment” (mifa) because the multiplicity, duality, and reality of “phenomena” and “characteristics” are merely “imagined” and “superimposed” by the discriminatory property of the unenlightened mind (which is covered by the third aspect, fenbie, viz., [PARIKALPITA](#)). In contrast, the last two aspects are called “factors associated with enlightenment” (wufa), with “knowledge” being the ability to discern the true “suchness” of things without conceptual superimpositions.

wu gong'an. (J. mukōan; K. mu kongan 無公案). In Chinese, “the case ‘no’”; an influential [CHAN](#) case or precedent ([GONG'AN](#)) associated with the Tang-dynasty Chan master [ZHAOZHOU CONGSHEN](#) (778–897). In this exchange, once a student came to Zhaozhou and asked, “Does a dog have the buddha-nature ([FOXING](#)), or not?” Zhaozhou answered, “No” (lit., “It does not have it”). The complete exchange from which this gong'an is drawn continues: “Everything has buddha-nature, from the buddhas above, to the ants below. Why wouldn't a dog have it?” Zhaozhou replied: “Because he has the nature of karmically conditioned consciousness.” This response seems to be associated with Chan debates concerning the Sinitic Buddhist doctrine of the “buddha-nature of the insentient” (wuqing foxing), which presumed that all insentient things, including rocks and tiles, trees, and grass, were also endowed with the buddha-nature; thus, if even rocks have the buddha-nature, why not dogs? Since the answer to the student's question should unequivocally be “Yes, a dog does have the buddha-nature,” Zhaozhou's enigmatic response, which [Wumen](#) calls a “checkpoint of the patriarchs,” seems to challenge one of the foundational beliefs of East Asian Buddhism; in so doing, it engenders a question in the student's mind, which will help to foster inquiry and ultimately a sense of doubt ([YIQING](#)). This answer “[WU](#)” (“no”) became a popular meditative topic ([HUATOU](#)) in the Chan meditation practice of “questioning meditation” ([KANHUA CHAN](#)) and is one of the most important gong'ans used in kanhua Chan training, especially in the Chinese [LINJI ZONG](#) and Japanese [RINZAISHŪ](#) lineages, as well as in the Korean [CHOGYE CHONG](#). The wu gong'an is the first case collected in the gong'an anthology [WUMEN GUAN](#) (“Gateless Checkpoint”), and its use in kanhua practice was popularized by the Chinese Linji teacher [DAHUI ZONGGAO](#) (1089–1163). See also [GOUZI WU FOXING](#).

wuhui nianfo. (J. goe nenbutsu; K. ohoe yōmbul 五會念佛). In Chinese, “five-tempo intonation of [the name of] the buddha” (see [NIANFO](#)). A method of intoning the name of the buddha [AMITĀBHA](#) devised by the Tang-dynasty monk [FAZHAO](#) (d.u.). While in [SAMĀDHI](#), Fazhao is said to have received instructions for the wuhui nianfo technique directly from Amitābha himself. The practice seems to be based on the larger [SUKHĀVATĪVYŪHASŪTRA](#), which speaks of the bejeweled trees that produce music in five tempos when swayed by the wind. The first tempo is a leisurely chant performed in a high tone (ping). The second tempo is a high and rising tone (pingshang). The third tempo is neither leisurely nor rapid, and the fourth gradually becomes rapid. The fifth tempo is a rapid and

repetitious recitation of the four characters “A-mi-tuo-fo,” the Chinese pronunciation of Amitābha. According to Fazhao, the practical aim of this practice is to focus on the three jewels ([RATNATRAYA](#)) until one attains “no-thought” ([WUNIAN](#)) and nonduality ([ADVAYA](#)). Fazhao recommends wuhui nianfo for both clergy and lay who wish to rid themselves of the five types of suffering and the five hindrances, or to purify the five sense organs ([INDRIYA](#)) and attain the five powers ([BALA](#)). The ultimate purpose of the practice is to attain rebirth in the [PURE LAND](#) of [SUKHĀVATĪ](#). Two manuals by Fazhao detailing the practice of wuhui nianfo, the *Jingtu wuhui nianfo lüefa shiyi canben* (“Praise for the Abbreviated Ritual Manual of the Pure Land Five-Tempo Intonation of [the Name of] the Buddha”) and the *Jingtu wuhui nianfo songjing guanxing yi* (“Rite for Intoning the Buddha’s Name, Reciting Scripture, and Performing Meditation According to the Five Tempos of the Pure Land”), were recovered in the [DUNHUANG](#) manuscript cache.

wujiao. (C) (五教). In Chinese, the “fivefold taxonomy of the teachings” according to the Huayan school. See [HUAYAN WUJIAO](#).

Wujiao zhang. (C) (五教章). See [HUAYAN WUJIAO ZHANG](#).

wu jia qi zong. (J. goke shichishū; K. oga ch’ilchong 五家七宗). In Chinese, “five houses and seven schools.” According to the traditional historical narratives of the [CHAN](#) tradition, the lineages of the sixth patriarch ([LIUZU](#)) [HUINENG](#)’s two major disciples [NANYUE HUIAIRANG](#) and [QINGYUAN XINGSI](#) grew into five houses and eventually seven schools. The five houses refer to the lineages of the [GUIYANG](#) [alt. Weiyang] [ZONG](#), [LINJI ZONG](#), [CAODONG ZONG](#), [YUNMEN ZONG](#), and [FAYAN ZONG](#) of the Tang dynasty. Each of these “houses” (jia) is said to have had its own unique teaching style (jiafeng) and was respectively named after its purported founder or “patriarch”: the Guiyang was named after [GUISHAN LINGYOU](#) and his disciple [YANGSHAN HUIJI](#), the Linji after [LINJI YIXUAN](#), the Caodong after [DONGSHAN LIANGJIE](#) and his disciple [CAOSHAN BENJI](#), the Yunmen after [YUNMEN WENYAN](#), and the Fayan after [FAYAN WENYI](#). Among these houses, the Linji became predominant during the Song dynasty, when it further split into two separate lineages known as the [HUANGLONG PAI](#) (named after [HUANGLONG HUINAN](#)) and the [YANGQI PAI](#) (named after [YANGQI FANGHUI](#)). These two Song-dynasty lineages, together with the original listing of five houses, constitute the so-called seven schools. According to the Chan historian [GUIFENG ZONGMI](#), the early Chan lineages known as the [NIUTOU ZONG](#), Heze zong (see

[HEZE SHENHUI](#)), [JINGZHONG ZONG](#), [BAOTANG ZONG](#), [BEI ZONG](#), and [NAN ZONG](#) were eventually supplanted by the flourishing lineages of Nanyue's disciple [MAZU DAOYI](#) (i.e., the Guiyang and Linji) and Qingyuan's disciples [SHITOU XIQIAN](#) (i.e., the Caodong and Yunmen) and [XUEFENG YICUN](#) (i.e., the Fayan).

[wujinzang yuan](#). (J. mujinzōin; K. mujinjang wŏn 無盡藏院). In Chinese, “inexhaustible storehouse cloister”; the emblematic institution of the Third Stage Sect ([SANJIE JIAO](#)), a major school of Buddhism during the Tang dynasty. The wujinzang yuan was established at Huadusi (Propagation and Salvation Monastery) in the capital Chang'an early in the Tang dynasty, probably between 618 and 627. The institution was based on the concept of “merit-sharing,” i.e., that one could enter into the universal inexhaustible storehouse of the dharma realm, as articulated by the sect's founder [XINXING](#) (540–594), by offering alms to the wujinzang yuan on behalf of all sentient beings. By 713, when the Tang emperor Xuanzong (r. 712–756) issued an edict closing it due to charges of embezzlement, the wujinzang yuan had served as a major agency for promoting the sect for almost a century. Drawing on the [AVATAMSAKASŪTRA](#) and the [VIMALAKĪRTINIRDEŚA](#), the sect interpreted the Sinographs wujin (inexhaustible) to mean that both the field of reverence—viz., the three jewels ([RATNATRAYA](#))—and the field of compassion—viz., sentient beings—were inexhaustible. The wujinzang yuan, therefore, was the place where the sect's sixteen kinds of almsgiving ([DĀNA](#)) were to be practiced, through offerings made to (1) the buddha, (2) the dharma, (3) the saṃgha, and (4) all sentient beings; (5) works that serve to ward off evil; (6) works that serve to do good; and offerings of (7) incense, (8) lamps, (9) the monks' baths, (10) bells and chants, (11) clothing, (12) dwellings, (13) beds and seats, (14) receptacles for food, (15) coal and fire, and (16) food and drink. There were two kinds of offerings made to the wujinzang yuan: (1) regular offerings collected in the form of a daily levy and (2) offerings received at particular times of the year. A Sanjie jiao text discovered at [DUNHUANG](#) says that a person is expected to offer one fen (a hundredth of a tael) of cash or one ge (a tenth of a pint) of grain per day, or thirty-six qian (a tenth of a Chinese ounce) or 3.6 dou (pecks) of grain per annum. However, the offerings were mostly made at specific times of the year, such as on the fourth day of the first lunar month, the day commemorating Xinxing's death, and the [ULLAMBANA](#) festival on the fifteenth day of the seventh lunar month. For those adherents who could not make offerings directly at Huadu monastery, the sect would temporarily open local branches, called “merit

offices” (gongde chu), especially at the time of the Ullambana festival. The assets of the wujinzang yuan consisted for the most part of such tangible assets as money, cloth, gold and silver, and jade. The offerings were used, for example, to fund the restoration of monasteries and the performance of religious services (i.e., the reverence field of merit, jingtian), and to provide alms to the poor (i.e., the compassion field of merit, beitian; see [PUNYAKSETRA](#)). People could also receive loans from the wujinzang, a function comparable to today’s microloans made to help raise people out of poverty. During the reign of Empress Wu, Fuxiansi in Luoyang was for a brief time also the site of a wujinzang yuan. See also [XIANGFA JUEYI JING](#).

[Wuliangshou jing](#). (J. Muryōjukyō; K. Muryangsu kyōng 無量壽經). In Chinese, “Sūtra of Infinite Life.” See [SUKHĀVATĪVYŪHASŪTRA](#).

[Wuliangshou jing lun](#). (C) (無量壽經論). See [WULIANGSHOU JING YOUPTISHE YUANSHENG JI](#).

[Wuliangshou jing youptishe yuansheng ji](#). (J. Muryōjukyō upadaisha ganshōge; K. Muryangsygyōng ubajesa wōnsaeng ke 無量壽經優婆提舍願生偈). In Chinese, “Verses on the Wish for Rebirth and the Exposition of the Limitless Life Scripture”; also known as the *Wuliangshou jing lun* (“Commentary on the Limitless Life Scripture”), *Jingtu lun* (“Treatise on the Pure Land”), *Wangsheng lun* (“Treatise on Rebirth”), and *Yuansheng ji* (“Verses on the Wish for Rebirth”). The *Wuliangshou jing youptishe yuansheng ji* is attributed to [VASUBANDHU](#) and was translated into Chinese by [BODHIRUCI](#) at the monastery of [YONGNINGSI](#) in 529. The text is largely a commentary on the larger [SUKHĀVATĪVYŪHASŪTRA](#) and is comprised of a twenty-four-line verse and prose commentary. The verse section begins with an exhortation to be reborn in the country of peace and happiness ([ANLEGUO](#)) or [PURE LAND \(JINGTU\)](#) of the buddha [AMITĀBHA](#), which it subsequently describes in detail, and ends with the dedication of merit ([PARINĀMANĀ](#)). The prose commentary explains the ritual means of rebirth in terms of “five gates of recollection” (wu nianmen). These five gates are veneration (libai), praise (cantan), vow (zuoyuan), discernment (guancha), and dedication (huixiang). The text came to be held in high regard in China and Japan after the eminent Chinese monk [TANLUAN](#) composed an influential commentary on the text. Along with the shorter and longer *Sukhāvātīvyūhasūtras* and the [GUAN WULIANGSHOU JING](#), the Japanese monk [HŌNEN](#) recognized the *Wuliangshou jing youptishe yuansheng ji* as a central

scripture of the school now known as the [JŌDOSHŪ](#). See also [JINGTU LUN](#).

[Wuliang yi jing](#). (J. Muryōgikyō; K. Muryang ūi kyōng 無量義經). In Chinese, “Sūtra of Immeasurable Meanings,” one of the “Three [Sister] Sūtras of the ‘Lotus’” ([FAHUA SANBU JINGI](#)), along with the [SADDHARMAPUNḌARĪKASŪTRA](#) (“Lotus Sūtra”) itself and the [GUAN PUXIAN PUSA XINGFA JING](#) (“Sūtra on the Procedures for Contemplating the Practices of the Bodhisattva [SAMANTABHADRA](#)”). The *Wuliang yi jing*, is presumed to be the prequel to the influential *Saddharmapuṇḍarīkasūtra*, while the *Guan Puxian pusa xingfa jing* is usually considered its sequel. The extant version of the scripture, in one roll, is attributed to the Indian translator *Dharmāgatayaśas of the Southern Qi dynasty (479–502), and is claimed to have been translated in 481; the [LIDAI SANBAO JI](#) scriptural catalogue also refers to a second, nonextant translation. There is, however, no evidence that a scripture with this title ever circulated in India, and no such text is ever cited in Indian sources. In addition, there are issues with the biography of the alleged translator (*Dharmāgatayaśas is otherwise unknown and this is his only attributed translation), and peculiar events in the transmission of the scripture, which suggest that attempts were made to obscure its questionable provenance. The scripture also includes unusual transcriptions and translations of Buddhist technical terminology, and peculiar taxonomies of Indian doctrinal concepts. Because of these problematic issues of provenance and content, the sūtra is now suspected of being an indigenous Chinese composition (see [APOCRYPHA](#)). Such Chinese exegetes as Huiji (412–496) and [Tiantai Zhiyi](#) (538–597) presumed that this scripture was the otherwise-unknown [MAHĀYĀNA](#) sūtra titled “Immeasurable Meanings” that is mentioned in the prologue to the *Saddharmapuṇḍarīkasūtra*, which the Buddha is said to have preached just prior to beginning the “Lotus Sūtra” proper. The *Wuliang yi jing* is in three chapters (pin). The first chapter is the prologue, where the bodhisattva “Great Adornment” (Dazhuangyan pusa) offers a long verse paean describing the Buddha’s many virtues. The second chapter is the sermon itself, where the Buddha explains the doctrine of immeasurable meanings as being the one teaching that will enable bodhisattvas to quickly attain complete, perfect enlightenment ([ANUTTARASAMYAKSAMBODHI](#)). This doctrine reveals that all phenomena ([DHARMA](#)) are void and calm in both their natures and their characteristics and thus are empty and nondual ([ADVAYA](#)). Hence, the immeasurable meanings of all descriptions of dharmas derive from the one dharma that is free from characteristics. The final chapter is the epilogue, which

describes the ten kinds of merit that accrue from hearing the sūtra.

Wumen guan. (J. Mumonkan; K. Mumun kwan 無門關). In Chinese, lit., “Gateless Checkpoint,” or “Wumen’s Checkpoint”; compiled by the **CHAN** master **WUMEN HUIKAI**, after whom the collection is named, also known as the *Chanzong Wumen guan* (“Gateless Checkpoint of the Chan Tradition”). Along with the **BIYAN LU** (“Blue Cliff Record”), the *Wumen guan* is considered one of the two most important **GONG’AN** (J. kōan; K. kongan) collections of the Chan tradition. In the summer of 1228, at the request of the resident monks at the monastery of Longxiangsi, Wumen lectured on a series of forty-eight cases (gong’an) that he culled from various “transmission of the lamplight” (**CHUANDENG LU**) histories and the recorded sayings (**YULU**) of previous Chan masters. His lectures were recorded and compiled that same year and published with a preface by Wumen in the following year (1229). Another case (case 49), composed by the layman Zheng Qingzhi, was added to the *Wumen guan* in 1246. The *Wumen guan* begins with a popular case attributed to **ZHAOZHOU CONGSHEN**, in which Zhaozhou replies “**WU**” (no) to the question, “Does a dog have buddha nature, or not?” (see **WU GONG’AN**). Wumen himself is known to have struggled with this case, which was given to him by his teacher Yuelin Shiguan (1143–1217). The Japanese monk **SHINICHI KAKUSHIN**, who briefly studied under Wumen in China, brought the *Wumen guan* to Japan. Although the collection was once declared to be heretical by the **SŌTŌSHŪ** in the mid-seventeenth century, many Japanese commentaries on the *Wumen guan* were composed at the time, testifying to its growing influence during the Edo period.

Wumen Huikai. (J. Mumon Ekai; K. Mumun Hyegae 無門慧開) (1183–1260). In Chinese, “Gateless, Opening of Wisdom”; **CHAN** master in the **LINJI ZONG**; author of the eponymous **WUMEN GUAN** (“Gateless Checkpoint”), one of the two most important collections of Chan **GONG’AN** (J. kōan; K. kongan). A native of Hangzhou prefecture in present-day Zhejiang province, Huikai was ordained by the monk “One Finger” Tianlong (d.u.), who also hailed from Hangzhou (see also **YIZHI CHAN**). Wumen later went to the monastery of Wanshousi in Jiangsu province to study with Yuelin Shiguan (1143–1217), from whom Huikai received the **WU GONG’AN** of **ZHAOZHOU CONGSHEN**; Huikai is said to have struggled with this gong’an for six years. In 1218, Huikai traveled to Baoyinsi on Mt. Anji, where he succeeded Yuelin as abbot. He subsequently served as abbot at such monasteries as TIANNINGSI, Pujisi, Kaiyuansi, and Baoningsi. In

1246, Huikai was appointed as abbot of Huguo Renwangsi in Hangzhou prefecture, and it is here that the Japanese [ZEN](#) monk [SHINICHI KAKUSHIN](#) studied under him. Emperor Lizong (r. 1224–1264) invited Huikai to provide a sermon at the Pavilion of Mysterious Virtue in the imperial palace and also to pray for rain. In honor of his achievements, the emperor bestowed upon him a golden robe and the title Chan master Foyan (Dharma Eye).

[wunian](#). (T. *bsam pa med pa*; J. *munen*; K. *munyŏm* 無念). In Chinese, “no-thought”; a Chinese meditative term that appears in the sixth-century [DASHENG QIXIN LUN](#) but finds its locus classicus in the eighth-century [CHAN](#) classic, the [LIUZU TAN JING](#). The putative author of the *Liuzu tan jing*, the sixth patriarch ([LIUZU](#)) [HUINENG](#), defines “no-thought” as “not to think even when involved in thought.” Thought, therefore, is not the issue, but rather the attachment to thought, which would encourage the proliferation of conceptualization throughout all of one’s sensory experience and thus render one a hapless victim of the conceptualizing tendency (cf. [PRAPAÑCA](#)). The *Liuzu tan jing* also explains no-thought in terms of “non-form” (*wuxian*) and “non-abiding” (*wuzhu*) and parses the term as follows: *wu* (“no”) refers to the absence of duality and *nian* (“thought”) to thinking about thusness ([TATHATA](#)). [HEZE SHENHUI](#) used the term “no-thought” to criticize the teaching of the “transcendence of thoughts” (*linian*) espoused by [SHENXIU](#) and his followers in the so-called Northern school ([BEI ZONG](#)). According to Shenhui, whereas the “transcendence of thoughts” (*linian*) emphasized the progressive wiping away of afflictions ([KLEŚA](#)) and conceptual thinking, “no-thought” (*wunian*) by contrast implied that there was no need for such effort since one had only to “see one’s nature” ([JIANXING](#)) in order to attain enlightenment. Thus, *wunian* became a central feature of those who espoused a “sudden” theory of enlightenment (see [DUNWU](#)). In some radical cases, the notion of *wunian* was used as theoretical justification for the abandonment of all ritual and practice, including meditation and the conferral of monastic precepts. This extreme form of “no-thought” doctrine played an important role in the [LIDAI FABAO JI](#) and the antinomian teachings of the Sichuan early-Chan lineages of the [JINGZHONG ZONG](#) and [BAOTANG ZONG](#), the latter of which may have had some influence in the development of [RDZOGS CHEN](#) thought in Tibet.

[Wunian dahui](#). (C) (五年大會). See [WUZHE HUI](#).

[wushi](#). (J. *goji*; K. *osi* 五時). In Chinese, “the five periods [of the Buddha’s teaching]”; the [Tiantai](#) school’s temporal taxonomy of Buddhist doctrines

([JIAOXIANG PANSHI](#)), according to which the Buddha’s teachings differ because he preached them at different points during his pedagogical career. The initial account of his awakening that the Buddha taught immediately after his enlightenment was described in the [AVATAMSAKASŪTRA](#); this stage is thus termed the [HUAYAN](#) period (huayan shiqi). This account of the experience of buddhahood was, however, so unadulterated and sublime that many [ŚRĀVAKA](#) disciples were utterly unable to comprehend its message. The Buddha therefore began his teaching anew in a second period that was termed Luyuan shiqi (after the Deer Park, [MRGADĀVA](#), where many of the [ĀGAMA](#) scriptures were taught) or ahan shiqi (after the āgamas, which were the compilation of the Buddha’s words from this period). This period was said to be an explicit attempt on the part of the Buddha to accommodate those disciples who were confounded during the first period, by teaching his insights in their most elementary form. The third period is called fangdeng ([VAIPULYA](#)) shiqi, where the “[HĪNAYĀNA](#)” teachings of the second period were superseded by teaching the aspiration for the [MAHĀYĀNA](#). Various sūtras that explicitly compare Mahāyāna favorably to “hīnayāna”—such as the [ŚRĪMĀLĀDEVĪSIMHANĀDASŪTRA](#) and the [VĪMALAKĪRTINIRDEŚĀ](#)—were supposedly products of this period. The fourth period is termed the bore shiqi, after its eponymous sūtras, the [PRAJÑĀPĀRAMITĀ](#). This was the stage of the Buddha’s teaching career where he began to remove the boundaries separating Mahāyāna and “hīnayāna” by leading his audience from the presumption that there were two separate vehicles to instead a common realization of emptiness ([ŚŪNYATĀ](#)). The final period is called Fahua Niepan shiqi, after its two representative sūtras, the [SADDHARMAPUNDARĪKASŪTRA](#) and the [MAHĀPARINIRVĀNASŪTRA](#). The teachings associated with this period are described as the “consummate” or “perfect” teachings ([YUANJIAO](#)) because they espouse the idea of one vehicle (or the one buddha vehicle; C. [YISHENG](#); S. [EKAYĀNA](#)), which Tiantai claimed was the truest form of the Buddha’s original intention (benyuan; see [PŪRVAPRANIDHĀNA](#)). The Tiantai school also compares these five stages of the teachings to the five stages in the clarification of milk (see [WUWEI](#), “five tastes”). See also [TĪANTAI BĀJIAO](#).

[wushi bajiao](#). (J. goji hakkyō; K. osi p’algyo 五時八教). In Chinese, “five periods and eight teachings”; a classification of teachings ([PANJIAO](#)) attributed to the [TĪANTAI](#) systematizer [TĪANTAI ZHIYI](#). A detailed explanation of the wushi bajiao is found in the text by the Korean exegete CH’EGWAN, the [CH’ŎNT’AE SAGYO ŪI](#) (C. *Tiantai sijiao yi*). The five periods correspond to what is believed to be the

five major chronological periods ([WUSHI](#)) of the Buddha's teaching career (represented by the name of a [SŪTRA](#) or group of sūtras preached during each period), namely, (1) Huayan ([AVATAMSAKASŪTRA](#)), (2) [ĀGAMA](#), (3) [VAIPULYA](#), (4) [PRAJÑĀPĀRAMITĀ](#), and (5) Lotus ([SADDHARMAPUNḌARĪKASŪTRA](#)) and Nirvāṇa ([MAHĀPARINIRVĀNASŪTRA](#)). According to Zhiyi, the Buddha also employed different techniques of conversion or pedagogical modes (huayi) for audiences of varying capacities, which are broadly divided into four: the sudden, gradual, indeterminate, and secret. The sudden and gradual teachings are distinguished by their variant uses of skillful means ([UPĀYA](#)), and indeterminate refers to the differing levels of the understanding of individuals. Zhiyi's contribution to these well-established categories was his further division of the indeterminate teachings into "secret" and "manifest" based on the awareness of the presence of others in the assembly. The content of the Buddha's teachings (huafa) is further described in terms of the four categories of [TRIPITAKA](#), common, distinct, and consummate. This division is based on whether the teachings are that of [TRIPITAKA](#) (viz. [HĪNAYĀNA](#)), [MAHĀYĀNA](#) (distinct), both (joint), or neither (consummate). Zhiyi referred to the central sūtra of his own Tiantai school, the *Saddharmapuṇḍarīkasūtra*, as consummate. Zhiyi's own classification system is based on those of earlier exegetical traditions of the north (wujiao shizong) and south (sanjiao), which he sought to unite and ultimately transcend. See [TIANTAI BAJIAO](#).

[wushi jiao](#). (C) (五時教). See [WUSHI](#).

[Wutaishan](#). (五臺山). In Chinese, "Five-Terraces Mountain"; a sacred mountain located in northern Shanxi province, which, together with [EMEISHAN](#), [PUTUOSHAN](#), and [JIUHUASHAN](#), is one of the "four great mountains" (sidamingshan) of Buddhism in China. The name Wutai is derived from its five treeless, barren peaks (one in each cardinal direction and the center) that resemble terraces or platforms. During the Northern Wei dynasty (424–532), Wutaishan came to be identified with the mythic Mt. Qingliang (Clear and Cool) of the [AVATAMSAKASŪTRA](#), which speaks of a mountain to the northeast where the bodhisattva [MAÑJUŚRĪ](#) is said to be constantly preaching the [DHARMA](#). From the time of the identification of Mount Wutai as Mt. Qingliang, numerous testimonies to the manifestation of Mañjuśrī on the mountain have been reported. Mt. Wutai thus came to be known as the primary abode and place of worship for Mañjuśrī and for this reason drew pilgrims from across the

continent, including South Asia and, later, Tibet. Numerous monasteries and hermitages of both Buddhists and Daoists occupy its peaks. The first Buddhist monastery on Wutaishan, Da Futu Lingjiusi (Great Buddha Vulture Monastery), is claimed to have been built by [KĀŚYAPA MĀTAṄGA](#) (d.u.) and Dharmaratna (d.u.) sometime during the first century (see also [BAIMASI](#) and [SISHI'ER ZHANG JING](#)). The name of the monastery was changed to Xuantongsi and then to (Da) Huayansi during the Tang dynasty to reflect its role as the center of [HUAYAN](#) studies. The Huayan patriarch [CHENGGUAN](#) (738–839) composed his great [HUAYANJING SHU](#) at this monastery. The esoteric monk [AMOGHAVAJRA](#) also assisted in the establishment of another monastery on Mt. Wutai, which was given the name Jingesi (Gold Pavilion Monastery) in 770 after its gilded tiles. Emperor Daizong (r. 762–779) declared Jingesi as an important center for the new esoteric teachings ([MIJIAO](#)) brought to China by Amoghavajra. The monk [FAZHAO](#) also established the monastery of Zhulinsi (Bamboo Grove Monastery) on the model of a majestic monastery that Mañjuśrī had revealed to him in a vision. The monasteries Qingliangsi, Beishansi, Manghaisi, and Da Wenshusi are also located on the mountain. During a pilgrimage to Wutaishan by the Korean monk [CHAJANG](#) (d.u., c. mid-seventh century), he had a vision in which Mañjuśrī guided him to a Korean analogue of the mountain; that mountain is now known as Odaesan (the Korean pronunciation of Wutaishan) and is itself a major pilgrimage center of Korean Buddhism. During the Qing dynasty, Wutaishan was also the major center for the study of Tibetan Buddhism in China.

[wuwei](#). (J. mui; K. muwi 無爲). In Chinese, lit., “nonaction,” “effortless action,” in later contexts “uncompounded”; a key term that appears in early Chinese classics such as the *Lunyu* (“Analects of Confucius”), the *Daode jing* (“The Way and Its Power”), and the *Zhuangzi*. “Nonaction” suggests action that takes place naturally or without artifice; thus variously interpreted as “effortless action,” “unattached action,” *etc.* Nonaction thus refers to the ideal mode of behavior for a sage, in which the sage “does nothing and yet there is nothing not done” (*wuwei er wu buwei*). Rather than acting by fiat, the sage acts by establishing a “sympathetic resonance” ([GANYING](#)) with the natural movements of heaven, which brings everything naturally to perfection, just as a tree grows naturally without making any effort to grow. The term is frequently used in indigenous Chinese texts in the context of good governance, where *wuwei* thus refers to the ultimate type of “soft power”: by “practicing nonaction,” a ruler creates an

appropriate environment in which “the people are able to look after themselves” (*Daode jing*, chapter 49); he does not impose his point of view but instead allows common cause with his constituency to develop naturally. In certain Chinese contexts, *wuwei* could also connote something that was “unproduced,” and the early Chinese Buddhists drew on this connotation to translate the seminal Sanskrit term [NIRVĀNA](#) and *nirvāṇa*’s putative “inactivity”; this misleading translation was eventually abandoned in favor of the phonetic transcription *niepan*. The Buddhists did however retain the term *wuwei* in this denotation to translate the concept of “uncompounded” or “unconditioned” factors ([ASAMSKRTADHARMA](#)), such as *nirvāṇa* and in some schools space ([ĀKĀŚA](#)), which are not conditioned ([SAMSKRTA](#)) and are thus not subject to the inevitable impermanence ([ANITYA](#)) to which all conditioned dharmas are subject.

wuwei. (J. *goi*; K. *owi* 五位). In Chinese, lit., “five ranks”; a doctrinal formula generally attributed to the [CHAN](#) master [DONGSHAN LIANGJIE](#) (807–869), the putative cofounder of the [CAODONG ZONG](#) of the mature Chan tradition. The antecedents of these five ranks are traced to [SHITOU XIQIAN](#)’s [CANTONG QI](#), which discusses the mutual “turning back on one other” (*huihu*) of the terms brightness and darkness. This dichotomy is eventually generalized as “relative” (*pian*), lit., “askew” or “partial,” referring to that which is bright, conceivable, effable, and phenomena ([SHI](#)); and absolute (*zheng*), lit., “upright,” correlating with what is dark, inconceivable, ineffable, and principle ([LI](#)). Although these two valences of relative and absolute may be discrete, they are interconnected, interdependent, and mutually defining, thus constantly “turning back on one other.” The five ranks are systematized by Dongshan in his “Verses on the Five Ranks” (*Wuwei song*) as follows. (1) The relative within the absolute (*zhengzhong pian*): this valence suggests that the ordinary person constantly abides in original enlightenment ([BENJUE](#)), but is unaware of it. (2) The absolute within the relative (*pianzhong zheng*): the practitioner may have become aware of the reality of original enlightenment, but still treats it as an object to be understood conceptually, rather than directly experienced. (3) [The relative] emerging from the absolute (*zhengzhong lai*): as the Chan practitioner experiences the pervasiveness of emptiness, that emptiness turns back on itself and transforms into a more dynamic and luxuriant way of experience of reality. (4) [The relative and the absolute] jointly accessible (*jianzhong zhi*): as the reality of each and every independent phenomenon (*shi*) is experienced, the reality of principle (*li*) is simultaneously accessed. (5) Integration of the absolute and the relative, or lit.

“arriving within together” (jianzhong dao): the bifurcations between relative and absolute, the experiencing subject and the object experienced, the realizer and the realized, etc., all drop away, so that the practitioner continues to practice but now without practicing anything, and seeks buddhahood while understanding that there is no buddhahood to be sought. In some interpretations, the first two ranks evoke the famous passage in the [PRAJÑĀPĀRAMITĀHRDAYASŪTRA](#): “form is emptiness, emptiness is form” (see [RŪPAM ŚŪNYATĀ ŚŪNYATAIVA RŪPAM](#)). The third rank implies the bodhisattva practice of returning to the world after his or her attainment of enlightenment ([BODHI](#)). Similarly, the fourth and fifth ranks imply the bodhisattva vow to save all living beings so that they may all access [NIRVĀNA](#) together. Despite the use of the term “rank,” a systematic progression is not necessarily implied, and some commentators suggest that all five ranks may be experienced simultaneously in a moment of sudden awakening ([DUNWU](#)); thus, the five ranks may be an attempt to demonstrate how gradual and sequential outlines of Buddhist soteriology can be integrated with the more subitist soteriologies that become emblematic of the mature Chan tradition. The five ranks are also sometimes correlated with the five wisdoms ([PAÑCAJÑĀNA](#)) of a buddha in the [MAHĀYĀNA](#), and specifically in the [YOGĀCĀRA](#) school. Dongshan’s “five ranks” were frequently used in East Asian [GONG’AN](#) collections as a means of checking a student’s level of understanding. In one of the modern Japanese [RINZAISHŪ](#) systematizations of kōan training, the final stage in the practice that follows initial sudden awakening (J. [SATORI](#), C. dunwu) also involves mastery of the five ranks (J. goi).

[wuwei](#). (J. gomi; K. omi 五味). In Chinese, lit. “five tastes”; an originally Indian list of the five stages in the clarification of milk that is derived from the [MAHĀPARINIRVĀNASŪTRA](#): milk, cream, curds, butter, and ghee. This list was used in the [TIANTAI ZONG](#) as a simile for the five chronological periods ([WUSHI](#)) in the Buddha’s preaching of the dharma. According to this school’s taxonomy of the teachings ([JIAOXIANG PANSHI](#)), the various teachings of Buddhism may be categorized according to these five “tastes”: milk symbolizes the [AVATAMSAKASŪTRA](#) period; cream, the [ĀGAMA](#) period; curds, the [VAIPULYA](#) period; and butter, the [PRAJÑĀPĀRAMITĀ](#) period; the subtlest and more clarified form of milk, the flavor of ghee (tihuwei; see [MANDA](#)), is finally compared to the “consummate” period of the [SADDHARMAPUNDIRĪKASŪTRA](#) and the [MAHĀPARINIRVĀNASŪTRA](#).

Wuwei sanzang chanyao. (J. Mui sanzō zen'yō; K. Muoe samjang sōnyo 無畏三藏禪要). In Chinese, “Essentials of Meditation by the [TREPITAKA ŚUBHAKARASIMHA](#)”; a relatively short treatise that purportedly records a sermon that the esoteric master Śubhākarasiṃha prepared for a debate he had with [CHAN](#) master [SHENXIU](#)'s disciple Jingxuan (660–723) sometime after 716. The sermon is largely concerned with the conferral of the [BODHISATTVA](#) precepts, repentance, the threefold pure precepts ([SANJU](#) JINGJIE; see [ŚĪLATRAYA](#)), and what Śubhākarasiṃha calls the secret essentials of meditation. Śubhākarasiṃha critiques Jingxuan and other fellow practitioners of meditation for their adherence to the doctrine of “no-thought” ([WUNIAN](#)) and offers instead a meditation technique that involves uttering a series of [DHĀRANĪs](#), gesturing in a series of [MUDRĀs](#), mindful breathing, and visualizing a lunar disk.

wuwei zhenren. (J. mui no shinnin; K. muwi chinin 無位真人). In Chinese, “true man of no rank”; a [CHAN](#) expression attributed to [LINJI YIXUAN](#) (d. 867), which is used to refer to the sentience, or “numinous awareness” ([LINGZHI](#)), of the mind, that constantly moves through the sense faculties, thus enabling sensory experience; equivalent to the buddha-nature ([FOXING](#)). Linji contrasts this true man of no rank with the “lump of red flesh” ([CHIROUTUAN](#)), the physical body that is constantly buffeted by sensory experience. The term zhenren is also used within the Daoist tradition to refer to a Daoist “perfected,” who has realized perfect freedom both mentally and physically by achieving immortality and transcending all dichotomies. See also [GANSHIJUE](#).

Wuxiang. (C) (無相). See [CHÖNGJUNG MUSANG](#).

wuxiang jie. (J. musōkai; K. musang kye 無相戒). In Chinese, “formless precepts”; a type of precept mentioned in the [LIUZU TAN JING](#), where they are said to help constrain practitioners so that they are able to gain enlightenment. The formless precepts reflect the early [CHAN](#) community's effort to offer its own understanding of the [MAHĀYĀNA](#) precepts. Although no clear explanation of exactly what these precepts are is provided in the text, the wuxiang jie are said to be the premier type of precepts, which are superior to the usual types of constraints taught in earlier types of Buddhism, which sought to develop wholesome ways of action and deter unwholesome actions. The conferral of these precepts appears to have occurred at the start of a kind of initiation ceremony, which subsequently followed with acceptance of the four great vows ([SI HONGSHIYUAN](#)), repentance (chan), the three refuges ([TRĪŚARANA](#)), and

[PRAJÑĀPĀRAMITĀ](#).

wuxin. (J. mushin; K. musim 無心). In Chinese, lit. “no-mind.” The term wuxin appears in the Chinese classic the *Zhuangzi* and was adapted by the early Chinese Buddhists exegetes of [PRAJÑĀPĀRAMITĀ](#) literature as a gloss on the Madhyamaka notion of [ŚŪNYATĀ](#) or “emptiness.” These exegetes were collectively known as the “school of the nonexistence of mind” (xinwu zong) and belonged to the larger tradition known as “Dark Learning” ([XUANXUE](#)). In later Buddhist treatises, most notably those belonging to the [CHAN](#) tradition, “no-mind” came to refer ambiguously either to a state in which all mental activity had ceased or one in which the mind was free of all discrimination, making it effectively equivalent to nonconceptualization (see [NISPRAPAÑCA](#)). In this latter sense, the term is closely synonymous with “no-thought” ([WUNIAN](#)). See also [WUXIN LUN](#).

Wuxin lun. (J. Mushinron; K. Musim non 無心論). In Chinese, “Treatise on No-Mind”; an early [CHAN](#) treatise attributed by tradition to the legendary monk [BODHIDHARMA](#), which, in both content and style, resembles [NIUTOU FARONG’S JUEGUAN LUN](#). As the title indicates, the treatise is concerned with the notion of [WUXIN](#), or “no-mind,” which the text attempts to elucidate by enumerating a long list of dichotomies, such as visible and invisible, bright and dark, and differentiated and undifferentiated. The treatise argues largely in catechistic format that the attainment of no-mind engenders a state that is unmarred by the myriad afflictions ([KLEŚA](#)), birth and death, and even [NIRVĀNA](#). The treatise was largely unknown until its rediscovery in the manuscript cache at the [DUNHUANG](#) caves at the end of the nineteenth century.

Wuxue Zuyuan. (J. Mugaku Sogen; K. Muhak Chowŏn 無學祖元) (1226–1286). Chinese [CHAN](#) master in the [LINJI ZONG](#), who was the founder of the influential monastery of [ENGAKUJI](#) in Kamakura, Japan; also known as Ziyuan. On the advice of his brother, Wuxue entered the Chinese monastery of Jingcisi, where he was ordained by Beijian Jujian (1164–1246). Wuxue later became the student of the Linji Chan master [WUZHUN SHIFAN](#) (1178–1249) and received his seal of transmission ([YINKE](#)). Wuxue also studied under [XUTANG ZHIYU](#) (1185–1269) and Wuchu Dagan (1201–1268) and spent the next few decades residing at various monasteries in Zhejiang prefecture. In 1275, Wuxue left for Nengrensi to avoid the invading Mongol troops of the Yuan dynasty. In 1279, at the invitation of Hōjō Tokimune (1251–1284), the eighth regent of the Kamakura shogunate,

Wuxue reluctantly left China for Japan. Upon his arrival in Kamakura, Wuxue was appointed abbot of [KENCHŌJI](#), succeeding the third abbot [LANXI DAOLONG](#). In 1282, Tokimune established Engakuji to commemorate the defeat of the invading Mongol troops and installed Wuxue as its founding abbot (J. kaisan; C. [KAISHAN](#)). Serving as administrator of the two most powerful Buddhist institutions in Japan at the time, Wuxue established a firm foundation for the success of the [RINZAISHŪ](#) in Japan. Wuxue was given the posthumous title state preceptor (J. kokushi, C. [GUOSHI](#)) Bukkō (Buddha Radiance). His students included Japan's first female Zen master, [MUGAI NYODAI](#) (1223–1298), and [KŌHŌ KENNICHI](#) (1241–1316), the son of Emperor Gosaga (r. 1242–1246) and the teacher of [MUSŌ SOSEKI](#). Wuxue's teachings appear in his *Bukkō kokushi goroku*.

[wuyun shijian](#). (J. goun seken; K. oon segan 五蘊世間). In Chinese, “the world of the five aggregates.” See [SATTVALOKA](#).

[Wu Zetian](#). (J. Bu Sokuten; K. Mu Ch'ŭkch'ŏn 武則天) (624–705). Chinese concubine and empress who was an important patron of Buddhism during the Tang dynasty and the short-lived Zhou-dynasty interregnum (684–704). Wu Zetian entered the palace as a concubine of Emperor Taizong (r. 626–649) while she was still in her teens. After the emperor's death, she became a Buddhist nun, but was summoned again to the palace as a concubine of Taizong's successor and son, the Gaozong emperor (r. 649–683). She bore Gaozong a son in 652 and began to exert much influence in court. Despite fierce opposition from court officials, Gaozong enthroned Wu Zetian as the new empress in 655. Wu Zetian quickly exiled all her foes in court and had the former empress Wang killed. In 657, she reinstated Luoyang as the cocapital of the empire and permanently moved the entire court there after Gaozong's death in 683. She subsequently exiled the Zhongzong emperor (r. 683–684, 705–710) and established her own dynasty named Zhou (684–704). Wu Zetian was an ardent supporter of Buddhism. She associated with such eminent monks as [XUANZANG](#), [SHENXIU](#), [FAZANG](#), and [YIJING](#). In an attempt to legitimize her reign, Wu Zetian also ordered the circulation of the [MAHĀMEGHASŪTRA](#) (“Great Cloud Sūtra”), which described a female reincarnation of [MAITREYA](#) and her rule over the whole world. She also arranged for the construction in every prefecture of the empire of monasteries all known as DAYUNSI (Great Cloud Monastery). In 705, she abdicated the throne to the restored Emperor Zhongzong.

wuzhe hui. (J. mushae; K. much'a hoe 無遮會). In Chinese, “unrestricted assembly”; an assembly hosted by the reigning monarch to make offerings to clergy and laity regardless of their status or station in life. The assembly was typically held every five years and is therefore also known as the “five-year great assembly” (C. wunian dahui; S. pañcavārṣikapariṣad). The first such assembly is attributed to King [AŚOKA](#). Emperor Wu of the Liang dynasty (LIANG WUDI) is known to have held a wuzhe dahui in 529 for an assembly said to have numbered fifty thousand. The famous pilgrim [XUANZANG](#) also witnessed an unrestricted assembly during his travels along the [SILK ROAD](#). In 596, Empress Suiko (554–628) held the first reported unrestricted assembly in Japan. In 732, [HEZE SHENHUI](#) organized an unrestricted great assembly (wuzhe dahui) at the monastery of DAYUNSI in Henan prefecture, where he attacked [SHENXIU](#) and his followers.

Wuzhensi. (悟真寺). In Chinese, “Awakening to Truth Monastery”; located in the Wuzhen Valley of [ZHONGNANSHAN](#) near the capital of Chang’an (present-day Xi’an). The monastery is comprised of two compounds, known as the upper and lower monasteries. The upper monastery is also named Zhulinsi, or Bamboo Grove Monastery, because of the bamboo forest surrounding it. Wuzhen Monastery was founded by the Sui-dynasty Buddhist monk Jingye (564–616), who stayed there from 595 to 608. He was accompanied by other eminent monks including Huichao (546–622), a disciple of the [TIANTAI](#) master [HUISI](#) (515–568), and Facheng (563–640). The latter was instrumental in expanding the monastery by building the Huayan Hall and another hall to enshrine images of a hundred buddhas. He also inscribed Buddhist verses on cliffs surrounding the monastery and along its roads. Due to his efforts, Wuzhen monastery became renowned during the Tang dynasty for its majesty and became a favorite haunt of literati. Eminent [SANLUN ZONG](#) monks such as [HUIYUAN](#) (523–592), Baogong (542–621), and Huiyin (539–629) also either resided here or were affiliated with the monastery. It was either at Wuzhensi or [LONGCHISI](#) that the [HUAYAN](#) master [FAZANG](#) (643–712), at the behest of the Ruizong emperor of Tang (r. 684–690, 710–712), is said to have famously performed a ritual to pray for snow in order to stave off a severe drought the region was experiencing. During the Song dynasty, the monastery was renamed [CHONGFASI](#), or Monastery of the Esteemed Dharma.

wuzhong xuanyi. (J. goshu no gengi; K. ojong hyōnŭi 五種玄義). In Chinese,

“five categories of profound meaning”; a list of five general hermeneutical issues that should be addressed prior to undertaking an in-depth exegesis of any [SŪTRA](#), attributed to [TIANTAI ZHIYI](#) (538–597) and emblematic of scriptural exegesis in the [TIANTAI SCHOOL](#). These five are (1) explicating the meaning of the text’s title (shiming), (2) analyzing the fundamental intent of the sūtra (bianben), (3) clarifying its principal themes or doctrines (mingzong), (4) expounding the sūtra’s “function” or impact on its audience (lunyong), and (5) classifying the sūtra ([PANJIAO](#)), viz., delineating its place within the entire corpus of sūtras expounded by the Buddha. These five issues typically would be addressed by the commentator prior to beginning the exegesis of the sūtra proper. See also [SANFEN KEJING](#); [JIAOXIANG PANSHI](#).

[Wuzhu](#). (C) (無住) (714–774). See [BAOTANG WUZHU](#).

[Wuzhun Shifan](#). (J. Bujun Shihan/Bushun Shibān/Mujun Shihan; K. Mujun Sabōm 無準師範) (1178–1249). Chinese [CHAN](#) master in the [LINJI ZONG](#). After his ordination in the winter of 1194, Wuzhun studied under a series of famed Chan masters, including [FOZHAO DEGUANG](#) and Po’an Zuxian. Wuzhun eventually attained awakening under Po’an and succeeded his lineage. During his illustrious career at such important monasteries as [WANSHOUSI](#) on Mt. Jing, Wuzhun also taught the Japanese pilgrims Hōshin (d.u.), Dōyū (1201–1258), and the famed [ENNI BEN’EN](#), who is now regarded as the first exponent of [ZEN](#) in Japan. Wuzhun was later summoned by Emperor Lizong (r. 1224–1264) to provide a public lecture at the Pavilion of Benevolent Illumination in the imperial palace. The emperor later bestowed upon him the title Chan master Fojian (Buddha Mirror). Wuzhun left many famous disciples such as [WUXUE ZUYUAN](#) and Mu’an Puning, both of whom went to Kamakura in Japan and served as abbots of the powerful monastery of [KENCHŌJI](#).

[Wuzu Fayan](#). (J. Goso Hōen; K. Ojo Pōbyōn 五祖法演) (d. 1104). Chinese [CHAN](#) master in the [LINJI ZONG](#). Wuzu was a native of Mianzhou prefecture in present-day Sichuan province. After being ordained at the age of thirty-four, Fayan studied [YOGĀCĀRA](#) doctrine in his home province, but later went south where he studied under Huilin Zongben (1020–1099), Fushan Fayuan (991–1067), and [BAIYUN SHOUDUAN](#). Fayan eventually became Baiyun’s disciple and inherited his Linji lineage. After staying at various monasteries in Anhui province, Fayan moved to Mt. Wuzu (also known as East Mountain) in Hubei province, where he acquired his toponym. The mountain itself received its name, Wuzu (fifth

patriarch), from its most famous past resident, the fifth patriarch of Chan, [HONGREN](#). Mt. Wuzu thus became an important center for the Linji lineage, and it was there that Fayuan taught his famous disciples [YUANWU KEQIN](#), Taiping Huiqin (1059–1117), and Foyan Qingyuan (1067–1120), known collectively as the “three Buddhas of East Mountain.” Wuzu’s teachings are recorded in the *Wuzu Fayuan chanshi yulu*.

[xiala](#). (C) (夏臘). See [JIELA](#).

[xiangdai miao](#). (C) (相待妙). See [DAIJUE ERMIAO](#).

[xiangfa](#). (J. zōhō; K. sangpŏp 像法). In Chinese, “semblance dharma” or “counterfeit dharma”; a term related to the Sanskrit [SADDHARMAPRATIRŪPAKA](#). The Sanskrit term has a range of uses, including as a designation for the [BUDDHADHARMA](#) after the buddha has passed into [PARINIRVĀNA](#). In the East Asian context, xiangfa came to designate the second and middle period of a buddha’s teaching. The first period, that of the [SADDHARMA](#) (C. zhengfa), is the period of the true dharma after a buddha’s passage into parinirvāṇa, during which time it is still possible to achieve enlightenment by following his teachings. The second period, of xiangfa, is a time during which the achievement of enlightenment is still possible, but the practice of the dharma has generally been reduced to rote repetition of the teachings and practices; there are also signs of laxity in both monastic and lay practice developing during this period. The third period, that of [MOFA](#) (cf. [SADDHARMAVIPRALOPA](#)), or the final dharma, is a time of degeneration and decline, during which the practice of the dharma is no longer efficacious, due largely to the diminished capacities of humans. This division into three periods of the dharma seems to have originated in China and was widely influential in East Asian Buddhism.

[Xiangfa jueyi jing](#). (J. Zōbō ketsugikyō; K. Sangpŏp kyŏrŭi kyŏng 像法決疑經). In Chinese, the “Scripture on Resolving Doubts Concerning the Semblance Dharma”; an indigenous Chinese Buddhist scripture (see [APOCRYPHA](#)), dating from the mid-sixth century. The *Xiangfa jueyi jing* is set against the background of the Buddha’s [PARINIRVĀNA](#). At the request of a [BODHISATTVA](#) named Changshi (Constant Giving), the Buddha offers instructions on the practice of giving ([DĀNA](#)), in which he declares charity to be the most appropriate practice during the age of the semblance dharma ([XIANGFA](#); [SADDHARMAPRATIRŪPAKA](#)). The semblance-dharma period is characterized as an age of degeneration, during which both clergy and laity begin to transgress the precepts and slander the Buddha’s teaching. The *Xiangfa jueyi jing* emphasizes the importance of collective rather than individual giving during this age, and especially giving to the impoverished and underprivileged, rather than just to the three jewels

([RATNATRAYA](#)) of Buddhism. These and other ideas from the *Xiangfa jueyi jing* were especially influential in the teachings of the Third-Stage school ([SANJIE JIAO](#)) and that school's emblematic institution, the [WUJINZANG YUAN](#) (inexhaustible storehouse cloister). Such eminent monks as [Tiantai Zhiyi](#), [Jizang](#), and [Hōnen](#) also held the *Xiangfa jueyi jing* in high regard.

[Xiangguosi](#). (相國寺). In Chinese, “Minister of the State Monastery”; located in eastern Henan in the city of Kaifeng. Originally built in 555 CE and named Jianguosi, it was subsequently destroyed during a battle. It then became a private residence and garden; but later, when a monk named Huiyun saw a reflection of a monastery in its garden pool, he collected enough subscriptions to buy the residence and turn it back into a monastery in 711. It was renamed Xiangguosi by the Ruizong emperor of the Tang (r. 684–690, 710–712). The monastery was well supported by Tang and Song emperors, as evidenced by the campus's extensive grounds and the lavish materials used in its accoutrements, such as using gold dust to decorate images, icons, and paintings. It is well known for its layout, including its use of twin pagodas ([STŪPA](#)). Xiangguosi also became famous for its frescoes, painted by famous contemporary artists from the neighboring region. Artists at the Song Painting Academy painted much of the Buddhist imagery at this monastery. Xiangguosi reached the zenith of its influence during the Song dynasty, when it became an outpost for foreign monks visiting China.

[xiangjiao](#). (J. zōkyō; K. sanggyo 像教). In Chinese, “teaching [viz., religion] of images”; a pejorative term coined by Confucians to refer to Buddhism, derived from the emphasis in Buddhism on bowing before images during rituals and ceremonies. Confucianism, in turn, was called the “teaching [viz., religion] of names” ([mingjiao](#)), to demonstrate by contrast that it was based on intellectual inquiry and the “rectification of names” ([zhengming](#)) rather than on worship of images of Confucius and the teachers within the tradition.

[Xiangmo Zang](#). (T. Bdud 'dul snying po; J. Gōma Zō; K. Hangma Chang 降魔藏) (d.u.). In Chinese, “Demon-Subduer Zang.” Chinese monk and leading disciple of the [CHAN](#) master [Shenxiu](#), in the Northern school ([BEI ZONG](#)). At an early age, Xiangmo Zang acquired the nickname “demon-subduer” ([xiangmo](#)) by dwelling in deserted houses and open fields. Later, he learned to recite the [SADDHARMAPUNDARĪKASŪTRA](#) and studied the [VINAYA](#) after he became a monk. He is said to have had an awakening experience after listening to a lecture on the

“theories of the Southern school” ([NAN ZONG](#) lun) and, abandoning his scriptural studies, became a student of Shenxiu. As Shenxiu’s disciple, Xiangmo Zang became the target of [HEZE SHENHUI](#)’s polemical attack on the Northern school of Chan. Xiangmo Zang also appears in the [BSAM GTAN MIG SGRON](#) by [GNUBS CHEN SANGS RGYAS YE SHES](#) along with a certain Wolun (d.u.) and [MOHEYAN](#) and others of the Northern school, whose teachings may have exerted some influence on [MAHĀYOGA](#) in Tibet.

[Xiangshansi](#). (香山寺). In Chinese, “Fragrant Mountain Monastery”; located on [SONGSHAN](#) in Ruzhou, Henan province. It is not known when the monastery was first established, but it is thought to have been built c. 516 CE during the Northern Wei dynasty (386–584). One source credits the founding of a Xiangshan monastery in Xiangzhou to a certain general named Liu Qingzhi, but no further mention is made of either the general or the monastery. The current Xiangshansi underwent a major renovation around 1068 during the Northern Song dynasty, and special attention was paid to restoring its Dabei ta (Great Compassion pagoda), which still stands today; housed in the pagoda is a thousand-armed and thousand-eyed form of [GUANYIN](#) ([SĀHASRABHUVASĀHASRANETRĀVALOKITEŚVARA](#)). Xiangshansi, like [SHANG TIANZHUSI](#), is known for being a major pilgrimage site for Guanyin ([AVALOKITEŚVARA](#)) worship. It became associated with the Princess [MIAOSHAN](#) incarnation of Guanyin, whose legend is inscribed on a stele at the monastery. The stele was commissioned in 1100 by a minor civil servant, Jiang Zhiqi (1031–1104), who was the prefect of Ruzhou. Jiang had the legend reinscribed on another stele at the Shang Tianzhusi when he moved to Hangzhou four years later.

[xiangxu wuchang](#). (C) (相續無常). See [ER WUCHANG](#).

[Xiangyan Zhixian](#). (J. Kyōgen Chikan; K. Hyangŏm Chihan 香巖智閑) (d. 898). Chinese [CHAN](#) master in the [GUIYANG ZONG](#) of the Chan tradition. Zhixian entered the monastery under [BAIZHANG HUIHAI](#) and later became a student of [YANGSHAN HUIJI](#). Zhixian dwelled for a long time at Mt. Xiangyan, whence his toponym. One day while he was sweeping the garden, Zhixian is said to have attained awakening when he heard the bamboo brush against the roof tiles. He is best known for the [GONG’AN](#) case “Xiangyan Hanging from a Tree”: A man is dangling by his mouth from the branch of a tall tree, his hands tied behind his back and nothing beneath his feet. Someone comes under the tree branch and

asks, “Why did [BODHIDHARMA](#) come from the West?” If he keeps his mouth clenched and refuses to answer, he is rude to the questioner; but if he opens his mouth to answer, he will fall to his death. How does he answer? Upon Zhixian’s death, he was given the posthumous title Chan master Xideng (Inheritor of the Lamplight).

[xiang zong](#). (J. sōshū; K. sang chong 相宗). In Chinese, “characteristics school”; also known as the [FAXIANG ZONG](#) or “Dharma Characteristics” school. Both these names were used polemically by rival scholiasts to polarize certain trends in Buddhist thought. In distinction to the [XING ZONG](#), or “nature” school, [FAZANG](#) in the [HUAYAN ZONG](#) uses the term [xiang zong](#) to refer to those monk-scholars whose scholarship focused on the changing form of phenomena and reality. Monks of the Faxiang or [YOGĀCĀRA](#) tradition tended to be categorized as this characteristics school. Maintaining a strict distinction between the xing and the xiang trends was called [xingxiang juepan](#) (differentiation of nature and characteristics), while a scholastic approach that attempted to harmonize the two trends was characterized as [xingxiang ronghui](#) (harmonizing nature and characteristics).

[Xianzong ji](#). (J. Kenshūki; K. Hyōnjong ki 顯宗禮). In Chinese, “Notes on Revealing the Cardinal Principle,” attributed to [HEZE SHENHUI](#); also known as the *Heze dashi xianzong ji* (“Notes on Revealing the Cardinal Principle of Great Master Heze”) and *Xianzong lun* (“Treatise on Revealing the Cardinal Principle”). A simpler version of the *Xianzong ji*, entitled *Dunwu wusheng bore song* (“Verses on Sudden Enlightenment, the Unborn, and Prajñā”), was also discovered at [DUNHUANG](#). As the title of the Dunhuang version makes clear, in this treatise Shenhui expounds on the notions of no-thought ([WUNIAN](#)), the unborn, or nonarising ([ANUTPĀDA](#)), and wisdom (prajñā), which all seem to function as synonyms for emptiness ([ŚŪNYATĀ](#)). Shenhui also mentions the Indian patriarch [BODHIDHARMA](#)’s transmission of this “secret teaching” to China and his conferral of the patriarchal robe as a mark of transmission. The *Xianzong ji* was later included in the genealogical history of the Chan tradition, the [JINGDE CHUANDENG LU](#).

[Xiaodao lun](#). (J. Shōdōron; K. Sodo non 笑道論). In Chinese, “Laughing at the Dao Treatise”; an anti-Daoist polemical treatise composed by Zhen Luan (d.u.) and presented to Emperor Wu (r. 560–578) of the Northern Zhou dynasty in 570. In response to the Daoist contentions in the [LAOZI HUAHU JING](#) that the Chinese

sage Laozi went to India and became [ŚĀKYAMUNI](#) Buddha in order to convert the Western barbarians, the *Xiaodao lun* attempts to expose the inconsistencies in Daoist thought, cosmological perspectives, practice, and ritual, and to demonstrate that the Daoists actually borrowed heavily from Buddhism. The treatise so displeased the emperor that he is said to have immediately ordered the text burned.

[xiaoguo](#). (C) (小過). In Chinese, “minor misdeed.” See [DUSKRTA](#).

[xiaomiao](#). (小廟). In Chinese, lit. “small temple”; a Songdynasty term for private monasteries whose control was passed within a single monastic lineage. The term is used in distinction to the large public monasteries, or “monasteries of the ten directions” ([SHIFANG CHA](#)).

[xiaosheng jiao](#). (C) (小乘教). See [HUAYAN WUJIAO](#).

[xiayu](#). (C) 下語. See [AGYO](#).

[Xiao zhiguan](#). (C) (小止觀). See [XIUXI ZHIGUAN ZUOCHAN FAYAO](#).

[xilai yi](#). (J. seiraii; K. sŏrae ūi 西來意). In Chinese, lit. “the meaning of coming from the west”; in [CHAN](#) literature, a common allusion to the question “What was the meaning of [Bodhidharma’s] coming from the west?” (xilai yi ruohe), i.e., “Why did [BODHIDHARMA](#), the founding patriarch of Chan, come from India to propagate Chan?” This question was commonly asked in Chan [GONG’AN](#) exchanges to test the spiritual depth of a teacher or disciple and as a meditative topic in “questioning meditation” ([KANHUA CHAN](#)). The phrase is found in [HUANGBO XIYUN](#)’s (d. c. 850) [CHUANXIN FAYAO](#), and the use of the question is well displayed in a famous exchange involving [MAZU DAOYI](#) (709–788) and his disciple Hongzhou Shuiliào (d.u.): when Shuiliào asks Mazu this question, Mazu encourages him to come closer, whereupon he kicks him to the ground, and Shuiliào immediately jumps up, enlightened. [ZHAOZHOU CONGSHEN](#)’s (778–897) answer to this question is the famous gong’an: “Cypress tree in front of the courtyard” ([TINGQIAN BOSHUZI](#)). Some of the other answers that appear in Chan literature include “sitting for a long time is a bother” ([BIYAN LU](#), case no. 17), “there is no meaning in Bodhidharma’s coming from the west” (*Biyān lu*, case no. 20), and “Zang’s head is white, Hai’s head is black” (*Biyān lu*, case no. 73).

[xilai yi ruohe](#). (C) (西來意若何). See [XILAI YI](#).

[Ximingsi](#). (西明寺). In Chinese, “Luminosity of the West Monastery,” located in the Tang capital of Chang’an (presentday Xi’an). There are two founding narratives. The first credits the Gaozong emperor (r. 649–683) with establishing the monastery at his old residence in 658 and installing [DAOXUAN](#) (596–667), founder of the Nanshan [VINAYA](#) school ([NANSHAN LÜ ZONG](#)), as its abbot. It is there that Daoxuan is said to have compiled the [DA TANG NEIDIAN](#) (“Great Tang Catalogue of Inner [viz., Buddhist] Classics”) as an inventory of scriptures for the newly established library at the monastery. Daoxuan also assisted [XUANZANG](#) (600/602–664) in translating preceptive texts, collaborated with his brother Daoshi (d. c. 683) in publishing [VINAYA](#) texts, and wrote his collection of essays in defense of Buddhism entitled the [GUANG HONGMING JI](#). A second narrative instead credits Xuanzang with founding the monastery. According to this story, the grounds were originally the residence of an imperial prince, and at first it was proposed to build both a Buddhist and a Daoist monastery there. After Xuanzang surveyed the site, he pronounced the site too small for two establishments, and thus only a Buddhist monastery was built. When Xuanzang settled there, the Gaozong emperor (r. 649–683) is said to have donated land, silk, and cotton to sustain it. ¶ Regardless of which account is correct, Ximingsi quickly became a major center of Buddhist scholarship and housed the most comprehensive library of Buddhist texts in the country. The monastery is said to have been built to match the dimensions of [JETAVANA](#) in India and, at one point, housed sixty-four cloisters. Because of its location in the Tang capital, several eminent monks resided and worked there. For example, the Tang emperor Xuanzong (r. 713–756) is said to have invited [ŚUBHAKARASIMHA](#) to stay at Ximingsi, where [YIXING](#) (683–727) assisted him in his translation work. [YIJING](#) (635–713) also translated there the Sanskrit manuscripts he brought back with him from his pilgrimage to India. The Korean monk [WÖNCH’ŬK](#) (613–695) worked with Xuanzang at Ximingsi (to the point that his lineage of scholastic interpretation is sometimes called the Ximing lineage, see [XIMING XUEPAI](#)), and the Japanese monk [KŪKAI](#) (774–835) is also known to have studied at the monastery.

[Ximing xuepai](#). (C) (西明學派). In Chinese, “the Ximing scholastic lineage” of the [FAXIANG ZONG](#), associated with [WÖNCH’ŬK](#). See [FAXIANG ZONG](#).

[xindi](#). (S. cintābhūmikā; J. shinji; K. simji 心地). In Chinese, lit. “mind-ground”

or “mind as ground”; a common metaphor used in [MAHĀYĀNA](#) literature to suggest that mind or thought is the source, or “ground,” of all phenomena. The *Dasheng bensheng xindi guan jing* (“Sūtra on the Great-Vehicle Contemplation of the Innate Mind Ground”), for example, metaphorically refers to the minds of the sentient beings of the three realms of existence as a “mind-ground,” since all phenomena—whether mundane ([LAUKIKA](#)) or supramundane ([LOKOTTARA](#)), and including all virtuous and nonvirtuous dharmas, as well as the five rebirth destinies ([GATI](#)) and the states of a [PRATYEKABUDDHA](#), [BODHISATTVA](#), or even a buddha—are generated from the mind of sentient beings, just as all grains and fruits are generated from soil. A commentary to the [MAHĀVAIROCANĀBHISAMBODHISŪTRA](#) (*Dari jing shu*) says that the mind is also metaphorically referred to as a “ground,” since the practice of bodhisattvas relies on the mind, just as activities of ordinary people rely on the ground. In the [FANWANG JING](#) (“Brahmā’s Net Sūtra”), the mind-ground refers to the bodhisattva precepts ([PUSA JIE](#)), which help to restrain the activities of body, speech, and mind; the precepts are the mind-ground because the activities of mind, or thought, are the basis for actions performed via body and speech. The buddha Vairocana says in the sūtra that he achieved complete, perfect enlightenment ([SAMYAKSAMBODHI](#)) only after cultivating the mind-ground over a hundred incalculable eons ([ASAMKHYEYAKALPA](#)). The Korean monk [WŎNHYO](#) (617–686), in his *Pŏmmanggyŏng Posal kyebon sagi* (“Personal Exposition on the Bodhisattva Precepts Text of the ‘Brahmā’s Net Sūtra’”), described three different denotations of mind-ground in terms of the abider and the ground on which that abider resides. These are (1) the fifty stages of the bodhisattva path (the ten [BODHISATTVABHŪMI](#), plus the forty stages preliminary to the bhūmis), which is the ground on which the thought of enlightenment ([BODHICITTA](#)) of the bodhisattva abides; (2) the three categories of precepts ([ŚĪLATRAYA](#)), which is the ground on which the enlightened mind abides; and (3) the realm of reality ([DHARMADHĀTU](#)), which is the ground on which the practitioner abides. In the [CHAN ZONG](#), the mind that was transmitted by [BODHIDHARMA](#), the putative founder of Chan, is termed the mind-ground, and his teaching of the one (enlightened) mind is called the dharma teaching of the mind-ground (xindi famen). [HUANGBO XIYUN](#) (d. 850) says in his [CHUANXIN FAYAO](#) that the “dharma teaching of the mind-ground means that all dharmas are constructed depending upon this mind.” Finally, [GUIFENG ZONGMI](#) in his *CHANYUAN CHUCHUANJI TUXU* (“Prolegomenon to the Comprehensive References to the Fountainhead of Chan Collection”) equates mind-ground with the buddha-nature ([FOXING](#)): “the

originally enlightened true nature of sentient beings is called both buddha-nature and mind-ground.”

xingjiao. (J. angya; K. haenggak 行脚). In Chinese, lit., “wandering on foot,” i.e., “pilgrimage”; a term used especially in the [CHAN](#) tradition to refer to a pilgrimage, often performed by a young monk who is in search of a teacher. Traditionally, this pilgrimage is made to numerous monasteries, most often located deep in the mountains, in hopes of having an interview with the resident master. In Japan, angya nowadays refers to the trip that young monks (known as unsui; see [YUNSHUI](#)) who have just completed their initial training at a provincial temple make to a major Zen training monastery, where they can continue their studies with a senior teacher ([RŌSHI](#)).

xingju shuo. (J. shōgusetsu; K. sǒnggu sǒl 性具說). In Chinese, the “nature-replete theory”; also known as liju sanqian, or “principle is replete with the trichiliocosm ([TRISĀHASRAMAHĀSĀHASRALOKADHĀTU](#)).” According to [Tiantai](#) doctrine, everything within the three realms of existence ([TRAI DHĀTUKA](#)) is all contained within the original nature of all sentient beings. This theory is said to be based on [Tiantai Zhiyi](#)’s notion of [Yinian Sanqian](#), or “the trichiliocosm in a single thought.” During the [Shanjia Shanwai](#) debate of the eleventh-century Tiantai community, the xingju theory came to connote the trichiliocosm that was replete within myriad phenomena and was distinguished from the [Huayan](#) doctrine of [Xingqi](#).

xingli. (J. anri; K. haengni 行履). In Chinese, lit., “practice hidden”; a contraction of qiongxing lijian, which literally means “assiduous practice and hidden conduct.” In the [CHAN](#) traditions, xingli generally refers to the daily conduct of a monk, which includes a whole gamut of activities from walking, sitting, and keeping silence to drinking tea and eating food. As such, the term can also refer to the progress of a monk’s training or to the history of his activities.

xingqi. (J. shōki; K. sǒnggi 性起). In Chinese, “nature origination”; an important [Huayan](#) soteriological and ontological theory, which emphasizes the common ground of all phenomenal appearances in the true nature of the mind. The term xingqi probably derives from the “Baowang rulai xingqi pin” (“Chapter on the ‘Nature Origination’ of the Tathāgata Jeweled King”), the thirty-second chapter of [Buddhabhadra](#)’s (359–429) sixty-roll translation of the [Avatamsakasūtra](#), which seems to translate the Sanskrit term tathāgatagotrāsambhava (the arising

of the lineage of the tathāgata). Its philosophical origins lie in the [TATHĀGATAGARBHA](#) corpus of literature, which maintains that all sentient beings are fundamentally identical to the buddhas, since they share the same buddha-nature ([FOXING](#)), and the term finds its antecedents in such earlier theories as the “conditioned origination of the true nature” (zhenxing yuanqi) proposed by the Southern [DILUN ZONG](#) master [JINGYING HUIYUAN](#) (523–592). ¶ The term “nature origination” was coined by the second Huayan patriarch [ZHIYAN](#) (602–668), and its implications were elaborated by the “third patriarch” [FAZANG](#) (643–712) in his [HUAYANJING TANXUAN JI](#) and especially the “fifth patriarch” [GUIFENG ZONGMI](#) (780–841). In Zhiyan’s soteriological interpretation of the xingqi, as elucidated in his influential treatise, [HUAYAN JING NAIZHANGMEN DENG ZA KONGMU ZHANG](#), “nature” (xing) refers to the “essence” ([TI](#)) and “origination” (qi) to the appearance of that essence in the “mind-ground” ([XINDI](#)). Zhiyan explicitly contrasts nature origination with the soteriological formulations of dependent origination (C. yuanqi; S. [PRATĪTYASAMUTPĀDA](#)): unlike dependent origination, which explains the specific conditions through which the experience of enlightenment occurs—and thus inevitably distinguishes the ordinary realm of [SAMSĀRA](#) from the enlightened realm of [NIRVĀNA](#)—nature origination operates entirely on the level of fruition to explain how enlightenment can “originate” only from within the very “nature” of this world itself. Enlightenment is therefore not something that needs to be produced, for it is the inherent nature of the mind itself. Zongmi subsequently provides a more ontological explanation of the xingqi, by explaining that “nature” refers to the one mind ([YIXIN](#)) as discussed in the [DASHENG QIXIN LUN](#) (“Awakening of Faith According to the Mahāyāna”) and “origination” refers to the process by which that nature is made manifest in the world at large. Thus, in distinction to the “conditioned origination of the [DHARMADHĀTU](#)” ([FAJIE YUANQI](#)), which explains how all phenomena in the universe are mutual conditioning, and conditioned by, all other phenomena, “nature origination” instead clarifies that all those phenomena simultaneously derive from the common ground that is the nature. Nature origination thus provides a description of causality from the standpoint of the “dharmadhātu of the unimpeded interpenetration of principle and phenomena” ([LISHI WU’AI FAJIE](#)).

[Xingsi](#). (C) (行思). See [QINGYUAN XINGSI](#).

[Xingtao](#). (C) (性瑠). See [MU’AN XINGTAO](#).

xingzhe. (J. anja; K. haengja 行者). In Chinese, “postulant.” According to the *Shishi yaolan*, a postulant refers to an unordained lay practitioner, a minimum of sixteen years of age, who works in a monastery until he or she is formally ordained. Within the **CHAN** traditions of East Asia, the sixth patriarch (**LIUZU**) **HUINENG** (638–713) is usually presumed to have been a postulant at the time he achieved enlightenment and received transmission from the fifth patriarch **HONGREN**. In premodern China, a postulant referred to a layperson who lived and worked in the monastic compounds before ordination; the postulant was still permitted to grow his or her hair and might in some cases even have a spouse. Postulants were expected to observe the five lay precepts (C. wujie; S. **PAÑCAŚĪLA**), but with the third precept against improper sexual conduct strengthened to require celibacy. In Korea, postulants (haengja) work in the monastery for at least six months before being allowed to ordain as novices. In Japan, a postulant (anja) may or may not be expected to ordain and works under the guidance of the administrative monks (yakusō) at the monastery or temple. ¶ The term xingzhe may also be used generically to refer to anyone who studies or practices Buddhism.

xing zong. (J. shōshū; K. sŏng chong 性宗). In Chinese, the “school of the nature”; also known as the **FAXING ZONG**, or “Dharma Nature” school. In distinction to the **XIANG ZONG**, or “characteristics school,” which mainly involved the analysis of phenomena, the xing school refers to those Buddhist intellectual traditions that studied the underlying essence or “nature” of reality. While the xiang school, i.e., the **FAXIANG** or “Dharma Characteristics” school, was a pejorative term referring to the Chinese **YOGĀCĀRA** school established on the basis of the new Yogācāra texts introduced from India by **XUANZANG** (600/602–664) and elaborated by his lineage, the name “xing zong” was used polemically to refer to the **MADHYAMAKA** teachings of the **SAN LUN ZONG**, the **TATHĀGATAGARBHA** teachings, or the last three of the five teachings in the **HUAYAN** school’s hermeneutical taxonomy (see **JIAOXIANG PANSHI**): the advanced teachings of Mahāyāna (Dasheng zhongjiao), i.e., the sudden teachings (**DUNJIAO**) and the perfect teachings (**YUANJIAO**). Maintaining a strict differentiation between the xing and xiang tendencies was called xingxiang juepan (differentiation between nature and characteristics); a scholastic approach that sought to harmonize the two trends was characterized as xingxiang ronghui (harmonizing nature and characteristics).

[Xin Huayan jing lun](#). (C) (新華嚴經論). See [HUAYAN JING HELUN](#).

[xinman chengfo](#). (C) (信滿成佛). See [YUANRONG](#).

[xinxin](#). (J. shinjin; K. sinsim 信心). In Chinese, “mind of faith” or “faith in mind”; the compound is typically interpreted to mean either faith in the purity of one’s own mind or else a mind that has faith in the three jewels ([RATNATRAYA](#)) and the principle of causality. The “mind of faith” is generally considered to constitute the inception of the Buddhist path ([MĀRGA](#)). In the elaborate fifty-two stage path schema outlined in such scriptures as the [AVATAMSAKASŪTRA](#), the [RENWANG JING](#), and the [PUSA YINGLUO BENYE JING](#), “mind of faith” (xinxin) constitutes the first of the ten stages of faith (shixin), a preliminary level of the [BODHISATTVA](#) path generally placed prior to the generation of the thought of enlightenment ([BODHICITTOTPĀDA](#)) that occurs on the first of the ten abiding stages (shizhu). The [MAHĀPARINIRVĀNASŪTRA](#) also says that the buddha-nature ([FOXING](#)) can be called the “great mind of faith” (da xinxin) because a bodhisattva-mahāsattva, through this mind of faith, comes to be endowed with the six perfections ([PĀRAMITĀ](#)). ¶ In the [PURE LAND](#) traditions, the mind of faith typically refers to faith in the vows of the buddha [AMITĀBHA](#), which ensures that those who have sincere devotion and faith in that buddha will be reborn in his pure land of [SUKHĀVATĪ](#). [SHANDAO](#) (613–681) divided the mind of faith into two types: (1) faith in one’s lesser spiritual capacity (xinji), which involves acceptance of the fact that one has fallen in a state of delusion during myriads of rebirths, and (2) faith in dharma (xinfā), which is faith in the fact that one can be saved from this delusion through the vows of Amitābha. [SHINRAN](#) (1173–1262) glosses the mind of faith as the buddha-mind realized by entrusting oneself to Amitābha’s name and vow. ¶ The term xinxin is also used as a translation of the Sanskrit [ŚRADDHĀ](#) (faith), which is one of the five spiritual faculties ([INDRIYA](#)), and of [ADHYĀŚAYA](#) (lit. “determination,” “resolution”), which is used to describe the intention of the bodhisattva to liberate all beings from suffering. See also [XINXIN MING](#).

[Xinxing](#). (J. Shingyō; K. Sinhaeng 信行) (540–594). In Chinese, “Practice of Faith”; founder of the “Third-Stage Sect” ([SANJIE JIAO](#)), a school of popular Buddhism that flourished during the Tang dynasty. Born in Ye in presentday Henan province, Xinxing ordained as a novice monk by the age of seventeen, after which he wandered the country, studying Buddhism and reading such Buddhist scriptures as the [SADDHARMAPUNDARĪKASŪTRA](#) (“Lotus Sūtra”),

[VIMALAKĪRTINIRDEŚA](#), and [MAHĀPARINIRVĀNASŪTRA](#). Feeling guilty for accepting from the laity offerings that he did not believe he deserved, Xinxing eventually abandoned monastic life, participating in various state labor projects and cultivating ascetic practices. He is also known to have bowed to all he met on the street, following the teachings of the [SADĀPARIBHŪTA](#) chapter of the *Saddharmapuṇḍarīkasūtra*. It is uncertain exactly when Xinxing established the Third-Stage Sect, but it was probably sometime around 587. In 589, at the behest of Emperor Wendi, he entered Chang’an, the capital city of the Sui dynasty, and stayed at Zhenjisi (Authentic Quiescence Monastery, later renamed Huadu monastery), where he promoted actively the teachings of the school until his death in 594. Xinxing had about three hundred followers, including Sengyong (543–631) and Huiru (d. c. 618). Due to the proscription of the sect during the Tang dynasty, only a few fragments of Xinxing’s writings are extant. These include the *Sanjie fofa* (“Buddhadharma during the Third Stage”), in four rolls, and sections of the *Duigen qixing fa* (“Principles on Practicing in Response to the Sense-Bases”) and the *Ming Dasheng wujinzang fa* (“Clarifying the Teaching of the Mahāyāna’s Inexhaustible Storehouse”). ¶ Xinxing’s teachings derive from the doctrines of the degenerate dharma ([MOFA](#)) and the buddha-nature ([FOXING](#)); they emphasize almsgiving (S. [DĀNA](#)) as an efficient salvific method, which contributed to the development of the school’s distinctive institution, the [WUJINZANG YUAN](#) (inexhaustible storehouse cloister). Because people during the degenerate age (mofa) were inevitably mistaken in their perceptions of reality, it was impossible for them to make any meaningful distinctions, whether between right and wrong, good and evil, or ordained and lay. Instead, adherents were taught to treat all things as manifestations of the buddha-nature, leading to a “universalist” perspective on Buddhism that was presumed to have supplanted all the previous teachings of the religion. Xinxing asserted that almsgiving was the epitome of Buddhist practice during the degenerate age of the dharma and that the true perfection of giving ([DĀNAPĀRAMITĀ](#)) meant that all people, monks and laypeople alike, should be making offerings to relieve the suffering of those most in need, including the poor, the orphaned, and the sick. In its radical reinterpretation of the practice of giving in Buddhism, even animals were considered to be a more appropriate object of charity than were buddhas, bodhisattvas, monks, or the three jewels ([RATNATRAYA](#)). Particularly significant were offerings made to the inexhaustible storehouse cloister (Wujinzang yuan), which served the needs of the impoverished and suffering in society—especially offerings made on the

anniversary of Xinxing’s death. See also [XIANGFA JUEYI JING](#).

[Xinxin ming](#). (J. Shinjinmei; K. Sinsim myōng 信心銘). In Chinese, “Inscription on the Mind of Faith” (or “Faith in Mind”); attributed to the dubious third patriarch of the [CHAN](#) tradition, the otherwise-unknown [SENGCAN](#). The *Xinxin ming* is a relatively short poem that praises nonduality and the method for attaining that experience. The last stanza, for instance, states that “faith and mind” (xinxin) are not two, and nonduality (lit. “not two”) is the “perfected mind” (xinxin). According to the *Xinxin ming*, the method of attaining nonduality largely involves the cultivation of detachment, especially from words and thoughts. Along with the [ZHENGDAO GE](#), [CANTONG QI](#), and [BAOJING SANMEI](#), the *Xinxin ming* has been regarded as one of the seminal statements of the Chan understanding of the dharma. Numerous commentaries on the poem were composed in East Asia. The *Xinxin ming* is still recited aloud in some Chan and [ZEN](#) monasteries.

[xinxun zhongzi](#). (C) (新薰種子). In Chinese, “newly acquired seeds.” See [BĪJA](#).

[Xiqian](#). (C) (希遷). See [SHITOU XIQIAN](#).

[Xitan ziji](#). (J. Shittan jiki; K. Siltam chagi 悉曇字禮). In Chinese, “Notes on the [SIDDHAM](#) Syllabary,” by the Chinese monk Zhikuang (d.u.); an influential primer of the Indian Siddham writing system. The *Xitan ziji* is said to be based on the teachings of a certain South Indian monk named Prajñābodhi. The main purpose of the *Xitan ziji* is to explain briefly the morphological operation of combining vowels and consonants. Zhikuang begins by discussing short and long syllables (e.g., a and ā). He then provides a detailed explanation of each vowel, their pronunciations, their various inflections, and their names. His coverage then extends to the syllables formed from the combination of consonants and vowels.

[Xiuxin yao lun](#). (J. Shushin yōron; K. Susim yo non 修心要論). In Chinese, “Treatise on the Essentials of Cultivating the Mind,” attributed to the fifth patriarch of the [CHAN](#) school, [HONGREN](#); an important text on meditative practice in the early Chan tradition. The edition of the *Xiuxin yao lun* used within the Chan school was published at the Korean monastery of Ansimsa in 1570 during the Chosŏn dynasty under the title [CH’OESANGSŪNG NON](#) (“Treatise on the Supreme Vehicle”) and again in 1907 as part of an edited volume of [SŌN](#) materials known as the [SŌNMUN CH’WARYO](#). With the recent discovery of some

earlier versions of the text at [DUNHUANG](#), a more nuanced history of the *Xiuxin yao lun* has emerged. Overall, the different recensions all seem to share the common goal of establishing “guarding the mind” (shouxin) as an authentic and effective practice in Chan. Largely written in dialogic format, the *Xiuxin yao lun* emphasizes the inherent purity of the mind, which the author likens to suchness ([TATHATĀ](#)). The practice of “guarding the mind” seems to be related to or even derived from the fourth patriarch [DAOXIN](#)’s “guarding the one” (shouyi), a practice that Daoxin probably borrowed from indigenous Chinese materials. The *Xiuxin yao lun* also emphatically notes the superiority of shouxin over the popular practice of reciting the buddha’s name ([NIANFO](#)) and a (misguided) experience of [SAMĀDHI](#), suggesting a polemical context for its composition.

[Xiuxi zhiguan zuochan fayao](#). (J. Shujū shikan zazenhōyō; K. Susŭp chigwan chwasŏn pŏbyo 修習止觀坐禪法要). In Chinese, “Essentials for Sitting in Meditation and Cultivating Calmness and Contemplation”; also known as the *Tongmeng zhiguan* (“Calming and Contemplation for Neophytes”) and the (*Tiantai*) *Xiao zhiguan* (“Shorter Calming and Contemplation of [Tiantai]”). The monk [Tiantai Zhiyi](#), the systematizer of the [Tiantai Zong](#), is known to have composed this treatise as a guide for training his brother Zhen Zhen. The treatise was composed sometime after his *Shi chan boluomi cidī chanmen* (571) and [Mohe Zhiguan](#) (594). Despite its popular designation as the *Xiao zhiguan*, the relatively short *Xiuxi zhiguan zuochan fayao* borrows heavily from the *Shi chan boluomi cidī chanmen* and seems to have no direct relation to Zhiyi’s massive *Mohe zhiguan*. A preface to the *Xiuxi zhiguan zuochan fayao* was prepared by the monk Yuanzhao (1048–1116) and was published together with the treatise in 1095. The treatise is divided into ten chapters: (1) necessary conditions, (2) rebuking desires, (3) discarding obstructions, (4) regulation, (5) expedient methods ([UPĀYA](#)), (6) proper cultivation, (7) manifestation of the (roots of) virtue ([KUSĀLAMŪLA](#)), (8) recognizing [MĀRA](#), (9) healing ailments, and (10) attainment of fruits. The practice of meditation outlined in the treatise is based on the twenty-five preparatory expedient methods of the [Dazhidu Lun](#) and the *Shi chan boluomi cidī chanmen*. As the title makes clear, the general purpose of the treatise is to provide the essentials for the concurrent practice of calming ([ŚAMATHA](#)) and insight ([VIPAŚYANĀ](#)). The treatise is still widely used in various Buddhist traditions as a practical manual for beginning meditators.

[Xiyu ji](#). (C) (西域禮). See [Da Tang Xiyu Ji](#).

[Xiyun](#). (C) (希運). See [HUANGBO XIYUN](#).

[Xuanhe huapu](#). (宣和畫譜). In Chinese, “The Xuanhe Chronology of Painting.” See [SODĀŚASTHAVIRA](#).

[Xuanjian](#). (C) (宣鑑). See [DESHAN XUANJIAN](#).

[Xuanjue](#). (C) (玄覺). See [YONGJIA XUANJUE](#).

[xuanmen](#). (C) (玄門). See [SHI XUANMEN](#).

[Xuansha sanbing](#). (J. Gensha sanbyō; K. Hyōnsa sambyōng 玄沙三病). In Chinese, “Xuansha’s Three Infirmities”; a famous sermon attributed to the [CHAN](#) master [XUANSHA SHIBEI](#). Different versions of the sermon are found in the [BIYAN LU](#) (case 88), [JINGDE CHUANDENG LU](#) (roll 18), [KAIAN KOKUGO](#) (roll 6), *etc.* One day, Xuansha asked the assembly what they would do should a blind, mute, and deaf person come to them for teaching, since the blind cannot see them raise their whisk, the mute cannot reply, and the deaf cannot hear. On a different occasion, the Chan master [YUNMEN WENYAN](#) demonstrated how this could be done. When a monk stepped back as Yunmen was about to hit him, the master whimsically noted that the monk was not blind. When the monk approached at his bidding, Yunmen then noted that the monk was not deaf. Finally, Yunmen asked the monk if he understood, and when the monk gave him a negative reply, Yunmen declared that he was not mute.

[Xuansha Shibe](#)i. (J. Gensha Shibi; K. Hyōnsa Sabi 玄沙師備) (835–908). Chinese [CHAN](#) master in the lineage of [QINGYUAN XINGSI](#) (d. 740) and a predecessor in the [FAYAN ZONG](#) of the classical Chan school; he was a native of Min (presentday Fujian province). Xuansha left home to study with the Chan master Lingxun (d.u.) on Mt. Furong and later received the monastic precepts in 864 from the [VINAYA](#) master Daoxuan (d.u.) at the monastery KAIYUANSI in Jiangxi province. Two years later, he visited the Chan master [XUEFENG YICUN](#) and became his disciple. Xuansha’s adherence to the precepts is said to have been so strict that he was given the nickname Bei Doutuo, or “[DHUTANGA](#) Bei.” He subsequently left Xuefeng’s side and established a cloister on Mt. Sheng (also known as Mt. Xuansha) in Fujian province, named Xuansha (Sublime Sand). In 898, he was summoned to live in the cloister of Anguoyin in Fujian by the king of Min. Emperor Zhaozong (r. 888–904) gave Xuansha the title of Great Master Zongyi

(Tradition's Best). Luohan Kuichen (867–928) was one of his disciples. His sayings were published in the *Xuansha guanglu* and *Xuansha Shibei chanshi yulu*, and sporadic references to some of his more popular sayings (e.g., [XUANSHA SANBING](#)) can also be found in the [BIYAN LU](#).

[Xuansu](#). (C) (玄素). See [HELIN XUANSU](#).

[Xuanxue](#). (J. Gengaku; K. Hyōnhak 玄學). In Chinese, “Dark Learning,” or “Profound Learning”; a Chinese philosophical movement of the third through sixth centuries CE, which provided a fertile intellectual ground for the emergence of early Chinese forms of Buddhism. It is sometimes known as “Neo-Daoism,” although the target audience of Xuanxue literati was fellow elite rather than adherents of the new schools of religious Daoism that were then developing in China. The social and political upheaval that accompanied the fall of the Han dynasty (206 BCE–220 CE) prompted many Chinese intellectuals to question the traditional foundations of Chinese thought and society and opened them to alternative worldviews. Buddhism, which was just then beginning to filter into Chinese territories, found a receptive audience among these groups of thinkers. Xuanxue scholars critiqued and reinterpreted the normative Chinese teachings of Confucianism by drawing on the so-called “three dark [treatises]” (*sanxuan*), i.e., the *Yijing* (“Book of Changes”), *Daode jing* (“The Way and Its Power”), and the *Zhuangzi*. Xuanxue designates a broad intellectual trend that sought a new way of understanding the “way” ([DAO](#)). Xuanxue philosophers explored the ontological grounding of the changing and diverse world of “being” (C. you) on a permanent and indivisible substratum called “nothingness” or “nonbeing” (C. [WU](#)). Xuanxue thinkers such as Wang Bi (226–249), who is regarded as the founder of the movement, and Guo Xiang (d. 312), who is often considered to represent its apex, explored how this ontological stratum of nothingness still was able to produce the world of being in all its diversity. This process was clarified by adopting the mainstream Chinese philosophical bifurcations between (1) the ineffable “substance” or “essence” ([TI](#)) of things and the ways in which that substance “functions” ([YONG](#)) in the phenomenal world; and (2) the “patterns” or “principles” ([LI](#)) that underlie all things and their phenomenal manifestations ([SHI](#)). These distinctions between ti/yong and li/shi proved to be extremely influential in subsequent Chinese Buddhist exegesis. Also according to Xuanxue interpretation, the sage (*shengren*) is one who understands this association between being and nothingness but realizes that their relationship is

fundamentally inexpressible; nevertheless, in order to make it intelligible to others, he feels “compelled” to describe it verbally. This emphasis on the inadequacy of language resonated with Buddhist treatments of the ineffability of spiritual experience and the necessity to deploy verbal stratagems ([UPĀYA](#)) in order to make that experience intelligible to others. The sage was able to manifest his understanding in the phenomenal world not by conscious intent but as an automatic “response” (ying) to “stimuli” (gan); early Chinese Buddhist thinkers deploy the compound “stimulus and response” ([GANYING](#)) to explain the Buddhist concepts of action ([KARMA](#)) and of grace (i.e., the “response” of a buddha or [BODHISATTVA](#) to a supplicant’s invocation, or “stimulus”). Xuanxue thinkers also began to explore parallels between their ideas of “nonbeing” (wu) and the notion of emptiness ([ŚŪNYATĀ](#)) in the [PRAJÑĀPĀRAMITĀ](#) corpus, which was just then being translated into Chinese. Xuanxue exegesis has often been described in the scholarly literature as a “matching concepts” ([GEYI](#)) style of interpretation, where Buddhist concepts were elucidated by drawing on indigenous Chinese philosophical terminology, though this interpretation of geyi has recently been called into question. Although Xuanxue vanished as a philosophical movement by the early sixth century, its influence was profound on several pioneering Chinese Buddhist thinkers, including [ZHI DUN](#) (314–366) and [SENGZHAO](#) (374–414), and on such early philosophical schools of Chinese Buddhism as the [SAN LUN ZONG](#) and [DI LUN ZONG](#), and eventually on the [TIANTAI ZONG](#) and [HUAYAN ZONG](#) of the mature Chinese tradition.

[Xuanzang](#). (J. Genjō; K. Hyōnjang 玄奘) (600/602–664). Chinese monk, pilgrim, and patriarch of the Chinese [YOGĀCĀRA](#) tradition ([FAXIANG ZONG](#)) and one of the two most influential and prolific translators of Indian Buddhist texts into Chinese, along with [KUMĀRAJĪVA](#) (344–413); in English sources, his name is seen transcribed in a variety of ways (now all outmoded), including Hsüan-tsang, Hiuen Tsiang, Yuan Chwang, *etc.* Xuanzang was born into a literati family in Henan province in either 600 or 602 (although a consensus is building around the latter date). In 612, during a state-supported ordination ceremony, Xuanzang entered the monastery of Jingtusi in Luoyang where his older brother was residing as a monk. There, Xuanzang and his brother studied the [MAHĀPARINIRVĀNASŪTRA](#) and various [MAHĀYĀNA](#) texts. When the Sui dynasty collapsed in 618, they both fled the capital for the safety of the countryside. In 622, Xuanzang was given the complete monastic precepts and was fully ordained as a monk ([BHIKSU](#)). By this time Xuanzang had also studied earlier

translations of the [MAHĀYĀNASAMGRAHA](#), [JÑĀNAPRASTHĀNA](#), and [*TATTVASIDDHI](#) under various teachers but came to doubt the accuracy of those translations and the veracity of their teachings. In order to resolve his doubts, Xuanzang embarked on an epic journey to India in 627, in flagrant disregard of the Taizong emperor's (r. 626–629) edict against traveling abroad. His trek across the [SILK ROAD](#) and India is well known, thanks to his travel record, the [DA TANG XIYU JI](#), his official biography, and the famous Ming-dynasty comic novel based on Xuanzang's travels, [XIYU JI](#) ("Journey to the West"). (See "Routes of Chinese Pilgrims" map.) According to these sources, Xuanzang visited the various Buddhist pilgrimage sites of the subcontinent (see [MAHĀSTHĀNA](#)) and spent years at [NĀLANDĀ](#) monastery mastering Sanskrit, including fifteen months studying the texts of the Indian Yogācāra tradition under the tutelage of the 106-year-old [ŚĪLABHADRA](#). In 645, Xuanzang returned to the Tang capital of Chang'an with over six hundred Sanskrit manuscripts that he had acquired in India, along with images, relics, and other artifacts. (These materials were stored in a five-story stone pagoda, named the [DAYAN TA](#), or Great Wild Goose Pagoda, that Xuanzang later built on the grounds of the monastery of [DA CI'ENSI](#); the pagoda is still a major tourist attraction in Xi'an.) The Taizong and Gaozong emperors (r. 649–683) honored Xuanzang with the title [TREPITAKA](#) (C. sanzang fashi; "master of the Buddhist canon") and established a translation bureau (yijing yuan) in the capital for the master, where Xuanzang supervised a legion of monks in charge of transcribing the texts, "rectifying" (viz., clarifying) their meaning, compiling the translations, polishing the renderings, and certifying both their meaning and syntax. Xuanzang and his team developed an etymologically precise set of Chinese equivalencies for Buddhist technical terminology, and his translations are known for their rigorous philological accuracy (although sometimes at the expense of their readability). While residing at such sites as HONGFUSI, Da ci'ensi, and the palace over an eighteen-year period, Xuanzang oversaw the translation of seventy-six sūtras and śāstras in a total of 1,347 rolls, nearly four times the number of texts translated by Kumārajīva, probably the most influential of translators into Chinese. (Scholars have estimated that Xuanzang and his team completed one roll of translation every five days over those eighteen years of work.) Xuanzang's influence was so immense that he is often recognized as initiating the "new translation" period in the history of the Chinese translation of Buddhist texts, in distinction to the "old translation" period where Kumārajīva's renderings hold pride of place. Among the more important translations made by Xuanzang and his translation team are

the foundational texts of the Yogācāra school, such as the [CHENG WEISHI LUN](#) (**Vijñaptimātratāsiddhi*), [ASAṄGA](#)'s [MAHĀYĀNASAMGRAHA](#), and the [YOGĀCĀRABHŪMIŚĀSTRA](#), and many of the major works associated with the [SARVĀSTIVĀDA](#) school of [ABHIDHARMA](#), including definitive translations of the *Jñānaprasthāna* and the encyclopedic [ABHIDHARMAMAHĀVIBHĀSĀ](#), as well as complete translations of [VASUBANDHU](#)'s [ABHIDHARMAKOŚABHĀSYA](#) and [SAMGHABHADRA](#)'s *[NYĀYĀNUSĀRA](#). He translated (and retranslated) many major Mahāyāna sūtras and śāstras, including the massive [MAHĀPRAJÑĀPĀRAMITĀSŪTRA](#), in six hundred rolls; this translation is given a place of honor as the first scripture in the East Asian Buddhist canons (see [DAZANGJING](#); [KORYŎ TAEJANGGYŎNG](#)). Also attributed to Xuanzang is the Chinese translation of the famed [PRAJÑĀPĀRAMITĀHRDAYASŪTRA](#), or “Heart Sūtra,” probably the most widely read and recited text in East Asian Buddhism. Because Xuanzang himself experienced a palpable sense of the Buddha’s absence while he was sojourning in India, he also translated the *Nandimitrāvadāna* (*Da aluohan Nantimiduo luo suoshuo fazhu ji*, abbr. *Fazhu ji*, “Record of the Duration of the Dharma Spoken by the Great Arhat [NANDIMITRA](#)”), the definitive text on the sixteen [ARHAT](#) protectors (see [SODĀŚASTHAVIRA](#)) of Buddhism, which became the basis for the LOUHAN cult in East Asia.

[Xuanzhong ming](#). (J. Genchūmei; K. Hyōnjung myōng 玄中銘). In Chinese, “Inscription on the Center of Mystery,” by the Chinese [CHAN](#) master [DONGSHAN LIANGJIE](#). In this poem, Dongshan sings of the “mystery” of subtle reciprocation (*huihu wanzhuan*), simultaneous illumination of phenomena and principle ([SHI LI](#) *shuangming*), and the unimpededness of essence and function ([TI YONG](#) *wuzhi*), which he likens to the activities of a sage. The *Xuanzhong ming* is found in Dongshan’s recorded sayings, the *Dongshan yulu*.

[Xuedou Chongxian](#). (J. Setchō Jūken; K. Sōltu Chunghyōn 雪竇重顯) (980–1052). Chinese [CHAN](#) master in the [YUNMEN ZONG](#) of the mature Chan tradition; also known as Yinzhi. Xuedou was a native of Sichuan province. After his ordination under Renxian (d.u.) of the cloister of Pu’anyuan, Xuedou received doctrinal training from Yuanying (d.u.) of Dacisi and Guyin Yuncong (965–1032) of Shimen. During his travels in the south, Xuedou visited the Yunmen master Zhimen Guangzuo (d.u.) in Hubei province and became his leading disciple. Xuedou later resided on Cuiwei peak near Tongting Lake and the monastery of Zishengsi on Mt. Xuedou in Zhejiang province, whence he

acquired his toponym. During his residence in Zishengsi, Xuedou acquired more than seventy students and composed his famed collection of one hundred old cases (guce, viz., [GONG'AN](#)) known as the *Xuedou songgu*, which in turn formed the basis of Chan master [YUANWU KEQIN](#)'s influential [BIYAN LU](#). Xuedou also composed the *Tongting yulu*, *Xuedou kaitang lu*, *Puquan ji*, *Zuying ji*, and various other texts. Xuedou's successful career as a teacher is often considered a period of revitalization of the Yunmen tradition.

[Xuefeng Yicun](#). (J. Seppō Gison; K. Sōlbong Ūijon 雪峰義存) (822–908). Chinese [CHAN](#) master in the lineage of [QINGYUAN XINGSI](#) (d. 740); a native of Min (presentday Fujian province). He was ordained at the age of seventeen and given the dharma name Yicun, but temporarily returned to lay clothing during the severe persecution of the [HUICHANG FANAN](#) and studied under Furong Lingxun (d.u.). After a brief stay with [DONGSHAN LIANGJIE](#), Xuefeng left at Dongshan's direction to study with [DESHAN XUANJIAN](#) (780/2–865). Xuefeng then embarked on a journey with his colleagues Yantou Quanhuo (828–887) and Qinshan Wensui (d.u.). With the help of Yantou, Xuefeng is said to have had his first awakening experience during a snowfall on Mt. Ao in Hunan. Xuefeng and Yantou became Deshan's leading disciples. Xuefeng later established a monastery with the support of the king of Min on what came to be known as Mt. Xuefeng in Fujian province. The mountain was originally known as Mt. Xianggu (Elephant Bone) but acquired its new name after a famous exchange at the mountain between the king of Min and the monk Xuefeng. Xuefeng's monastery was given the name Chongshengsi and Yingtian Xuefeng Chanyuan. In 882, Emperor Xizong (r. 873–888) bestowed upon him the title Great Master Zhenjue (Authentic Enlightenment) and the purple robe. His disciples include [YUNMEN WENYAN](#) (the founder of the [YUNMEN ZONG](#) of the classical Chan school), [XUANSHA SHIBEI](#) (whose students eventually would go on to establish the [FAYAN ZONG](#)), Changjing Huileng (854–932), Baofu Congzhan (d. 928), and Gushan Shenyan (d. 943). His teachings are recorded in his *Xuefeng Zhenjue chanshi yulu*.

[Xuemo lun](#). [alt. Xuemai lun] (J. Kechimyakuron; K. Hyōlmaek non 血脈論). In Chinese, “Treatise on the Blood-Vessel.” This short treatise has been traditionally attributed to the legendary Indian monk [BODHIDHARMA](#) and is also referred to as the *Damo dashi xuemo lun* (“Great Master [Bodhi]dharma's Treatise on the Blood-Vessel”). Judging from its style of argumentation and

doctrinal content, the treatise was most probably composed by a [CHAN](#) adept of the [HONGZHOU ZONG](#) or [NIUTOU ZONG](#) sometime during the ninth century, long after Bodhidharma's death. The treatise begins with the claim that the three realms of existence ([TRAIDHĀTUKA](#)) return to the "one mind" ([YIXIN](#)), which was transmitted from one buddha to another without recourse to words or letters ([BULI WENZI](#)). From beginning to end, the treatise consistently underscores the importance of the inherent purity of the mind (xin) and claims that the mind is none other than the buddha, [DHARMAKĀYA](#), [BODHI](#), and [NIRVĀNA](#). The treatise also polemically contends that the practice of chanting and being mindful of the buddha [AMITĀBHA](#)'s name ([NIANFO](#)), reading scriptures, and upholding the precepts may guarantee a better rebirth and intelligence but do not ensure the achievement of buddhahood. According to the treatise, only the practice of seeing one's own nature ([JIANXING](#)) can lead to buddhahood (see [JIANXING CHENGFO](#)). The first known edition of the *Xuemo lun* was first published in Korea in 1473 and was republished on several subsequent occasions. It is often anthologized in larger compilations such as the [SŌNMUN CH'WARYO](#) and [SHŌSHITSU ROKUMON](#).

[Xu gaoseng zhuan](#). (J. Zoku kōsōden; K. Sok kosŭng chŏn 續高僧傳). In Chinese, "Supplement to the Biographies of Eminent Monks," compiled by the [VINAYA](#) master [DAOXUAN](#); also known as the *Tang gaoseng zhuan*. As the title suggests, the *Xu gaoseng zhuan* "supplements" or "continues" the work of [HUIJIAO](#)'s earlier [GAOSEN ZHUAN](#) and records the lives of monks who were active in the period between Huijiao's composition during the Liang dynasty and Daoxuan's own time. The *Xu gaoseng zhuan* contains 485 major and 219 appended biographies, neatly categorized under translators (yijing), exegetes (yijie), practitioners of meditation (xichan), specialists of [VINAYA](#)(minglü), protectors of the [DHARMA](#) (hufa), sympathetic resonance ([GANTONG](#)), sacrifice of the body ([YISHEN](#)), chanters (dusong), benefactors (xingfu), and miscellaneous (zake). Although Daoxuan generally followed Huijiao's earlier categorizations, he made several changes. In lieu of Huijiao's divine wonders (shenyi), viz., thaumaturgists, Daoxuan opted to use the term sympathetic resonance, instead; he also subsumed Huijiao's hymnodists (jingshi) and propagators (changdao) under the "miscellaneous" category. Daoxuan also introduced the new category of protectors of the dharma order to leave a record of disputes that occurred at court with Daoists. These adjustments seem to reflect ongoing developments within Chinese Buddhism in how to conceive of, and write, history. Other

related biographical collections include [ZANNING](#)'s [SONG GAOSENG ZHUAN](#), Shi Baochang's [BIQIUNI ZHUAN](#), the Korean [HAEDONG KOSŬNG CHŎN](#), and the Japanese [HONCHŌ KŌSŌDEN](#).

Xutang Zhiyu. (J. Kidō Chigu; K. Hōdang Chiu 虛堂智愚) (1185–1269). Chinese [CHAN](#) master in the [LINJI ZONG](#); also known as Xijingsou. Xutang was ordained at age sixteen by Shiyun (d.u.) of Pumingsi and later became the disciple of [YUN'AN PUYAN](#) (1156–1226). He continued to visit various teachers throughout the country until he became the abbot of the monastery of Xingshengsi in 1229. Xutang also served as abbot of many other important Chan monasteries throughout his illustrious career, including BAOLINSI and [WANSHOUSI](#). The emperors Lizong (r. 1224–1264) and Duzong (r. 1264–1274) honored Xutang as their teacher. Among his disciples is the Japanese monk [NANPO JŌMYŌ](#) (1235–1308), to whom the abbots of [DAITOKUJI](#) and [MYŌSHINJI](#) trace their lineage. The eminent Japanese monk and abbot of Daitokuji, [IKKYŪ SŌJUN](#), even went so far as to consider himself to be a reincarnation of Xutang and had numerous portraits of himself drawn in the likeness of Xutang.

Xuyun. (虛雲) (1840–1959). In Chinese, “Empty Cloud”; [CHAN](#) monk of the modern period, renowned as one of the major reformers of modern Chinese Buddhism, especially of the Chan school; also known as Deqing. Xuyun was a native of Xiangxiang in Hunan province. He entered the monastery at the age of nineteen and received the precepts a year later from the monk Miaolian (d.u.). He then embarked on a long pilgrimage to famous mountains in China and to such distant sites as Tibet, India, and Sri Lanka, where he studied with teachers in a variety of Buddhist traditions. At the age of forty-three, Xuyun climbed [WUTAISHAN](#), where he is said to have had a vision of the resident bodhisattva [MAÑJUŚRĪ](#). His awakening experience came at the drop of a teacup at the age of fifty-six. Xuyun was particularly renowned for his austerities and longevity. He became an important exponent of the convergence of “questioning meditation” ([KANHUA CHAN](#)) and recitation of the Buddha's name ([NIANFO](#)), who was noted for using the meditative topic ([HUATOU](#)) “Who is reciting the Buddha's name?” Xuyun spent the rest of his career propagating Buddhism throughout China until his death on Mt. Yunju in Jiangxi province at the advanced age of 120. See also [TAIXU](#); [YINGUANG](#).

Y

yab yum. A Tibetan term, literally meaning “father-mother,” referring to the theme common in [VAJRAYĀNA](#) iconography, especially that of [ANUTTARAYOGATANTRA](#), viz., male and female deities in sexual union. The deities are depicted either standing face-to-face or sitting, with the male deity in the [VAJRĀSANA](#) and the female deity seated on the male deity’s lap, with her legs wrapped around his back, their arms embracing each other. Although interpreted in numerous ways, the male figure is generally understood to represent compassion ([KARUNĀ](#)) and method ([UPĀYA](#)) and the female figure wisdom ([PRAJÑĀ](#)). Their union represents the indivisibility of these two qualities in the state of buddhahood. Although often described in such symbolic terms, numerous [SĀDHANAs](#) associated with the anuttarayogatantras include the practice of sexual union.

yaksa. (P. yakkha; T. gnod sbyin; C. yecha; J. yasha; K. yach’a 夜叉). In Indian mythology, a class of nature spirit, commonly serving as local guardians of the earth and of trees and the treasures hidden there. They possess supernatural powers—including the ability to fly, to change their appearance, and to disappear—which they can employ for good or for evil. They appear often in Buddhist texts, sometimes serving as benevolent protectors of and messengers for the Buddha and his disciples. The most famous of them is [VAJRAPĀNI](#), who accompanies the Buddha as his bodyguard. They are commonly listed among the audience of the Buddha’s sermons, with some attaining the rank of stream-enterer. There are also demonic yakṣas, especially the female yakṣas or yakṣiṇī, who devour infants and corpses and must be subdued by the Buddha, an [ARHAT](#), or a [BODHISATTVA](#). The continent of [UTTARAKURU](#) and the island of Sri Lanka were considered to be abodes of the yakṣas.

Yakushiji. (薬師寺). In Japanese, “Medicine Buddha Monastery.” One of the seven great monasteries of Nara, Japan. Yakushiji is currently the headquarters (daihonzan) of the Hossō (C. [FAXIANG ZONG](#)) tradition. In 680, Emperor Tenmu (r. 673–686) ordered the construction of a statue of the Medicine Buddha

([BHAIJAGURU](#)) and a new monastery to pray for the recovery of his ill consort, who later succeeded him as Empress Jitō (r. 687–697). Due to the emperor’s death and the lack of sufficient funds, construction began under Empress Jitō’s reign in the old capital of Fujiwarakyō in present-day Kashihara city. Construction was completed in 697, but the monastery was physically relocated to the new capital Heijōkyō in 718 after the transfer of the capital in 710. The monastery originally consisted of two pagodas to the east and the west flanking a central golden hall (kondō) and a lecture hall (kōdō) behind it. After a great fire in 973, only the pagodas and the golden hall remained. The hall collapsed during a typhoon in 1445 and the west pagoda was lost to fire during a war in 1528. Reconstruction of the monastery took place during most of the late twentieth and early twenty-first centuries. The golden hall houses the famed Medicine Buddha triad from the Hakuō period (645–710), now designated a national treasure.

Yama. (T. Gshin rje; C. Yanmo wang; J. Enma ō; K. Yōmma wang 閻魔王). In the Buddhist pantheon, the lord of death and the king of hell. Among the six rebirth destinies ([SADGATI](#)), Yama is considered a divinity ([DEVA](#)), even though his abode is variously placed in heaven ([SVARGA](#)), in the realm of the ghosts ([PRETA](#)), and in the hells (see [NĀRAKA](#)). Birth, old age, sickness, and punishment are said to be his messengers, sent among humans to remind them to avoid evil deeds and to live virtuously. Since [KARMA](#) functions as a natural law, with suffering resulting from unvirtuous actions and happiness from virtuous actions, the process of moral cause and effect should proceed without the need for a judge to mete out rewards and punishments. However, in Indian sources, Yama is sometimes described as the judge of the dead, who interrogates them about their deeds and assigns the wicked to the appropriate hell. This role of Yama was expanded in China, where he oversaw a quintessentially Chinese infernal bureaucracy: Yama is said to have organized the complex array of indigenous “subterranean prisons” (C. diyu) into a streamlined system of ten infernal courts, each presided over by a different king who would judge the incoming denizens. These judges were known collectively as the ten kings of hell (C. [SHIWANG](#)) and are the subject of the eponymous *Shiwang jing*, a Chinese indigenous scripture (see [APOCRYPHA](#)). See also [KSITIGARBHA](#).

yāma. (T. ’thab bral; C. yemo tian; J. yamaten; K. yama ch’ōn 夜摩天). In Sanskrit and Pāli, proper name of a heaven in the sensuous realm ([KĀMADHĀTU](#));

also known as *suyāma* (“where the seasons are always good”). The *yāma* heaven is the third from the bottom of the six heavens located in the sensuous realm above Mount [SUMERU](#), between [TRĀYASTRIMŚĀ](#) below and [TUŚITA](#) above. Like all Buddhist heavens, it is a place of rebirth and not a permanent post-mortem abode. Because this heaven is located in the sky, the divinities who inhabit it do not need to engage in combat with the [ASURAS](#) who dwell on the slopes of Mount Sumeru, hence the Tibetan interpretation of the name as “free from conflict.” (The Chinese is a Sinographic transcription of the Sanskrit.) The life span in this heaven is said to be two thousand years, with each day lasting two hundred human years.

[yamabushi](#). (山伏). In Japanese, lit. “those who lie down [or sleep] in the mountains”; itinerant mountain ascetics associated with the [SHUGENDŌ](#) (way of cultivating supernatural power) tradition; also known as *shugenja*, or “those who cultivate supernatural powers.” Records reveal that as early as the Nara period (although possibly before), *yamabushi* practiced a variety of severe austerities in the mountains, which were thought to be numinous places that housed the spirits of the dead. Thanks to the special powers accumulated through this training, such adepts were able to mediate with the realm of the dead, convert baleful spirits, and provide healing services. During this early period, the *yamabushi* were not formally ordained but instead operated independently, drawing freely from Buddhism, Daoism, and indigenous religious beliefs. In the mid to late Heian period (794–1185), such *Shugendō* sites as the mountains of Yoshino and [KUMANO](#) became affiliated with Japanese Tendaishū ([TIANTAI](#)) and [SHINGONSHŪ](#) institutions, and *yamabushi* increasingly incorporated esoteric Buddhism into their training, whereby they strove to attain buddhahood ([SOKUSHIN JŌBUTSU](#)) through severe asceticism, such as immersion under waterfalls, solitary confinement in caves, fasting, meditating, and the recitation of spells ([MANTRA](#)). In addition, *yamabushi* guided people on pilgrimages through their mountain redoubts and performed powerful rites for the aristocratic nobility and royal court. During the Tokugawa period (1600–1868), they were forced because of temple regulations (J. *jin hatto*) to adopt permanent residences. While higher-ranking practitioners stayed at the mountain centers, many others settled down in villages, where they performed shamanic rituals and offered healing and prayers. Later in the Tokugawa period, many of these practices would provide the foundation for Japan’s so-called new religions. When *Shugendō* was proscribed in 1872, *yamabushi* were forced to join either Buddhist or Shintō institutions and

to forgo many of their former practices. When this ban was lifted in the late 1940s following World War II, yamabushi at some centers, including Mt. Haguro and Kumano, resumed their former practice, which continues to the present.

[Yamaka](#). In Pāli, “Pairs”; one of the principal books of the Pāli abhidhammapiṭaka (see [ABHIDHARMAPITAKA](#)), which has no precise analogue in the abhidharmas of other [MAINSTREAM BUDDHIST SCHOOLS](#). The text belongs to the second stratum of Pāli abhidhamma works and is traditionally dated to the time of the third Buddhist council (see [COUNCIL, THIRD](#)) (c. third–second century BCE). The *Yamaka* is divided into ten chapters: (1) nine kinds of faculties or roots (mūla), for example, the three wholesome faculties (see [KUŚĀLAMŪLA](#)), the three unwholesome faculties (see [AKUŚĀLAMŪLA](#)), and the three neutral faculties; (2) five aggregates (see [SKANDHA](#)); (3) six sensory bases ([ĀYATANA](#)); (4) eighteen elements ([DHĀTU](#)); (5) the [FOUR NOBLE TRUTHS](#); (6) conditioning factors (see [SAMSKĀRA](#)) created via body, speech, and mind; (7) the proclivities (see [ANUŚAYA](#)); (8) mind ([CITTA](#)); (9) factors (see [DHARMA](#)); and (10) faculties ([INDRIYA](#)). Each of these chapters is organized into three sections: (1) delimitation of terminology, viz., the precise denotation of the terms covered in a chapter; (2) process, viz., discussions of how the terms are deployed in the course of abhidhamma analysis; and (3) penetration, viz., what understandings are generated through this analysis. The coverage proceeds through series of paired exchanges. An example is the opening discussion of the truth of suffering (P. dukkhasacca; S. [DUHKHASATYA](#)). Exchange A asks: “Are painful sensations (P. dukkha; S. [DUHKHA](#)) always included in the truth of suffering? Yes.” Exchange B asks: “Does the truth of suffering always refer to painful sensations? No, the truth of suffering involves other types of suffering apart from physical and psychological suffering.” Through this exchange, the text clarifies that the term dukkha cannot be limited solely to physical or psychological pain (see [DUHKHADUHKHATĀ](#)), but suggests that it may also involve the suffering caused by change (see [VIPARINĀMADUHKHATĀ](#)) and in fact lies at the very root of conditioning itself (see [SAMSKĀRADUHKHATĀ](#)). Perhaps because its format of paired exchanges does not readily lend itself to systematic analysis, the *Yamaka* has the dubious distinction of being probably the least read of all the works in the Pāli abhidhammapiṭaka.

[yamakaprātihārya](#). (P. yamakapāṭihāriya; T. cho ’phrul ya ma zung; C.

shuangshenbian; J. sōjinpen; K. ssangsinbyōn 雙神變). In Sanskrit, “paired miracle” or “twin miracle”; this and the [MAHĀPRĀTIHĀRYA](#) are the two most famous of the miracles performed by the Buddha during his career, which are frequently narrated in both canonical and commentarial literature and widely depicted in Buddhist art. Both types are generally understood to have taken place in the city of [ŚRĀVASTĪ](#) and thus are often referred to collectively in the literature as the [ŚRĀVASTĪ MIRACLES](#). The yamakaprātihārya involved the manifestation of the contrasting physical elements ([MAHĀBHŪTA](#)) of fire and water. After the Buddha established a rule preventing monks from displaying miraculous powers, he was challenged by a group of non-Buddhist yogins to a display of his own supranormal powers. As a buddha, he was exempt from this prohibition, so he accepted their challenge and stated that he would perform a miracle at the foot of a mango tree. To keep him from proceeding, his opponents uprooted all the mango trees in the vicinity, leading the Buddha to cause a great tree to grow spontaneously from a mango seed. At the appointed time, the Buddha created a bejeweled walkway in the sky and then proceeded back and forth on it, causing flames to emerge from the upper part of his body and streams of water from the lower part, then water from the upper part and flames from the lower part, then flames from the right side and water from the left side, then from his front and back, right eye and left eye, right ear and left ear, *etc.* He then created a double of himself (see [MANOMAYAKĀYA](#)), with whom he conversed. It is because of the simultaneous presence of fire and water (and perhaps because of his creation of his doppelgänger) that the event is called the “paired miracle.” After performing the miracle and preaching for sixteen days, the Buddha departed for the heaven of the thirty-three ([TRĀYASTRIMŚĀ](#)), where he spent the rains retreat ([VARṢĀ](#)) teaching the [ABHIDHARMA](#) to his mother [MĀYĀ](#) (who had been reborn as a divinity in the [TUSITA](#) heaven). This miracle is said to be performed by all buddhas (and only by a buddha) and always in Śrāvastī.

[Yamāntaka](#). (T. Gshin rje gshed; C. Yanmandejia/Daweide mingwang; J. Enmantokuka/Daiitoku myōō; K. Yōmmandōkka/Taewidōk myōngwang 焰曼德迦/大威德明王). In Sanskrit, “Destroyer of Death” (lit. “he who brings an end (antaka) to death (yama)”), closely associated with [BHAIRAVA](#) (“The Frightening One”) and [VAJRABHAIRAVA](#); one of the most important tantric deities. In Tibetan Buddhism, he was one of the three primary [YI DAM](#) of the [DGE LUGS](#) sect (together with [GUHYASAMĀJA](#) and [CAKRASAMVARA](#)). Yamāntaka is considered to be a fully enlightened buddha, who appears always in a wrathful form. He is

depicted both with and without a consort; the solitary depiction, called “sole hero” (ekavīra), is particularly popular. Bhairava also appears in the Hindu tantric pantheon as a wrathful manifestation of the god Śiva. According to Buddhist mythology, [MAÑJUŚRĪ](#), the bodhisattva of wisdom, took the form of the terrifying bull-headed deity in order to destroy the Lord of Death ([YAMA](#)) who was ravaging the country; hence the epithet Yamāntaka (Destroyer of Death). Yamāntaka has nine heads, thirty-four arms, and sixteen legs, each arm holding a different weapon or frightening object, and each foot trampling a different being. Each of these receives detailed symbolic interpretation in ritual and meditation texts associated with Yamāntaka. Thus, his two horns are said to represent the two truths ([SATYADVAYA](#)) of [MADHYAMA](#) philosophy: ultimate truth ([PARAMĀRTHASATYA](#)) and conventional truth ([SAMVRTISATYA](#)). His nine heads represent the nine categories ([NAVAṄGA\[PĀVACANA\]](#)) of Buddhist scriptures. His thirty-four arms, together with his body, speech, and mind, symbolize the thirty-seven “factors pertaining to awakening” ([BODHIPĀKSIKADHARMA](#)). His sixteen legs symbolize the sixteen emptinesses ([ŚŪNYATĀ](#)). The humans and animals that he tramples with his right foot represent the attainment of the eight accomplishments, viz., supernatural abilities acquired through tantric practice, including the ability to fly, to become invisible, and travel underground. The birds that he tramples with his left foot represent the attainment of the eight powers, another set of magical abilities, including the ability to travel anywhere in an instant and the power to create emanations. His erect phallus represents great bliss, his nakedness means that he is not covered up with obstacles, and his hair standing on end symbolizes his passage beyond all sorrow ([DUHKHA](#)). The Yamāntaka root tantras are the *Sarvatathāgatakāyavāgcittakṛṣṇayamāritantra* (“Body, Speech, and Mind of All Tathāgatas: Black Enemy of Death Tantra”) in eighteen chapters; *Sarvatathāgatakāyavāgcittarakṛṣṇayamāritantra* (“Red Enemy of Death Tantra,” in large part, a different version of the same tantra in nineteen chapters); and the important *Kṛṣṇayamārimukhatantra*, also called the “Three Summaries Tantra” (T. *Rgyud sdom gsum*) because it has no chapters. Also included in the cycle is the *Yamāntakakrodhaviḥayatantra* (“Victorious Wrathful Yamāntaka Tantra”), a [CARYĀTANTRA](#). Based on these three works, in Tibet, the three varieties of Yamāntaka are called the “red, black, and the frightening” (T. dmar nag ’jigs gsum) derived from Raktayamāri (Red Enemy of Death), Kṛṣṇayamāri (Black Enemy of Death), and Vajrabhairava.

yāna. (T. theg pa; C. sheng; J. jō; K. sŭng 乘). In Sanskrit, “vehicle,” “conveyance”; a common Sanskrit term for any means of transportation (in Pāli materials and in many of the [MAINSTREAM BUDDHIST SCHOOLS](#), the term is generally used in this literal sense). In [MAHĀYĀNA](#) literature, the term takes on great significance in the metaphorical sense of a mode of transportation along the path to enlightenment, becoming a constituent of the term Mahāyāna (“Great Vehicle”) itself. In Mahāyāna [SŪTRAS](#) and [ŚĀSTRAS](#), this rhetorical sense of the term is often put to polemical use, with the followers of the Buddha being placed into three or two vehicles. The three vehicles are the [BODHISATTVA YĀNA](#) or Mahāyāna, the [PRATYEKABUDDHAYĀNA](#), and the [ŚRĀVAKAYĀNA](#). The two vehicles are the Mahāyāna and the [HĪNAYĀNA](#) (the “lesser vehicle,” or even more disparagingly, “base vehicle” or “vile vehicle”), which subsumes the pratyekabuddhayāna and the śrāvakayāna. Other uses of the term yāna include the [BUDDHAYĀNA](#) and the [EKAYĀNA](#) (“one vehicle”), whose precise relationship to the bodhisattvayāna and the Mahāyāna is discussed in the scholastic literature. Among the Mahāyāna sūtras, the most celebrated expression of the rhetoric of the yānas occurs in the [SADDHARMAPUNĀRĪKASŪTRA](#) (“Lotus Sūtra”) where, in the parable of the burning house, a father promises to reward his children with three different carriages (yāna) when in fact there is only a single magnificent carriage. With the rise of tantric Buddhism, the Mahāyāna itself is divided into two, the [PĀRAMITĀYĀNA](#) or “perfection vehicle,” referring to the path to buddhahood involving successive mastery of the perfections ([PĀRAMITĀ](#)) as set forth in the sūtras, and the [MANTRAYĀNA](#) or “mantra vehicle,” referring to the path to buddhahood as set forth in the [TANTRAS](#) (although some scholars have argued that the proper term here is not yāna, but naya, meaning “mode” or “principle”). The tantric teachings are also variously referred to as the [GUHYAMANTRAYĀNA](#) (“secret mantra vehicle”), the [PHALAYĀNA](#) (“fruition vehicle”), and, most famously, as the [VAJRAYĀNA](#) (“diamond vehicle” or “thunderbolt vehicle”).

yang ’dul gtsug lag khang. (yangdul tsuklakang). In Tibetan, the four “extra-taming temples” or “extra-pinning temples” of [BU CHU](#), [MKHO MTHING](#), [DGE GYES](#), and [PRA DUM RTSE](#) said to have been constructed during the time of the Tibetan king [SRONG BTSAN SGAM PO](#) to pin down the limbs of the demoness (T. srin mo) who was impeding the introduction of Buddhism into Tibet. The [LHA SA](#) temple (gtsug lag khang) pins down her heart and the four extra taming temples pin down her right and left elbows and right and left knees.

[Yang le shod](#). (Yangleshō). An important pilgrimage site south of the Kathmandu Valley in Nepal, sacred to Tibetan and Newar Buddhists as well as to Hindus, although the source and meaning of the name are unclear. According to traditional Buddhist accounts, [PADMASAMBHAVA](#) practiced meditation in a cave here, subdued [NĀGA](#) demons through the practice of [VAJRAKĪLAYA](#), and attained realization of [MAHĀMUDRĀ](#). Hindus relate the site to the avatāra of Viṣṇu called Śeṣa Nārāyaṇa.

[Yangqi Fanghui](#). (J. Yōgi Hōe; K. Yanggi Panghoe 楊岐方會) (992–1049). Chinese [CHAN](#) master and patriarch of the [YANGQI PAI](#) collateral line of the [LINJI ZONG](#); one of the two major Linji sublineages, along with the [HUANGLONG PAI](#). Yangqi was a native of Yuanzhou prefecture in present-day Jiangxi province. After studying under various teachers, he visited the Chan master Shishuang Chuyuan (986–1039), himself a successor of Fenyang Shanzhao (947–1024), and became one of Shishuang’s leading disciples. Yangqi was later invited to serve as abbot of the monastery Putong Chanyuan on Mt. Yangqi in his hometown of Yuanzhou, whence he acquired his toponym. In 1046, he moved his residence to the monastery of Haihuisi on Mt. Yung’ai. Among his many talented disciples, the most famous is [BAIYUN SHOUDUAN](#) (1025–1072). His teachings are recorded in the *Yangqi Fanghui chanshi yulu*, *Yangqi Fanghui chanshi houlu*, and *Yangqi Hui chanshi yuyao*. See also [WU JIA QI ZONG](#).

[Yangqi pai](#). (J. Yōgiha; K. Yanggi p’a 楊岐派). One of the two major branches of the [LINJI ZONG](#) of the [CHAN](#) school, which is listed among the five houses and seven schools ([WU JIA QI ZONG](#)) of the mature Chinese Chan tradition. The school is named after its founder, [YANGQI FANGHUI](#) (995–1049), who taught at Mt. Yangqi in what is now Yuanzhou province. Yangqi was a disciple of Shishuang Chuyuan (986–1039), a sixth-generation successor in the Linji school, who also taught [HUANGLONG HUINAN](#) (1002–1069), the founder of the [HUANGLONG PAI](#) sublineage of the Linji school. The Yangqi lineage flourished under its third-generation successors, Fojian Huiqin (1059–1117), Foyan Qingyuan (1067–1120), and [YUANWU KEQIN](#) (1063–1135), who promoted it among the literati, and it became one of the dominant schools of Song-dynasty Buddhism thanks to the decisive role played by Yuanwu’s disciple [DAHUI ZONGGAO](#) (1089–1163). It was especially within this lineage that the meditative technique of the Chan of investigating the meditative topic or questioning meditation ([KANHUA CHAN](#)) flourished. The Yangqi masters took a different approach to [GONG’AN](#) (public

case) training, criticizing “lettered Chan” ([WENZI CHAN](#)), a style of Chan developed by Yunmen and Huanglong masters, which gained popularity among the literati officials in the Northern Song period with its polished language and elegant verse explanations of the meaning of the gong’an. Dahui in particular presented the gong’an as a meditative tool for realizing one’s innate enlightenment, not to demonstrate one’s talent in clever repartee or one’s literary prowess; at the same time, he critiqued the approaches of rival Chan schools, criticizing such Huanglong masters as [JUEFAN HUIHONG](#) (1071–1128) for clinging to intellectual and literary endeavors and such [CAODONG ZONG](#) masters as [HONGZHI ZHENGJUE](#) (1091–1157) for clinging to tranquillity and simply waiting for one’s innate enlightenment to manifest itself. The school also produced many gong’an collections, including the [BIYANLU](#) (“Blue Cliff Record”), compiled by Yuanwu Keqin, and the [WUMEN GUAN](#) (“Gateless Checkpoint”), compiled by the seventh-generation successor [WUMEN HUIKAI](#) (1183–1260). The Yangqi lineage was formally introduced to Korea by [T’AEGO POU](#) (1301–1382), who studied with the eleventh-generation Yangqi teacher Shiwu Qinggong (1272–1352); some modern Korean monks and scholars argue that the contemporary Korean Sōn tradition should be traced back to T’aego and his Yangqi lineage, rather than to [POJO CHINUL](#) (1158–1210). The Yangqi school reached Japan in the thirteenth century through pilgrim monks, including Shunjō (1166–1227), who studied with the Yangqi teacher Meng’an Yuancong (1126–1209), and [NANPO JŌMYŌ](#) (1235–1309), better known by his imperially bestowed title Entsū Daiō Kokushi (“state preceptor,” see [GUOSHI](#)), who studied with the ninth-generation teacher [XUTANG ZHIYU](#) (1185–1269). All Linji lineages in contemporary Japan are affiliated with the Yangqi pai.

[Yangshan Huiji](#). (J. Gyōzan/Kyōzan Ejaku; K. Angsan Hyejōk 仰山慧寂) (807–883). Chinese [CHAN](#) master and patriarch of the [GUIYANG ZONG](#) [alt. Weiyang zong]. Yangshan was a native of Shaozhou prefecture in present-day Guangdong province. According to his biography, Yangshan’s first attempt to enter the monastery at age fifteen failed because his parents refused to give their required permission. Two years later he cut off two of his fingers as a sign of his resolve to become a monk and became a [ŚRĀMANERA](#) under the guidance of Chan master Tong (d.u.) of Nanhuasi. After he received his monastic precepts, Yangshan studied the [VINAYAPITAKA](#). Yangshan is said to have received the teachings of the circle diagrams from Danyuan Yingzhen (d.u.), and he later became a disciple of Chan master [GUISHAN LINGYOU](#) after serving him for fifteen years. He later

moved to Mt. Yang in Yuanzhou prefecture (present-day Jiangxi province), whence he acquired his toponym, and established a name for himself as a Chan master. Yangshan later moved to Mt. Dongping in his hometown of Shaozhou, where he passed away in the year 883 (alternative dates for his death are 916 and 891). He was posthumously honored with the title Dengxu dashi (Great Master Clear Vacuity) and a purple robe. He was also named Great Master Zhitong (Penetration of Wisdom). His teachings are recorded in the *Yuanzhou Yangshan Huiji chanshi yulu*. The names of the mountains on which Yangshan and his teacher Guishan resided were used in compound to designate their lineage, the Guiyang.

[Yangs pa can](#). (Yangpachen). The monastic residence of the [ZHWA DMAR](#) incarnations in Tibet, founded under the direction of the fourth Zhwa dmar Chos kyi grags pa (Chökyi Drakpa, 1453–1524) and located near [MTSHUR PHU](#) monastery west of [LHA SA](#); it was also known as Thub bstan Yangs pa can (Tupten Yangpachen). After the tenth Zhwa dmar was found guilty of treason, the monastery was converted to [DGE LUGS](#) and renamed Kun bde gling.

[Yang Wenhui](#). (J. Yō Bunkai; K. Yang Munhoe 楊文會) (1837–1911). Chinese Buddhist layman at the end of the Qing dynasty, renowned for his efforts to revitalize modern Chinese Buddhism. A native of Anhui province, Yang fled from the Taiping Rebellion to Hangzhou prefecture. In 1862, he serendipitously acquired a copy of the [DASHENG QIXIN LUN](#) (“Awakening of Faith According to the Mahāyāna”) and became interested in Buddhism. In 1878, he traveled to England, where he served at the Chinese Embassy in London, befriending the Japanese Buddhist scholar [NANJŌ BUN'YŪ](#) (1849–1927), who helped him to acquire Chinese Buddhist texts that had been preserved in Japan. After his return to China, Yang established a publishing press called the Jingling Kejing Chu and published more than three thousand Buddhist scriptures. In 1893, [ANAGĀRIKA DHARMAPĀLA](#) visited Yang in Shanghai. In 1894, Yang and the British missionary Timothy Richard translated the [DASHENG QIXIN LUN](#) into English. In 1907, the Jingling Kejing Chu began to publish primers of Buddhism in various languages. In 1910, Yang also founded the Fojiao Yanjiu Hui (Buddhist Research Society), where he regularly lectured until his death in 1911.

[Yanshou](#). (C) (延壽). See [YONGMING YANSHOU](#).

[yantra](#). (T. 'khrul 'khor; C. tuxiang; J. zuzō; K. tosang 圖像). In Sanskrit,

“diagram” or “instrument.” Although the term can have many meanings in Sanskrit, within the Buddhist tradition it is most commonly used to refer to a picture made of images and/or geometric shapes, usually triangles, which are repeated in such a way that they form a pattern. Such magical diagrams are used in tantric rituals and meditations to depict in visual form the power of the invoked deities, representing the universe, or certain spiritual or cosmological powers in the universe. A yantra is commonly understood as rendering through lines and colors the sacred sound of a [MANTRA](#). Yantras are used for such purposes as gaining magical protection, worshipping tantric deities, or facilitating meditation. The term is in some cases interchangeable with a [MANDALA](#), although there are some differences: a yantra is typically small in size while a maṇḍala is variously sized and may even be large enough for a practitioner to enter during the rituals; a yantra, except for those under temple statues, is often portable, while a maṇḍala is not; and deity figures rarely appear on a yantra, while they are common on a maṇḍala. A yantra can be two-or three-dimensional and may range from such simple geometric designs as dots or triangles to more elaborate temple structures. Some texts suggest that merely seeing a maṇḍala or drawing or imagining a yantra also brings benefits. Yantra tattooing (Thai, yak sant) is a common practice in Southeast Asia among both monks and laity. It is generally performed by specialist monks using traditional needles.

[yaoshi](#). (J. yakuseki; K. yaksŏk 藥石). In Chinese, lit. “herbal medicine (yao) and stone probes” (shi); “medicine stone,” the Chinese Buddhist euphemism for “supper.” The [VINAYA](#) restricts monks and nuns from eating after noon; anytime afterwards is an “improper time.” There are waivers allowed for certain types of “medicine,” however, which may legally be consumed. To circumvent this prohibition against eating after noon, the Chinese referred to food consumed after noon as “medicine,” and an evening meal therefore euphemistically came to be referred to as a “medicine stone.”

[Yaśas](#). (P. Yasa; T. Grags pa; C. Yeshe; J. Yasha; K. Yasa 耶舍). An early [ARHAT](#) disciple of the Buddha. The son of a wealthy merchant of Vārāṇasī, Yaśas was brought up in luxury. He had three mansions, one for the winter, one for the rainy season, and one for the summer, and was attended by a troupe of female musicians. Once, he happened to awake in the middle of the night and witnessed his attendants sleeping in an indecorous manner. Greatly disturbed, he put on a

pair of golden sandals and wandered in the direction of the Deer Park ([MRGADĀVA](#)) where the Buddha was dwelling, exclaiming, “Alas, what distress, what danger.” The Buddha saw him approach and, knowing what he was experiencing, called out to him, “Yaśas, come. Here there is neither distress nor danger.” Yaśas approached the Buddha, took off his golden sandals, and sat down beside him. The Buddha preached a graduated discourse ([ANUPUBBIKATHĀ](#)) to him, at the conclusion of which Yaśas became a stream-enterer ([SROTAAPANNA](#)). He thus became the Buddha’s sixth disciple and the first who had not known him prior to his achievement of enlightenment (as had his first five disciples, the bhadravargīya or [PAÑCAVARGIKA](#)). Yaśas was also the first person to become an enlightened lay disciple ([UPĀSAKA](#)), although he ordained a few minutes later. Later, Yaśas’s father, who had come searching for his son, arrived at the Buddha’s residence. The Buddha used his magical powers to make Yaśas invisible and, inviting his father to sit, preached a discourse to him. Yaśas’s father also became a stream-enterer, while Yaśas, who overheard the sermon from his invisible state, became an arhat. When the Buddha made Yaśas visible to his father, he informed him that, since his son was now an arhat, it would be impossible for him to return home to a householder’s life and he would have to become a monk. Yaśas thus became the sixth member of the Buddha’s monastic order. Yaśas accompanied the Buddha to his father’s house the next day to receive the morning meal. After the meal, the Buddha preached a sermon. Yaśas’s mother, [SUJĀTĀ](#), and other members of the household became stream-enterers, his mother thus becoming the first female disciple ([UPĀSIKĀ](#)) of the Buddha and the first woman to become a stream-enterer. At that time, fifty-four of Yaśas’s friends also were converted and entered the order of monks, swelling its ranks to sixty members. It was at this time that the Buddha directed his disciples to go forth separately and preach the dharma they had realized for the welfare and benefit of the world. ¶ There was a later monk, also named Yaśas, whose protest led to the second Buddhist council ([COUNCIL, SECOND](#)), held at [VAIŚĀLĪ](#). Some one hundred years after the Buddha’s death, Yaśas was traveling in Vaiśālī when he observed the monks there receiving gold and silver as alms directly from the laity, in violation of the [VINAYA](#) prohibition against monks touching gold and silver. He also found that the monks had identified ten points in the vinaya that were identified as violations but that they felt were sufficiently minor to be ignored. The ten violations in question were: (1) carrying salt in an animal horn; (2) eating when the shadow of the sundial was two fingerbreadths past noon; (3) after eating, traveling to another village to eat another meal on the

same day; (4) holding several assemblies within the same boundary ([SĪMĀ](#)) during the same fortnight; (5) making a monastic decision with an incomplete assembly and subsequently receiving the approval of the absent monks; (6) citing precedent as a justification to violate monastic procedures; (7) drinking milk whey after mealtime; (8) drinking unfermented wine; (9) using mats with a fringe; and (10) accepting gold and silver. Yaśas told the monks that these were indeed violations, at which point the monks are said to have offered him a share of the gold and silver they had collected. When he refused the bribe, they expelled him from the order. Yaśas sought the support of several respected monks in the west, including Sambhūta, [ŚĀNAKAVĀSIN](#), and [REVATA](#). Together with other monks, they went to Vaiśālī, where they convened a council ([SAMGĪTI](#)) at which Revata submitted questions about each of the disputed points to Sarvagāmin, the eldest monk of the day, who is said to have been a disciple of [ĀNANDA](#). In each case, he said that the practice in question was a violation of the vinaya. Seven hundred monks then gathered to recite the vinaya. Those who did not accept the decision of the council held their own convocation, which they called the [MAHĀSĀMGHIKA](#) or “Great Assembly,” the rival group coming to be called the [STHAVIRANIKĀYA](#), or “School of the Elders.” This event is sometimes referred to as “the great schism,” since it marks the first permanent schism in the order ([SAMGHABHEDA](#)).

[Yasenkanna](#). [alt. Yasenkanwa] (夜船閑話). In Japanese, “Idle Talk on a Night Boat”; a short meditative text composed by the [ZEN](#) master [HAKUIN EKAKU](#) in the [RINZAISHŪ](#), and his most popular piece. The *Yasenkanna* was first published in 1757 and has remained in print ever since. The title seems to be an allusion to the popular saying, “night boat on the Shirakawa River” (Shirakawa yasen), which refers to the story of a man from the countryside and the lies he tells about his trip to Kyōto. Hakuin wrote the *Yasenkanna* to offer beginners of meditation an expedient technique for overcoming “Zen illness” (zenbyō) and fatigue. The *Yasenkanna* details Hakuin’s own bout with this illness and his miraculous recovery with the help of a secret technique known as inner discernment or visualization (naikan), which he purports to have learned from the obscure hermit Hakuyū. Different versions of this story also appear in Hakuin’s other writings, such as the *Kanzanshi sendai kimon*, *Orategama*, and *Isumadegusa*.

[Yaśodharā](#). (P. Yasodharā; T. Grags ’dzin ma; C. Yeshutuoluo; J. Yashudara; K. Yasudara 耶輸陀羅). The Sanskrit proper name of wife of the prince and

[BODHISATTVA](#), [SIDDHĀRTHA GAUTAMA](#), and mother of his son, [RĀHULA](#) (she is often known in Pāli sources as Rāhulamātā, Rāhula's Mother); she eventually became an [ARHAT](#), who was declared by the Buddha to be foremost among nuns possessing the six superknowledges ([ABHIJÑĀ](#); P. abhiññā). According to Pāli accounts, she was born on the same day as Prince Gautama and had skin the color of gold, hence another of her epithets, Bhaddā Kaccānā. She is also referred to in Pāli commentaries as Bimbā. Yaśodharā married the prince when she was sixteen, after he had proved his superior skill in archery and other manly arts. She was chief consort in a harem of forty thousand women. On the day her son, Rāhula, was born, the prince renounced the world and abandoned his wife, child, and palace to become a mendicant. According to another version of the story, Rāhula was conceived on the night of the prince's departure and was not born until the night of the prince's enlightenment, six years later. Yaśodharā was so heartbroken at her husband's departure that she took up his ascetic lifestyle, eating only one meal per day and wearing the yellow robes of a mendicant. When the Buddha returned to his former palace in [KAPILAVASTU](#) after his enlightenment, Yaśodharā was allowed the honor of worshipping him in the manner she saw fit. After seven days, as the Buddha was about to depart, Yaśodharā instructed her son Rāhula to ask for his inheritance. In response, the Buddha instructed [ŚĀRIPUTRA](#) to ordain his son. As Rāhula was the first child to be admitted to the order, he became the first Buddhist novice ([ŚRĀMANERA](#)). Yaśodharā and Rāhula's grandfather [ŚUDDHODANA](#) were greatly saddened at losing the child and heir to the order; hence, at Śuddhodana's request, the Buddha passed a rule that, thenceforth, no child should be ordained without the consent of its parents. When later the Buddha allowed women to enter the order, Yaśodharā became a nun ([BHIKSUNĪ](#)) under [MAHĀPRAJĀPATĪ](#), who was chief of the nuns' order and the Buddha's stepmother. Yaśodharā cultivated insight and became an arhat with extraordinary supranormal powers. She could recall her past lives stretching back an immeasurable age and one hundred thousand eons without effort. The [JĀTAKA](#) records numerous occasions when Yaśodharā had been the wife of the bodhisattva in earlier existences. Also mentioned as the wife of the Buddha is Gopā, although it is unclear whether this refers to another wife or is another name for Yaśodharā.

[Yaśomitra](#). (T. Grags pa bshes gnyen) (fl. c. late sixth century). Indian [ĀBHIDHARMIKA](#) scholastic, probably affiliated with the [SAUTRĀNTIKA](#) school, and author of the [SPHUTĀRTHĀ-ĀBHIDHARMAKOŚAVYĀKHYĀ](#), an important

commentary on [VASUBANDHU](#)'s [ABHIDHARMAKOŚABHĀSYA](#). His commentary is noted for its detail and clarity, and for its attempt to identify the adherents of the various doctrinal positions mentioned by Vasubandhu. The text is preserved in both Sanskrit and Tibetan. Yaśomitra's text was among the first [ABHIDHARMA](#) works to be studied in Europe; it was one of the Sanskrit manuscripts sent by [BRIAN HOUGHTON HODGSON](#) from Kathmandu to Paris, where it was read by [EUGÈNE BURNOUF](#), who discusses it in his *Introduction à l'histoire du Bouddhisme indien* (1844).

[Yasutani Hakuun](#). (安谷白雲) (1885–1973). Japanese [ZEN](#) teacher in the [SŌTOSHŪ](#), who was influential in the West. Born in Japan, Yasutani attended public school until he entered a Sōtō Zen seminary at the age of thirteen. Yasutani was trained as a teacher and taught elementary school. He was married at the age of thirty and raised five children before turning to a life dedicated to the work of a Sōtō priest. He met Sogaku Harada in 1924 while lecturing in Tōkyō. Yasutani began intensive study with Harada roshi and dedicated his life to teaching the dharma to laypeople. Yasutani organized a group called the Sanbō Kyodan (Fellowship of the Three Jewels), which became independent of the Sōtō school in 1954. Yasutani was the teacher of [PHILIP KAPLEAU](#), who studied with him for eight years, and maintained a close relationship with him until 1967. Kapleau's *The Three Pillars of Zen* was based heavily on Yasutani's teachings. Yasutani traveled to the United States for the first time at the age of seventy-seven, three years after [SHUNRYŪ SUZUKI](#) arrived. For seven years, Yasutani taught Zen to many laypeople in the USA and, although he had prepared to live somewhat permanently in the country, a tuberculosis test prevented him from receiving a permanent visa. In his later years, Yasutani continued to travel in the United States as well as in India. He preferred to teach Zen in a nonmonastic environment. He died in Kamakura in 1973.

[Yatana Htut-hkaung zedi](#). The Yatana Htut-hkaung Pagoda (Burmese, [JEDI](#); P. cetī; S. [CAITYA](#)) is located on Min-wun Hill in the northern part of the Sagaing Hills in Upper Burma (Myanmar). It was built in 1315 CE by Princess Soe Mingyi, the daughter of Sagaing's founder, King Athinkaya Saw-yun. Over the course of time, the neighboring village, along with its monastery and line of [SAYADAWs](#) (abbots), came to be known as Htut-hkaung. One such abbot was Htut-hkaung Sayadaw, who flourished in the nineteenth century, was greatly respected by King [MINDON](#) (r. 1853–1878) for his learning and piety. The king

built for the sayadaw a famous monastery named Mahādhammika Kyaung where he taught scripture and meditation to many hundreds of monks and nuns. This sayadaw was a prolific writer, and his catechisms are famous in Burmese literature. He received many titles from the King Mindon and was believed by some to have been an arahant (S. [ARHAT](#)).

[yathābhūtajñānadarśana](#). (P. yathābhūtañānadassana; C. rushi zhijian; J. nyojitsu chiken; K. yōsil chigyōn 如實知見). In Sanskrit, “knowledge and vision that accord with reality”; a crucial insight leading to deliverance (VIMUKTI), which results in dispassion toward the things of this world because of seeing things as they actually are: i.e., as impermanence ([ANITYA](#)), suffering ([DUHKHA](#)), and nonself ([ANĀTMAN](#)). “Knowledge and vision (jñānadarśana)” is usually interpreted to suggest the direct insight into things “as they are” (yathābhūta), meaning these three marks of existence ([TRILAKSANA](#)), or sometimes the [FOUR NOBLE TRUTHS](#). Yathābhūtajñānadarśana is presumed to be closely related to wisdom ([PRAJÑĀ](#)), but with one significant difference: yathābhūtajñānadarśana is the first true insight, but it is intermittent and weak, while prajñā is continuous and strong. Seeing things as they are, however, is intense enough that the insight so gleaned is sufficient to transform an ordinary person ([PRTHAGJANA](#)) into an [ARYA](#). ¶ In the *Upanisāsutta* of the [SAMYUTTANIKĀYA](#), the standard twelfefold chain of dependent origination ([PRATĪYASAMUTPĀDA](#)) is connected to an alternate chain that is designated the “supramundane dependent origination” (P. lokuttara-paṭiccasamuppāda; S. lokottara-pratīyasamutpāda), which outlines the process leading to liberation and prominently includes the knowledge and vision that accord with reality. Here, the last factor in the standard chain, that of old age and death ([JARĀMARANA](#)), is substituted with suffering (P. dukkha; S. [DUHKHA](#)), which in turn becomes the first factor in this alternate series. According to the *Nettipakaraṇa*, a Pāli exegetical treatise, this chain of supramundane dependent origination consists of: (1) suffering (P. dukkha; S. duḥkha), (2) faith (P. saddhā; S. [ŚRADDHĀ](#)), (3) delight or satisfaction (P. pāmojja; S. prāmodya), (4) rapture or joy (P. pīti; S. [PRĪTI](#)), (5) tranquility or repose (P. passaddhi; S. [PRAŚRABDHI](#)), (6) mental ease or bliss ([SUKHA](#)), (7) concentration ([SAMĀDHI](#)), (8) knowledge and vision that accord with reality (P. yathābhūtañānadassana; S. yathābhūtajñānadarśana), (9) disgust (P. nibbidā; S. [NIRVEDA](#)), (10) dispassion (P. virāga; S. [VAIRĀGYA](#)), (11) liberation (P. vimutti; S. VIMUKTI), and (12) knowledge of the destruction of the contaminants (P. āsavakkhayañāṇa; S. āsravakṣayañāṇa; see [ĀSRAVAKSAYA](#)). The *Kimatthiyasutta* of the

[AṄGUTTARANIKĀYA](#) gives a slightly different version of the first links, replacing suffering and faith with (1) observance of precepts (P. kusalasīla; S. kuśalaśīla) and (2) freedom from remorse (P. avippaṭisāra; S. avipraṭisāra). In both formulations, yathābhūtajñānadarśana arises as a result of the preceding factor of meditative concentration (samādhi); it is regarded as the specific awareness ([JÑĀNA](#)) of the nature of reality, which is seen ([DARŚANA](#)) vividly and directly. In this context, yathābhūtajñānadarśana is essentially synonymous with insight ([VIPĀŚYANA](#)). As this chain of transcendental dependent origination is sometimes interpreted, the stage of faith (P. saddhā; S. śraddhā) is made manifest through generosity ([DĀNA](#)) and observing precepts ([ŚĪLA](#)), which frees the mind from feelings of remorse and guilt (avipraṭisāra). The stage of delight or satisfaction (prāmodya) refers to a satisfied or relaxed state of mind, which is freed from any mental disturbances that might prevent concentration. The stages of rapture (prīti), bliss (sukha), and concentration (samādhi) are factors associated with the four levels of meditative absorption ([DHYĀNA](#)). The knowledge and vision that accord with reality arise in dependence on the preceding samādhi; it is able to destroy the afflictions ([KLEŚA](#)), rather than simply suppress them, as occurs in the state of concentration, and thus leads to liberation from [SAMSĀRA](#). The fact that samādhi provides a basis for seeing things “as they are,” which generates an insight that can bring about liberation, demonstrates the explicitly soteriological dimensions of concentration in a Buddhist meditative context. ¶ In Pāli sources, such as the [VISUDDHIMAGGA](#), yathābhūtajñānadarśana is the fifteenth of eighteen principal types of superior insight (P. mahāvīpassanā), which liberate the mind from delusions regarding the world and the self. The eighteen insights are contemplations of: (1) impermanence (aniccānupassanā); (2) suffering (dukkhānupassanā); (3) nonself (anattānupassanā); (4) aversion (nibbidānupassanā); (5) dispassion (virāgānupassanā); (6) extinction (nirodhānupassanā); (7) abandoning (paṭinissaggānupassanā); (8) waning (khayānupassanā); (9) disappearing (vayānupassanā); (10) change (vipariṇāmānupassanā); (11) signlessness (animittānupassanā); (12) wishlessness (appaṇihitānupassanā); (13) emptiness (suññatānupassanā); (14) advanced understanding into phenomena (adhipaññādhammavīpassanā); (15) knowledge and vision that accord with reality (yathābhūtañāṇadassana); (16) contemplation of danger (ādīnavānupassanā); (17) contemplation involving reflection (paṭisaṅkhānupassanā); and (18) contemplation of turning away (vivattaṅānupassanā). The counterparts which are overcome through these eighteen insights are: (1) the idea of permanence, (2) the idea of pleasure, (3) the

idea of self, (4) delighting, (5) greed, (6) origination, (7) grasping, (8) the idea of compactness, (9) the accumulation of action (kamma), (10) the idea of lastingness, (11) signs, (12) desire, (13) misinterpretation, (14) misinterpretation due to grasping, (15) misinterpretation due to confusion, (16) misinterpretation due to reliance, (17) nonreflection or thoughtlessness, (18) misinterpretation due to entanglement.

[yathābhūtaparijñāna](#). (T. ji lta ba mkhyen pa'i ye shes). An alternate term for **[YATHĀVADBHĀVIKAJÑĀNA](#)** (knowledge of the mode).

[yathāvadbhāvikajñāna](#). (T. ji lta ba mkhyen pa'i ye shes; C. ruli zhi; J. nyorichi; K. yōri chi 如理智). In Sanskrit, lit. “knowledge of the mode”; a buddha’s knowledge of the single mode of being of the universe. This type of knowledge is typically mentioned in conjunction with the “knowledge of the multiplicities” (**[YĀVADBHĀVIKAJÑĀNA](#)**), a buddha’s knowledge of each of the phenomena of the universe in its specificity. Only a buddha possesses these two knowledges and possesses them simultaneously; thus, only he is able to perceive all of the various phenomena of the universe as well as their ultimate nature. This joint awareness is referred to as the simultaneous knowledge of the two truths (**[SATYADVAYA](#)**).

[yāvadbhāvikajñāna](#). (T. ji snyed pa mkhyen pa'i ye shes; C. ruliang zhi; J. nyoryōchi; K. yōryang chi 如量智). In Sanskrit, lit., “knowledge of the multiplicities” or “knowledge of the varieties”; a buddha’s knowledge of each of the phenomena of the universe in its specificity. This type of knowledge is typically mentioned in conjunction with a buddha’s “knowledge of the mode” (**[YATHĀVADBHĀVIKAJÑĀNA](#)**), which understands the single mode of being of the universe. Only a buddha possesses these two knowledges and possesses them simultaneously; thus, only he is able to perceive all of the various phenomena of the universe as well as their ultimate nature. This joint awareness is referred to as the simultaneous knowledge of the two truths (**[SATYADVAYA](#)**).

[yavana](#). (T. yol ba; C. biandi; J. henji; K. pyōnji 邊地). In Sanskrit (from Greek Ionian), “peripheral” or “outlying regions”; referring to the regions beyond the civilizing influences of Buddhism and higher spiritual culture. The term was used to designate Greeks (Ionians) and later even Arab Muslims. In Buddhist cosmology, the term was used to designate regions north and west of India proper, which are inhabited by illiterate, barbaric peoples hostile to Buddhism.

The birth into a “peripheral region” is considered to be one of the “insuperable difficulties” (see [AKSANA](#)) to the attainment of enlightenment in the present lifetime. See also [BIANDI](#).

[Yazawin-kyaw](#). In Burmese, “Celebrated Chronicle”; the traditional title given to the [MAHĀSAMMATAVAMSA](#), the oldest extant yazawin, or Burmese (Myanmar) royal chronicle. It was completed in two installments by the monk MAHĀSĪLAVAMSA of [AVA](#), the first completed in 1502, the second in 1520. The chronicle is written in mixed Burmese and Pāli and contains the earliest surviving examples of the Burmese nissaya (Pāli to Burmese word-by-word translation) style of writing. The text follows roughly the outline of the [MAHĀVAMSA](#) and devotes most of its coverage to the history of Buddhist dynasties in India and Sri Lanka. Only the last seventh of the work concerns the history of Burma from the time of the Buddha through the [PAGAN](#) (Bagan) and Ava periods. The text contains the assertion that the Buddhism of Burma was established by the elder Mahāpuṇṇa during the lifetime of the Buddha and hence is older and longer-lived than that of Sri Lanka. The Yazawin-kyaw concludes with an account of the meritorious deeds of Shwe-nan-kyaw-shin (r. 1502–1527), the king of Ava at the time the work was composed.

[ye dharmā](#). In Sanskrit, lit. “those phenomena...”; the opening words of perhaps the most famous synopsis of the teachings of Buddhism; the full declaration in Sanskrit is “ye dharmā hetuprabhavā hetuṃ teṣāṃ tathāgato hy avadat teṣāṃ ca yo nirodha, evaṃ vādī mahāśramaṇaḥ”: “Of those phenomena produced through causes, the [TATHĀGATA](#) has proclaimed their causes ([HETU](#)) and also their cessation ([NIRODHA](#)). Thus has spoken the great renunciant ([ŚRAMANA](#)).” This statement plays a central role in the story of [ŚĀRIPUTRA](#)’s conversion. Śāriputra, who was a disciple of the agnostic teacher [SAÑJAYA VAIRĀTĪPUTRA](#), encountered one of the Buddha’s five original disciples ([PAÑCAVARGIKA](#)), [AŚVAJIT](#). Noticing Aśvajit’s serene countenance, Śāriputra asked him who his teacher might be, to which Aśvajit replied that his teacher was the Buddha. When Śāriputra asked what it was that the Buddha taught, Aśvajit demurred, explaining that he had only recently renounced the life of a householder and was unable to present the teaching in full. Śāriputra asked Aśvajit to give him the gist of the Buddha’s teaching. Aśvajit replied with this famous ye dharmā line. Immediately upon hearing these words, Śāriputra is said to have gained the rank of stream-enterer ([SROTAĀPANNA](#)), the first stage of sanctity ([ĀRYAMĀRGA](#)). He then asked the

whereabouts of the Buddha and was ordained, going on to become the disciple most renowned for his wisdom. Aśvajit's précis points to the central importance of causality in the Buddha's teachings and provides a kind of summary of the [FOUR NOBLE TRUTHS](#). The Buddha has identified the causes (such as [KARMA](#) and [KLEŚA](#)) of those things that have causes (such as suffering, S. [DUHKHA](#)), and he has also identified their cessation in the experience of [NIRVĀNA](#). What may therefore have begun as a simple statement to mollify an eager questioner eventually became a slogan and ultimately a [MANTRA](#), the very recitation of which was said to produce apotropaic powers. Like a mantra, the words of the ye dharmā slogan were often transcribed phonetically, rather than translated, into various languages across Asia. These words were also often written on strips of paper and enshrined in [STŪPAS](#); they thus became a dharmaverse relic ([ŚARĪRA](#)), serving as a substitute for a bodily relic of the Buddha.

[Yellow Hats](#). (C. huangmao 黄帽). A popular designation in both European languages and Chinese for the [DGE LUGS](#) sect of Tibetan Buddhism, whose monks do indeed wear yellow hats. Although the term zhwa gser, or “yellow hat,” does occur occasionally in Tibetan as a term of self-appellation for the Dge lugs, the Western and Chinese division of major Tibetan sects into Yellow Hats, [RED HATS](#), and [BLACK HATS](#) has no corollary in Tibetan Buddhism and should be avoided.

[Yel pa bka' brgyud](#). (Yelpa Kagyü). One of the four major and eight minor subsects of the [BKA' BRGYUD](#) sect of Tibetan Buddhism ([BKA' BRGYUD CHE BZHI CHUNG BRGYAD](#)), originating with Ye shes brtsegs pa (b. 1134), a student of Bka' brgyud hierarch [PHAG MO GRU PA RDO RJE RGYAL PO](#). After a period of decline, it was revived by [CHOS KYI 'BYUNG GNAS](#) but was latter absorbed into [KARMA BKA' BRGYUD](#).

[ye shes](#). (yeshe). In Tibetan, lit. “primordial knowledge,” with ye meaning “original” or “primordial.” The term renders the Sanskrit [JÑĀNA](#); in the [RNYING MA](#) sect of Tibetan Buddhism, it refers to the originally pure mind. See [RIG PA](#); [JÑĀNA](#).

[Ye shes mtsho rgyal](#). (Yeshe Tsogyal) (c. 757–817). A renowned female Tibetan Buddhist master, generally regarded as a wisdom [DĀKINĪ](#) and venerated especially as consort and disciple of the Indian adept [PADMASAMBHAVA](#). Ye shes mtsho rgyal was born into an aristocratic family in central Tibet, south of [LHA](#)

[SA](#). According to traditional biographical accounts, a nearby lake miraculously swelled at the time of her birth and she was thus given the name “victor of the lake” (mtsho rgyal). This lake, near the cave complex of [SGRAG YANG RDZONG](#), is believed to still hold Ye shes mtsho rgyal’s life essence (bla). Her remarkable beauty even at a young age drew numerous suitors, but rather than submit to a marriage arranged by her father, she fled in order to undertake religious practice. She spent a brief period of time in the court of the Tibetan ruler [KHRI SRONG LDE BTSAN](#) (perhaps as one of his wives), after which she met Padmasambhava and was accepted as one of his chief disciples. In addition to receiving and practicing numerous tantric instructions, Ye shes mtsho rgyal helped to conceal many of Padmasambhava’s treasure teachings ([GTER MA](#)), many of which are said to be her transcriptions of Padmasambhava’s teachings. She is regarded as the first Tibetan to achieve buddhahood in a single lifetime. As a wisdom ḍākinī, she is also known as Bde chen rgyal mo (“Great Bliss Queen”).

[Ye shes ’od](#). (Yeshe Ö) (947–1024). A Tibetan king of the western region of [GU GE](#) credited with inspiring a revival of Buddhism that initiated the latter dissemination ([PHYI DAR](#)) of Buddhism in Tibet. He decried the state of Tibetan Buddhist practice, especially the practice of [TANTRA](#), in a famous ordinance (bka’ shog), complaining that people were engaging in murder and illicit sex under the guise of the tantric practices of “liberation” (grol) and “union” (sbyor). According to a famous story, Ye shes ’od was captured by a Gar log Turk chieftain while seeking to raise the capital necessary to invite [ATIŚA DĪPAMKARĀŚRĪJÑĀNA](#) to Tibet. He then sacrificed his own life by commanding his grandnephew [BYANG CHUB ’OD](#) to use whatever gold had been accumulated not as a ransom for his own release, but rather as an offering to the Indian scholar. Atiśa was so moved by the king’s act of selflessness that, despite his previous declinations, he agreed to make the journey north. Traditional accounts also suggest that Ye shes ’od sponsored a group of twenty-two young scholars to study Indian languages and tantric literature in Kashmir (see [KASHMIR-GANDHĀRA](#)), of whom only two survived: the translators [RIN CHEN BZANG PO](#) and [RNGOG LEGS PA’I SHES RAB](#). Both the story of his noble death for the sake of Atiśa’s invitation and the story of his sponsorship of Rin chen bzang po present difficulties in chronology, suggesting that they are embellishments. He is also credited with inspiring the establishment of numerous religious institutions, including [THO LING](#), [NYAR MA](#), and [TA PHO](#). He is also known as Lha bla ma (Lha Lama).

[Ye shes sde](#). (Yeshe De) (fl. late eighth/early ninth century). A Tibetan translator ([LO TSA BA](#)) during the early dissemination ([SNGA DAR](#)) of Buddhism in Tibet; a native of Ngam shod of the Sna nam clan, also referred to by the clan name Zhang. He is said to have been a disciple of both [PADMASAMBHAVA](#) and [ŚRISIMHA](#), from whom he received tantric instructions, especially in the [SEMS SDE](#) (mind class) of [RDZOGS CHEN](#). He collaborated with some fifteen Indian scholars, among them Jinamitra, Śilendrabodhi, and Dānaśīla, on the translation of as many as 347 different works, if the later canonical records are correct. His translations includes upwards of 163 Mahāyāna sūtras, among them the [PRAJÑĀPĀRAMITĀ](#), [AVATAMSAKASŪTRA](#), and [RATNAKŪTASŪTRA](#) collections, translations of the [YOGĀCĀRABHŪMI](#) and other basic [MADHYAMAKA](#) and [YOGĀCĀRA](#) treatises, as well as a number of works by his contemporaries [ŚĀNTARAKSITA](#) and [KAMALAŚĪLA](#). He is also credited with the translation of tantric works that would come to be known as the “old translations” used by the [RNYING MA](#) sect. He is said to have been a practitioner of the [VAJRAKĪLAYA](#) tantras. He is also author of a number of original compositions, among them the *Lta ba'i khyad par* (“Differences in Views”), preserved in both a [BSTAN 'GYUR](#) and [DUNHUANG](#) version, which divides the Madhyamaka school into Sautrāntika-Madhyamaka and Yogācāra-Madhyamaka. See also [DPAL BRTSEGS](#); [KLU'I RGYAL MTSHAN](#).

[yi bao](#). (C) (依報). See [ER BAO](#).

[yi dam](#). In Tibetan, a term often translated as “meditational deity” or “tutelary deity.” In the practice of Buddhist tantra, it is the enlightened being, whether male or female, peaceful or wrathful, who serves as the focus of one’s [SĀDHANA](#) practice. One is also to visualize one’s tantric teacher ([VAJRĀCĀRYA](#)) as this deity. The term is of uncertain origin and does not seem to be a direct translation of a Sanskrit term, although *iṣṭadevatā* is sometimes identified with the term. The etymology that is often given sees the term as an abbreviation of *yid kyi dam tshig*, meaning “commitment of the mind.” Traditionally, the *yi dam* is selected by throwing a flower onto a [MANDALA](#), with the deity upon whom the flower lands becoming the “chosen deity.” However, when one receives a tantric initiation, the central deity of that tantra typically becomes the *yi dam*, with daily practices of offering and meditation often required. Through the propitiation of the deity and recitation of [MANTRA](#), it is said that the deity will bestow accomplishments ([SIDDHI](#)). In the practice of [DEVATĀYOGA](#), one meditates upon

oneself as that deity in order to achieve buddhahood in the form of that deity. The yi dam is considered one of the three roots (rtsa gsum) of tantric practice, together with the [GURU](#) and the [DĀKINĪ](#): the guru is considered to be the source of blessings; the yi dam, the source of accomplishments; and the dākinī, the source of activities. These three roots are considered the inner refuge, with the Buddha, [DHARMA](#), and [SAMGHA](#) being the outer refuge, and the channels ([NĀDĪ](#)), winds ([PRĀNA](#)), and drops ([BINDU](#)) being the secret refuge.

[yidashi](#). (一大事). In Chinese, the “one great matter.” See [DASHI](#).

[Yifu](#). (J. Gifuku, K. Ūibok 義福) (661–736). Chinese [CHAN](#) master associated with the Northern school ([BEI ZONG](#)) of the early Chan tradition. Yifu was a native of Luzhou prefecture in present-day Shanxi province, who became a student of the lay master [DU FEI](#) (d.u.), the author of the [CHUAN FABAO JI](#), at Fuxiansi in Luoyang. After Yifu received the full monastic precepts in 690, he went to the monastery of [YUQUANSI](#) in Jingzhou prefecture to study with the eminent Chan master [SHENXIU](#). Yifu became Shenxiu’s close disciple and continued to study under him probably until his master’s death. Later, Yifu moved to the monastery of Huagansi on [ZHONGNANSHAN](#), where he lived for about twenty years. During his stay at Huagansi, Yifu attracted a large following. In 722, he moved again to the grand monastery of [DACI’ENSI](#) in Chang’an, where he was patronized by the upper echelons of Tang Chinese society. At the request of Emperor Xuanzong (r. 712–756), Yifu returned once again to Luoyang and resided at the monasteries of Fuxiansi and Nanlongxingsi. He received the posthumous title Chan Master Dazhi (Great Wisdom).

[yi ge brgya pa](#). (yi ge gyapa). In Tibetan, “hundred-syllable [MANTRA](#)”; term used to describe a number of lengthy [MANTRAS](#), most commonly that of [VAJRASATTVA](#), recited as part of a Tibetan tantric confession and purification practice. This is one of the preliminary practices ([SNGON ’GRO](#)) of the [RNYING MA](#) sect of Tibetan Buddhism, involving one hundred thousand repetitions of the Vajrasattva mantra.

[yiji](#). (J. yuige; K. yuge 遺偈). In Chinese, “bequeathed verse” or “death verse”; a verse (C. ji; lit. S. [GĀTHĀ](#)) left by eminent monks and nuns, especially in the [CHAN](#) school, just before the moment of death, as a final expression of their enlightenment experience; also called a “taking leave of the world hymn” (cishi song) or, especially in the Korean tradition, a “moment of death gāthā”

(imjongge). The verse may be either recited or written and is left as the master's last bequeathed teaching immediately before he passes away, often delivered as part of a final sermon. The final instructions of a buddha or a monk for the edification of his disciples are referred to as a "bequeathed teaching" (yijiao; see also [YIJIAO JING](#)), and the tradition of specifically bequeathing a verse as part of this final instruction is thought to have originated in the Tang-dynasty Chan tradition. Such bequeathed verses usually consisted of four lines of four, five, or seven Sinographs per line and thus are similar in format to other types of verses found within the Chan tradition, such as an "enlightenment hymn" (C. wudao song), the verse recited by a student upon achieving enlightenment, and "dharma-transmission gāthā" (C. chuanfa ji), the verse bestowed on a dharma successor as an authorization to teach. As an example of such a bequeathed verse, [HONGZHI ZHENGJUE](#) (1091–1157), a well-known teacher in the [CAODONG ZONG](#), is said to have written the following gāthā just before his death: "An illusory fantasy and a flower in the sky ([KHAPUSPA](#)),/ Are these sixty-seven years,/ A white bird fades into the mist,/ The autumnal waters merge with the sky." Not all renowned Chan masters left yiji and others derided the practice. The yiji of [DAHUI ZONGGAO](#) (1089–1163), the influential [LINJI ZONG](#) master and a contemporary of Hongzhi, expressed ironically his indifference to yiji: "Birth is thus,/ Death is thus,/ Verse or no verse,/ What's the fuss?" In Japan, handwritten death verses were treasured as precious calligraphic art and a virtual relic of the deceased master. They were thus often hung in the abbot's quarters (J. hōjō, C. [FANGZHANG](#)) or in the retirement cloisters.

[Yijiao jing](#). (J. Yuikyōgyō; K. Yugyo kyōng 遺教經). In Chinese, "Scripture on the Bequeathed Teachings"; also known as *Foshuo banniepan jiaojie jing* ("Scripture on the Admonishments Taught by the Buddha [before] his [PARINIRVĀNA](#)") and *Fo yijiao jing* ("Scripture on the Teachings Bequeathed by the Buddha"). Sanskrit and Tibetan versions of this text are not known to have existed. The Chinese translation of this text is attributed to [KUMĀRAJĪVA](#), but the text is now widely assumed to be an indigenous Chinese Buddhist scripture (see [APOCRYPHA](#)). The sūtra is set against the backdrop of the Buddha's parinirvāṇa, when he imparts his final instructions to the gathered disciples. The Buddha instructs his disciples to uphold the precepts and regard them as their teacher after his entry into parinirvāṇa. He then instructs them to control sensuality ([KĀMA](#)) and cultivate serenity and [DHYĀNA](#). Finally, the Buddha asks the assembly if they have any questions regarding the [FOUR NOBLE TRUTHS](#). When no

one replies, the Buddha succinctly expounds upon impermanence and the need to seek liberation ([VIMOKṢA](#)). This sūtra bears striking resemblances in style and content to the [MAHĀPARINIBBĀNASUTTA](#) and [AŚVAGHOṢA](#)'s [BUDDHACARITA](#). Along with the [SISHI'ER ZHANG JING](#) and [GUISHAN JINGCE](#), the *Yijiao jing* has been cherished by the [CHAN](#) tradition for its simple and clear exposition. Sometime during the late Tang and early Song dynasties, the three texts were edited together as the *Fozu sanjing* (“The Three Scriptures of the Buddhas and Patriarchs”) and recommended to Chan neophytes.

yijing. (C) (疑經). In Chinese, lit. “suspicious scriptures” or “scriptures of doubtful [provenance].” See [APOCRYPHA](#).

Yijing. (J. Gijō; K. Ŭijōng 義淨) (635–713). Chinese Buddhist monk and pilgrim. Ordained at the age of twenty, Yijing dreamed of following in the footsteps of the renowned pilgrims [FAXIAN](#) and [XUANZANG](#). He eventually set out for India in 671 via the southern maritime route. After visiting the major Indian pilgrimage sites (see [MAHĀSTHĀNA](#)), Yijing traveled to the monastic university at [NALANDĀ](#), where he remained for the next ten years. On his return trip to China, Yijing stopped at [ŚRĪVIJAYA](#) (Palembang in Sumatra) to continue his studies. He praised the monks there for their high level of learning, describing them as primarily [HĪNAYĀNA](#) in affiliation. It was in Śrīvijaya that he began to compose his record of his travels, the [NANHAI JIGUI NEIFA ZHUAN](#), which remains an important source on the practice of Buddhism in the many regions where he traveled and for understanding the various [NIKĀYA](#) affiliations of the period. It was also during his time in Śrīvijaya that Yijing began his translation of the massive [MŪLASARVĀSTIVĀDA VINAYA](#). When he ran out of paper and ink, he made a brief trip back to China in 689 to retrieve more writing supplies and then returned to Śrīvijaya. After a thirty-year sojourn overseas, Yijing finally returned to China in 695 with some four hundred Sanskrit texts and three hundred grains of the Buddha's relics ([ŚARĪRA](#)). Yijing was warmly welcomed in the capital of Luoyang by Empress [WU ZETIAN](#), who appointed him to the monastery of Foshoujisi. Later, from 695 to 699, Yijing participated in [ŚIKSĀNANDA](#)'s new translation of the [AVATAMSAKASŪTRA](#) and devoted the next decade or so to the translation of the scriptures that he had brought back with him from India. In addition to the Mūlasarvāstivāda vinaya, his translations also include several important [YOGĀCĀRA](#) treatises and [TANTRAS](#). His writings also include a collection of the biographies of renowned East Asian Buddhist pilgrims to India,

the [DA TANG XIYU QIUFU GAOSENG ZHUAN](#).

[yijing sanzang](#). (J. yakukyō sanzō; K. yŏkkyŏng samjang 譯經三藏). In Chinese, lit. “master of the three repositories, translator of scriptures.” See [TREPITAKA](#).

[Yingluo jing](#). (C) (瓔珞經). See [PUSA YINGLUO BENYE JING](#).

[Yinguang](#). (J. Inkō; K. In’gwang 印光) (1862–1940). Chinese monk renowned for his efforts to revitalize modern Chinese Buddhism, especially of the [PURE LAND](#) tradition; also sometimes referred to as the thirteenth patriarch of the Chinese [JINGTU](#) school and as Chang Cankui Seng (Forever Ashamed Monk). Yinguang was a native of Geyang in Shaanxi province. At a young age, Yinguang suffered from an eye ailment, probably conjunctivitis, which he is said to have cured by studying the Buddhist scriptures. He was formally ordained later at the monastery of Xing’an Shuangqisi in his home province. Yinguang’s interest in pure land thought and practice is said to have been catalyzed by his encounter with the writings of the [CHAN](#) master Jixing Chewu (1741–1810), who came to be known as the twelfth patriarch of the pure land tradition in China. For more than twenty years, he resided in isolation at the monastery of Fayusi on the sacred mountain of [PUTUOSHAN](#), where he studied the scriptures and practiced the recitation of the name of the buddha [AMITABHA](#) ([NIANFO](#); cf. [NAMU AMIDABUTSU](#)). Yinguang’s reputation grew with the publication of his private correspondences and his collected essays known as *Jingtu jueyi lun* (“Treatise on Resolving Doubts about the Pure Land”). His writings were often critical of Chan and emphasized the efficacy of pure land practice instead. Yinguang also worked to restore monasteries and to republish important pure land writings until his death in 1940. See also [TAIXU](#); [XUYUN](#).

[yingwu Chan](#). (J. ōmuzen; K. aengmu Sŏn 鸚鵡禪). In Chinese, lit. “parrot Chan”; a [CHAN](#) Buddhist expression referring to the way some practitioners merely parrot with their mouths the pithy sayings and [GONG’AN](#) dialogues of the patriarchs and masters ([ZUSHI](#)), but fail to realize their true message and attain enlightenment for themselves. This pejorative description is also applied to pundits of the traditional Buddhist scholastic schools (C. jiao, see K. [KYO](#)), whose intellectual erudition and doctrinal prowess were caricatured as “parrot Chan,” in contrast to the Chan school’s supposed subitist spiritual approach that did not rely on mere intellectual understanding (see [BULI WENZI](#)). These pundits are likened to parrots in that they also mimic other people’s understanding

through their doctrinal exegeses, but without comprehending it themselves. Cf. [KOUTOU CHAN](#).

[yingyan](#). (應驗). In Chinese, “responsive attestation.” See [GANYING](#).

[yinian sanqian](#). (J. ichinen sanzen; K. illyōm samch’ōn 一念三千). In Chinese, lit. “the [TRICHILIOCOSM](#) in a single instant of thought”; a [TIANTAI](#) teaching that posits that any given thought-moment perfectly encompasses the entirety of reality both spatially and temporally. An instant ([KSANA](#)) of thought refers to the shortest period of time and the trichiliocosm ([TRISĀHASRAMAHĀSĀHASRALOKADHĀTU](#)) to the largest possible universe; hence, according to this teaching, the microcosm contains the macrocosm and temporality encompasses spatiality. Thus, whenever a single thought arises, there also arise the myriad dharmas; these two events occur simultaneously, not sequentially. Any given thought can be categorized as belonging to one of the ten realms of reality ([DHARMADHĀTU](#)). For example, a thought of charity metaphorically promotes a person to the realm of the heavens at that instant, whereas a subsequent thought of consuming hatred metaphorically casts the same person into the realm of the hells. Tiantai exegetes also understood each of the ten dharmadhātus as containing and pervading all the other nine dharmadhātus, making one hundred dharmadhātus in total (ten times ten). In turn, each of the one hundred dharmadhātus contains “ten aspects of reality” (or the “ten suchnesses”; see [SHI RUSHI](#)) that pervade all realms of existence, which makes one thousand “suchnesses” (qianru, viz., one hundred dharmadhātus times ten “suchnesses”). Finally the one thousand “suchnesses” are said to be found in the categories of the “five aggregates” ([SKANDHA](#)), “sentient beings” ([SATTVA](#)), and the physical environment (guotu). These three latter categories times the one thousand “suchnesses” thus gives the “three thousand realms,” which are said to be present in either potential or activated form in any single moment of thought. This famous dictum is attributed to the eminent Chinese monk [TIANTAI ZHIYI](#), who spoke of the “trichiliocosm contained in the mind during an instant of thought” (sanqian zai yinian xin) in the first part of the fifth roll of his magnum opus, [MOHE ZHIGUAN](#). Zhiyi’s discussion of this dictum appears in a passage on the “inconceivable realm” ([ACINTYA](#)) from the chapter on the proper practice of [ŚAMATHA](#) and [VIPĀŚYANĀ](#). Emphatically noting the “inconceivable” ability of the mind to contain the trichiliocosm, Zhiyi sought through this teaching to emphasize the importance and mystery of the mind during the practice of

meditation. Within the context of the practice of contemplation of mind ([GUANXIN](#)), this dictum also anticipates a “sudden” theory of awakening (see [DUNWU](#)). [TIANTAI](#) exegetes during the Song dynasty expanded upon the dictum and applied it to practically every aspect of daily activity, such as eating, reciting scriptures, and ritual prostration. See also [SHANJIA SHANWAI](#).

[yinke](#). (J. inka; K. in’ga 印可). In Chinese, lit. “seal of/in approval,” “certification” and often seen in Western sources in its Japanese pronunciation inka; a seal of approval, certification, or transmission, which is given by masters in the various [CHAN](#) traditions across East Asia to practitioners who, in their estimation, have attained a satisfactory level of awakening or maturity of understanding to serve as public exponents of their lineage. Because these lineages are presumed to trace back to [BODHIDHARMA](#), the founder of the Chan school, and ultimately to the person of the Buddha himself, the person who receives such certification is considered to be qualified to speak for the current generation of Chan adepts on behalf of the Chan patriarchs, masters, and even the Buddha, to accept and train students, and to give them certification in turn once their training is complete. The manner of certification differs within traditions. Certification often entails admission into the master’s lineage; the conferral of such symbols of religious authority and memorial worship as robes, bowls, chowries ([BINGFU](#)), or portraits; and the right to serve in high ecclesiastical office in a sectarian monastery. In the modern [ZEN](#) traditions of Japan, certification is offered by a [RŌSHI](#), a teacher who has himself been previously certified. Especially in the Japanese traditions, receiving inka need not necessarily be testimony to the profundity of a person’s enlightenment experience, but may simply be public recognition that a student has sufficient maturity and ability to serve as abbot or hold other high ecclesiastical office in the monasteries and temples of a specific sectarian lineage. In some cases, yinke is an abbreviation for yinke zhengming, or “certification via seal of approval.” Certification is also known as yinding (seal of meditation), renke (acceptance and approval), and yinzheng (seal and certify). See also [CHUANFA](#); [FASI](#).

[yinke zhengming](#). (J. inka shōmyō; K. in’ga chŭngmyōng 印可證明). In Chinese, “certification via a seal of approval.” See [YINKE](#).

[yinsheng nianfo](#). (J. inshō nenbutsu/inzei nenbutsu; K. insŏng yŏmbul 引聲念佛). In Chinese, “intoning [the name of] the Buddha by drawing out the sound” (see [NIANFO](#)); one of the “five-tempo intonations of [the name of] the Buddha”

([WUHUI NIANFO](#)) devised by [FAZHAO](#). Yinsheng nianfo involves the long, drawn-out intonation of the name of the buddha [AMITĀBHĀ](#). Even before Fazhao, the practice of yinsheng nianfo is known to have been practiced by the [CHAN](#) master [CHÖNGJUNG MUSANG](#) (680–756 [alt. 684–762]), who recommended this practice for those who wished to attain “no recollection” (wuyi), “no thought” ([WUNIAN](#)), and “no forgetting” (mowang).

[Yinyuan Longxi](#). (J. Ingen Ryūki 隱元隆琦) (1592–1673). Chinese [CHAN](#) master and founding patriarch of the Japanese [ŌBAKUSHŪ](#). Yinyuan was a native of Fuzhou, in present-day Fujian province. He began his training as a monk in his early twenties on [PUTUOSHAN](#) and was formally ordained several years later at Wanfusi on Mt. Huangbo. Yinyuan continued his training under the Chan master [MIYUN YUANWU](#) and, while serving under the Chan master [FEIYIN TONGRONG](#) at Wanfusi Yinyuan, was formally recognized as an heir to Feiyin’s lineage in 1633. Seven years later, in 1640, Yinyuan found himself at the monastery of Fuyansi in Zhejiang province and at Longquansi in Fujian province in 1645. The next year, in 1646, he returned to Mt. Huangbo and revitalized the community at Wanfusi. In 1654, at the invitation of Yiran Xingrong (1601–1668), the abbot of the Chinese temple of Kōfukuji in Nagasaki, Yinyuan decided to leave China to escape the succession wars and political turmoil that had accompanied the fall of the Chinese Ming dynasty. He was to be accompanied by some thirty monks and artisans. Due to political issues, however, Yinyuan was only allowed to enter Japan a year later in 1655. That same year, largely through the efforts of the Japanese monk Ryōkei Shōsen (1602–1670), the abbot of [MYŌSHINJI](#), Yinyuan was allowed to stay at Ryōkei’s home temple of Fumonji under virtual house arrest. The next year when Yinyuan expressed his wishes to return to China, Ryōkei arranged a visit to Edo and an audience with the young shōgun. At the end of 1658, Yinyuan made the trip to Edo and won the patronage of the shōgun and his ministers. With their support, Yinyuan began the construction of [MANPUKUJIS](#) in Uji in 1661. The site came to be known as Mt. Ōbaku, the Japanese pronunciation of his mountain home of Huangbo, and served as the center for the introduction of Ming-dynasty Chan into Japan. Yinyuan’s teachings, especially those concerning monastic rules, catalyzed institutional and doctrinal reform among the entrenched Japanese [ZEN](#) communities. In 1664, Yinyuan left his head disciple [MU’AN XINGTAO](#) in charge of all administrative matters involving the monastery and retired to his hermitage on the compounds of Manpukuji. Nine years later Emperor Gomizunoo (r. 1611–1629) bestowed

upon him the title state preceptor (J. kokushi, C. [GUOSHI](#)) Daikō Fushō (Great Radiance, Universal Illumination). He died shortly thereafter. Yinyuan brought many texts and precious art objects with him from China, and composed numerous texts himself such as the *Huangbo yulu*, *Hongjie fayi*, *Fushō kokushi kōroku*, *Ōbaku oshō fusō goroku*, *Ingen hōgo*, and *Ōbaku shingi*.

[Yiqiejing yinyi](#). (J. Issaikyō ongi; K. Ilch'egyōng ūmūi 一切經音義). In Chinese, “Pronunciation and Meaning of All the Scriptures”; a specialized Chinese glossary of Buddhist technical terminology. As more and more Indian and Central Asian texts were being translated into Chinese, the use of Sanskrit and Middle Indic transcriptions and technical vocabulary increased, leading to the need for comprehensive glossaries of these abstruse terms. Because of the polysemous and sacred character of such Buddhist doctrinal concepts as [BODHI](#), [NIRVĀNA](#), and [PRAJÑĀ](#), many Chinese translators also preferred to transcribe rather than translate such crucial terms, so as not to limit their semantic range to a single Chinese meaning. The Indian pronunciations of proper names were also commonly retained by Chinese translators. Finally, the spiritual efficacy thought to be inherent in the spoken sounds of Buddhist spells ([MANTRA](#)) and codes ([DHĀRANĪ](#)) compelled the translators to preserve as closely as possible in Chinese the pronunciation of the Sanskrit or Middle Indic original. By the sixth century, the plethora of different transcriptions used for the same Sanskrit Buddhist terms led to attempts to standardize the Chinese transcriptions of Sanskrit words, and to clarify the obscure Sinographs and compounds used in Chinese translations of Buddhist texts. This material was compiled in various Buddhist “pronunciation and meaning” (yinyi) lexicons, the earliest of which was the twenty-five-roll *Yiqiejing yinyi* compiled by the monk Xuanying (fl. c. 645–656). Xuanying, a member of the translation bureau organized in the Chinese capital of Chang’an by the renowned Chinese pilgrim, translator, and Sanskritist [XUANZANG](#) (600/602–664), compiled his anthology in 649 from 454 of the most important [MAHĀYĀNA](#), [ŚRĀVAKAYĀNA](#), [VINAYA](#), and [ŚĀSTRA](#) materials, probably as a primer for members of Xuanzang’s translation team. His work is arranged by individual scripture, and includes a roll-by-roll listing and discussion of the problematic terms encountered in each section of the text. For the more obscure Sinographs, the entry provides the fanqie (a Chinese phonetic analysis that uses paired Sinographs to indicate the initial and final sounds of the target character), the Chinese translation, and the corrected transcription of the Sanskrit, according to the phonologically sophisticated transcription system developed by Xuanzang.

Xuanying's compendium is similar in approach to its predecessor in the secular field, the *Jingdian shiwen*, compiled during the Tang dynasty in thirty rolls by Lu Deming (c. 550–630). The monk Huilin (783–807) subsequently incorporated all of Xuanying's terms and commentary into an expanded glossary that included difficult terms from more than 1,300 scriptures; Huilin's expansion becomes the definitive glossary used within the tradition. Still another yinyi was compiled later during the Liao dynasty by the monk Xilin (d.u.). In addition to their value in establishing the Chinese interpretation of Buddhist technical terms, these "pronunciation and meaning" glossaries also serve as important sources for studying the Chinese phonology of their times.

yiqing. (J. gijō; K. ūijōng 疑情). In Chinese, lit. the "sensation of doubt," or simply "doubt"; a feeling of puzzlement and sense of questioning that is a crucial factor in the meditation technique of "questioning meditation" ([KANHUA CHAN](#)) as systematized by [DAHUI ZONGGAO](#) (1089–1163). In the kanhua technique, doubt refers to the puzzlement and perplexity that the meditator feels when trying to understand the conundrum that is the [GONG'AN](#) (public case) or [HUATOU](#) (meditative topic). This doubt arises from the inability to understand the significance of the huatou through rational thought. This loss of confidence in one's conceptual and intellectual faculties releases the mind from the false sense of security engendered through habitual ways of thinking, creating a feeling of frustration that is often compared to "a mosquito trying to bite an iron ox." The meditator's sense of self ultimately becomes so identified with the huatou that the intense pressure created by the doubt "explodes" (C. po), freeing the mind from the personal point of view that is the self. Hence, by cutting off conceptualization and producing a state of intense concentration, the sensation of doubt helps to impel meditation forward toward the experience of awakening ([WU](#)). The term "sensation of doubt" was not coined by Dahui. One of its earliest usages is in the enlightenment poem of Luohan Guichen (867–928), the teacher of [FAYAN WENYI](#) (885–958), which describes enlightenment as shattering the "ball of doubt" ([YITUAN](#)). Dahui's grandteacher, [WUZU FAYAN](#) (d. 1104), also taught his students to keep the great ball of doubt. But it was Dahui who put doubt at the core of his interpretation of kanhua Chan meditation; for him, the sensation of doubt becomes an effective antidote to conceptual thinking as well as the force that drives the student forward toward enlightenment. The Chinese term yi is also used as the translation for the Sanskrit term [VICIKITSĀ](#), or skeptical doubt, which was one of the five hindrances ([NĪVARANA](#)) to meditative

absorption ([DHYĀNA](#)). But rather than being viewed as it had been in India as a hindrance, in Dahui's interpretation doubt instead plays a crucial role in the meditative process.

[Yishan Yining](#). (J. Issan Ichinei; K. Ilsa Illyōng 一山一寧) (1247–1317). Chinese [CHAN](#) master in the [LINJI ZONG](#); a native of Taizhou prefecture in present-day Zhejiang province. At a young age, Yishan became a student of a certain Wudeng Rong (d.u.) at the monastery of Hongfusi on Mt. Fu near his hometown in Taizhou. He was later ordained at the monastery of Puguangsi in Siming in Zhejiang province and continued to study [VINAYA](#) at Yingzhensi and [TIANTAI](#) thought and practice at Yanqingsi. Yishan then began his training in Chan under several teachers. He eventually became a disciple of Wanji Xingmi (d.u.), a disciple of the Chan master [CAOYUAN DAOSHENG](#). In 1299, the Yuan emperor Chengzong (r. 1294–1307) bestowed upon him the title Great Master Miaoci Hongji (Subtle Compassion, Universal Salvation) and an official post as the overseer of Buddhist matters in Zhejiang. That same year, he was sent to Japan as an envoy of the court, but was detained temporarily at the temple of Shūzenji in Izu by the Kamakura shogunate. When the Hōjō rulers learned of Yishan's renown in China, Yishan was invited to reside as abbot of the powerful monasteries of [KENCHŌJI](#), [ENGAKUJI](#), and Jōchiji in Kamakura. In 1313, Yishan was invited by the retired Emperor Gouda (r. 1274–1287) to reside as the third abbot of the monastery [NANZENJI](#) in Kyōto. Yishan had many students in Japan including the eminent Japanese monk [MUSŌ SOSEKI](#). Yishan became ill and passed away in the abbot's quarters (J. hōjō; C. [FANGZHANG](#)) of Nanzenji in 1317. The emperor bestowed upon him the title state preceptor (J. kokushi; C. [GUOSHI](#)) Issan (One Mountain). Yishan is also remembered for his calligraphy and for introducing to Japan the new commentaries written by the great Neo-Confucian scholar Zhu Xi (1130–1200) to Japan. He and his disciples, such as Shiliang Rengong (1266–1334), Mujaku Ryōen (d.u.), Monkei Ryōsō (d. 1372), and Tōrin Yūkyū (d. 1369), contributed much to the development of [GOZAN](#) culture in Japan.

[yishen](#). (J. yuishin; K. yusin 遺身). In Chinese, lit., “to let go of the body,” viz., “self-immolation.” See [SHESHEN](#).

[Yisheng xianxing jiao](#). (C) (一乘顯性教). See [HUAYAN WUJIAO](#).

[yituan](#). (J. gidan; K. ūidan 疑團). In Chinese, “ball of doubt”; also referred to as

dayituan, or “great ball of doubt.” Although the term appears in a verse recorded in the [JINGDE CHUANDENG LU](#) that is attributed to Luohan Guichen (867–928), the teacher of [FAYAN WENYI](#), it was the [CHAN](#) master [DAHUI ZONGGAO](#) who systematized and popularized its use. Dahui probably inherited the notion of a ball of doubt from his teacher [YUANWU KEQIN](#), whose teacher [WUZU FAYAN](#) also mentions a ball of doubt in his teachings. Dahui described the arousal of the sensation of doubt ([YIQING](#)) or the ball of doubt as an important tool in his meditative approach called [KANHUA CHAN](#), or investigation of the meditative “topic” ([HUATOU](#)).

[yixin](#). (S. ekacitta; J. isshin; K. ilsim 一心). In Chinese, “one mind”; the ground of being and the principle ([LI](#)) foundational to all phenomena ([SHI](#)). The [LANKĀVATĀRASŪTRA](#) and the [DASHENG QIXIN LUN](#) (“Awakening of Faith According to the Mahāyāna”), both central texts in the [TATHĀGATAGARBHA](#) corpus of literature, treat the “one mind” as a central doctrine. The *Lankāvatārasūtra* states that the “calm extinction [of [NIRVĀNA](#)] is called the one mind, and this one mind is called the tathāgatagarbha.” The *Dasheng qixin lun* presents all of Buddhism in terms of the one mind and its two aspects: the mind’s true-thusness aspect (xin zhenru men) and production-and-cessation aspect (xin shengmie men). The *Dasheng qixin lun*, arguably the most influential tathāgatagarbha text within the East Asian Buddhist tradition, has long been considered the principal treatise outlining the doctrine of the one mind and its associations with the [YOGĀCĀRA](#) theory of consciousness and tathāgatagarbha thought. ¶ The exegeses to the *Dasheng qixin lun* by [JINGYING HUIYUAN](#) (523–592), [WŌNHYO](#) (617–686), and [FAZANG](#) (643–712), which the tradition has regarded as its three major commentaries (san dashu), have each elucidated in considerable detail the foundational role that the notion of the one mind plays in that text. Fazang, for example, glossed the one mind of the *Dasheng qixin lun* as the “one tathāgatagarbha mind” and thus identified the one mind with the tathāgatagarbha; the two aspects of the one mind, true thusness and production-and-cessation, were correlated, respectively, with either [MADHYAMAKA](#) and [YOGĀCĀRA](#) or principle (li) and phenomena (shi). Fazang thus places tathāgatagarbha thought above both the [SAN LUN ZONG](#) (the Chinese analogue of the Madhyamaka school) and the [FAXIANG ZONG](#) (Yogācāra) teachings in his doctrinal taxonomy (panjiao; see [JIAOXIANG PANSHI](#)). By contrast, Huiyuan’s commentary treats the one mind within the context of the nine-consciousnesses theory of the [SHE LUN ZONG](#), an early Yogācāra-oriented strand of Chinese

Buddhist thought. In his analysis of the two aspects of the one mind, Huiyuan correlates the true-thusness aspect of the one mind with the ninth “immaculate consciousness” ([AMALAVIJÑĀNA](#)); he correlates the production-and-cessation aspect of the one mind with the eighth “storehouse consciousness” ([ĀLAYAVIJÑĀNA](#)). Unlike Fazang’s interpretation, tathāgatagarbha is here not identified with the one mind but is instead viewed as the production-and-cessation aspect of the mind. In Wōnhyo’s case, rather than seeking as Fazang did to distinguish the Faxiang teachings of Yogācāra from tathāgatagarbha thought, he sought instead to reconcile the Faxiang perspective on consciousness with the *Dasheng qixin lun*’s analysis of mind. Like Huiyuan, Wōnhyo identified the tathāgatagarbha with the production-and-cessation aspect of the one mind. ¶ The one mind is also a central theme of the [ZONGJING LU](#), an encyclopedic [CHAN](#) anthology compiled by [YONGMING YANSHOU](#) (904–976) in the [FAYAN ZONG](#), which seeks to unify the various Chinese schools of Buddhism, including [HUAYAN](#), Yogācāra, and [TIANTAI](#), and to demonstrate the compatibility of doctrinal teachings and meditative practice. Yanshou draws on the doctrinal classification schema of [GUIFENG ZONGMI](#) (780–841), the Chan scholiast who was also the fifth patriarch of the Huayan school, in positing three broad strands of Buddhist teaching: dharma characteristics (Faxiang zong), destruction of characteristics (Poxiang), dharma nature ([FAXING ZONG](#)). Yanshou states that the Faxing (dharma nature) teachings, which include both the Huayan and Chan schools and which are based on tathāgatagarbha thought, treat both aspects of true thusness or the one mind, that is, the aspect of “immutability” (bubian) and “adaptability” (lit., “according to conditions,” suiyuan); the Faxiang (dharma characteristics) teachings, by contrast, only treat the aspect of “adaptability.” ¶ In the [TIANTAI](#) school, one mind or sometimes one thought (yinian) is said to be the ground of all things in existence in both their tainted and pure manifestations, a notion expressed in the aphorism “one thought [contains] the [TRICHILIOCOSM](#)” ([YINIAN SANQIAN](#)), one of the main doctrines of the school. The Tiantai teaching that “one mind,” viz., a single instance of thought, contains all three “viewpoints” (yixin sanguan) also expresses how the three inseparable aspects of phenomena ([SANDI](#))—viz., the truth of emptiness (kongdi), the truth of being only provisionally real (jiadi), and the truth of the mean (zhongdi)—are each contained in one thought moment. In the [PURE LAND](#) tradition, one mind generally refers to single-minded recollection ([NIANFO](#)) of, especially, the buddha [AMITĀBHA](#), and is a synonym of one-pointedness of mind.

yixin chuanxin. (J. ishin denshin; K. isim chönsim 以心傳心). In Chinese, “mind-to-mind transmission.” An oft-repeated phrase used mainly by the East Asian [CHAN](#) traditions to refer to a special transmission of the “mind” of the Buddha from master to disciple in a “telepathic” way that does not rely on words or letters (see [JIAOWAI BIECHUAN](#) and [BULI WENZI](#)). In an attempt to distinguish itself from the other Buddhist traditions that sought the teachings of the Buddha in sūtras and commentaries, the burgeoning Chan tradition of the eighth and ninth centuries emphasized the nonverbal transmission of the Buddha’s teachings. The notion of mind-to-mind transmission has thus served as an important trope in the self-fashioning of the Chan tradition. Mind-to-mind transmission is often explained by reference to a famous Chan legend that first appears in the *Tiansheng guangdeng lu*. While at Vulture Peak ([GRDHRĀKŪTAPARVATA](#)), the Buddha is said to have raised a flower in front of a large assembly, whereupon the elder [MAHĀKĀŚYAPA](#) smiled in response. The Buddha then announced that he had thereby entrusted his “treasury of the true dharma eye” ([ZHENG FAYAN ZANG](#)) to Mahākāśyapa, thus recognizing him as the Buddha’s successor and first patriarch ([ZUSHI](#)). For this legend, see [NIANHUA WEIXIAO](#).

Yixing. (J. Ichigyō; K. Irhaeng 一行) (683–727). In Chinese, “Single Practice”; a famous student of [CHAN](#) and master of esoteric Buddhism ([MIJIAO](#)), translator, and distinguished astronomer. Yixing was a native of Julu prefecture in present-day Hebei province. He became a monk under the eminent Chan master [PUJI](#) (651–739) in the Northern school ([BEI ZONG](#)) of the early Chan tradition and also studied the [VINAYA](#) under a monk by the name of Huizhen (d.u.). Having made a name for himself at the monastery of Guoqingsi on Mt. Tiantai, in 717, Yixing was invited by Emperor Xuanzong (r. 712–756) to the palace in Luoyang. While residing at the palace, Yixing became a disciple of the [TREPITAKA ŚUBHAKARASIMHA](#) and, together, they translated the [MAHĀVAIROCANĀBHISAMBODHISŪTRA](#). Based on Śubhakarasiṃha’s oral interpretations provided in the course of preparing their translation, Yixing also composed an important commentary on the sūtra, the *Darijing shu*. In 727, Yixing’s reputation in astronomy and calendrics prompted the emperor to have him devise a new calendar, which is known as the Dayan li. Yixing also devised an elaborate celestial globe, which used hydraulic power to portray the precise movements of the sun, moon, and constellations across the firmament. After his death, he was bestowed the posthumous title Chan master Dahui (Great Wisdom).

yixing sanmei. (S. ekavyūhasamādhi; J. ichigyō zanmai; K. irhaeng sammae 一行三昧). In Chinese, “single-practice [SAMĀDHI](#).” The term yixing sanmei seems to first appear in a passage in the Chinese translation of the [SAPTAŚATIKĀPRAJÑĀPĀRAMITĀSŪTRA](#): “The [DHARMADHĀTU](#) has only a single mark; to take the dharmadhātu as an object is called one-practice samādhi.” Two practices are then recommended by the text for cultivating yixing sanmei, viz, the perfection of wisdom ([PRAJÑĀPĀRAMITĀ](#)) and recollection of the Buddha’s name (S. [BUDDHĀNUMSMRTI](#); C. [NIANFO](#)). The concept of yixing sanmei was later incorporated into the apocryphal Chinese treatise [DASHENG QIXIN LUN](#) and the influential meditation manual [MOHE ZHIGUAN](#). [Tiantai Zhiyi](#), the author of the *Mohe Zhiguan*, identified the practice of constant sitting, the first of the so-called four kinds of samādhi (sizhong sanmei), with yixing sanmei. Famous teachers of the early [CHAN](#) community, such as [Daoxin](#), [Huineng](#), and [Heze Shenhui](#), also emphasized the importance of yixing sanmei, which they identified with seated meditation ([ZUOCHAN](#)) and the cultivation of prajñāpāramitā. According to the [LIUZU TANJING](#) (“Platform Sūtra of the Sixth Patriarch”), Huineng interpreted yixing sanmei as the maintenance of a straightforward mind (yizhi xin) while walking, standing, sitting, and lying. Shenhui identified yixing sanmei with “no mind” ([WUXIN](#); see also [WUNIAN](#)).

Yixuan. (C) (義玄). See [LINJI YIXUAN](#).

yizhi Chan. (J. issi no zen; K. ilchi sŏn 一指禪). In Chinese, “one-finger Chan”; the famous pedagogical technique used by the [CHAN](#) master Juzhi Yizhi (c. ninth century) and his teacher Hangzhou Tianlong (d.u.) in the lineage of [MAZU DAOYI](#). “One-finger Chan” refers to Juzhi’s propensity to answer any question he was asked by simply raising one finger, so as not to allow any conceptual understanding of Buddhism to arise in the student’s mind. The phrase appears in Case 19 of the [BIYAN LU](#) and Case 3 of the [WUMEN GUAN](#), and is frequently cited in Chan sources. In one well-known Chan case ([GONG’AN](#)), Juzhi is said to have cut off the finger of a boy who mimicked him without understanding the meaning of the gesture.

yizi guan. (J. ichijikan; K. ilcha kwan 一字關). In Chinese, “one-word checkpoint” or “one-word barrier”; a pedagogical device developed by [YUNMEN WENYAN](#) (864–949), the founder of the [YUNMEN ZONG](#) of the classical [CHAN](#) tradition, which used only a single utterance to respond to a student’s question. For example, once a monk asked him, “When you kill your parents, you repent

before the Buddha. But when you kill the buddhas and patriarchs, to whom do you repent?” Yunmen answered, “Lu” (“exposed”). Another time a monk asked him, “What is the treasury of the true dharma eye ([ZHENGFAZHANG](#))?” Yunmen answered, “Pu” (“universal”). Such terse answers offered no basis for conceptual understanding, instead demanding that students have a direct realization of truth. These one-word checkpoints were highly praised by [DAHUI ZONGGAO](#) for fostering especially close concentration during [KANHUA CHAN](#) meditation: “Once you enter into the gate of the one-word [GONG’AN](#), even nine oxen wouldn’t be able to pull you out.”

yoga. (T. sbyor ba/rnal ’byor; C. xiu/xiuxing/xiuxi/yuqie; J. shu/shugyō/shujū/yuga; K. su/suhaeng/susŭp/yuga 修/修行/修習/瑜伽). In Sanskrit, “bond,” “restraint,” and by extension “spiritual discipline”; in Buddhism, a generic term for soteriological training or contemplative practice, including tantric practice.

[Yogabhāvanāmārga.](#) [alt. Bhāvanāyogamārga; Yogabhāvanāpatha] (T. Rnal ’byor bsgom pa’i lam). In Sanskrit, “Path of Yogic Cultivation”; a work on the [BODHISATTVA](#) path usually attributed to the eighth-century Indian master Jñānagarbha, who is known as the teacher of [ŚĀNTARAKSITA](#) (c. 725–788) and a disciple of Śrīgupta. It is presumed that the *Yogabhāvanāmārga* is an example of the later [MADHYAMAKA](#) school’s attention to the theme of the stages of meditative cultivation ([BHĀVANĀ](#)), as best exemplified by [KAMALAŚĪLA](#)’s three [BHĀVANĀKRAMAS](#). There are two Jñānagarbhas known to the tradition, one from the early ninth century and the other from the eleventh century. Some scholars suggest that the commentary to the Maitreya chapter of the [SAMDHINIRMOCANASŪTRA](#) should be attributed to the first Jñānagarbha, while authorship of the *Yogabhāvanāmārga* should be ascribed to the second. The *Yogabhāvanāmārga*, along with Jñānagarbha’s two other works, the *Satyadvayavibhaṅga* (“Analysis of the Two Truths”) and its autocommentary *Satyadvayavibhaṅgavṛtti* (“Commentary on Analysis of the Two Truths”), are only extant in Tibetan translation.

[Yogācāra.](#) (T. Rnal ’byor spyod pa; C. Yuqixing pai; J. Yugagyōha; K. Yugahaeng p’a 瑜伽行派). In Sanskrit, “Practice of [YOGA](#)”; one of the two major [MAHĀYĀNA](#) philosophical schools (along with [MADHYAMAKA](#)) in India, known especially for its doctrines of “mind-only” ([CITTAMĀTRA](#)) or “representation-only” ([VIJÑĀPTIMĀTRATĀ](#)), the [TRISVABHĀVA](#), and the [ĀLAYAVIJÑĀNA](#). In addition,

much of the exposition of the structure of the Mahāyāna path ([MĀRGA](#)) and of the Mahāyāna [ABHIDHARMA](#) derives from this school. The texts of the school were widely influential in Tibet and East Asia. Although several of the terms associated with the school occur in such important Mahāyāna sūtras as the [DAŚABHŪMIKASŪTRA](#), the [LANKĀVATĀRASŪTRA](#), and especially the [SAMDHINIRMOCANASŪTRA](#), the exposition of the key doctrines was largely the work of two Indian scholastics of the fourth to fifth centuries CE, the half brothers [ASAṄGA](#) and [VASUBANDHU](#) and their commentators, especially [STHIRAMATI](#) and [DHARMAPĀLA](#). Asaṅga's major works include the central parts of the [YOGĀCĀRABHŪMI](#), the [MAHĀYĀNASAMGRAHA](#), and the [ABHIDHARMASAMUCCAYA](#). Vasubandhu's most famous Yogācāra works are the [VIMŚATIKĀ](#) and the [TRIMŚIKĀ](#) (his most famous work of all, the [ABHIDHARMAKOŚABHĀŚYA](#), is said to have been composed prior to his conversion to the Mahāyāna). Among the “five books of [MAITREYA](#)” (see [BYAMS CHOS SDE LŪNGA](#)), three are particularly significant in Yogācāra: the [MADHYĀNTAVIBHĀGA](#), the [DHARMADHARMATĀVIBHĀGA](#), and the [MAHĀYĀNASŪTRĀLAMKĀRA](#). Important contributions to Yogācāra thought were also made by the logicians [DIGNĀGA](#) and [DHARMAKĪRTI](#). Although Yogācāra and Madhyamaka engaged in polemics, in the latter phases of Buddhism in India, a synthesis of Yogācāra and Madhyamaka took place in the works of such authors as [ŚĀNTARAŚRĪTA](#) and [KAMALAŚĪLA](#); Tibetan doxographers dubbed this synthesis [YOGĀCĀRA-SVĀTANTRIKA-MADHYAMAKA](#). ¶ Yogācāra authors offered detailed presentations and analyses of virtually all of the important topics in Buddhist thought and practice, built upon an edifice deriving from meditative experience. The school is perhaps most famous for the doctrines of “mind-only” (cittamātra) and “representation-only” (vijñaptimātra), according to which the conception of the objects of experience as existing external to and independent of the consciousness perceiving them was regarded as the fundamental ignorance and the cause of suffering. Instead of the standard six consciousnesses ([VIJÑĀNA](#)) posited by other Buddhist schools (the five sensory consciousnesses and the mental consciousness), some Yogācāra texts described eight forms of consciousness: these six, plus the seventh “afflicted mind” ([KLISTAMANAS](#)), which mistakenly generates the false notion of a perishing self ([ĀTMAN](#)), and the eighth foundational, or “storehouse,” consciousness (ālayavijñāna). This foundational consciousness is the repository of seeds ([BĪJA](#)) or imprints ([VĀSANĀ](#)) produced by past actions ([KARMAṆ](#)) that fructify as experience, producing simultaneously consciousness and the objects of consciousness. The afflicted mind mistakenly regards the foundational

consciousness as a permanent and independent self. The doctrine of the three natures (trīsvabhāva), although variously interpreted, is also often explained in light of the doctrine of representation-only. The imaginary nature ([PARIKALPITA](#)) refers to misconceptions, such as the belief in self and in the existence of objects that exist apart from consciousness. The dependent nature ([PARATANTRA](#)) encompasses impermanent phenomena, which are products of causes and conditions. The consummate nature ([PARINISPANNA](#)) is reality, classically defined as the absence of the imaginary nature in the dependent nature. By removing these latent predispositions from the ālayavijñāna and overcoming the mistaken bifurcation of experience between a perceiving subject and perceived objects ([GRĀHYAGRĀHAKAVIKALPA](#)), a transformation of consciousness ([ĀSRAYAPARĀVṚTTI](#)) occurs which turns the deluded mind of the sentient being into the enlightenment cognition of the buddhas (BUDDHAJÑĀNA), with the ālayavijñāna being transformed into the mirrorlike wisdom ([ĀDARŚAJÑĀNA](#)). In the realm of soteriology, much of what would become the standard Mahāyāna elaboration of the five paths ([PAÑCAMĀRGA](#)) and the bodies ([KĀYA](#), e.g., [TRIKĀYA](#)) of a buddha is found in works by Yogācāra authors, although there are important differences between Yogācāra and Madhyamaka on a number of key soteriological questions, including whether there is one vehicle ([EKAYĀNA](#)) or three final vehicles ([TRİYĀNA](#)), that is, whether all beings are destined for buddhahood, or whether some, such as the [ARHATS](#) of the mainstream Buddhist schools, are stuck in a soteriological dead end. ¶ Not all the scholastics regarded as Yogācāra exegetes adhered to all of the most famous doctrines of the school. The most common division of the school is into those who do and do not assert the existence of eight consciousnesses (and hence the ālayavijñāna). The former, who include Asaṅga and Vasubandhu, are called “followers of scripture” (āgamānusārin), and the latter, who include the famous logicians [DIGNĀGA](#) and [DHARMAKĪRTI](#), are called “followers of reasoning” (nyāyānusārin). Yogācāra strands of Buddhism were extremely influential in the development of indigenous East Asian schools of Buddhism, including the mature schools of [HUAYAN](#) and even [CHAN](#). For specifically East Asian analogues of Yogācāra, see [FAXIANG ZONG](#), [XIANG ZONG](#), [DI LUN ZONG](#), and [SHE LUN ZONG](#).

[Yogācārabhūmiśāstra](#). [alt. Yogācārabhūmi] (T. Rnal ’byor spyod pa’i sa’i bstan bcos; C. Yuqieshidi lun; J. Yugashijiron; K. Yugasaji non 瑜伽師地論). In Sanskrit, “Treatise on the Stages of Yogic Practice”; an encyclopedic work that is the major treatise ([ŚĀSTRA](#)) of the [YOGĀCĀRA](#) school of Indian Buddhism. It

was widely influential in East Asia and Tibet, being translated into Chinese by [XUANZANG](#) between 646 and 648 and into Tibetan circa 800. Authorship is traditionally ascribed to [ASAṄGA](#) (or, in China, to [MAITREYA](#)), but the size and scope of the text suggest that it is the compilation of the work of a number of scholars (possibly including Asaṅga) during the fourth century CE. The work is divided into five major sections. The first and longest, comprising approximately half the text, is called the “Multiple Stages” (Bahubhūmika or Bhūmivastu) and sets forth the stages of the path to buddhahood in seventeen sections. The two most famous of these sections (both of which are preserved in Sanskrit and which circulated as independent works) are the [ŚRĀVAKABHŪMI](#) and the [BODHISATTVABHŪMI](#), the latter providing one of the most detailed discussions of the bodhisattva path ([MĀRGA](#)) in Indian literature. In this section, many of the central doctrines of the Yogācāra school are discussed, including the eight consciousnesses, the [ĀLAYAVIJÑĀNA](#), and the three natures ([TRISVABHĀVA](#)). The structures and practices of the paths of the [ŚRĀVAKA](#), [PRATYEKABUDDHA](#), and [BODHISATTVA](#) are presented here in the form that would eventually become normative among [MAHĀYĀNA](#) scholars in general (not just adherents of Yogācāra). The second section, “Compendium of Resolving [Questions]” (Viniścayasamgrahaṇī), considers controversial points that arise in the previous section. The third section, “Compendium of Interpretation” (Vyākhyānasamgrahaṇī), examines these points in light of relevant passages from the sūtras; it is interesting to note that the majority of the texts cited in this section are Sanskrit [ĀGAMA](#)s rather than Mahāyāna sūtras. The fourth, called “Compendium of Synonyms” (Paryāyasamgraha) considers the terms mentioned in the sūtras. The fifth and final section, “Compendium of Topics” (Vastusamgraha), considers central points of Buddhist doctrine, including [PRATĪTYASAMUTPĀDA](#) and [BODHI](#). This section also contains a discussion of [VINAYA](#) and (in the Chinese version) [ABHIDHARMA](#).

[Yogācāra-Svātantrika-Madhyamaka](#). (T. Rnal ’byor spyod pa’i dbu ma rang rgyud pa). According to Tibetan exegetes, who coined the term, one of the two branches of the [SVĀTANTRIKA](#) school of [MADHYAMAKA](#), together with the [SAUTRĀNTIKA-SVĀTANTRIKA-MADHYAMAKA](#). Its main proponents include [ŚĀNTARAḶSITA](#) and [KAMALAŚĪLA](#). Like [YOGĀCĀRA](#), the school holds that external objects do not exist and that objects are of the nature of consciousness. Like [MADHYAMAKA](#), the school holds that consciousness is empty of true existence. In its presentation of the three vehicles ([TRIYĀNA](#)), it correlates each vehicle with a

different wisdom, thus bringing together the views of the [HĪNAYĀNA](#), Yogācāra, and Madhyamaka. In order to achieve liberation from rebirth as an [ARHAT](#), the [ŚRĀVĀKA](#) must understand that a perduring self ([ATMAN](#)) does not exist. A [PRATYĒKABUDDHA](#) must understand that objects, and hence the external world, do not exist separately from the consciousnesses that perceive them, thereby abandoning the [GRĀHYAGRĀHAKAVIKALPA](#), the misconception of there being a bifurcation between subject and object. In order to achieve buddhahood, the [BODHISATTVA](#) must understand the emptiness ([ŚŪNYATA](#)) of all phenomena.

yogatantra. (T. mal 'byor rgyud). One of the four traditional Indian categories of tantric texts. In a late Indian categorization of Buddhist [TANTRA](#), a hierarchy was established that placed texts into one of four categories, in descending order: [ANUTTARAYOGATANTRA](#), yogatantra, [CARYĀTANTRA](#), and [KRIYĀTANTRA](#). The precise meaning of these categories, their parameters, and their contents were widely discussed, especially in Tibet. In one influential description, yogatantra was said to emphasize internal yoga over external ritual practice and therefore did not employ the practice of sexual union. An examination of texts included in this category shows, however, that this description is somewhat arbitrary. Important texts classed as yogatantras include the [SARVATATHĀGATATATTVASAMGRAHA](#), the [MAÑJUŚRĪMŪLAKALPA](#), the [SARVADURGATIPARIŚODHANATANTRA](#), and the [VAJRAŚĒKHARA](#). [MANDALAS](#) with the buddha [VAIROCANA](#) as the central deity occur often in the yogatantras.

yogin. (T. mal 'byor pa; C. xiuxing ren; J. shugyōnin; K. suhaeng in 修行人). A male practitioner of [YOGA](#) (generally in the generic sense of meditative practice) who has gained some level of attainment in his practice. The term can be used to refer to any advanced Buddhist practitioner, although it refers especially to advanced practitioners of Buddhist [TANTRA](#).

yoginī. (T. mal 'byor ma). A female practitioner of [YOGA](#), or contemplative practice, but used especially to refer to female adepts of Buddhist [TANTRA](#), particularly those who engage in tantric rituals (including sexual rituals) with tantric [YOGINS](#). The term is sometimes synonymous with [DĀKINĪ](#).

yoginītantra. (T. mal 'byor ma'i rgyud). Also known as “mother tantras” ([MĀTRATANTRA](#)) and “wisdom tantras” (T. shes rab kyi rgyud), one of the two categories into which the [ANUTTARAYOGATANTRAS](#) are divided, the other being “father tantras” ([PITRATANTRA](#)). Developing in India from the [SIDDHA](#) tradition, the

yoginītantras apparently receive this name because the majority (and in some cases all) of the deities in the tantra's [MANDALA](#) are female. According to a traditional explanation, these tantras emphasize wisdom ([PRAJÑĀ](#)), especially the mind of clear light ([PRABHĀSVARACITTA](#)), while father tantras emphasize method ([UPĀYA](#)), especially the illusory body ([MĀYĀDEHA](#)). See [CAKRASAMVARATANTRA](#).

[yogipratyakṣa](#). (T. rnal 'byor mngon sum; C. dingguan zhi; J. jōkanchi; K. chōnggwan chi 定觀知). In Sanskrit, “yogic direct perception”; a specific variety of direct perception ([PRATYAKṢA](#)) that is typically presumed to derive from meditative practice ([BHĀVANĀ](#); [YOGA](#)). A direct intuition of the real obtained through meditative practice, this type of understanding was accepted as a valid means of knowledge by most of the traditional Indian religious schools. In Buddhism, the psychological analysis of the notion of yogipratyakṣa and the related yogijñāna (yogic knowledge or cognition) was undertaken by [DHARMAKĪRTI](#) (c. 600–670) in his [PRAMĀNAVĀRTTIKA](#) and [NYĀYABINDU](#), as well as by his commentators. Dharmakīrti's predecessor [DIGNĀGA](#) (c. 480–540) had posited that there were only two reliable sources of knowledge ([PRAMĀNA](#)): direct perception ([PRATYAKṢA](#)) and logical inference ([ANUMĀNA](#)). Dharmakīrti, however, subdivided direct perception (pratyakṣa) into four subtypes, viz., sensory cognition (indriyajñāna), mental discrimination ([MANOVIJÑĀNA](#)), self-awareness ([SVASAMVEDANA](#)), and yogic cognition (yogijñāna). In Dharmakīrti's analysis, yogic cognition (yogijñāna) is a form of yogic perception (yogipratyakṣa), because it fulfills the two conditions of perception (pratyakṣa): (1) it is devoid of conceptual construction ([KALPANĀ](#)); and (2) it is a cognition that is “nonerroneous” (abhrānta), viz., real. The treatment of yogipratyakṣa in the literature thus focuses on how yogipratyakṣa fulfills these two conditions of perception. Yogic knowledge is devoid of conceptual construction (kalpanā), Dharmakīrti maintains, because it is nonconceptual (akalpa; [NIRVIKALPA](#)) and thus “vivid” or “distinct” (spaṣṭa). This type of perception is therefore able to perceive reality directly, without the intercession of mental images or concepts. Since yogic cognition is said to be devoid of conceptual construction, this raises the issue of its second condition, its lack of error. Why is meditatively induced perception true and reliable? How does a meditator's yogic perception differ from the hallucinations of the deranged, since both of them presume they have a vivid cognition of an object? The reason, Dharmakīrti maintains, is that the objects of yogic knowledge are “true” or “real” (bhūta; sadbhūta), whereas hallucinations are “false” or “unreal” objects (abhūta; asadbhūta). The only true

objects of yogic knowledge offered by Dharmakīrti are the [FOUR NOBLE TRUTHS](#): that is, the perception of these truths is true and reliable because they enable one to reach the goal of enlightenment, not because they involve a perception of an ultimate substance. In this sense, Dharmakīrti’s understanding of yogijñāna is more focused on the direct realization of the soteriological import of the four noble truths than on extraordinary sensory ability. Therefore, yogic direct perception is qualitatively different from the various forms of clairvoyance that are the byproducts of deep states of concentration that may be achieved by both Buddhist and non-Buddhist practitioners. Yogipratyakṣa is a form of insight ([VIPAŚYANĀ](#)) possessed only by noble persons ([ĀRYAPUDGALA](#)); and among the five paths it occurs only on the path of vision ([DARŚANAMĀRGA](#)) and above. See also [DARŚANA](#).

yojana. (T. dpag tshad; C. youxun; J. yujun; K. yusun 由旬). In Sanskrit, a “league”; a standard measure of distance in ancient India, and often used in Buddhist texts; it is said to be the distance a yoked team of oxen could travel in one day. Modern estimates of this distance vary widely, with the figure of eight miles often provided as an approximation, although estimates of from four to ten miles (six to sixteen kilometers) are also found.

Yōkan. (永觀) (1032–1111). Japanese [VINAYA](#) master of the Sanronshū (C. [SAN LUN ZONG](#)); also known as Eikan. Yōkan wrote two important works on [PURE LAND](#) doctrine known as the *Ōjōjūin* and the *Ōjōkōshiki*. In contrast to the [TENDAISHŪ](#) and [SHINGONSHŪ](#) interpretation of the practice of [NENBUTSU](#) (C. [NIANFO](#)) as the contemplation of the buddha [AMITĀBHA](#), Yōkan emphasized instead the efficacy of the vocal recitation of name of Amitābha ([NAMU AMIDABUTSU](#)). Doctrinally, Yōkan supported the view that enlightenment and afflictions, like buddhas and human beings, are not two but of a single essence. Yōkan or Eikan is also well known for the monastery in Kyōto that took his name, Eikandō, which is also called Zenrinji.

Yokawa. (横川). The northern of the three main subcomplexes of the [TENDAISHŪ](#) (C. [TIAN TAI ZONG](#)) monastery [ENRYAKUJI](#) on [HIEIZAN](#) in Japan. In 848, the Japanese pilgrim-monk [ENNIN](#) established the Shūryōgon’in complex in Yokawa; subsequent expansion projects were undertaken by the monks [RYŌGEN](#) and [GENSHIN](#). The Yokawa complex is famous for its central hall, now known as the Yokawa chūdō, also founded in 848, and the Eshin’in (or Eshindō) established by Genshin, which came to function as a special hall for practicing

nenbutsu (C. [NIANFO](#)).

Yona. One of nine adjacent lands (P. *paccantadesa*) converted to Buddhism by missionaries dispatched by the elder [MOGGALIPUTTATIṢṢA](#) at the end of the third Buddhist council (see [COUNCIL, THIRD](#)), which was held in [PĀTALIPUTRA](#) during the reign of [AŚOKA](#) in the third century BCE. The region is generally identified as located in northwest India, homeland of the Bactrian Greeks, and is also known as Yonakā or [YAVANA](#). Yona was converted by the elder Mahārakkhita, who preached the *Aggikkhandhopamasutta*. The third Buddhist council at Pāṭaliputra, and the nine Buddhist missions are known only in [STHAVIRANIKĀYA](#) sources and are first recorded in the fifth-century [DĪPAVAMSA](#).

Yōndam Yuil. (蓮潭有一) (1720–1799). Korean [SŎN](#) master and exegete during the Chosŏn dynasty; also known as Mui. Shortly after his parents' death in 1737, Yōndam became a student of the monk Sŏngch'ŏl (d.u.) at the monastery of Pŏpch'ŏnsa on Mt. Sŏngdal and received the monastic precepts the next year from the [VINAYA](#) master Anbin (d.u.). In 1739, he began scriptural studies under the Sŏn master Pyŏkha Taeu (1676–1763), which he continued under Yongam Ch'ejo (1714–1779) and Sŏlp'a Sangŏn (1707–1791). In 1741, Yōndam began training in Sŏn meditation under Hoam Ch'ejŏng (1687–1748) and eventually became his disciple. Yōndam established himself as a talented exegete of Sŏn materials and was installed as the abbot of the monastery of Sŏbongsa in 1779. He left many writings, including the *Imha nok*, *Chabo haengŏp*, *Tosŏ kwamok pyŏngip sagi*, *Sŏnyo sagi*, *Sŏjang sagi*, *Wŏn'gak sagi*, *Simsŏng non*, and others. In his influential *Imha nok*, Yōndam addressed the anti-Buddhist polemics of the Confucian scholars. His “personal notes” (sagi) on the [CHANYUAN ZHUQUANJI DUXU](#), [DAHUI SHUZHUANG](#), [CHANYAO](#), and [YUANJUE JING](#) are still widely used in Korean monastic seminaries, or kangwŏn.

yōndŭng hoe. (燃燈會). In Korean, “lantern-lighting ceremony”; a Korean Buddhist celebration that originated sometime during the Koryŏ dynasty. To celebrate the lunar New Year, lanterns were lit on the fifteenth day of the first lunar month and kept lit for two nights. Although King Sŏngjong (r. 982–997) banned the ceremony, the ban was lifted in the first year of King Hyŏnjong's (r. 1010–1031) reign and the ceremony was held again on the fifteenth day of the second lunar month and continued to be held on the second month from that point onward. In 1352, the celebration of the yōndŭng hoe took place in the palace on the traditional East Asian date of the Buddha's birthday (the eighth

day of the fourth lunar month) with one hundred monks in attendance, and the event was subsequently held on the Buddha's birthday throughout the remainder of the Chosŏn dynasty. This custom of lighting lanterns to celebrate the Buddha's birthday continues today in Korea.

yong. (J. yū; K. yong 用). In Chinese, “function,” or “application”; a term often deployed in the East Asian religious traditions, including Buddhism, as a philosophical pair with “essence” ([TI](#)). Chinese Daoist and “Dark Learning” ([XUANXUE](#)) texts first imbued the term with philosophical implications: the *Daode jing* refers to yong as the “attributes” of the way, and the *Daodejing zhu*, Wang Bi's (226–249) commentary to the text, employs the term to indicate the functions or attributes of “nonbeing” ([WU](#)) or “voidness” (xu). However, yong, along with its companion ti, was not widely used until the Buddhists adopted both terms to provide a basic conceptual frame for reality or truth. For example, the [SAN LUN ZONG](#) master [JIZANG](#) (549–623) used ti and yong to explicate his theory of the middle way ([MADHYAMAPRATIPAD](#)). He connected the middle (zhong) to ti, which he described as “neither ultimate nor conventional” (feizhen feisu), and the provisional (jia) to yong, which he described as “ultimate and conventional” (zhensu). The ti and yong pair was often used in the [HUAYAN](#), [TIANAI](#), and [CHAN](#) traditions. [GUIFENG ZONGMI](#) (780–841), a Tang-dynasty master of both the [HUAYAN ZONG](#) and Heze Chan traditions, provided a systematic explanation for yong and ti, based on the [DASHENG QIXIN LUN](#) (“Awakening of Faith According to the Mahāyāna”). In particular, he distinguished between two different types of function in his theory of mind: the “inherent function of the self-nature” (zixing benyong), which he called “numinous awareness” ([LINGZHI](#)), and the responsive functions that accord with conditions (suiyuan yingyong), which he described as the various mental functions that derive from the inherent function of the mind. Many Chinese and Korean Neo-Confucian thinkers, such as Cheng Yi (1033–1107), Zhu Xi (1130–1200), and Yi Hwang (1501–1570), applied Zongmi's interpretation of this pair to their own philosophical systems.

Yongjia Xuanjue. (J. Yōka Genkaku; K. Yōngga Hyōn'gak 永嘉玄覺) (675–713). Chinese [CHAN](#) monk renowned for his writings on meditation, also known as Mingdao, Yishujue, and Great Master Zhenjue (True Awakening); Yongjia is his toponym, the name of his hometown in Zhejiang province. Yongjia made a name for himself at a young age as an expert on meditation and the [TIANAI](#) practices

of calmness and insight (see [ŚAMATHA](#) and [VIPĀŚYANĀ](#)). He is said to have later received a seal of approval ([YINKE](#)) from the sixth patriarch ([LIUZU](#)) of Chan, [HUINENG](#), after studying under the master for only one day and a night; hence, his cognomen Yishujue (Single-Night Enlightened, or Overnight Guest). His teachings are primarily known through the influential works attributed to him, such as the [ZHENGDAO GE](#) and *Yongjia ji*. Yongjia was given the posthumous title Great Master Wuxiang (No Marks).

[Yongjusa](#). (龍珠寺). In Korean, “Dragon Pearl Monastery”; the second district monastery ([PONSA](#)) of the contemporary [CHOGYE CHONG](#) of Korean Buddhism, located on Mt. Hwa in Kyōnggi province. The temple was constructed in 854 and originally named Karyangsa. It was rebuilt in 1790 to serve as the royal tomb of Prince Sado (1735–1762), the father of King Chōngjo (r. 1776–1800). During the Japanese colonial period (1910–1945), Yongjusa became one of thirty-one head monasteries ([PONSA](#)) and it managed forty-nine branch temples (malsa) in several regions. A monks’ training school was established in 1955, followed by a meditation hall in 1969. Yongjusa’s main shrine hall ([TAEUNG CHŎN](#)) was constructed in 1790 and enshrines images of the buddhas [ŚĀKYAMUNI](#), [BHAIŚAJYAGURU](#), and [AMITĀBHA](#). Other cultural properties at the site include the main temple bell, bronze censers, and a hanging painting of the Buddha ([KWAEBUL](#)).

[yongmaeng chōngjin](#). (S. ārabdhavīrya; T. brtson ’grus rtsom pa, C. yongmeng jingjin; J. yūmyōshōjin 勇猛精進). In Korean, “ferocious effort”; an especially rigorous period of practice performed during a [SŎN](#) (C. [CHAN](#)) meditative retreat (K. kyōlche; C. [JIEZHI](#)) in Korea. The term most commonly refers to a one-week period during the winter retreat and leading up to the enlightenment day of the Buddha (Puch’ōnim sōngdo il) on the eighth day of the twelfth lunar month (usually in early January), during which all the monks (or nuns) in the meditation hall will undertake the ascetic practice (see [DHUTAṄGA](#)) of constantly sitting and never lying down to sleep (K. [CHANGJWA PURWA](#)) for the entire seven days. This practice is a ritual reenactment of the Buddha’s own final fervent effort to awaken. The phrase has also come to refer more generally to an intense session of meditation carried out by a small group of elite monks during a three-year retreat (samnyōn kyōlsa). See also [SESSHIN](#); [RŌHATSU SESSHIN](#).

[Yongming Yanshou](#). (J. Yōmei Enju; K. Yōngmyōng Yōnsu 永明延壽) (904–975). Chinese [CHAN](#) master in the [FAYAN ZONG](#) during the Five Dynasties and

Song dynasty periods; also known as Chongxuan and Baoyizi. Yongming was a native of Lin'an prefecture in Zhejiang province. At the age of twenty-seven, Yongming left his post as a minor official to become a monk under Cuiyan Lingcan (d.u.), a disciple of the Chan master [XUEFENG YICUN](#) (822–908); he subsequently studied under Tiantai Deshao (891–972) and inherited his Fayan lineage. Beginning in 952, Yongming served as abbot of a series of different monasteries, including Zishengsi on Mt. Xuedou, Lingyinsi (at the request of the king of Wuyue), and Yongmingsi, whence he acquired his toponym. Yongming was renowned for his advocacy of the simultaneous cultivation of Chan meditation and [Nianfo](#) (recitation of the Buddha's name) and for his magnum opus [Zongjing lu](#), a massive Chan genealogical history, in one hundred rolls. His writings also include the famous [Wanshan Tonggui ji](#) and the [Weixin jue](#). Although Yongming's Fayan lineage declined in China during the Song dynasty, thirty-six envoys sent by the Koryŏ king to study under Yongming returned with his teachings to Korea, where the line continued to flourish. Yongming was posthumously given the title Chan master Zhijue (Wise Awakening).

[Yongningsi](#). (J. Eineiji; K. Yŏngnyŏngsa 永寧寺). In Chinese, "Eternal Peace monastery"; one of the most important monasteries in the Northern Wei capital of Luoyang. After the Wei rulers moved the Chinese capital to Luoyang, Empress Dowager Ling, the birth mother of Emperor Xiao Mingdi (r. 515–528), began construction of Yongningsi in 516. According to the [Luoyang Qielan ji](#), Yongningsi was a grand complex that could house more than a thousand monks and was located to the west of the imperial highway and south of the Changhe gate. In the northern precinct of the monastery was a Buddha hall, which housed various golden images, and to the south, a triple-gated tower more than two hundred feet in height. A nine-story pagoda that rose a thousand feet supported a tall golden pole with golden disks to collect the dew. Golden bells were also hung from the pagoda. Since it overlooked the palace, only Emperor Xiao Mingdi and the Empress Dowager were allowed to climb the pagoda to gaze at the entire capital. All the scriptures and paintings from foreign countries available at the time are said to have been stored at the monastery. The eminent translator [Bodhiruci](#) also translated many scriptures while in residence at Yongningsi. The monastery was devastated by a fire and was left in ruins after the capital was moved again to Ye. Several restorations were made during the Sui and Tang dynasties, but the monastery remains in ruins today.

Yöngsanjae. (靈山齋). In Korean, “Vulture Peak Ceremony”; a Korean Buddhist rite associated with the [SADDHARMAPUNḌARĪKASŪTRA](#) (“Lotus Sūtra”), which has been performed in Korea since the mid to late Koryŏ dynasty (918–1392). This elaborate ritual is a loose reenactment of the *Saddharmapuṇḍarīkasūtra* and is intended to depict the process by which all beings, both the living and the dead, are led to enlightenment. Its performance often occurs in conjunction with the forty-ninth day ceremony (K. sasipku [il] chae; C. [SISHIJU \[RI\] ZHAI](#)), which sends a deceased being in the intermediate transitional state ([ANTARĀBHAVA](#)) on to the next rebirth. The Yöngsanjae is renowned for including the most complete repertoire of Buddhist chant and dance preserved in the Korean tradition. The rite may last for between one day and a week, although it is rare nowadays to see it extend beyond a single day; briefer productions lasting a couple of hours are sometimes staged for tourists. The Yöngsanjae is protected through the Korean Cultural Property Protection Law as an intangible cultural asset (Muhyŏng Munhwajae, no. 50), and the group responsible for protecting and preserving the rite for the future consists of monks at the monastery of [PONGWŌNSA](#) in Seoul, the headquarters of the [T’AEGO CHONG](#). The monks at the monastery also train monks and nuns from other orders of Buddhism, as well as laypeople, in different components of the rite. In recent years, the dominant [CHOGYE CHONG](#) of Korean Buddhism has also begun to perform the Yöngsanjae again, thanks to training from the Pongwōnsa specialists in the tradition. ¶ The Yöngsanjae is held in front of a large [KWAEBUL](#) (hanging painting) scroll depicting [ŚĀKYAMUNI](#) teaching at Vulture Peak ([GRDHRAKŪTAPARVATA](#)), delivering the *Saddharmapuṇḍarīkasūtra* to his followers. A day-long version of the ceremony starts with bell ringing and a procession escorting the attending spirits in a palanquin, which then proceeds to a ceremonial raising of the kwaebul. The rest of the day is made up of the following sequence of events: chanting spells (DHĀRANĪ) to the bodhisattva [AVALOKITEŚVARA](#) (K. Kwanseŭm posal); the cymbal dance, or [PARACH’UM](#), as monks chant the *Ch’önsu kyŏng* (C. [QIANSHOU JING](#)) dedicated to the thousand-handed incarnation of Avalokiteśvara (see [SĀHASRABHUJASĀHASRANETRĀVALOKITEŚVARA](#)); [PŎMP’AE](#); purification of the ritual site (toryanggye), during which the butterfly dance, or [NABICH’UM](#), is performed to entice the dead to attend the ceremony while the pŏmp’ae chants entreat the three jewels (RATNATRAYA) and dragons ([NĀGA](#)) to be present; the dharma drum dance, or [PŎPKOCH’UM](#), during which a large drum is beaten to awaken all sentient beings; a group prayer to the Buddha and bodhisattvas, where everyone in attendance has the chance to take refuge in the three jewels

(ratnatraya); an offering of flowers and incense (hyanghwagye) to the Buddha and bodhisattvas is made by the nabich'um dancers, followed by offering chants; a chant hoping that the food offerings on the altar will be sufficient as the parach'um is performed again together with four dhāraṇī chants; placing the offerings on the altar while chanting continues; culminating in a transfer of merit (kongdökkye) to all the people in attendance, including sending off the spiritual guests of the ceremony. The siktang chakpöp, an elaborate ceremonial meal, is then consumed. A recitation on behalf of the lay donors who funded the ceremony (hoehyang üisik) concludes the rite.

[Yongsöng Chinjong](#). (龍城震鐘) (1864–1940). Korean monk during the Japanese colonial period (1910–1945), also known as Paek Yongsöng; leader of a conservative group of monastic reformers, and one of the thirty-three signatories to the Korean Declaration of Independence in 1919. Ordained at the monastery of [HAEINSA](#) in 1879, he received full monastic precepts five years later and became a disciple of Taeün Nango (1780–1841) at the hermitage of Ch'ilburam. Later, he had a great awakening while he was studying the [JINGDE CHUANDENGLU](#) at the monastery of [SONGGWANGSA](#), where he became a disciple of the [SÖN](#) master [HWANSÖNG CHIAN](#). One year after Korea was annexed by Japan, he established the monastery of Taegaksa and a Sön center (Sönhagwön) in Seoul in an attempt to propagate Buddhism among a wider public. On March 1, 1919, he signed the Korean Declaration of Independence as a representative of the Buddhist community and was consequently incarcerated by the Japanese colonial government for eighteen months. During his year and a half in prison, he translated many sūtras (such as the voluminous [AVATAMSAKASŪTRA](#), or *Hwaömgöng*) from literary Chinese into han'gül, the Korean vernacular script, in order to make more Buddhist texts accessible to ordinary Koreans. After his release from prison in March 1921, he established a community known as the Taegakkyo (Teaching of Great Awakening) and a translation center called Samjang Yökhoe (Society for Translating the [TRIPITAKA](#)), and devoted most of his time to the translation of Buddhist scriptures. In 1928 he published the journal *Mua* (“No Self”) and with [HANYÖNG CHÖNGHO](#) also published the journal *Puril* (“Buddha Sun”). In May 1929, he and 127 other monks submitted a petition to the Japanese colonial government asking for the restoration of the tradition of celibacy in the Buddhist monasteries. Because of his interest in ensuring the continuance of the [BHIKSU](#) and [BHIKSUNĪ](#) traditions, Yongsöng personally established many ordination platforms and transmitted the complete

monastic precepts (kujokkye) several times during his career. He also stressed the need for monasteries to be self-sustaining economically. In accordance with his plan for self-sustenance, he participated in the management of a mine in Hamgyōng province, and in 1922, he bought some land in Manchuria and ran a farm on the compounds of a branch of the Taegakkyo. He also started a Ch'amsōn Manil Kyōlsahoe (Ten-Thousand Day Meditation Retreat Society) at the monastery of Ch'ilbalsa and attracted many followers from other monasteries. Yongsōng was a prolific writer who left behind many works, including his famous *Kwiwōn chōngjong* (“The Orthodox Teaching that Returns to the Source”), a tract that compared Buddhism to Confucianism, Daoism, and Christianity, a modern twist on the old “three teachings” syncretism of medieval East Asian philosophy. This work was one of the first attempts by Buddhists to respond to the inroads made by Christianity in modern Korea. In his treatment, he suggests that Confucianism presented a complete moral doctrine but was deficient in transcendental teachings; Daoism was deficient in moral teachings but half-understood transcendental teaching; Christianity was fairly close to the Buddhist ch'ōn'gyo (“teachings of [humans] and divinities”), which taught the kinds of meritorious actions that would lead to rebirth in heavenly realms but was completely ignorant of the transcendental teaching. Only Buddhism, Yongsōng concluded, presented all facets of both moral and transcendental teachings. Yongsōng's other works include his *Kakhae illyun*, *Susim non*, and *Ch'ōnggong wōnil*. See also [IMWÖTKO](#).

[Yongzhong](#). (C) (J. Eichū; K. Yōngchung 永中) (d.u.). Yuan-dynasty [CHAN](#) master in the [LINJI ZONG](#), also known as Jueji Yongzhong, and author of the [ZIMEN JINGXUN](#).

[yoni](#). (T. skye gnas; C. sheng; J. shō; K. saeng 生). In Sanskrit and Pāli, “modes of birth”; four modes by which sentient beings are born into the three realms of existence ([TRAIDHĀTUKA](#)): (1) oviparous birth (aṇḍajayoni), viz., beings born from eggs, such as birds, reptiles, fish, and insects; (2) viviparous birth (jarāyujayoni), viz., beings born from a womb, such as mammals and human beings; (3) moisture-born (saṃsvedajayoni), viz., beings such as maggots generated by rotten meat or mosquitoes born from swamp water, which are understood to be born as the result of the combination of heat and moisture; (4) metamorphic birth ([UPAPĀDUKAYONI](#)), viz., spontaneously generated beings, such as divinities ([DEVA](#)), hungry ghosts ([PRETA](#)), denizens of hell ([NĀRAKA](#)), and those residing in

the intermediate state ([ANTARĀBHAVA](#)). In some interpretations, even beings generally classified in one category may in certain circumstances be born through other modes. For example, although human beings are viviparously born, the five hundred sons of the king of Pañcāla, one of the sixteen ancient kingdoms of India, are said to have been born from eggs, King Māndhātṛ was born from moisture, and the first humans to appear at the beginning of the [KALPA](#) are born by metamorphosis. Among animals, although the first three modes of birth are most common, there are also some animals born by metamorphosis, such as [NĀGAS](#) and [GARUDAS](#). Finally, among beings that are born through metamorphosis, there are certain types of preta who are said to be born viviparously.

[yoniśomanaskāra](#). [alt. yoniśomanasikāra] (P. yonisomanasikāra; T. tshul bzhin yid la byed pa; C. ruli zuoyi/zheng siwei; J. nyorisai/shōshiyui; K. yōri chagŭi/chōng sayu 如理作意/正思惟). In Sanskrit, “systematic attention”; attention directed to an object or a phenomenon purposely and thoroughly, without becoming entranced by its external marks ([LAKSANA](#)) and secondary characteristics ([ANUVYAÑJANA](#)). The term is used in the context of meditation to refer to the thoroughgoing reflection in which one traces an object or a phenomenon back to its cause or origin, so that one perceives how it arises and perishes in accordance with conditions. Thus, yoniśomanaskāra ultimately refers to attention directed to the [FOUR NOBLE TRUTHS](#), which reveals that the things of this compounded world are fundamentally impermanent ([ANITYA](#)), suffering ([DUHKHA](#)), and nonself ([ANĀTMAN](#)). While unsystematic attention ([AYONIŚOMANASKĀRA](#)) to the characteristics of sensory objects creates false views, craving, and eventually subjection to the objective order of [SAMŚĀRA](#), systematic attention instead brings this unsystematic attention to an end so that the practitioner perceives the true nature of things. Thus, because of systematic attention, as yet unarisen erroneous views ([MITHYĀDRSTI](#)) do not arise, already arisen ones cease, unarisen right views arise ([SAMYAGDRSTI](#)), and already arisen ones increase. Systematic attention is thus foundational to the path that leads to liberation from saṃsāra. See also [YUKTI](#).

[yōnji](#). (C. ranzhi; J. nenshi 燃指). In Korean, “finger burning.” Although not officially sanctioned by the Korean Buddhist [SAMGHA](#), the ascetic practice of finger burning is sometimes performed by a handful of devoted Korean monks and nuns. Unlike a similar Chinese practice, the practice of finger burning is not

performed in the context of ordination, and is held in high regard. The rationale for such a practice is often traced to the self-immolation of the bodhisattva [BHAIŠAJYARĀJA](#) in the [SADDHARMAPUNĀRĪKASŪTRA](#) and the bodhisattva [SADĀPRARUDITA](#)'s self-mutilation in the [ASTASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#). See also [DEHADĀNA](#); [SHESHEN](#).

[yon mchod](#). [alt. mchod yon] (yön chö). In Tibetan, “priest-patron,” a term used to describe the relationship between various Tibetan Buddhist hierarchs and Mongol, Manchu, and Chinese rulers. The compound is composed of abbreviations of two terms. The first, “yon bdag,” connotes a powerful benefactor or patron, often a political or military leader. The second “mchod gnas” connotes a religious official, such as a court chaplain. The relationship between Tibetan hierarchs and Mongol rulers is traced to the meeting of [SA SKYA PANDITA](#) and Godan Khan (1206–1251, the grandson of Genghis Khan). When Mongol troops invaded Tibet, Sa skya Paṇḍita led a delegation to the Mongol court in 1247, during which he cured Godan Khan of an illness and offered him religious instruction. Subsequently, Godan Khan became his disciple, sparing Tibet from further invasion and granting control of central Tibet to Sa skya Paṇḍita. The classic example of the “priest-patron” relationship occurred when Sa skya Paṇḍita's nephew ['PHAGS PA BLO GROS RGYAL MTSHAN](#) served as religious preceptor and close advisor to Qubilai Khan. Other Tibetan Buddhist hierarchs would serve in similar roles during the Ming and Qing dynasties. As often invoked in Tibetan sources, in the “priest-patron” relationship, the Tibetan Buddhist lama provides religious instruction and spiritual protection (through the performance of tantric rituals) to the Mongol, Manchu, or Chinese chieftain and in return the Mongol, Manchu, or Chinese ruler provides material support and military protection, while allowing Tibet to remain independent.

[Yon tan rgya mtsho](#). (Yöntan Gyatso) (1589–1616). In Tibetan, “Ocean of Good Qualities”; the fourth [DALAI LAMA](#). The [DGE LUGS](#) monk [BSOD NAMS RGYA MTSHO](#), later recognized as the third Dalai Lama, visited the court of the Mongol ruler, the Altan Khan, in 1578. It was the Altan Khan who first used the term “Dalai Lama” to refer to this leader of the Dge lugs sect. The third Dalai Lama soon returned to Tibet but came back to Mongolia after the death of the Altan Khan, spending the next five years giving Buddhist teachings and founding monasteries before dying in 1588. His incarnation was identified by the Mongols among their own people, as the grandson of Altan Khan's successor. He was

given the name Yon tan rgya mtsho. He was thus the only Dalai Lama who was not ethnically Tibetan. The Dge lugs hierarchy in Tibet did not immediately recognize the Mongol as the incarnation of Bsod nams rgya mtsho. To assuage their concerns, a Mongolian delegation was sent to Tibet in 1600 to invite a group of Dge lugs dignitaries to come to Mongolia and administer the traditional tests to determine the boy's identity. After the tests convinced the Tibetan delegation that he was indeed the fourth Dalai Lama, they took the boy back to [LHA SA](#) in 1602, where he was ordained as a novice at the [JO KHANG](#). He received [BHIKSU](#) ordination in 1614 from his tutor [BLO BZANG CHOS KYI RGYAL MTSHAN](#), who would later become the first (or according to a different reckoning, the fourth) [PAN CHEN LAMA](#). Tibet was on the brink of civil war, with the king of Gtsang, a patron of the [KARMA BKA' RGYUD](#), seeking to control central Tibet, where the Dge lugs were in power with the support of the Mongols. Although the young fourth Dalai Lama appears not to have been involved in politics, the fact that he was a foreigner seems to have been resented in some quarters. He died of uncertain causes in 1616 at the age of twenty-seven. The close relations that developed between the Mongols and the Dge lugs sect as a result of his selection as Dalai Lama would be an important factor in the eventual political ascendancy of his successor, the fifth Dalai Lama, [NGAG DBANG BLO BZANG RGYA MSHO](#), in 1642.

[Yōsai](#). (J) (榮西). See [MYŌAN EISAI](#).

[Yose](#). (K) (了世). See [WŌNMYO YOSE](#).

[Yu](#). (J. U; K. U 于). Ethnikon used in China for monks who hailed from [KHOTAN](#) (transcribed as Yutian in Chinese), an Indo-European oasis kingdom at the southern edge of the Takla Makhan desert in Inner Asia, along the northern slope of the Kunlun mountains. Khotan was a major center of Buddhism in Central Asia and an important conduit for the transmission of Buddhism from India to China along the [SILK ROAD](#).

Yuandeng. (C) (圓澄). See [ZHANRAN YUANDENG](#).

yuandun jiao. (J. endongyō; K. wōndon kyo 圓頓教). In Chinese, “perfect and sudden teaching”; one of the highest levels of the various doctrinal taxonomies (panjiao; see [JIAOXIANG PANSHI](#)) deployed in the [Tiantai Zong](#), [Huayan Zong](#), and sometimes the [Chan Zong](#). The Tiantai school first introduced the term to refer to the highest form of the teachings. In the Tiantai analysis, “perfect” refers to “perfect teaching” or “consummate teaching” ([YUANJIAO](#)), the last of the four types of teachings according to content (huafa sijiao), while “sudden” refers to the “sudden teaching” ([DUNJIAO](#)), the first of the four modes of exposition (huayi sijiao) (see [Tiantai Bajiao](#)). The compound “perfect and sudden teaching” thus refers to the consummate vision of the ultimate truth of Buddhism that is expounded all at once without any provisional or gradual expedients. In the Tiantai zong, this “perfect and sudden teaching” may refer either to (1) the teachings of the Tiantai school itself, which provide an approach to Buddhist soteriology in which every stage, condition, and thought, whether defiled or pure, becomes the basis of enlightenment since it represents the perfect median truth (see [SANDI](#)); or (2) the teachings of the [Avatamsakasūtra](#), in which the Buddha expounded his consummate and unadulterated vision of reality immediately after his enlightenment without any consideration of the ability of his audience to understand that vision. The Huayan school follows closely the Tiantai concept of yuandun jiao. The Huayan and [Chan](#) teacher [Guifeng Zongmi](#) (780–841), for example, refers to the perfect and sudden teaching as the “huayi dun” (sudden teaching according to the method of exposition), correlating it with the teaching of the dharma-realm of the mutual and unobstructed interpenetration between phenomenon and phenomena ([Shishi Wu'ai Fajie](#)). The Korean [Sōn](#) (Chan) master [Pojo Chinul](#) (1158–1210), based on the works of [Li Tongxuan](#) (635–730), interpreted the term as referring to the perfect and sudden enlightenment to the truth of nature origination ([Xingqi](#)), which occurs through understanding Huayan doctrine from a Sōn perspective. In the Chan tradition, therefore, the “perfect and sudden teaching” may refer to the highest form of the Buddhist teachings rather than to the teachings of any specific scholastic school ([Kyo](#)). See also [Wōndon Sōngbul Non](#).

yuanjiao. (圓教). In Chinese, “perfect/consummate teaching.” See [Huayan Wujiao](#).

Yuanjue jing. (J. Engakukyō; K. Wŏn’gak kyŏng 圓覺經). In Chinese, “Scripture of Perfect Enlightenment”; also known as *Dafangguang yuanjue xiuduoluo liaoyi jing*; an influential indigenous Chinese sūtra (see [APOCRYPHA](#)). The *Yuanjue jing* was purportedly translated by a certain Buddhatrāta (d.u.) at the monastery of [BAIMASI](#) in 693, but no Sanskrit or Tibetan equivalent is known to have existed and the scripture is now recognized as being an apocryphon. While in a special [SAMĀDHI](#) named “great illuminating repository of spiritual penetration” (shentong daguang mingzang), the Buddha is requested by twelve bodhisattvas including [MAÑJUŚRĪ](#), [SAMANTABHADRA](#), and [MAITREYA](#) to explain perfect enlightenment (yuanjue), the originally pure mind as its cause, and the different ways to cultivate it. The scripture focuses on [ŚAMATHA](#), [SAMĀPATTI](#), and [DHYĀNA](#) as the primary means of cultivation, and divides the spiritual capacity of sentient beings into three levels. The [TATHĀGATAGARBHA](#) and original-enlightenment ([BENJUE](#)) theories of the apocryphal [DASHENG QIXIN LUN](#) seem to have influenced the composition of the *Yuanjue jing*. The scripture was especially influential in the writings of the [CHAN](#) historian [GUIFENG ZONGMI](#), who wrote several commentaries and subcommentaries on the text, including his *Yuanjue jing lueshu*, *Yuanjue jing lüeshu chao*, *Yuanjue jing daochang xiuzheng yi*, *Yuanjue jing dashu*, and *Yuanjue jing dashu chao*. Zongmi also wrote manuals, no longer extant, on the use of the *Yuanjue jing* in repentance rituals. The *Yuanjue jing* is one of a number of Chan-related texts that were translated into Uighur Turkish in the [TURFAN](#) region.

Yuanmiao. (原妙). See [GAOFENG YUANMIAO](#).

Yuanming lun. (J. Enmyōron; K. Wŏnmyŏng non 圓明論). In Chinese, “Treatise on Perfect Illumination”; attributed to [AŚVAGHOSA](#), but almost certainly a transcription of a lecture by a teacher associated with the Northern school ([BEI ZONG](#)) in the nascent Chinese [CHAN](#) tradition. Several copies of this text have been discovered at [DUNHUANG](#), and a private copy is extant in Japan. The treatise consists of nine chapters written largely in catechistic format. The treatise elucidates the causes and results of the path, the nature of the [DHARMADHĀTU](#) as the manifestation of one’s own mind, false and correct views, the importance of [UPĀYA](#), and the practice of meditation. The *Yuanming lun* serves as an important source on the teachings of the early Chan tradition before its coalescence around the mythology of the “sixth patriarch” ([LIUZU](#)) [HUINENG](#) and the so-called Southern school ([NAN ZONG](#)).

Yuanren lun. (J. Genninron; K. Wōnin non 原人論). In Chinese, “Treatise on the Origin of Humanity”; by the eminent [HUAYAN](#) and [CHAN](#) scholiast [GUIFENG ZONGMI](#). A preface to this relatively short treatise was prepared by Zongmi, as was another by his lay disciple Pei Xiu (787?–860). The treatise largely consists of four chapters: exposing deluded attachments, exposing the partial and superficial, directly revealing the true source, and reconciling root and branches. In his critique of deluded attachments, Zongmi offers a response to the different Confucian and Daoist theories of the way ([DAO](#)), spontaneity (ziran), primal pneuma (yuanqi), and the mandate of heaven (tianming). Zongmi then briefly summarizes the teachings of the different vehicles of Buddhism, such as [HĪNAYĀNA](#) and [MAHĀYĀNA](#), and expounds their different approaches to reality. Relying on the teachings of the [AVATAMSAKASŪTRA](#), Zongmi finally offers a Buddhist alternative to the theories of the Confucian and Daoist critics: the [TATHĀGATAGARBHA](#) as the origin of humanity.

yuanrong. (J. ennyū; K. wōnyung 圓融). In Chinese, “consummate interfusion,” “perfectly interfused”; a term used in the [HUAYAN](#) and [TIANTAI](#) traditions to refer to the ultimate state of reality wherein each individual phenomenon is perceived to be perfectly interfused and completely harmonized with every other phenomena. Yuanrong is contrasted with “separation” ([GELI](#)), the understanding of reality in terms of the discriminative phenomena of the conventional realm. ¶ The concept of yuanrong is deployed soteriologically as one of the two modes of describing the bodhisattva path in the Huayan tradition, viz., the “approach of consummate interfusion” (yuanrong men), also known as the “approach of consummate interfusion and mutual conflation” ([YUANRONG XIANGSHE MEN](#)); this mode is contrasted with the “approach of sequential practices” ([CIDI XINGBU MEN](#)). The approach of sequential practices refers to the different stages in the process of religious training, which progress through the fifty-two stages of the bodhisattva path ([MĀRGA](#)). By contrast, the yuanrong men focuses instead on the principle of equivalency (pingdeng) and indicates the way in which any one stage of training subsumes all stages of the path, or how the inception of the path is in fact identical to its consummation. According to this mode of description, then, the completion of the ten stages of faith (shixin), a preliminary stage of the mārḡa in the Huayan tradition, is often stated to be identical to the achievement of buddhahood ([XINMAN CHENGFO](#)). In the Huayan school’s fivefold taxonomy of the teachings ([HUAYAN WUJIAO](#)) as systematized by [FAZANG](#) (643–712), the three vehicles are considered to represent the xingbu men, while the “consummate

teaching” ([YUANJIAO](#)), the final and highest level of teaching in this schema, corresponds to the yuanrong men. ¶ Yuanrong is also used in accounts of contemplation practice in the Huayan school, as, for example, in the “contemplation on the consummate interfusion of the three sages” (sansheng yuanrong guan), which was treated by both [CHENGGUAN](#) (738–839) and [LI TONGXUAN](#) (635–730). In this Huayan meditation, the bodhisattvas [MAÑJUŚRĪ](#) and [SAMANTABHADRA](#) represent the causal aspects of practice (yinfen), and the buddha [VAIROCANA](#), the fruition aspect (guofen); the consummate interfusion of the causal and effect aspects of practice thus indicates enlightenment. Samantabhadra and Mañjuśrī are juxtaposed as, respectively, the [DHARMADHĀTU](#) as the object of faith (suoxin) and the mind as the subject of faith (nengxin), as practice (xing) and understanding (jie), and as principle ([LI](#)) and wisdom (zhi). When these juxtaposed aspects are perfectly interfused with each other, the causal aspect is consummated and becomes perfectly interfused with the effect aspect. Thus Samantabhadra as the “empty [TATHĀGATAGARBHA](#)” (kong rulaizang) and Mañjuśrī as the “nonempty tathāgatagarbha” (bukong rulaizang) are interfused with Vairocana Buddha’s “comprehensive tathāgatagarbha” (zong rulaizang). ¶ In the Tiantai tradition, the “consummate interfusion of the three truths” (yuanrong sandi) is one of the two ways of interpreting the three truths ([SANDI](#)), viz., of emptiness (kongdi), provisionally real (jiadi), and the mean (zhongdi). The yuanrong sandi, also termed the “nonsequential three truths” ([BU CIDI SANDI](#)), refers to the notion that each truth (di) is endowed with all three of these truths together, and thus the particular and the universal are not separate from one another. This mode is distinguished from the “differentiated three truths” ([GELI SANDI](#)), also known as the “sequential three truths” (cidi sandi), where each truth is treated independently; in this mode, the first two truths represent the aspect of phenomena, while the last truth, of the mean, refers to the aspect of principle. In the Tiantai doctrinal taxonomy (see [TIANTAI BAJIAO](#); [WUSHI BAJIAO](#)), geli sandi and yuanrong sandi are said to correspond, respectively, to the “distinct teaching” (biejiao) and the “consummate teaching” (yuanjiao), the third and fourth of the “four types of teaching according to their content” (huafa sijiao) in the Tiantai doctrinal classification. ¶ In both the Huayan and Tiantai traditions, yuanrong is also employed as a defining characteristic of the “dharma realm” (fajie; S. dharmadhātu). The term “consummate interfusion of the dharma realm” (fajie yuanrong) describes both the infinitely interdependent state of the Huayan “dharmadhātu of the unimpeded interpenetration of phenomenon with phenomena” ([SHISHI WU’AI FAJIE](#)), as well as the Tiantai doctrine of “intrinsic

inclusiveness” (xingju), in which each individual phenomenon is said to be endowed with the [TRICHILIOCOSM](#) (SANQIAN DAQIAN SHIJIE; see [TRISĀHASRAMAHĀSĀHASRALOKADHĀTU](#)), which represents the entirety of existence in the Tiantai cosmology. The Huayan “dharmadhātu of the unimpeded interpenetration of phenomenon with phenomena” is systematized in the doctrine of the Huayan version of causality, the “conditioned origination of the dharmadhātu” ([FAJIE YUANQI](#)), and this Huayan causality of the dharmadhātu is also explained as the “consummate interfusion of the six aspects” ([LIUXIANG yuanrong](#)).

[yuanrong sanguan](#). (圓融三觀). In Chinese, “three contemplations of consummate interfusion.” See [SANGUAN](#).

[yuanrong xiangshe men](#). (圓融相攝門). In Chinese, “approach of consummate interfusion and mutual conflation.” See [YUANRONG](#).

[Yuanwu Keqin](#). (J. Engo Kokugon; K. Wōno Kūkkūn 圓悟克勤) (1062–1135). Chinese [CHAN](#) master in the [LINJI ZONG](#); also known as Wuzhuo and Foguo. Yuanwu was a native of Chongning, Pengzhou prefecture, in present-day Sichuan province (northwest of the city of Chengdu). Little is known about his early career, but Yuanwu eventually became a disciple of the Chan master [WUZU FAYAN](#). According to legend, Yuanwu became ill after leaving Wuzu’s side, and returned as Wuzu had predicted. Yuanwu then inherited Wuzu’s Linji lineage. While traveling in the south, Yuanwu befriended the statesman [ZHANG SHANGYING](#) (1043–1122) and also won the support of other powerful local figures, such as the governor of Chengdu. At their request, Yuanwu served as abbot of several monasteries, including Jiashansi and Daolinsi, where he lectured on the *Xuedou gonggu* by [XUEDOU CHONGXUAN](#). These lectures were later edited together as the [BIYAN LU](#) (“Blue Cliff Record”), an influential collection of Chan cases ([GONG’AN](#)). Yuanwu was honored with several titles: Emperor Huizong (r. 1100–1125) gave him the title Chan master Foguo (Buddha Fruition) and Gaozong the title Chan master Yuanwu (Consummate Awakening). The title Chan master Zhenjue (True Enlightenment) was also bestowed upon him. Among his hundred or so disciples, [DAHUI ZONGGAO](#), the systematizer of the [KANHUA CHAN](#) method of meditation, is most famous. Yuanwu’s teachings are recorded in the *Yuanwu Foguo chanshi yulu* and *Yuanwu chanshi xinyao*.

[yuganaddha](#). (T. zung ’jug; C. shuangru/shuangyun; J. sōnyū/sōun; K.

ssangip/ssangun 雙入/雙運). In Sanskrit and Pāli, lit., “yoked together,” sometimes translated as “union” or “joining.” The term is especially important in tantric literature, where it often refers to the union of two things, resulting in a state of nonduality ([ADVAYA](#)). However, the term appears in a variety of contexts where two elements are conjoined, including serenity ([ŚAMATHA](#)) and insight ([VIPAŚYANĀ](#)), wisdom ([PRAJÑĀ](#)) and method ([UPĀYA](#)), [SAMSĀRA](#) and [NIRVĀNA](#), male and female, and subject and object. In Pāli literature, the term appears especially in the context of treatments of samatha and vipassanā, both in practices in which the meditator alternates between the two and practices in which the two are unified.

Yuimae. (C. Weimo hui; K. Yuma hoe 維摩會). In Japanese, “[VIMALAKĪRTI](#) ceremony.” One of the three great ceremonies (Nankyō san[n]e) held in the ancient Japanese capital of Nara. In 656, when the senior courtier Nakatomi no Kamatari (an ancestor of the Fujiwara clan) became seriously ill, the Paekche nun Pōmmyōng (J. Hōmyō) advised Empress Saimei to sponsor a reading of the “Inquiry about Illness” chapter of the [VIMALAKĪRTINIRDEŚA](#) in order to speed his recovery. The reading was successful and, out of gratitude, Kamatari and his family subsequently sponsored a lecture on the sūtra in 658 to commemorate the construction of the new monastery of Sankaiji. This ceremony was transferred to the Hossōshū (C. [FAXIANG ZONG](#)) monastery of [KŌFUKUJI](#) in Nara in 712, where it was held periodically every two to five years; it is now observed annually on the tenth day of the tenth lunar month. For seven days, a lecture on the *Vimalakīrtinirdeśa* is offered to the public and offerings are made to the [SAMGHA](#).

Yujōmsa. (楡岾寺). In Korean, “Elm Hillock Monastery”; one of the four major monasteries located in the Diamond Mountains ([KŪMGANGSAN](#)) in present-day North Korea, and best known traditionally for its fifty-three buddha images. Yujōmsa claims to be one of the oldest monasteries on the Korean peninsula. According to its historical record, *Kūmgangsan Yujōmsa sajōkki*, written in 1297 by the Koryō official and diplomat Min Chi (1248–1326), icons of fifty-three buddhas drifted to the Silla seashore in the year 4 CE through the intercession of an Indo-Scythian [alt. Yuezhi, Rouzhi] king from the northwestern region of India. These images were originally cast by [MAÑJUŚRĪ](#) in the Indian city of [ŚRĀVASTĪ](#) and enshrined inside a large bell. After landing in Korea, the bell containing these fifty-three icons magically traveled inland and was eventually discovered in a branch of an elm tree by a Korean local official. To house these

icons, the Silla king Namhae Ch'ach'aung (r. 4–24 CE) ordered the construction of this monastery, which he named after the elm tree in which the bell was discovered. Despite this legend of the monastery's origins, however, the main construction work at Yujōmsa could not have begun before 1168. In the thirteenth century, during the late Koryō period, the monastery enjoyed the patronage of the Mongol–Korean court, which raised its political status and importance. The fifty-three buddhas of Yujōmsa remained a popular destination for both literati tourists and Buddhist pilgrims to the Diamond Mountains throughout the Chosŏn dynasty. When the site was surveyed in 1912 by the Japanese scholar Sekino Tadashi (1867–1935), only fifty small gilt bronze icons were displayed in the Nūngin pojŏn on a unique screen altar that was ornamented with meandering tree branches. In contrast to Min Chi's description of the iconography, various other images, including bodhisattvas and monastic figures, were included along with the buddha icons. Stylistically, forty-three individual figures could be dated to the Unified Silla period, and the remaining seven were determined to be post-Koryō products. This incongruent mixture of styles is due to continuous devastations of the images by fire and theft and their subsequent restorations. Yujōmsa burned to the ground during the Korean War (1950–1953) and the current whereabouts of the fifty-three icons are unknown.

Yujōng. (K) (惟政). See [SAMYŎNG YUJŎNG](#).

yukti. (P. yutti; T. rigs pa; C. daoli; J. dōri; K. tori 道理). In Sanskrit, “reasoning” or “argumentation”; the process of analytical reflection that results in correct understanding. The term often appears in conjunction with [ĀGAMA](#) (scripture), as criteria or tools deployed to verify a particular point of doctrinal correctness. Yukti is usually presumed to have two denotations in the literature, viz., “reasoning” and “rational principles,” although sometimes it is difficult to differentiate between these two senses in a particular text. ¶ The [MAHĀYĀNASŪTRĀLAMKĀRA](#), for instance, refers to yukti as one of the four types of provisional establishment (prajñaptivyavasthāna), that is, provisional establishment of dharma (dharmaprajñaptivyavasthāna), truth (satyaprajñaptivyavasthāna), reasoning (yuktiprajñaptivyavasthāna), and vehicle (yānaprajñaptivyavasthāna). Yukti is itself subdivided into four types, that is, the yukti of reference (apekṣāyukti), defined as systematic attention ([YONISŌMANASKĀRA](#)); efficacy (kāryakāraṇayukti), defined as right view together with its fruits (samyagdrṣṭiḥ phalānvitā); valid proof (upapattisāadhanayukti),

defined as analysis by means of correct cognition (pramāṇavicaya); and reality ([DHARMATĀ-yukti](#)), defined as the inconceivable ([ACINTYA](#)). ¶ In such texts as the [YOGĀCĀRABHŪMI](#), the [SAMDHINIRMOCANASŪTRA](#), and the [ABHIDHARMASAMUCCAYA](#), the four types of yukti are described as tools or means for investigating Buddhist teachings and yukti thus carries the denotation of “rational principles” (see [VYĀKHYĀYUKTI](#)). In these scriptures, the principle of dependence (apekṣāyukti) is defined as the principle of dependent origination ([PRATĪTYASAMUTPĀDA](#)); thus, in dependence on the seed, the shoot emerges. The principle of efficacy (kāryakāraṇayukti) is defined as the way in which particular causes are associated with specific effects; thus, visual consciousness affects vision but not hearing. The principle of valid proof (upapattisādhanayukti) is defined as the three types of valid knowledge ([PRAMĀNA](#)), that is, direct perception ([PRATYAKṢA](#)), logical inference ([ANUMĀNA](#)), and scripture (āgama). The principle of reality (dharma-tā-yukti) is defined as the generic properties and natures of dharmas, such as the property of water falling downward, or the sun rising in the east. The *Samdhinirmocanasūtra*’s emphasis on the third yukti of valid proof ultimately led to a narrowing of the term to refer to the three types of valid knowledge (pramāṇa). After [DIGNĀGA](#) (c. 480–540), who accepted only two pramāṇas—that is, direct perception (pratyakṣa) and logical inference (anumāna), but not scripture (āgama)—yukti is subsequently confined to only these two types of pramāṇas. In the [ABHIDHARMAKOŚABHĀSYA](#), Vasubandhu advocates that the wisdom obtained through reflection ([CINTĀMAYĪPRAJÑĀ](#)), the second of the three modes of wisdom (prajñā) (along with the wisdom obtained through listening/learning [[ŚRUTAMAYĪPRAJÑĀ](#)] and the wisdom obtained through meditative practice [[BHĀVANĀMAYĪPRAJÑĀ](#)]) is produced from investigation by means of yukti (yuktinidhyānajā). Since Vasubandhu presents all three modes of wisdom as arising from meditative concentration ([SAMĀDHI](#)), yukti in this context seems to have been understood in relation to meditative practice, not purely intellectual reasoning. ¶ The Pāli equivalent yutti, which appears in the [NETTIPPAKARANA](#), is presented as one of the sixteen categories (hārā) of scriptural exposition, referring to (logical) fitness, right construction, or correctness of meaning.

[yuktikāya](#). (T. rigs tshogs). In Sanskrit, literally “corpus of reasoning,” or “collection of reasoning”; a term used in the Indian and Tibetan traditions to refer collectively to six works that traditionally constitute [NĀGĀRJUNA](#)’s philosophical oeuvre. The six works are the [MŪLAMADHYAMAKAKĀRIKĀ](#),

[YUKTIŚASTIKĀ](#), [ŚŪNYATĀSAPTATI](#), [VIGRAHAVYĀVARTANĪ](#), [VAIDALYAPRAKARANA](#), and [RATNĀVALĪ](#). (Some versions list only five works in the corpus, eliminating the *Ratnāvalī*; others substitute the [AKUTOBHAYĀ](#) in place of the *Ratnāvalī* as the sixth work). This group of texts is often referred to in connection with the [STAVAKĀYA](#), or “corpus of hymns,” the devotional works attributed to Nāgārjuna. There are traditionally four works in this group of hymns, known collectively as the [CATUHSTAVA](#): the [LOKĀTĪTASTAVA](#), [NIRAUPAMYASTAVA](#), [ACINTYASTAVA](#), and [PARAMĀRTHASTAVA](#), although a number of other important hymns are also ascribed to Nāgārjuna. These two collections of Nāgārjuna’s works figure prominently in the “self-emptiness, other emptiness” ([RANG STONG GZHAN STONG](#)) debate in Tibetan Buddhism, where the parties disagree on the question of which corpus represents Nāgārjuna’s final view.

[Yuktiśastikā](#). (T. Rigs pa drug cu pa; C. Liushisong ruli lun; J. Rokujūju nyoriron; K. Yuksipsong yōri non 六十頌如理論). In Sanskrit, “Sixty Stanzas of Reasoning”; one of the most famous and widely cited works attributed to [NĀGĀRJUNA](#), traditionally counted as one of the texts in his “corpus of reasoning” ([YUKTIKĀYA](#)). Although lost in the original Sanskrit, the work is preserved in both Tibetan and Chinese; a number of the Sanskrit stanzas have however been recovered as citations in other works. Sixty-one stanzas in length, the work is a collection of aphorisms generally organized around the topic of [PRATĪYASAMUTPĀDA](#). It begins with the famous homage to the Buddha, “Obeisance to the King of Sages who proclaimed dependent origination, this mode by which production and disintegration are abandoned.” The work argues throughout that the world that is subject to production and disintegration is an illusion created by ignorance and that the path taught by the Buddha is the means to destroy this illusion and the suffering it creates. Individual stanzas are quoted by such commentators as [BHĀVAVIVEKA](#), [CANDRAKĪRTI](#), and [ŚĀNTARAKSITA](#) in support of some of the central debates in [MADHYAMAKA](#), such as whether [ARHATS](#) must understand the Madhyamaka conception of emptiness ([ŚŪNYATĀ](#)) in order to be liberated from rebirth and whether Nāgārjuna held that external objects do not exist (the thirty-fourth stanza can be read to suggest that he held this view).

[Yuktiśastikāvṛtti](#). (T. Rigs pa drug cu pa’i ’grel pa). “Commentary on [[NĀGĀRJUNA](#)’s] Sixty Stanzas of Reasoning,” by [CANDRAKĪRTI](#). See [YUKTIŚASTIKĀ](#).

[Yulan Guanyin](#). (C) (魚藍觀音). See [MALANG FU](#).

[yulanben](#). (T. yongs su skyob pa'i snod; J. urabon; K. uranbun 盂蘭盆). In Chinese, lit. “yulan vessel,” referring to the “ghost festival.” The Sinographs “yulan” have typically been interpreted by scholars to be a transcription of a hypothetical [BUDDHIST HYBRID SANSKRIT](#), Middle Indic, or perhaps even Iranian form [*ULLAMBANA](#), which is presumed to correspond to the Sanskrit avalambana (lit. “hanging downward,” “suspended”); the term refers to the “Ghost Festival,” a ritual that sought the salvation of beings condemned to the unfortunate fate of being “suspended” in hell. This explanation of yulan is questionable, however, since this connotation of the Sanskrit term avalambana is unknown in Indian Buddhist contexts. The Tibetan translation of yulanben as yongs su skyob pa'i snod, or “vessel of complete protection,” also does not fit any connotations of “hanging down”; the Tibetan rendering does, however, seem to fit better an alternate explanation of the derivation of yulan(ben) as the Buddhist Hybrid Sanskrit term ullumpana (sometimes mistakenly transcribed as ullumpana, ullumbana, etc.), lit. “rescuing, extracting [from an unfortunate fate].” The Sinograph “ben” (“bowl”) is less problematic: it refers to the bowl in which offerings are placed during the [PRAVĀRANĀ](#) festival in order to rescue one’s ancestors from their unfortunate destinies. A more recent hypothesis is that “yulan” is a transcription of the Sanskrit and Pāli term odana (cooked rice) and “ben” a native word for bowl; the compound “yulanben” is thus not a transcription of the hypothetical Sanskrit word ullambana but actually means a “rice bowl,” perhaps even a special kind of rice bowl for making offerings on the pravāraṇā day. The term yulanben is now used to refer to the “ghost festival,” a popular ceremony in medieval China, Korea, and Japan, when offerings were made to the [SAMGHA](#) of the ten directions ([DAŚADIŚ](#)) on behalf of one’s ancestors. A bowl was filled with all kinds of flavorful foods and fruits and offered on behalf of seven generations of one’s deceased parents and ancestors. The festival was held on the full moon of the seventh lunar month, when the saṃgha performed the pravāraṇā ceremony, ending the summer rains retreat ([VARŚĀ](#)). The origin myth and practices associated with the ghost festival are found in various sources, including popular stories known as [BIANWEN](#) and such Buddhist apocryphal scriptures as the [YULANBEN JING](#) and [BAO’EN FENGBEN JING](#) (“Sūtra for Offering Bowls to Repay Kindness”). The Japanese [BON FESTIVAL](#) (alt. Obon) derives from this term; it is celebrated in either mid-July or mid-August in order to honor the spirits of one’s deceased ancestors.

Yulanben jing. (T. 'Phags pa yongs su skyobs pa'i snod ces bya ba'i mdo; J. Urabongyō; K. Uranbun kyōng 孟蘭盆經). In Chinese, “Book of the Yulan Vessel”; an influential indigenous Chinese Buddhist scripture (see [APOCRYPHA](#)), often known in English as the *Ullambana Sūtra* or simply the *Yulanben Sūtra*. Along with the [BAO'EN FENGBEN JING](#) (“Scripture for Offering Bowls to Repay Kindness”), the *Yulanben jing* details the practice of the ghost festival ([YULANBEN](#)) and its origin myth. Little is known about the provenance of either text. Both are now generally presumed to be indigenous Chinese works, although some scholars continue to maintain that they are of Indian or Central Asian origin. They are thought to have been composed sometime between the fourth and fifth centuries and were included in the Chinese Buddhist canon as early as the sixth century. The origin myth recounted in the scripture describes the pious efforts of Mulian (S. [MAHĀMAUDGALYĀYANA](#)), one of the two main disciples of the Buddha, to save his mother from the tortures of her rebirth as a hungry ghost ([PRETA](#)). The Buddha explains to Mulian that it is impossible for an individual on his own to save his ancestors from their suffering; instead, one should place offerings in a bowl for the entire [SAMGHA](#) of the ten directions, and these offerings will be sufficient to liberate up to seven generations of one’s parents and ancestors from their unfortunate rebirths. At least six commentaries were written on the *Yulanben jing*, although only two survive, including an influential exegesis by [GUIFENG ZONGMI](#). The Tibetan translation of the scripture, made in the Chinese outpost of [DUNHUANG](#) sometime in the early ninth century by 'GOS CHOS GRUB (C. Facheng; c. 755–849), is rendered directly from the Chinese recension and is extant in only three manuscript editions of the Tibetan canon ([BKA' 'GYUR](#)). See also [YULANBEN](#).

yulu. (J. goroku; K. ōrok 語錄). In Chinese, “discourse records” or “recorded sayings,” also known as yuben (lit. “edition of discourses”) or guanglu (“extensive records”); compilations of the sayings of [CHAN](#), [SŌN](#), and [ZEN](#) masters. This genre of Chan literature typically involved collections of the formal sermons ([SHANGTANG](#)), exchanges ([WENDA](#)), and utterances of Chan masters, which were edited together by their disciples soon after their deaths. The yulu genre sought to capture the vernacular flavor of the master’s speech, thus giving it a personal and intimate quality, as if the master himself were in some sense still accessible. Often the recorded sayings of a master would also include his biography, poetry, death verse ([YIJI](#)), inscriptions, letters ([SHUZHUANG](#)), and other writings, in addition to the transcription of his lectures

and sayings. For this reason, Chan discourse records are the Buddhist equivalent of the literary collections (wenji) of secular literati. The term first appears in the [SONG GAOSENG ZHUAN](#), and the genre is often associated particularly with the Chan master [MAZU DAOYI](#) (709–788) and his [HONGZHOU](#) line of Chan. Among the more famous recorded sayings are the *Mazu yulu* (a.k.a. *Mazu Daoyi chanshi guanglu*), [LINJI YIXUAN](#)'s [LINJI LU](#), and [HUANGBO XIYUN](#)'s [CHUANXIN FAYAO](#). Recorded sayings written in Japanese vernacular are also often called a hōgo (dharma discourse).

[Yum bu bla sgang](#). (Yumbu Lagang). A palace and adjacent tower purported to be Tibet's oldest building, established according to legend by the first Tibetan king Gnya' khri btsan po (Nyatri Tsenpo) in central Tibet's Yar klungs (Yarlung) Valley. It may have served as the residence for the earliest Tibetan rulers and was likely renovated by the twenty-eighth king, Lha Tho tho ri gnyan btsan (Lha Tothori Nyentsen, b. 433) during the mid-fifth century. Legends state that this king received the first Buddhist scriptures while residing at the Yum bu bla sgang as they miraculously descended from the sky, heralding the eventual religious conversion of the country. According to one early Tibetan historian, however, the texts were actually transported by the Indian cleric Buddharaṣita; the king, unable to read the Indic script, declared their miraculous descent in order to keep secret their foreign origins. The texts were therefore called the gnyan po gsang ba, “the sacred secret,” and indeed remained a secret until the advent of king [SRONG BTSAN SGAM PO](#) in the seventh century.

[Yum chen mo](#). In Tibetan, lit., “great mother”; a Tibetan epithet for a goddess who is the deified embodiment of the [PRAJÑĀPĀRAMITĀ](#), or perfection of wisdom. The term is also used to refer to the ŚATASĀHASRIKĀPRAJÑĀPĀRAMITĀ (“Perfection of Wisdom in One Hundred Thousand Lines”), or to any other prajñāpāramitā sūtra. Finally, Yum chen mo is also an honorific term used to refer to the mother of the [DALAILAMA](#).

[Yun'an Puyan](#). (J. Unnan Fugan; K. Unam Poam 運庵普巖) (1156–1226). Chinese [CHAN](#) master in the [LINJI ZONG](#); a native of Siming in present-day Sichuan province. After studying under Shigu Xiyi (d.u.) and Wuyong Jingquan (1137–1207) following his ordination, Yun'an traveled to the monastery of Zhengzhao Chanyuan on Mt. Yang in 1184 and continued his training under the Chan master Songyuan Chongyue (1132–1202), who early in his vocation had been a student of [DAHUI ZONGGAO](#). When Songyuan was moved to Guangxiao

Chansi in Jiangsu province and again to Shiji Chanyuan in Anhui province, Yun'an followed and continued to serve the master for eighteen years. Yun'an eventually became Songyuan's successor. In 1202, after Songyuan's death, Yun'an was invited to reside in a new hermitage established by the master's brother in Yun'an's hometown in Siming. This hermitage was named Yun'an, whence he acquired his toponym. In 1206, Yun'an moved to Dasheng Puzhao Chansi in Jiangsu province, where he trained many eminent disciples, such as [XUTANG ZHIYU](#). His disciples edited his sayings together in the *Yun'an Puyan chanshi yulu*.

[Yungang](#). (J. Unkō; K. Un'gang 雲崗). A complex of some fifty-three carved Buddhist caves located at the southern foot of Mt. Wuzhou some ten miles west of the city of Datong, in the Chinese province of Shaanxi. The Yungang grottoes extend roughly half a mile from east to west and were carved over a fifty-year period between the fifth and sixth centuries CE under the patronage of the Northern Wei dynasty (386–534) court. The caves themselves contain roughly fifty thousand Buddhist sculptures, which are noted for their rich variety. The grottoes at Yungang are divided into eastern, western, and central zones. Most of the best-preserved grottoes are found in the western zone, although Grotto No. 1 in the eastern section still contains numerous sculptures in relief. Grotto No. 5, located inside the entrance to the site, contains a giant buddha statue. Grottoes 16–20 are especially renowned for their five colossal buddha images. The iconographical features of the sculptures preserved at the Yungang caves are similar to those found in the contemporaneous cave complex at [DUNHUANG](#); unlike Dunhuang, however, the Yungang caves contain no paintings. Since their completion, the Yungang grottoes have fallen victim to both war and natural disasters. After the People's Republic of China was founded in 1949, the Chinese government took an interest in the site, officially placing it under state protection in 1961. In December 2001, the Yungang grottoes were listed as a UNESCO World Heritage site.

[Yunjusi](#). (雲居寺). In Chinese, “Cloud Dwelling Monastery”; monastery that is the home of the [FANGSHAN SHIJING](#) (stone scriptures). The monk Jingwan (?–639) allegedly founded this monastery in 631, but a stone inscription dated to 669 is the earliest written record of its existence. The monastery was also known as Xiyusi (Western Valley or Western Region Monastery), and in the seventh-century *Mingbaoji* (“Records of Miraculous Retribution”) it is called Zhichuansi

(Fount of Wisdom Monastery). On the nearby hill of Shijingshan (Stone Scriptures Hill) just to the east of Yunjusi, nine cave libraries stored the Fangshan lithic canon: its total of 14,278 lithic blocks of 1,122 Buddhist scriptures represent textual lineages that derive from recensions that circulated during the Tang and Khitan Liao dynasties. The carving of the lithic scriptures started during the Sui dynasty under the monk Jingwan with the support of Empress Xiao (r. 604–617), and continued through the late Ming dynasty. The monastery itself is famous for its pagodas, which were closely associated with the engraving of the lithographs. Seven stone pagodas date from the Tang, of which the single-story one at the top of Stone Scriptures Hill, with an inscription dated to 898, is noted for both its architecture and carved decorations. Two of the five pagodas from the Liao are especially significant. Built in 1117, the octagonal Southern Pagoda has eleven stories and pointed eaves and includes a depository of Buddhist scriptures beneath it. The Northern Pagoda is uniquely shaped: the bottom half is octagonal with bracketed eaves and carved niches, while the upper half is cone-shaped and decorated with nine circular bands. Its surface is decorated with more than thirty groups of brick reliefs depicting scenes of dancing and singing, the most interesting example of which is a goddess strumming a three-stringed instrument, one of the rare extant examples for the study of Liao musical culture. The Northern Pagoda is surrounded by smaller stone pagodas dating from the Tang dynasty, several of which resemble the Xiaoyanta (Small Wild Goose Pagoda; see [DACIENSI](#)) in the ancient Chinese capital of Chang'an (modern Xi'an).

[Yunmen Wenyan](#). (J. Unmon Bun'en; K. Unmun Munŏn 雲門文偃) (864–949). Chinese [CHAN](#) monk and founder of the [YUNMEN ZONG](#), one of the so-called five houses and seven schools ([WU JIA QI ZONG](#)) of the classical Chinese Chan tradition. Yunmen was a native of Jiaxing in present-day Zhejiang province. He was ordained at the age of sixteen by the [VINAYA](#) master Zhideng (d.u.) of the monastery Kongwangsi and two years later received the full monastic precepts at the precept platform in Piling (present-day Jiangsu province). After his full ordination, Yunmen returned to Kongwangsi and studied the [DHARMAGUPTAKA](#) vinaya ([SIFEN LÜ](#)) under Zhideng. Later, Yunmen visited Muzhou Daoming (d.u.), a prominent disciple of the eminent Chan master [HUANGBO XIYUN](#), and continued his studies of Chan under [XUEFENG YICUN](#). Yunmen eventually became Xuefeng's disciple and inherited his lineage. Taking his leave of Xuefeng, Yunmen continued to visit other Chan masters throughout the country,

and in 911 he visited the funerary [STŪPA](#) of the sixth patriarch ([LIUZU](#)) [HUINENG](#) on [CAOXISHAN](#). Yunmen then visited Lingshu Rumin (d. 918), a famed disciple of the Chan master Fuzhou Da'an (793–883), at his monastery of Lingshu Chanyuan in Shaozhou (present-day Guangdong province) and continued to study under Lingshu until his death in 918. Yunmen was then asked by the ruler of the newly established Nan Han state (917–971), Liu Yan (r. 917–942), to succeed Lingshu's place at Lingshu Chanyuan. In 923, he established a monastery on Mt. Yunmen in the region, whence he acquired his toponym. He continued to reside on Mt. Yunmen for thirty years and frequently visited the palace of the Nan Han state to preach. In 938, Liu Cheng (943–958), monarch of the Nan Han, bestowed on him the title Great Master Kuangzhen (Genuine Truth). According to his wishes, no funerary stūpa was prepared for Yunmen and his body was left in his abbot's quarters ([FANGZHANG](#)). Yunmen was especially famous for his so-called one-word barriers ([YIZI GUAN](#)), in which he used a single utterance to respond to a student's question. For example, once a monk asked him, "When you kill your parents, you repent before the Buddha. But when you kill the buddhas and patriarchs, to whom do you repent?" Yunmen answered, "Lu" ("exposed"). Eighteen of Yunmen's most famous Chan cases ([GONG'AN](#)) are collected in the [BIYAN LU](#) ("Blue Cliff Record"); his extended teachings are recorded in the *Yunmen Kuangzhen chanshi guanglu*.

[Yunmen zong](#). (J. Unmonshū; K. Unmun chong 雲門宗). In Chinese, "Cloud Gate school"; one of the so-called five houses and seven schools ([WU JIA QI ZONG](#)) of the mature Chinese [CHAN](#) tradition. It is named after the mountain, located in Shaozhou (present-day Guangdong province), where its founder [YUNMEN WENYAN](#) (864–949) taught. Yunmen Wenyan was famous for his "one-word barriers" or "one-word checkpoints" ([YIZI GUAN](#)), in which he responded to his students' questions by using only a single word. The school became one of the dominant Chan traditions in the Five Dynasties (Wudai) and early Song dynasty, producing such prominent masters as [DONGSHAN SHOUCU](#) (910–990), Dongshan Xiacong (d. 1030), [XUEDOU ZHONGXIAN](#) (980–1052), and Tianyi Yihuai (992–1064). Yunmen masters played a major role in the development of classical Chan literature. Xuedou Zhongxian's earlier collection of one hundred old cases (guce, viz., [GONG'AN](#)), known as the *Xuedou songgu*, served as the basis for the famous [BIYAN LU](#) ("Blue Cliff Record"), which added the extensive commentaries and annotations of the Linji master [YUANWU KEQIN](#) (1063–1135) to Zhongxian's original compilation. Several Yunmen masters were closely

associated with the Song-dynasty intelligentsia. Dajue Huailian (1009–1090), for example, was as personal friend of the Song literocrat (shidafu) and poet Su Shi (1036–1101). Fori Qichong (1007–1072) asserted the fundamental harmony of Confucianism and Buddhism, explaining Confucian philosophical concepts using Buddhist terminology. [CHANGLU ZONGZE](#) (fl. c. late eleventh to early twelfth century) institutionalized the practice of reciting the name of the Buddha ([NIANFO](#)) into the routine of Chan monastic life and wrote an influential text on Chan monastic regulations or “rules of purity” ([QINGGUI](#)), the [CHANYUAN QINGGUI](#) (“Pure Rules for the Chan Grove”). The Yunmen school survived for about two centuries before it was eventually absorbed into the [LINJI ZONG](#).

[Yunqi fahui](#). (雲棲法彙). In Chinese, “Anthology of the Teachings of Yunqi.” See [YUNQI ZHUHONG](#).

[Yunqi Zhuhong](#). (J. Unsei Shukō; K. Unsō Chugoeng 雲棲祿宏) (1535–1615). Chinese [CHAN](#) master of the [LINJI ZONG](#) and one of the so-called four great monks of the Ming dynasty, along with [HANSHAN DEQING](#) (1546–1623), [DAGUAN ZHENKE](#) (1543–1603), and [OUYI ZHIXU](#) (1599–1655); also known as Fohui and Lianchi. Yunqi was a native of Renhe, Hangzhou prefecture (present-day Zhejiang province). In 1566, Yunqi abandoned his family and his life as a Confucian literatus and was ordained by Xingtianli (d.u.) of West Mountain. Yunqi wandered throughout the country in search of prominent teachers and attained his first awakening at Dongchang in present-day Shandong province. In 1571, he arrived at Mt. Yunqi in Hangzhou, whence he acquired his toponym. There, he was able to restore Yunqi monastery with the help of local followers. His reputation grew after he successfully brought rain and drove tigers from the area. Yunqi remained on the mountain and composed over thirty major works. With the help of his Confucian background, Yunqi was able to draw a large public to his Chan teachings, and he also promoted the practice known as [NIANFO](#) Chan in what was at the time the largest lay society in China. His influential works, such as the [CHANGUAN CEJIN](#), *Zizhi lu* (“Record of Self-Knowledge”), *Sengxun riji*, and *Zimen chongxing lu*, were edited together as the *Yunqi fahui* (“Anthology of the Teachings of Yunqi Zhuhong”).

[yunshui](#). (J. unsui; K. unsu 雲水). In Chinese, lit. “clouds and water”; a term abbreviated from the phrase “moving clouds and flowing water” (C. xingyun liushui; J. kōun ryūsui; K. haengun yusu), which is used to refer to an itinerant Buddhist practitioner who, like clouds or water, is always on the move and never

settles down. The term is especially associated with the [CHAN](#) (K. [SŎN](#); J. [ZEN](#)) school, where it refers to a Chan monk in training. The term implies that a novice monk is expected to travel to various monasteries and learn from different teachers as part of his training, rather than remaining attached to one specific monastery or teaching. In contemporary Japanese Zen usage, *unsui* refers to neophyte priests who undergo training as novices and live in a *sōdō* ([SAMGHA](#) hall, see [SENGTANG](#)) at a Zen training center. A “cloud robe” (J. *unnō*), by extension, refers to a monk’s robe that is worn and ragged from following an itinerant lifestyle. During the Edo period (1600–1868), the term *unsui* became popularized to mean liberated, blissful travel, as exemplified in the novel, *Tōkaidōchū hizakurige* (“Traveling the Eastern Highway on a Chestnut Pony”) by Jippensha Ikku (1765–1831). *Unsui* is also contrasted with the term “dragons and elephants” (C. *longxiang*; J. *ryūzō*; K. *yongsang*; see S. [HASTINĀGA](#)), which is commonly found in Chan texts to refer to an advanced adept of Chan.

[yuntang](#). (雲堂). In Chinese, “cloud hall”; a monastic residential hall. See [SENGTANG](#).

[Yuquansi](#). (玉泉寺). In Chinese, “Jade Spring Monastery”; important meditative center located on Mt. Yuquan in Jingzhou prefecture (present-day Hubei province). During the Daye reign period (605–617) of the Sui dynasty, a name plaque for the monastery was prepared by the King of Jin, and the eminent monk [Tiantai Zhiyi](#) lectured there on his [FAHUA XUANYI](#) and [MOHE ZHIGUAN](#). Yuquansi soon became a prominent center for meditators in China. The monastery became even more famous when the [CHAN](#) master [Shenxiu](#) of the Northern school ([BEI ZONG](#)) took up residence at the site sometime in the last quarter of the seventh century. The famed Chan master [Nanyue Huairang](#) is also said to have ordained at Yuquansi.

[Yu sim allak to](#). (C. *Youxin anledao*; J. *Yūshin anrakudō* 遊心安樂道). In Korean, “Wandering the Path to Mental Peace and Bliss”; traditionally attributed to the Korean monk [Wōnhyo](#), its authorship remains a matter of debate. No early references to this text are found in Korean canonical catalogues, and the earliest extant version was found in the library of the Raigōin in Kyōto, Japan. The prevailing scholarly view is that the text was composed in tenth-century Japan, perhaps by an adherent of the [Tendaishū](#), with the first half of the work taken virtually verbatim from Wōnhyo’s *Muryangsu-gyōng chongyo* (“Doctrinal Essentials of the [Sukhāvativyūhasūtra](#)”). The *Yu sim allak to* was influential

in Japan, especially during the Kamakura period, when it was quoted in such texts as the *Kōmyō shingon dosha kanjinki* by [MYŌE KŌBEN](#), *An'yōshū* by Minamoto Takakuni (1004–1077), *Ketsujō ōjōshū* by Chinkai (1087–1165), and the [SENCHAKU HONGAN NENBUTSUSHŪ](#) by [HŌNEN](#). The *Yu sim allak to* consists of seven sections: (1) the central tenet (i.e., the benefits of rebirth), (2) the whereabouts of the land of peace and happiness ([ANLEGUO](#), viz., [SUKHĀVATĪ](#)), (3) clarification of doubts and concerns, (4) the various causes and conditions of rebirth in the [PURE LAND](#), (5) the nine grades ([JIUPIN](#)) of rebirth, (6) the ease and difficulty of rebirth in the different buddha-fields ([BUDDHAKSETRA](#)), (7) and the rebirth of women, those with dull faculties, and sinners. The last section also contains a [MANTRA](#) from the *Amoghapāśakalparājāsūtra* and an empowerment ([ADHISTHĀNA](#)) ritual.

[Yu-Sōk chirŭi non](#). (儒釋質疑論). In Korean, “Treatise on Queries and Doubts concerning Yu (C. Ru, viz., Confucius) and Sōk (C. Shi, [ŚĀKYAMUNI](#))”; a Buddhist “defense of the faith” against Neo-Confucian criticisms, written during the early Chosŏn period. Although the authorship of this text remains a mystery, the style and content of the treatise resemble the [HYŌNJŌNG NON](#) by [KIHWA](#) (1376–1433), and it is clear that its Buddhist author was well versed in both Confucian and Daoist thought. The *Yu-Sōk chirŭi non* is written in catechetic style and consists of nineteen questions and answers, which largely address misleading views that Confucian scholars hold regarding Buddhism. Following a syncretic approach that seeks to reconcile the teaching of Confucianism, Buddhism, and Daoism, this work generally argues that these three teachings each have their own distinctive roles to play in people’s lives and need not be in conflict. Buddhism, Confucianism, and Daoism are explained as corresponding, respectively, to (1) nature (K. sŏng, C. XING), mind (K. sim, C. XIN), and pneuma (K. ki, C. qi); (2) truth (K. chin, C. zhen), its traces (K. chŏk, C. ji), and the connection between them; and so on. The treatise claims that these three teachings are ultimately in accord with one another because of their identical basis in the mind. The text also treats such traditional aspects of Chinese thought as yin-yang cosmology and the five phases (K. ohaeng, C. wuxing) (viz., the five traditional Chinese elements), as well as astrological and cosmological issues.

[yūzūnenbutsu](#). (融通念佛). In Japanese, lit. “consummate-interfusion recitation of the Buddha’s name”; a method of chanting Amida (S. [AMITĀBHA](#)) Buddha’s name (J. nenbutsu; C. [NIANFO](#)), devised by the founder of the [YŪZŪNENBUTSU](#)

school, [RYŌNIN](#) (1072–1132). The principle of yūzūnenbutsu is derived from Kegonshū (C. [HUAYAN ZONG](#)) and [TENDAISHŪ](#) (C. [TIANAI ZONG](#)) philosophy, especially the Kegon teachings of “consummate interfusion” (J. yūzū, C. [YUANRONG](#)) and the unobstructed interpenetration of all phenomena (J. jiji muge; see C. [SHISHI WU’AI FAJIE](#)) and the Tendai teaching of the mutual inclusion of the ten dharma-realms (J. jikkai goku; C. shijie huju). The principle of yūzūnenbutsu builds upon this sense that each and every phenomenon is perfectly interfused with all other phenomena to propose that the merit coming from one person’s chanting of Amitābha’s name is transferred to all other persons and vice versa. When more people chant the Buddha’s name, more merit is thus transferred to all people, and the merit derived from these cooperative efforts reaches not only the dharma-realm ([DHARMADHĀTU](#)) in which it is created but also all other dharma-realms as well. Therefore, all things in all realms of existence receive benefit from any one individual’s practice of chanting the Buddha’s name. The practice of yūzūnenbutsu thus has two major characteristics: (1) the individual’s burden to practice is relieved because salvation is due not just to one’s own merit but to everyone’s merit; (2) the notion of “other power” ([TARIKI](#)) in this form of pure land means both the power of one’s fellow beings and the power deriving from Amitābha Buddha’s vow of compassion.

[Yūzūnenbutsushū](#). (融通念佛宗). In Japanese, “School of Consummate-Interfusion Recitation of the Buddha’s Name”; one of the first Japanese [PURE LAND](#) schools. The school was founded by the [TENDAISHŪ](#) monk [RYŌNIN](#) (1072–1132), who claimed to have a direct revelation from the buddha Amida (S. [AMITĀBHA](#)) regarding the principle of [YŪZŪNENBUTSU](#), in which every individual benefits from both his own and other’s chanting of the Buddha’s name (J. nenbutsu; C. [NIANFO](#)) through a mutual transfer of merit. Ryōnin traveled around Japan to teach the practice and spread the school, keeping a register of new adherents as he traveled. Indeed, carrying this register of adherents became a privilege of the leader of the school. Ryōnin also made Dainenbutsuji (Great Recitation of the Buddha’s Name Temple), in the Ōsaka area, the center for his campaign in 1127. ¶ The Yūzūnenbutsu school declined after six generations. When the sixth patriarch of the school Ryōchin (d. 1182) died without a successor, the register of adherents was entrusted to the Iwashimizu Hachiman shrine, in the hopes that the [HACHIMAN KAMI](#) cum [BODHISATTVA](#) resident there would select the next patriarch of the school. About 140 years later, the

Yūzūnenbutsu school was revitalized through the efforts of Hōmyō (1279–1349), who claimed to have received a revelation from Hachiman. After becoming Ryōnin’s seventh successor in 1321, Hōmyō restored Dainenbutsuji and several other branch temples that had long been neglected. He also received imperial patronage from the monarch Godaigo (r. 1318–1339), who added his name and the names of many government officials to the school’s register of adherents. After Hōmyō’s death, the school declined again as other pure land schools gained popularity, until 1689, when Daitō (1649–1716) became the forty-sixth patriarch of the school. Daitō rejuvenated the school, ardently propagating the school’s teachings and the practice of chanting the Buddha’s name. Daitō systematized the school’s teachings: he established an academic institute and wrote two treatises, the *Yūzū enmonshō* (“Essay on the Complete Teachings of Perfect Interpenetration [*Yūzū*]”) and the *Yūzūnenbutsu shingeshō* (“Essay on Faith and Understanding in the *Yūzūnenbutsu*”). In the former text, Daitō lists five classifications of the Buddhist teachings in ascending order (the teaching of humans and divinities, [HINAYANA](#), gradual, sudden, and consummate teachings) and classified Yūzūnenbutsu teachings in the fifth category of the “consummate teachings” (see [YUANJIAO](#)); he also discusses the school’s daily practice of chanting Amida Buddha’s name ten times while facing west. The Yūzūnenbutsu school remains active today at its head temple of Dainenbutsuji, although it is relatively small in size compared to the major Japanese pure land schools of [JŌDOSHŪ](#) and [JŌDO SHINSHŪ](#). The [AVATAMSAKASŪTRA](#) and the [SADDHARMAPUNĀRIKASŪTRA](#) are the principal scriptures of the school, with the three major pure land sūtras ([JINGTU SANBUJING](#)) of secondary importance.

[Zanabazar \(Mongolian\)](#). See [RJE B TSUN DAM PA](#).

[Zangs mdog dpal ri](#). (Sangdok Palri). In Tibetan, the “Glorious Copper-Colored Mountain”; the abode of [PADMASAMBHAVA](#). It is located on the island of Cāmara, one of the two “subcontinents” flanking the island of [JAMBUDVĪPA](#); Cāmara is sometimes identified as Sri Lanka. After leaving Tibet, Padmasambhava is said to have departed for the Copper-Colored Mountain. The island was inhabited by ogres ([RAKSASA](#)), whom he first had to subdue. He then constructed an octagonal palace, called “Lotus Light” (Padma ’od), at the summit of the mountain, where he will abide until the end of [SAMSĀRA](#). In Tibetan Buddhism, Copper-Colored Mountain came to function as a [PURE LAND](#), although it is located on earth, and is not flat as pure lands are supposed to be. There are numerous prayers for rebirth on the Copper-Colored Mountain and numerous accounts of devotees being transported there in dreams and visions. Among the most common depictions of Padmasambhava in Tibetan painting are those of him enthroned on the Copper-Colored Mountain.

[zangzhu](#). (J. zōshu/zōsu; K. changju 藏主). In Chinese, “library prefect.” One of the six prefects (C. [TOUSHOU](#)) at a [CHAN](#) monastery. The library prefect is in charge of the scriptures at the monastery. According to the [CHANYUAN QINGGUI](#), the library prefect prepares the reading desks and tea for those who wish to study the scriptures at the library or scriptorium.

[Zanning](#). (J. Sannei; K. Ch’annyōng 贊寧) (919–1001). Chinese [VINAYA](#) master and historian. Zanning was a native of Bohai in present-day Hebei province. Sometime between 926 and 930, he was ordained at the monastery of Xiangfusi in Hangzhou, Zhejiang province, and received his monastic precepts on Mt. Tiantai. Zanning then studied the “Four-Part Vinaya” ([SIFEN LÜ](#)) of the [DHARMAGUPTAKA](#) school and became an expert in the South Mountain vinaya lineage ([NANSHAN LÜ ZONG](#)). He thus came to be known as Lühu or “Vinaya Tiger,” and was given the title Great Master Mingyi (Bright Righteousness). In 978, he also received the title Great Master Tonghui (Penetrating Wisdom) and was invited to the monastery of Tianshousi. Upon the Emperor’s decree, Zanning compiled the influential Buddhist biographical record, the [SONG GAOSEN ZHUAN](#), which was completed and entered into the official canon

([DAZANGJING](#)) in 988. He also composed the [DA SONG SENG SHI LÜE](#), one of the earliest attempts to provide a comprehensive account of the history of Buddhism throughout Asia. His other writings include the *Neidian ji*, *Jiuling shengxian lu*, and *Shichao yinyi zhigui*.

[Zaō gongen](#). (藏王權現). In Japanese, “Provisional Manifestation of the Matrix King,” also known as Zaō, Zaō bosatsu, and Kongō Zaō; proper name of a tutelary deity revered largely by followers of the Japanese [SHUGENDŌ](#) and [SHINGONSHŪ](#) traditions. Zaō gongen is said to have revealed himself to the legendary Japanese ascetic [EN NO GYŌJA](#), the reputed founder of Shugendō, on Mt. Kinbu in Nara. Zaō gongen is considered to be a [BODHISATTVA](#) who quells demons, as well as a [NIRMĀNAKĀYA](#) of the Buddha. Offerings and worship for Zaō gongen are conducted at the hall of Zaōdō on Mt. Kinbu. This wrathful deity is often depicted with three fearsome heads, with a three-pronged [VAJRA](#) in his right hand and his right leg suspended in the air.

[Zaya Paṇḍita](#). [alt. Jaya Paṇḍita] (1599–1662). An important Mongolian monk of the [DGE LUGS](#) sect of Tibetan Buddhism. Born as the fifth son in a noble family of the Qoshot tribe, in 1615 he was selected by its leader to become a monk. He was sent to Tibet where he became a disciple of the first (also counted as the fourth) [PAN CHEN LAMA](#), [BLO BZANG CHOS KYI RGYAL MTSHAN](#), studying both the scholastic curriculum and the tantric curriculum. In 1639, after twenty-two years in Tibet, on the instructions of the Paṇ chen Lama and the fifth [DALAI LAMA](#), he returned to his homeland, serving as a missionary among the Qoshot. During this period, he invented the todorxoi üzüg (clear script) for the transcription of the Oirad language. In 1650, he returned to Tibet to make offerings to the Dalai Lama and to visit the Paṇ chen Lama, and then continued his missionary work, going as far west as the Kalmyk region of the Volga. Zaya Paṇḍita died while en route back to Tibet in 1662. He was a distinguished translator, translating 177 works from Tibetan into the Oirad language. The title of Zaya Paṇḍita was given to masters of the five traditional sciences; there were at least two other important Mongolian monks who bore the title and had lines of incarnation. The monk described here can be distinguished by his Tibetan name, Nam kha'i rgya mtsho.

[zazen](#). (J) (坐禪). See [ZUOCHAN](#).

[Zazen wasan](#). (坐禪和讚). In Japanese, “Praise of Seated Meditation”; a short

song by the Japanese [ZEN](#) master [HAKUIN EKAKU](#) in the [RINZAISHŪ](#), which is probably his most popular work. The *Zazen wasan* is still printed in manuals for scripture recitation and is chanted at many Rinzai temples and monasteries today. In his song, Hakuin extols as the supreme virtues original enlightenment (J. [HONGAKU](#); C. [BENJUE](#)), seated meditation (J. *zazen*; C. [ZUOCHAN](#)), and seeing one's own nature (J. *kenshō*; C. [JIANXING](#)).

[Zazen yōjinki](#). (坐禪用心禮). In Japanese, “Notes on Employing the Mind during Seated Meditation,” by the [ZEN](#) master [KEIZAN JŌKIN](#) in the [SŌTŌSHŪ](#); published in 1680. Following the model of his teacher [DŌGEN KIGEN](#) and his meditation manual [FUKAN ZAZENGI](#), Keizan composed this relatively short treatise of his own on seated Zen (J. *zazen*; C. [ZUOCHAN](#)) for the edification of clergy and laity alike. The *Zazen yōjinki* delineates the purpose, method, and technique of seated meditation, with an emphasis on what kinds of mental states should be maintained during practice. Sitting meditation is explained as being a technique designed to set aside all attachments and concerns so that one will be able to abide serenely in one's true nature, or original face. Keizan also speaks of the specific impediments to meditative practice, such as deluded visions and sloth and torpor, and suggests some practical techniques for mitigating such problems.

[zedi](#). (Burmese). See [JEDI](#).

[Zen](#). (禪). In Japanese, “Meditation”; the Japanese strand of the broader East Asian [CHAN](#) school, which includes Chinese Chan, Korean [SŌN](#), and Vietnamese [THIÊN](#). Zen is the Japanese pronunciation of the Chinese term Chan, which in turn is a transcription of the Sanskrit term [DHYĀNA](#), or meditative absorption. More specifically, Zen denotes the Japanese Buddhist traditions that trace their origins back to the Chinese Chan school, or [CHAN ZONG](#). Currently three major traditions in Japan, [RINZAISHŪ](#), [SŌTŌSHŪ](#), and [ŌBAKUSHŪ](#), refer to themselves as Zen schools, and are thus known collectively as the Zen tradition (J. [ZENSHŪ](#); C. [CHAN ZONG](#)). The Rinzai school was first transmitted to Japan in the late twelfth century by [MYŌAN EISAI](#) (1141–1215), who visited China twice and received training and certification in the Chinese [LINJI ZONG](#). By the end of the Kamakura period, some twenty-one different Rinzai lineages had been transmitted to Japan. The Rinzai school came to be associated with the meditative practice of contemplating Zen “cases” (J. *kōan*; C. [GONG'AN](#); see also J. *kanna Zen*; C. [KANHUA CHAN](#)). The foundation of the Sōtōshū is attributed to [DŌGEN KIGEN](#) (1200–1253), who is credited with transmitting the [CAODONG ZONG](#) of the

Chinese [CHAN](#) teacher [TIAN TONG RU JING](#) (1162–1227). Dōgen is said to have taught the technique of “just sitting” ([SHIKAN TAZA](#)), through which the mind would become stabilized and concentrated in a state of full clarity and alertness, free from any specific content. During the Tokugawa period, the Sōtō school developed into one of the largest Buddhist sects in Japan through the mandatory parish system ([DANKA SEIDO](#)), in which every household was required to register as a member of a local Buddhist temple. By the middle of the eighteenth century, there were more than 17,500 Sōtō temples across the country. The Ōbakushū was founded by the émigré Chinese [CHAN](#) master [YIN YUAN LONG XI](#) (J. Ingen Ryūki; 1592–1673), who traveled to Japan in 1654/1655 to escape the succession wars and political turmoil that had accompanied the fall of the Ming dynasty. The Ōbaku school introduced exotic contemporary Chinese customs and monastic practices to the Japanese Zen Buddhism of the time. Although it remained much smaller than the Rinzai and Sōtō Zen traditions, the presence of the Ōbaku school compelled the monks of its two larger rivals to reevaluate their own practices and to initiate a series of important reform movements within their respective traditions (see [IN IN EKISHI](#)). In the modern era, largely through the efforts of such towering intellectual figures as [DAISETZ TEITARO SUZUKI](#) (1870–1966), [NISHIDA KITARŌ](#) (1870–1945), and [NISHITANI KEIJI](#) (1900–1991), the term Zen has also come to connote a “pure experience” (junsui keiken) that transcends language and thought, which is sometimes argued to be the unique property of the Japanese people and their culture (cf. [KYOTO SCHOOL](#)). The cavalier way in which the term Zen is now deployed in generic Western writings (e.g., the myriad “Zen in the Art of” books) often has little to do with the traditional perspectives of the Zen tradition found in either Japan or the rest of East Asia. As in the case of Chan, in more common parlance, Zen can also denote the particular teaching style of a Zen master and is often expressed as “so-and-so’s Zen.” See also entries on the [SŌTŌSHŪ](#), [RINZAISHŪ](#), and [ŌBAKUSHŪ](#) and on specific Japanese Zen masters and monasteries.

[zendō](#). (禪堂). In Japanese, “meditation hall.” See [SENGTANG](#).

[Zenkōji](#). (善光寺). In Japanese, “Monastery of the Radiance of Goodness”; located in modern-day Nagano. According to the *Zenkōji engi*, the monastery was built at the beginning of the seventh century by a certain Honda Yoshimitsu to enshrine a famous Amida ([AMITĀBHA](#)) triad. In the ancient Indian kingdom of [VAISĀLI](#), a merchant by the name of Somachattrā is said to have warded off

epidemic demons and cured his daughter by invoking the name of the buddha Amitābha ten times. Somachattrā was so moved by the appearance of Amitābha and his two attendants [AVALOKITEŚVARA](#) and [MAHĀSTHĀMAPRĀPTA](#) in the sky that he asked the Buddha for an icon to be made in their likeness. The triad was then forged with special gold from the dragon king’s palace and worshipped as a living manifestation of Amitābha and his attendants. Somachattrā was later reborn as King Sōng (r. 523–553) of the Korean kingdom of Paekche. The triad first traveled to Paekche to aid King Sōng, after which it was taken to Japan. Honda Yoshimitsu is said to have discovered the triad in the Naniwa Canal and enshrined it in his house, which was later transformed into a magnificent buddha hall by Empress Kōgyoku (r. 642–645). With support from the Hōjō bakufu, a Zenkōji cult proliferated especially during the Kamakura period and onwards, and numerous replicas of the “original” (Shinano) Zenkōji triad were made and enshrined in Shin (“New”) Zenkōji temples. For centuries, the (Shinano) Zenkōji in Nagano remained under the control of another powerful [TENDAISHŪ](#) monastery known as [MIIDERA](#). Zenkōji was devastated by fire in 1179, but legendary accounts testify to the miraculous escape of the “original” triad, which now remains as a secret buddha ([HIBUTSU](#)) image largely unavailable for public viewing. After the Japanese monk [IPPEN](#)’s visit to Zenkōji, several Shin Zenkōji temples also came to be associated with his tradition, the [JISHŪ](#).

[Zenrin kushū](#). (禪林句集). In Japanese, “Phrase Collection of the [ZEN](#) Grove”; a lengthy collection of more than four thousand Zen phrases—specifically capping phrases ([JAKUGO](#)) or appended phrases ([AGYO](#))—culled from Buddhist [SŪTRAS](#), discourse records ([YULU](#)), kōan collections (see C. [GONG’AN](#)), and various Chinese belletristic classics. The collection was edited by a certain Ijūshi in 1688. Ijūshi’s collection is based on a shorter phrase book entitled the *Kuzōshi*, compiled by the Zen master Tōyō Eichō (1428–1504) of the [MYŌSHINJI](#) lineage of the [RINZAISHŪ](#). Beginning with single-character phrases, the Zen phrases in the *Zenrin kushū* are sequentially organized according to their number of Sinographs. The *Zenrin kushū* is one of the most commonly used collections in Japanese kōan training today.

[Zenrin shōkisen](#). (禪林象器箋). In Japanese, “A Composition on the Images and Utensils of the Zen Grove”; compiled by the [ZEN](#) historian [MUJAKU DŌCHŪ](#) in the [RINZAISHŪ](#); a comprehensive catalogue of regulations, events, utensils, and accoutrements used by the Zen (C. [CHAN](#)) tradition. The preface was prepared by

Mujaku in 1741. More than just a simple catalogue, Mujaku's *Zenrin shōkisen* also meticulously notes the possible origin and history of each catalogued item and also expounds upon the significance of its implementation during his day, making it an invaluable tool for the study of Zen in practice. His research is based on an exhaustive list of sources (a total of 488 selections) beginning with sūtras and commentaries to Chinese and Japanese classics, lamplight histories (see [CHUANDENG LU](#)), and poetry. A handwritten copy of the text is currently housed at [MYŌSHINJI](#) in Kyōto.

[Zenshū](#). (J) (禪宗). In Japanese, the school, lineage, or tradition of [CHAN](#). See [ZEN](#).

[Zetawun Pagoda](#). In Burmese, “Prince Jeta’s Grove” (P. [JETAVANA](#)); regarded as the oldest shrine in Sagaing. Zetawun Pagoda commemorates the Buddha’s legendary first visit to Burma (Myanmar) in the company of [ĀNANDA](#). According to tradition, the site was occupied by ninety-nine ogres (Burmese, bilu), the leader of whom was named Zeta. When they encountered the Buddha and Ānanda, the ogres welcomed them and, in return for their piety, the Buddha preached the dharma to them for seven days. All ninety-nine ogres became stream-enterers (P. sotāpanna; S. [SROTAĀPANNA](#)) while listening to these sermons. The Zetawun Pagoda purportedly contains the lower robe or waist cloth (P. antaravāsaka; S. [ANTARVĀSAS](#)) of the Buddha, which he is said to have presented to the ogres upon their entreaty to leave a token of his visit as an object of worship. The name Zetawun honors the ogre chief Zeta and recalls the fact that at the time of the Buddha’s visit this spot was covered by forests (Burmese, wun). To commemorate the spiritual attainment of the ogres, the village that grew up around the site became known as Thotapan Ywa or Sotāpanna Village. An annual pagoda festival is held in the village on the new moon day of the Burmese month of Waso (July–August). Adjacent to the Zetawun can also be found an ordination hall said to have been established by the Mon saint, Shin Araham.

[Zhabs dkar tshogs drug rang grol](#). (Shapkar Tsokdruk Rangdröl) (1781–1851). One of the most revered Tibetan preachers and saints of the nineteenth century. He was born in the Reb kong region of A mdo in the northeast of the Tibetan cultural domain. During his youth, he received instruction in [RDZOGS CHEN](#) and various treasure ([GTER MA](#)) cycles of the [RNYING MA](#) sect. He undertook a one-year retreat at the age of sixteen and was ordained at the age of twenty at

Rdo bis, a [DGE LUGS](#) monastery. He maintained his monastic vows throughout his life but wore his hair long and piled on the top of his head in the manner of a tantric [YOGIN](#). His main teacher was Chos rgyal Ngag gi dbang po, but he studied with a variety of teachers, including those of the Dge lugs sect. He also studied traditional painting. An adept, pilgrim, and poet of the Rnying ma sect, he traveled throughout Tibet, undertaking retreats at such famous sites as Rma chen spom ra, [TSA RI](#), and Mount [KAILĀSA](#), including in a number of caves where [MILARASPA](#) is said to have meditated. He became known as Zhabs dkar, or “white footprint,” because he meditated at Mount Kailāsa, where the Buddha is said to have left his footprints ([BUDDHAPĀDA](#)). He also traveled to Kathmandu, where he offered gold for the spire of the [BODHNĀTH STŪPA](#). He gained fame among all social classes through his wide-ranging activities as a Buddhist teacher and his enormous personal generosity and charisma. His autobiography, entitled *Snyigs dus 'gro ba yongs kyi skyabs mgon zhabs dkar rdo rje 'chang chen po'i rnam par thar pa rgyas par bshad pa* (translated as *The Life of Shabkar*) is regarded as one of the masterworks of that genre of Tibetan literature.

[Zhabs drung Ngag dbang rnam rgyal](#). (Shapdrung Ngawang Namgyal) (1594–1651). A Tibetan Buddhist figure noted for unifying Bhutan as a Buddhist state. At a young age, Ngag dbang rnam rgyal was installed as the eighteenth successor to the throne of [RWA LUNG](#) monastery, seat of the '[BRUG PA BKA' BRGYUD](#) sect of Tibetan Buddhism in central Tibet and its leaders, the '[BRUG CHEN INCARNATIONS](#). In 1616, at the age of twenty-three, he was forced to flee to Bhutan in a political dispute over his recognition as the reincarnation of the fourth 'Brug chen master, [PADMA DKAR PO](#). Ngag dbang rnam rgyal initially gained control over the western region, with his forces eventually defeating his rivals and uniting the various regions into a single country under his leadership. He later successfully repelled an invasion of Bhutan by Tibetan forces mustered by the fifth [DALAI LAMA](#). His title Zhabs drung (literally “at the feet”) refers to his great stature as a Buddhist master. He is famed for establishing a religious and political system of monastic and administrative centers called rdzong (fortress), which are still in use today in Bhutan. Ngag dbang rnam rgyal is also considered the first master of a prominent Bhutanese incarnation lineage, the Zhabs drung incarnations.

[zhai](#). (J. sai; K. chae 齋). A polysemous Chinese term that means “fast,” “purify,” “make offerings to monks,” “festival,” or “vegetarian feast” (and often

seen translated as “maigre feast”); it is also used to translate the Sanskrit term [UPOSADHA](#). The traditional [PRĀTIMOKṢA](#) prohibition against monks and nuns eating after noon was referred to in Chinese as zhai, hence its translation as “fast.” In China, zhai came to refer generally to meals offered at Buddhist rituals and events and more specifically to vegetarian feasts held at monasteries throughout the country. Monasteries often maintained special funds to be used for such purposes. These vegetarian feasts and festivals served as one of the primary means through which the laity made offerings to the monastic community. One of the most famous of such festivals in East Asia was the “Ghost Festival” ([YULANBEN](#)).

[Zhancha shan’ē yebao jing](#). (J. Senzatsu zen’aku gōhōkyō; K. Chōmch’al sōnak ōppo kyōng 占察善惡業報經). In Chinese, “Scripture of Divining the Requit of Good and Evil Actions”; an indigenous Chinese Buddhist scripture (see [APOCRYPHA](#)) compiled sometime during the late sixth century. The scripture seems to have been used by a community in Guangdong that was deemed heretical and whose practice of divination and repentance was banned in 593. The first roll of this scripture is largely concerned with the practice of divination, which is made possible through repentance. The scripture emphasizes the need for faith in this dharma-ending age ([MOFA](#)); the method of cultivating this faith is offered by the bodhisattva [KSITIGARBHA](#). This method largely involves the use of various spinning tops (lit. “wheels”) on which the possible fate and fortune of the client is written. A total of 189 possible fates are offered. The repentance rite in the *Zhancha shan’ē yebao jing* seems to have been influenced by the *Upāsakaśīlasūtra* translated by [DHARMAKSEMA](#). The second roll of the scripture has been a subject of controversy, for it provides an early version of the monistic “one mind” ([YIXIN](#)) and [TATHĀGATAGARBHA](#) doctrine that came to dominate in the East Asian schools of Buddhism. Comparisons are often made between this second roll and the influential [DASHENG QIXIN LUN](#).

[Zhang Sengyao](#). (C) (張僧繇) (d.u.; fl c. 502–549). The first Chinese artist to paint a rendering of the sixteen [ARHAT](#) protectors of Buddhism. See [SODAŚASTHAVIRA](#).

[Zhang Shangying](#). (J. Chō Shōei; K. Chang Sangyōng 張商英) (1043–1122). Influential Chinese Buddhist layman and statesman; also known as Tinajue and Wujin jushi (Layman Infinite). Born to a prominent literati family in Xinjin (present-day Sichuan province), Zhang Shangying began his illustrious career in

1065 after receiving his jinshi degree. He first made a name for himself through military expeditions against neighboring barbarian tribes in Yuzhou, after which he was given a high metropolitan post by the powerful grand councilor Wang Anshi (1021–1086). Zhang thus became a supporter of Wang’s administrative and fiscal reform attempts known as the “new policies” (xinfā). Even after Wang’s fall from power, Zhang maintained his support for reform, which eventually allowed him to become grand councilor himself in 1111. Due to political battles at court and his complaints regarding Emperor Huizong’s (r. 1100–1125) support of the Daoists’ anti-Buddhist polemics, Zhang’s tenure at court was cut short, and he spent the rest of his life in retirement. During this period of retirement, Zhang Shangying devoted much of his time to Buddhism. Throughout his life, Zhang befriended and studied under the most respected [CHAN](#) masters of his day, such as Dantang Wenzhun (1061–1115), Doushuai Congyue (1044–1091), Huitang Zuxin (1025–1100), [ZHENJING KEWEN](#), [YUANWU KEQIN](#), [DAHUI ZONGGAO](#), and [JUEFAN HUIHONG](#), and exchanged correspondence with many of them, some of which are still extant. Zhang was particularly fond of the [AVATAMSAKASŪTRA](#) and commentaries on the text composed by the famous Tang dynasty layman [LI TONGXUAN](#); emulating Li, Zhang made a pilgrimage to [WUTAISHAN](#). He also wrote a treatise entitled *Hufa lun* (“Arguments in Defense of the Dharma”) as a rebuttal to the growing anti-Buddhist polemics among the Daoists at court.

[Zhanran](#). (C) (湛然). See [JINGXI ZHANRAN](#).

[Zhanran Yuandeng](#). (J. Tannen Enchō; K. Tamyŏn Wŏnjing 湛然圓澄) (1561–1626). Chinese [CHAN](#) master in the [CAODONG ZONG](#); also known as Sanmu daoren. Zhanran was a native of Huiji prefecture in Zhejiang province. In his early twenties, Zhanran became the student of the monk Miaofeng (d.u.) on Mt. Tianhuang and later received monastic precepts from the Chan master [YUNQI ZHUHONG](#), one of the most eminent Chan teachers of the Ming dynasty. In 1591, Zhanran became the disciple of Cizhou Fangnian (d. 1594) and inherited his Caodong lineage. Zhanran first made a name for himself while residing at the monastery of Shouxingsi and subsequently served as abbot of the monasteries [WANSHOUSI](#) on Mt. Jing, and Xianshengsi in his hometown of Huiji, as well as several other monasteries in different regions of Zhejiang province. Zhanran composed the [ZONGMEN HUOMEN](#), an influential treatise on Chan meditation, and his other teachings are recorded in the *Zhanran Yuandeng chansi yulu*.

[zhao'er changji](#). (C) (照而常寂). See [JIER CHANGZHAO](#).

[Zhao lun](#). (J. Jōron; K. Cho non 肇論). In Chinese, “(Seng)zhao’s Treatise”; an influential work by the eminent Chinese monk [SENGZHAO](#) (374–414), one of the major disciples of the important Kuchean translator [KUMĀRAJĪVA](#) (344–413). The *Zhao lun* was compiled sometime between 384 and 414 and brings together Sengzhao’s four major works. The first, *Wubuqian lun* (“On the Immutability of Things”), explores the irrelevancy of time in explaining dharmas that are not subject to production and cessation. The second, *Buzhenkong lun* (“Emptiness of the Unreal”), explains how dharmas can simultaneously appear as both real and unreal. The [BORE WUZHI LUN](#) (“The Nescience of Prajñā”) explains that because wisdom ([PRAJÑĀ](#)) is quiescent, empty, and lacking a perduring essence, any conscious awareness of it, or emanating from it, is impossible. Finally, “Niepan wuming lun” (“The Anonymity of Nirvāṇa”) demonstrates that [NIRVĀNA](#) is fundamentally ineffable and therefore nameless. A chapter entitled “Zong benyi” (“Fundamental Meaning of the Major Tenets”) appears at the beginning of the *Zhao lun* and offers a succinct explanation of some important doctrinal matters, such as original nothingness (benwu), the true mark of reality (shixiang), dharma nature (faxing), and the emptiness of nature (xingkong). Letters exchanged between Sengzhao and the layman Liu Yimin (d. 410) of [LUSHAN](#) are appended at the end of the *Zhao lun*. Numerous commentaries on this text exist across the East Asian traditions.

[Zhaozhou Congshen](#). (J. Jōshū Jūshin; K. Choju Chongsim 趙州從諗) (778–897). One of the most renowned Chinese [CHAN](#) teachers of the Tang dynasty; his toponym Zhaozhou derives from the Zhaozhou region in Hebei province, where he spent much of his later teaching career. Zhaozhou was ordained in his youth at Hutongyuan in his hometown of Caozhou (in present-day Shandong province). At the age of eighteen, he met [NANQUAN PUYUAN](#) (748–835), a successor of [MAZU DAOYI](#) (709–788), and studied under him for several decades until that teacher’s death. Then in his fifties, Zhaozhou began to travel throughout China, visiting prominent Chan masters such as [HUANGBO XIYUN](#) (d. 850) and Daowu Yuanzhi (760–835). Having served as abbot of various monasteries on Mt. Huangbo, Baoshou, and Jia, Zhaozhou settled at the age of eighty in Guanyinyuan ([AVALOKITEŚVARA](#) Cloister) in Zhaozhou, and taught a small group of monks there for the next forty years. Zhaozhou did not use the iconoclastic pedagogical techniques, such as shouting and beating ([BANGHE](#)),

made famous by other teachers of his era, but used his words to challenge his students and lead them to self-realization. The Song-dynasty Chan master [YUANWU KEQIN](#) (1063–1135) described this characteristic of Zhaozhou’s teachings when he said, “Zhaozhou’s Chan lies on the lips.” Zhaozhou is frequently cited in the collections of Chan [GONG’AN](#) (public cases), including five of the forty-eight gong’an collected in the [WUMEN GUAN](#) (“Gateless Checkpoint”) and twelve of the one hundred in the [BIYAN LU](#) (“Blue Cliff Record”). The most influential gong’an associated with Zhaozhou is the first case collected in the *Wumen guan*, the so-called [WU GONG’AN](#): “Does a dog have the buddha-nature ([FOXING](#)) or not?” ‘No.’” Zhaozhou’s “[WU](#)” (no; lit. “it does not have it”), became one of the most oft-cited statements in all of Chan, [SŌN](#), and [ZEN](#) literature. Due in large part to the efforts of Chan master [DAHUI ZONGGAO](#) and his followers, Zhaozhou’s wu came to be used as one of the meditative topics ([HUATOU](#)) in the Chan meditation practice of “questioning meditation” ([KANHUA CHAN](#)). Although Zhaozhou had thirteen dharma heirs, his lineage soon died out. He posthumously received the title “Zhenji dashi” (Great Master Apex of Truth). The record of his teachings is contained in the three rolls of the *Zhenji dashi yulu* (“Discourse Record of Zhenji Dashi”) and in his *Zhaozhou lu*.

[Zhe chen](#). (Shechen). One of the four main [RNYING MA](#) monasteries in eastern Tibet, the others being [KAH THOG](#), [RDZOGS CHEN](#), and [DPAL YUL](#); founded in 1735 by the second [ZHE CHEN RAB ’BYAMS](#) incarnation, ’Gyur med kun bzang nam rgyal (Gyurme Kunsang Namgyel, 1710–1769). Zhe chen then became the seat for his subsequent incarnations, who all served as abbot, and a principal institution of the Rnying ma sect of Tibetan Buddhism. The monastery, comprised of several main temples and surrounding structures, was at times also governed by a line of regent lamas, the Zhe chen rgyal tshab (Shechen Gyaltsap) incarnations. The fourth Zhe chen rgyal tshab, Padma nam rgyal (Pema Namgyel, 1871–1926), formally recognized the young twentieth-century luminary [DIL MGO MKHYEN BRTSE](#) as one of five reembodiments of ’[JAM DBYANG MKHYEN BRTSE DBANG PO](#), a leading figure of the nineteenth-century [RIS MED](#), or nonsectarian movement. The institution’s full name is Zhe chen bden gnyis dar rgyas gling (Shechen Dennyi Dargyeling).

[Zhe chen rab ’byams](#). (Shechen Rapjam). An important line of Tibetan incarnate lamas. The first Zhe chen rab ’byams, Bstan pa’i rgyal mtshan (Tenpe

Gyaltsen, 1650–1709), was a disciple of the fifth [DALAI LAMA](#), [NGAG DBANG BLO BZANG RGYA MTSHO](#), and Padma rig 'dzin (Pema Rikdzin, 1625–1697)—the latter being the first [RDZOGS CHEN INCARNATION](#) and founder of [RDZOGS CHEN](#) monastery. The second Zhe chen rab 'byams, 'Gyur med kun bzang rnam rgyal (Gyurme Kunsang Namgyel, 1710–1769), founded Zhe chen monastery in 1735. Subsequent incarnations served as the abbots of Zhe chen monastery.

[zheng bao](#). (J. shōhō; K. chōngbo 正報). In Chinese “retribution proper,” the actions, or [KARMAN](#), directly affect the individual, conditioning one’s physical body and psychological makeup. See [ER BAO](#).

[Zhengdao ge](#). (J. Shōdōka; K. Chūngdo ka 證道歌). In Chinese, “Song of the Attainment of the Way”; attributed to [YONGJIA XUANJUE](#) (675–713); also known as the *Chanmen biyao jue* (“Secret Essentials of the Chan Tradition”). Along with the [XINXIN MING](#), the *Zhengdao ge* is cherished by the [CHAN](#) tradition as one of the classic verse expressions on the process of meditation and the experience of enlightenment. Its contents purport to convey Yongjia’s awakening after only a single day and night of tutelage under the sixth patriarch ([LIUZU](#)) [HUINENG](#), whence Yongjia’s cognomen Ishujue (“Single-Night Enlightened,” or “Overnight Guest”). The poem consists of fewer than two thousand Sinographs and follows a traditional regulated-verse style. The verse describes enlightenment as the realization that the true nature of all things is in fact the buddha-nature ([FOXING](#)), which is emptiness itself, transcending all the dichotomies of existence or nonexistence or truth and falsity. This enlightenment is said to occur suddenly, “in a snap of the fingers” (*danzhi*), the verse says, and it is this sudden enlightenment ([DUNWU](#)) that has been transmitted through the twenty-eight Indian and six Chinese patriarchs ([ZUSHI](#)) of the Chan tradition. Aspects of the style and vocabulary used in the poem, which seem to antedate the eighth century, have led to questions about the authenticity of its attribution to Yongjia. Several copies of this text were found at [DUNHUANG](#), and numerous commentaries of this text are extant, dating from the Song dynasty. The Song-dynasty teacher [DAHUI ZONGGAO](#) claimed that the verse was held in such high esteem that it had even been back-translated into Sanskrit.

[Zhengfayanzang](#). (J. Shōbōgenzō; K. Chōngpōbanjang 正法眼藏). In Chinese, “Treasury of the Eye of the True Dharma,” in three rolls, edited by the [CHAN](#) master [DAHUI ZONGGAO](#) and his lay disciples in 1147. The *Zhengfayanzang* is largely a collection of 661 cases or [GONG’AN](#) with Dahui’s prose commentary

(pingchang), annotations (C. zhuoyu/zhuyu; see J. [JAKUGO](#)), and instructions for the assembly. The zhengfayanzang of the title is a term used within Chan to indicate the school's special repository of the "eye" or "mind" of the [BUDDHADHARMA](#), which is independent from the scriptural tradition. (See [JAOWAI BIECHUAN](#)). The exchanges between masters and disciples that Daohui covers in his collection are described as being the transmission of this eye. His *Zhengfayanzang* thus records the exchanges of a number of renowned Tang and Northern Song Chan masters and their disciples, including [ZHAOZHOU CONGSHEN](#), [DESHAN XUANJIAN](#), and [XUEFENG YICUN](#), as well as the sermons of masters associated especially with the [LINJI ZONG](#), including [LINJI YIXUAN](#), [YANGQI FANGHUI](#), and [HUANGLONG HUINAN](#). Dahui strings together typically between three and six exchanges or sermons and, at the end of each section, adds his own brief prose commentary, often about twenty Sinographs in length, most starting with "Miaoxi says." (Miaoxi is one of Daohui's cognomens.) The *Zhengfayanzang* seems to have exerted some influence on the compilation of the [ZONGMEN LIANDENG HUIYAO](#), by Dahui's third-generation successor Huiweng Wuming (d.u.). The [SHÖBÖGENZÖ](#), the magnum opus of the Japanese [SÖTÖSHÜ](#) monk [DÖGEN KIGEN](#), bears the same title but in its Japanese pronunciation.

[Zhengjue](#). (C) (正覺). See [HONGZHI ZHENGJUE](#).

[Zhengnian](#). (C) (正念). See [DAXIU ZHENGNIAN](#).

[zhengwu](#). (J. shōgo; K. chūngo 證悟). In Chinese, "realization-awakening"; the most advanced of the two types of enlightenment ([WU](#); [BODHI](#)) discussed in some [CHAN](#) schools, equivalent to the achievement of buddhahood. This type of awakening is achieved at the consummation of the ten stages ([BHÜMI](#)) of the bodhisattva path, rendering one a buddha in fact as well as in principle. The initial "seeing the nature" ([JIANXING](#)) of buddhahood catalyzes the "understanding-awakening" ([JIEWU](#)), in which the Chan adept comes to know that he is not a deluded sentient being but a buddha. This initial sudden awakening is not in itself sufficient, however, to bring an end to the habituations ([VĀSANĀ](#)) that have been engrained in the mind for an essentially infinite amount of time. It is only after a period of gradual cultivation (jianxiu) that these habitual tendencies will be removed and one's actions will finally correspond with one's understanding. That point where knowledge and action are fully integrated marks the final "realization-awakening" ([ZHENGWU](#)) and thus constitutes the complete, perfect enlightenment of buddhahood

([ANUTTARASAMYAKSAMBODHI](#)). This two-tiered approach to awakening is the hallmark of the sudden awakening/gradual cultivation ([DUNWU JIANXIU](#)) path ([MĀRGA](#)) schema of certain Chan masters, such as [GUIFENG ZONGMI](#) (780–841) in the Chinese Hoze school of Chan, and [POJO CHINUL](#) (1158–1210) of the Korean Sōn tradition.

[Zhenjing Kewen](#). (J. Shinjō Kokubun; K. Chinjōng Kŭngmun 眞淨克文) (1025–1102). Chinese [CHAN](#) master in the [HUANGLONG PAI](#) collateral line branch of the [LINJI ZONG](#); also known as Yun’an, Baofeng, and Letan. Zhenjing was a native of Shanfu in present-day Henan province. He became a student of a certain master Guang of the North Pagoda in Fuzhou (present-day Hubei province) and was given the name Kewen. After receiving the monastic precepts at age twenty-four, Zhenjing began studying the sūtras and commentaries, but left for the South to seek out teachers of Chan. In 1065, Zhenjing spent a summer retreat on Mt. Dawei and had his first awakening experience upon hearing the words of the Chan master [YUNMEN WENYAN](#) from another monk. Zhenjing eventually became a disciple of the eminent Chan master [HUANGLONG HUINAN](#) (1002–1069) in Jicui and inherited his Linji lineage. At the request of the local king, Zhenjing moved to Jinleng, where he became the founding abbot of a monastery named Baoningsi. Zhenjing later retired to Gao’an, where he built a small hermitage named Toulao’an. Six years later, he moved to the monastery of Guizongsi on [LUSHAN](#) and again to Letan at the request of the famed statesman [ZHANG SHANGYING](#). Along with his colleagues Huanglong Zuxin (1025–1100) and Donglin Changcong (1025–1091), Zhenjing helped to build their teacher Huanglong Huinan’s lineage into one of the most prosperous in China. He retired to the hermitage of Yun’an, where he passed away in 1102. Zhenjing left numerous disciples and students, many of whom were statesmen and officials from Jiangxi province. His teachings can be found in the *Yun’an Zhenjing chanshi yulu*.

[Zhenke](#). (C) (眞可). See [DAGUAN ZHENKE](#).

[zhenru](#). (J. shinnyo; K. chinyō 眞如). In Chinese, “true thusness” or “true suchness”; the Chinese translation of the Sanskrit terms [BHŪTATATHATĀ](#) or [TATHATĀ](#), which comes to play its own important role in indigenous Chinese Buddhist thought. According to the Chinese scholastic tradition, deriving from translations of the [LAṆKĀVATĀRASŪTRA](#) and [YOGĀCĀRA](#) sources, [ZHENRU](#) is, along with right knowledge (chengzhi), one of the two “factors associated with

enlightenment” (wufa), true thusness being what is seen by correct knowledge when perception is freed from conceptual superimpositions. True thusness (zhenru) is described in the [DASHENG QIXIN LUN](#) (“Awakening of Faith According to the Mahāyāna”) as one of two distinct, but complementary, aspects of the one mind ([YIXIN](#)), along with production and cessation (shengmie). True thusness and production and cessation correspond, respectively, to ultimate truth ([PARAMĀRTHASATYA](#)) and conventional truth ([SAMVRTISATYA](#)), or the unconditioned ([ASAMSKRTA](#)) and conditioned ([SAMKRTA](#)) realms. Since the mind that is subject to production and cessation (which the *Dasheng qixin lun* identifies with [ĀLAYAVIJÑĀNA](#)) remains always grounded on the mind of true thusness (which the treatise identifies with [TATHĀGATAGARBHA](#)), the mind may therefore be simultaneously described as both deluded and enlightened. The bifurcation between this enlightened essence of the mind as “true thusness” and its various temporal manifestations as “production and cessation” also aligns with the “essence” ([TI](#)) and “function” ([YONG](#)) distinction that Buddhism imported from indigenous Chinese philosophy.

zhenyan. (J. shingon; K. chinŏn 眞言). In Chinese, lit. “true word.” See [MANTRA](#); [SHINGONSHŪ](#).

Zhi. (J. Shi; K. Chi 支). Ethnikon used in China for monks from Scythia (C. Yuezhi) or its successor state, the [KUSHAN](#) kingdom, in the northwest of India.

zhi byed. (shije). In Tibetan, lit. “pacification”; a Tibetan Buddhist tradition of meditation practice traced back to the eleventh-century Indian adept [PHA DAM PA SANGS RGYAS](#), who for many years taught at the small temple of [GLANG SKOR](#), near Ding ri in western Tibet. The name derives from the goal of the practice, which is the “pacification” of all suffering, transforming negative states into positive states through the practice of the six perfections ([PĀRAMITĀ](#)), especially the perfection of wisdom ([PRAJÑĀPĀRAMITĀ](#)). The practice is also said to extend one’s life. Together with the related tradition of [GCOD](#), or “severance,” promulgated by Pha dam pa sangs rgyas’s female disciple [MA GCIG LAB SGRON](#), pacification is frequently counted as one of eight major streams of Buddhist practice found in Tibet, the so-called eight great conveyances that are lineages of achievement ([SGRUB BRGYUD SHING RTA CHEN PO BRGYAD](#)). Unlike the tradition of severance, however, the practice of pacification as a unique system had largely died out by the nineteenth century, when great Tibetan scholars of the nonsectarian ([RIS MED](#)) movement attempted to preserve its transmission.

zhidian. (J. chiden; K. chijŏn 知殿). In Chinese, lit., “to know the halls,” a “hall prefect”; one of the six prefects (C. [TOUSHOU](#)) at a [CHAN](#) or [ZEN](#) monastery. The hall prefect is in charge of cleaning and preparing the shrine halls and the ritual objects placed therein.

Zhi Dun. [alt. Zhi Daolin] (J. Shi Ton/Shi Dōrin; K. Chi Tun/Chi Torim 支遁/支道林) (314–366). An early exegete of the perfection of wisdom ([PRAJÑĀPĀRAMITĀ](#)) literature in the southern part of China and leader of an influential group of early Buddhist philosophers associated with the “Dark Learning” ([XUANXUE](#)) school. Zhi is especially important for his crucial reinterpretation of the Chinese philosophical term [LI](#), which previously had meant the “pattern” or natural order of things. Zhi instead reinterprets li in light of perfection of wisdom thought as an absolute “principle,” which later came to be contrasted with the manifestations of that principle in the world as various “phenomena” ([SHI](#)). This distinction between principle and phenomena later occupied a crucial position in the thought of many of the indigenous schools of Chinese Buddhism, including the [TIANAI ZONG](#) and the [HUAYAN ZONG](#). Zhi Dun is also known for the earliest communication to a certain monk from the Korean Koguryŏ Kingdom, at least one decade before the official introduction of Buddhism to the peninsula, suggesting earlier Buddhist contacts between China and Korea than the extant evidence indicates.

zhike. (J. shika; K. chigaek 知客). In Chinese, “guest prefect”; one of the six prefects (C. [TOUSHOU](#)) at a [CHAN](#) monastery. The guest prefect is in charge of receiving and accommodating important visitors and guests. In modern Japanese [ZEN](#), the guest prefect plays an important role in the training of young monks on pilgrimage (J. [ANGYA](#); see C. [XINGJIAO](#)) as they engage each other in the elaborate ritual of receiving permission to enter the monastery.

zhi khro. (shi dro). In Tibetan, “peaceful and wrathful”; a term used to refer to assemblies (especially in a [MANDALA](#)) of peaceful and wrathful (also known as khrag ’thung or “blood drinking”) deities. For example, in the so-called *Tibetan Book of the Dead*, known in Tibetan as the [BAR DO THOS GROL CHEN MO](#) or the *Karma zhi khro* (“The Peaceful and Wrathful Deities of [KARMA GLING PA](#)”), a maṇḍala of forty-two peaceful deities and fifty-eight wrathful deities appears during the chos nyid bar do, the second of the three bardos ([ANTARĀBHAVA](#)).

Zhikong Chanxian. (J. Shikū Zenken; K. Chigong Sōnhyōn; S. *Śūnyadiśya-Dhyānabhadra 指空禪賢) (1289–1363). In Chinese, “Pointing to Emptiness, Meditative Worthy,” an Indian monk who taught first in China, but later came to live and teach in Korea at the end of the Koryō dynasty, where his influence was especially important; his Chinese name is sometimes reconstructed into Sanskrit as ***DHYĀNABHADRA**, and this is how he is often known in the literature. According to his memorial stele written by the Korean literatus Yi Saek (1328–1396), Zhikong was born as the third son of the ruler of a small state in the **MAGADHA** region of northeastern India around 1235. He entered the monastic life at the age of eight and is said to have studied at the famous **NĀLANDĀ** monastic university under the guidance of Vinayabhadra (C. Lūxian). He claimed to have traveled to Sri Lanka at the age of nineteen to study under Samantaprabhāsa (C. Puming), the 107th patriarch in a putative “Chan” lineage starting from **MAHĀKĀŚYAPA**, which probably means some sort of meditative lineage quite distinct from the East Asian **CHAN** lineages. After receiving transmission from Samantaprabhāsa, Zhikong became the 108th patriarch in that lineage. Around 1324, Zhikong traveled via Tibet to the Yuan dynasty and then went on to Koryō in 1326 at the invitation of King Ch’ungsuk (1294–1339; r. 1313–1330, 1332–1339), whom he had met in Beijing at the Mongol court. During his stay in Koryō, Zhikong went on pilgrimage to many important Buddhist sites, including the famous Diamond Mountains (**KŪMGANGSAN**). He also founded Hoeamsa (Fir Tree Cliff Monastery) in 1328 in what is now Kyōnggi province, which is said to have been modeled after Nālandā monastery. He returned to the Yuan in 1328, where he was visited by many Korean students, including the late Koryō monks **NAONG HYGŪN** (1320–1376) and **MUHAK CHACH’O** (1327–1405), on whom he had great influence. He died in 1363, and because of the reverence in which he was held by King Kongmin (r. 1351–1374), some of his relics were sent to Koryō. The relics were first housed in the royal palace and later enshrined in a reliquary at Hoeamsa. Zhikong was supposed to have been well versed in literature of **PRAJÑĀPĀRAMITĀ**, **VINAYA**, and **TANTRA**. In Korea, there survives a collection of his teachings, the *Chigong hwasang Sōnyo nok* (“Master Zhigong’s Essentials of Sōn Record”), and his putative sūtra, the *Munsusari posal ch’oesangsŭng musaenggye kyōng* (“Sūtra on the Ultimate Nonproduction (**ANUTPĀDA**) Precepts of the Bodhisattva **MAÑJUŚRĪ**”), which is supposed to have been translated from a Sanskrit original by his disciple Naong.

Zhili. (C) (知禮). See [SIMING ZHILI](#).

Zhi Qian. (J. Shi Ken; K. Chi Kyōm 支謙) (fl. c. 220–252). Prolific earlier translator of Buddhist texts into Chinese. A descendant of an Indo-Scythian émigré from the [KUSHAN](#) kingdom in the [KASHMIR-GANDHĀRA](#) region of northwest India, Zhi Qian is said to have been fluent in six languages. Although never ordained as a monk, Zhi Qian studied under the guidance of Zhi Liang (d.u.), a disciple of the renowned Indo-Scythian translator [LOKAKSEMA](#) (fl. c. 178–198 CE). Zhi Qian fled northern China in the political chaos that accompanied the collapse of the Han dynasty (206 BCE–220 CE), eventually migrating to the Wu Kingdom in the south. There, he settled first in Wuchang and later in the Wu capital of Jianye, which was where the majority of his translations appear to have been made. Zhi Qian was known to have been artistically talented, and many of his translations were noted for their fluent style that did not strive to adhere to the exact meaning of each word and phrase, but instead sought to convey the insights of the text in an accessible fashion for a Chinese audience. The fifty-three translations that are attributed to Zhi Qian range widely between [ĀGAMA](#) and didactic materials and early [MAHĀYĀNA](#) scriptural literature, but also include many spurious later attributions (see [APOCRYPHA](#)). Among the translations that may with confidence be ascribed to Zhi Qian are early renderings of the [VIMALAKĪRTINIRDEŚA](#), the [PUSA BENYE JING](#), the [SUKHĀVATĪVYŪHASŪTRA](#), the [ASTASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#), and a primitive recension of the [AVATAMSAKASŪTRA](#). Zhi Qian is also presumed to be one of the first Buddhist commentators in the East Asian tradition: [DAO'AN](#) (314–385) states in his scriptural catalogue [ZONGLI ZHONGJING MULU](#) (now embedded in the [CHU SANZANG JIJI](#)) that Zhi Qian wrote a commentary to the [ŚĀLISTAMBASŪTRA](#) (C. Liaoben shengsi jing) while preparing its translation. Late in his life, Zhi Qian retired to Mt. Qionglong, where he is said to have passed away at the age of sixty.

zhishi. (J. chiji; K. chisa 知事). In Chinese, lit., “to know or manage affairs”; a “steward” at a [CHAN](#) monastery. Ideally, there are six stewards who oversee the administration and finances of the monastic community. Because their offices were often located on the east side of the monastery, they were also often referred to as the east section or rank. The influential [CHANYUAN QINGGUI](#) mentions only four stewards, the prior (C. [JIANYUAN](#)), rector (C. [WEINUO](#)), cook (C. [DIANZUO](#)), and overseer (C. [ZHISUI](#)). Later, the prior came to be referred to as

the [DUSI](#), and a comptroller (C. [JIANSI](#)) and assistant comptroller (C. [FUSI](#)) were added to the list of four.

[zhisui](#). (J. shissui; K. chikse 直歲). In Chinese, “overseer”; one of the six stewards (C. [ZHISHI](#)) at a [CHAN](#) monastery. The zhisui supervises the manual labor conducted in the monastery, including everything from large construction projects, repairs, and the cultivation of land to patrolling the monastery grounds.

[Zhixu](#). (J. Chigyoku; K. Chiuk 智旭) (C). See [OUYI ZHIXU](#).

[Zhiyan](#). (J. Chigon; K. Chiöm 智儼) (602–668). Putative second patriarch of the Chinese [HUAYAN](#) tradition. Zhiyan was a native of Tianshui in present-day Gansu province. While still a boy, Zhiyan is said to have become a student of the monk [DUSHUN](#) at the monastery of Zhixiangsi on [ZHONGNANSHAN](#). He was ordained at age fourteen and received the full monastic precepts at age twenty, at which time he began studying the “Four-Part Vinaya” ([SIFEN LÜ](#)) of the [DHARMAGUPTAKA](#) school, as well as the [*TATTVASIDDHI](#), [DAŚABHŪMIKASŪTRA](#), [BODHISATTVABHŪMI](#), and [MAHĀPARINIRVĀNASŪTRA](#). Zhiyan also studied the [MAHĀYĀNASAMGRAHA](#) under Fachang (567–645). While studying under Jinglin (565–640), Zhiyan came across a copy of the [AVATAMSAKASŪTRA](#) and, at age twenty-seven, composed his influential commentary on the *Avatamsakasūtra*, the [HUAYAN JING SOUXUAN JI](#). He also composed the [KONGMU ZHANG](#) (viz., *Huayan jingnei zhangmendeng za kongmu zhang*), *Shi xuan men*, *Huayan wushi yao wenda*, *Jingang jing lüeshu*, and others. Zhiyan began to make a name for himself by preaching the *Avatamsakasūtra* to the rural populace and eventually counted among his many supporters the Emperor Gaozong (r. 649–683) himself. Zhiyan is closely associated with the doctrine of “nature origination” ([XINGQI](#)), which explains how enlightenment can be “originated” only from within the very “nature” of this world; enlightenment is therefore not something that needs to be created, for it derives from the inherent nature of the mind itself. [ZHIYAN](#)’s teachings on the *Avatamsakasūtra* were extremely influential in East Asian Buddhism and were developed further by his disciples [ŪISANG](#) and [FAZANG](#). The Korean monk [WŎNHYO](#) was also heavily influenced by Zhiyan’s writings. Because Zhiyan resided at his teacher’s monastery Zhixiangsi, he later came to be called Great Master Zhixiang.

[Zhiyi](#). (C) (智顓) (538–597). See [Tiantai Zhiyi](#).

zhiyu. (J. chiyoku; K. chiyok 知浴). In Chinese, the “bath prefect”; one of the six prefects (C. [TOUSHOU](#)) at a [CHAN](#) monastery. The bath prefect is in charge of cleaning the bathhouse, heating the water for use, and preparing necessities such as towels, incense, and tea. Usually, the bath prefect prepares the bath according to a strict monthly schedule.

zhizhi renxin. (J. jikishi ninshin; K. chikchi insim 直指人心). In Chinese, “directly point to the human mind”; a famous aphorism summarizing the soteriological approach of the [CHAN](#) school. The phrase appears for the first time in [HUANGBO XIYUN](#)’s [CHUANXIN FAYAO](#), where it is followed by the line [JIANXING CHENGFO](#) (“see one’s own nature and become a buddha”). Subsequently, these two phrases appear together with two other phrases, [BULIWENZI](#) (“not establishing words or letters”) and [JIAOWAI BIECHUAN](#) (“a special transmission outside the teachings”), in the [ZUTING SHIYUAN](#) compiled in 1108. These four phrases subsequently became a normative teaching for Chan practice and also the foundation on which the Chan, [SŌN](#), and [ZEN](#) traditions created their own self-identity as a separate school of East Asian Buddhism.

Zhongfeng Mingben. (J. Chūhō Myōhon; K. Chungbong Myōngbon 中峰明本) (1263–1323). Chinese [CHAN](#) master in the [LINJI ZONG](#) and one of the most influential monks of the Yuan dynasty; also known by the toponym Huanzhu (Illusory Abode). Zhongfeng was a native of Qiantang in Hangzhou prefecture (present-day Zhejiang province). While still a youth, Zhongfeng left home to study under the Chan master [GAOFENG YUANMIAO](#) of Mt. Tianmu, from whom he eventually received his monastic precepts at age twenty-four. After he left Gaofeng, Zhongfeng maintained no fixed residence and would on some occasions dwell on a boat. As his reputation grew, he came to be known as the Old Buddha of the South (Jiangnan Gufo). Mingben was an especially eloquent advocate of “questioning meditation” ([KANHUA CHAN](#)); his descriptions of the meaning and significance of Chan cases ([GONG’AN](#)) and meditative topics ([HUATOU](#)) and the processes and experience of kanhua practice are widely cited in the literature. In 1318, he was given a golden robe and the title Chan master Foci Yuanzhao Guanghui (Buddha’s Compassion, Perfect Illumination, Broad Wisdom) from Emperor Renzong (r. 1311–1320). Zhongfeng also served as teacher of the next emperor Yingzong (r. 1320–1323). Emperor Wenzong (r. 1329–1332) also bestowed upon him the posthumous title Chan master Zhijue (Wise Enlightenment). Five years later, Emperor Shundi (r. 1333–1367) entered

Zhongfeng's discourse records ([YULU](#)), the *Zhongfeng guanglu*, into the Chinese Buddhist canon ([DAZANGJING](#)), a signal honor for an indigenous author (few of whom are represented in the official canon); Shundi also bestowed on him the title State Preceptor Puying (Universal Resonance). Zhongfeng also composed his own set of monastic rules ([QINGGUI](#)) titled the *Huanzhu'an qinggui*.

[Zhongguan lun shu](#). (J. Chūgan ronsho; K. Chunggwan non so 中觀論疏). In Chinese, “Commentary on the [MŪLAMADHYAMAKAKĀRIKĀ](#)”; composed by the Chinese [SAN LUN ZONG](#) monk [JIZANG](#) in 608. Jizang begins with his observations on Sengrui's (378–444?) preface to their teacher [KUMĀRAJĪVA](#)'s translation of the *Mūlamadhyamakakārikā*. He then analyzes the twenty-seven chapters of the *Mūlamadhyamakakārikā* in a manner consistent with other scholars of the San lun tradition. Jizang contends that the middle way is a path traversed by the buddhas and [BODHISATTVAS](#) and explains its contents in terms of conventional truth ([SAMVRTISATYA](#)), absolute truth ([PARAMĀRTHASATYA](#)), and neither conventional nor absolute truth. (See also [SANDI](#).) Jizang supports his arguments by citing numerous sūtras, commentaries, and theories of other teachers. For his analysis of emptiness ([ŚŪNYATĀ](#)), Jizang frequently makes recourse to the [MAHĀPARINIRVĀNASŪTRA](#).

[zhongjiao](#). (C) (終教). See [HUAYAN WUJIAO](#).

[Zhongnanshan](#). (J. Shūnanzan; K. Chongnamsan 終南山). In Chinese, “Southernmost Mountain”; also called Nanshan, Mt. Taibai, Mt. Difei, and Mt. Zhounan. Zhongnanshan is located west of the former Chinese capital of Chang'an (present-day Xi'an) and occupies a section of the Qinling Mountain range that stretches through southern Shaanxi province. Because of its proximity to the capital, Zhongnanshan became an important practice site in both the Buddhist and Daoist traditions. Two Buddhist monasteries were built on the mountain, and they attracted many eminent Buddhist monks throughout the dynasties. [DAOXUAN](#), the founder of the Nanshan branch of the Chinese [VINAYA](#) school ([LŪ ZONG](#)) studied there; because of his long association with the mountain, his tradition of monastic discipline came also to be known as the [NANSHAN LŪ ZONG](#). [FAZANG](#) is also said to have begun his study of the [AVATAMSAKASŪTRA](#) on Zhongnanshan and to have performed a Buddho-Daoist prayer ritual on the mountain at the behest of Emperor Ruizong in order to relieve a drought. The syncretic character of the ritual he performed symbolizes the way in which Zhongnanshan straddles the two religious traditions. Sources

differ as to whether the monastery where he performed the ritual was Longchisi (Monastery of the Dragon Pool) or Wuzhensi (Awakening to Truth Monastery).

Zhongxiangcheng. (J. Shūkōjō; K. Chunghyangsŏng 衆香城). In Chinese, “City of Multitudinous Fragrances”; according to the [ASTASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#), the city where the [BODHISATTVA DHARMODGATA](#) lived and taught the perfection of wisdom ([PRAJÑĀPĀRAMITĀ](#)); an alternate name for the Korean “Diamond Mountains.” See also [GANDHAVATĪ](#), [KŪMGANGSAN](#).

Zhu. (J. Jiku; K. Ch’uk 竺). Ethnikon typically used in China for monks who hailed from India (C. [TIANZHU](#)).

Zhuanhong jue. (C) (傳弘決). See [MOHE ZHIGUAN FUXING ZHUANHONG JUE](#).

zhuchi. (J. jūji; K. chuji 住持). In Chinese, “abbot” of a Buddhist monastery. The term literally means “dwelling and holding,” from the sense that the abbot occupies his own monastery and maintains the Buddha’s dispensation in the current generation, serving as a “holding vessel” so that the Buddha’s lineage can never be extinguished. The zhuchi dwells in the “abbot’s quarters” ([FANGZHANG](#)), a term that in some contexts comes by metonymy to refer to the abbot himself, as is the case in certain Korean monasteries.

Zhu Daosheng. (C) (竺道生). See [DAOSHENG](#).

Zhu Fonian. (J. Jiku Butsunen; K. Ch’uk Pullyŏm 竺佛念) (d.u.). A prolific early Chinese translator, who was active between the latter fourth and early fifth centuries. A native of Liangzhou, he collaborated with [BUDDHAYAŚAS](#) in the translation of the [DĪRGHĀGAMA](#), with Dharmanandin in the translation of the [EKOTTARĀGAMA](#), and the “Four-Part Vinaya” ([SIFEN LÜ](#)), the [DHARMAGUPTAKA](#) recension of the [VINAYA](#), which eventually becomes the definitive version of the vinaya in the Sinitic tradition. He was also involved in the translation of such texts as the [ASTASĀHASRIKĀPRAJÑĀPĀRAMITĀ](#), the [UDĀNAVARGA](#), a [SARVĀSTIVĀDA](#) anthology of aphorisms, and the [JÑĀNAPRASTHĀNA](#), the central treatise of the Sarvāstivāda [ABHIDHARMA](#). Some indigenous Chinese scriptures (see [APOCRYPHA](#)), such as the [PUSA YINGLUO BENYE JING](#), are also attributed to him.

Zhuhong. (C) (祜宏). See [YUNQI ZHUHONG](#).

Zhujing yao ji. (J. Shokyō yōshū; K. Chegyōng yo chip 諸經要集). In Chinese, “Collection of the Essentials of the Various Scriptures,” edited by the Chinese monk Daoshi (d. 683); also known as the *Shan’ e yebao lun* (“Treatise on Good and Evil Karmic Retribution”). As the title implies, the *Zhujing yao ji* is a collection of what Daoshi considered to be essential passages from more than two hundred primary sources, including various sūtras, [VINAYAS](#), and commentaries. Many of the passages that were chosen by Daoshi for inclusion in his collection are concerned with the issue of [KARMAN](#) and retribution, hence the text’s alternative title. The entire collection is comprised of a total of thirty sections: (1) the three jewels ([RATNATRAYA](#)), (2) worshipping [STŪPAS](#), (3) controlling thoughts, (4) entering the way, (5) praises and chants, (6) lighting incense, (7) receiving requests, (8) receiving vegetarian feasts ([ZHAI](#)), (9) breaking fast, (10) wealth, (11) poverty, (12) leading others, (13) repaying debt to others, (14) releasing living beings, (15) the flourishing of merit, (16) choosing friends, (17) staying alert, (18) six classifications of beings ([GATI](#)), (19) cause of karman, (20) desire and defilements, (21) four types of birth, (22) retributions, (23) ten evils, (24) deception, (25) laziness, (26) wine and meat, (27) divination, (28) hell, (29) mortuary customs, and (30) miscellaneous matters.

zhung lnga. (shung nga). [alt. gzhung chen bka’ pod lnga/gzhung chen pod lnga]. In Tibetan, “the five books,” five Indian treatises that provided the foundation for the monastic curriculum of the [DGE LUGS](#) sect. The five works are the [ABHISAMAYĀLAMKĀRA](#) of [MAITREYA](#), the [MADHYAMAKĀVATĀRA](#) of [CANDRAKĪRTI](#), the [PRAMĀNAVĀRTTIKA](#) of [DHARMAKĪRTI](#), the [ABHIDHARMAKOŚABHĀSYA](#) of [VASUBANDHU](#), and the [VINAYASŪTRA](#) of [GUNAPRABHA](#).

zhuoyu. (著語). In Chinese, “annotation,” or “capping phrase.” See [JAKUGO](#).

zhurengong. (J. shujinkō; K. chuin’gong 主人公). In Chinese, literally “master” or “owner”; a term used within the [CHAN](#) tradition to refer to “buddha-nature” (C. [FOXING](#)) or “true mind” (C. zhenxin), sometimes seen also as the variant “old master” (zhurenweng). The [ZIMEN JINGXUN](#) (“Admonitions for the Dark-[Robed]”), an influential Buddhist primer compiled in 1313 by the [CHAN](#) monk Yongzhong (d.u.), specifically refers to the variant zhurenweng as a designation for “true mind.” The [WUMEN GUAN](#) (“Gateless Checkpoint”), the eponymous [GONG’AN](#) collection of [WUMEN HUIKAI](#) (1183–1260), includes a gong’an on

zhurengong attributed to Ruiyan Shican (850–910), a second-generation successor of [DESHAN XUANJIAN](#) (782–865): Ruiyan would call to himself every day, “Master (zhurengong)!” And he would respond, “Yes.” Then he would say, “Be clear!” “Yes.” “Any time and any day, don’t be fooled by anything.” “I won’t be.” Yaun Kagu’s (fl. c. 1376) [CHAGYÖNG MUN](#) (“Self-admonitions”), one of the three texts included in the Korean monastic primer [CH’OBALSIM CHAGYÖNG MUN](#), opens with an admonition to postulants and novices: “Master (chuin’gong)! Listen to my words! How can you continue to transmigrate through the realms of suffering when so many people have realized the way through the gateway of emptiness?” The Korean Sōn community uses the concept of chuin’gong as a generic “meditative topic” (hwadu; C. [HUATOU](#)) in kanhwa Sōn (C. [KANHUA CHAN](#)), or “questioning meditation.”

[Zhwa dmar incarnations.](#) (Shamar). An influential incarnation ([SPRUL SKU](#)) lineage in the [KARMA BKA’ BRGYUD](#) sect of Tibetan Buddhism, regarded as a human incarnation of [AMITĀBHA](#). The first incarnation, Grags pa seng ge (Drakpa Senge, 1283–1349), was a disciple of the third [KARMA PA](#), who offered him a red crown (zhwa dmar), from which the name of the line of incarnations derives. Subsequent Zhwa dmar embodiments had close relationships with the Karma pa line, in many cases alternately serving as [GURU](#) and pupil to the [BKA’ BRGYUD](#) hierarch. Grags pa seng ge founded a seat at [GNAS NANG](#) monastery in central Tibet, later moved to [YANGS PA CAN](#) monastery under the direction of the fourth incarnation, Chos grags ye shes (Chödrak Yeshe, 1453–1524). Several Zhwa dmar incarnations spent considerable time in Nepal, including the sixth, Gar dbang Chos kyi dbang phug (Garwang Chökyi Wangchuk, 1584–1630), who composed a detailed description of his travels. The lineage was interrupted for nearly a century when the tenth incarnation, Chos grub rgya mtsho (Chödrup Gyatso, 1741–1791), was accused of forging a treasonous alliance with the Gorkha army during a Tibetan conflict with Nepal, during which [BKRA SHIS LHUN PO](#) monastery was sacked. The tenth Zhwa dmar died in prison, by either suicide or murder. The Tibetan government seized Yangs pa can monastery and converted it into a [DGE LUGS](#) monastery. It also banned recognition of new Zhwa dmar embodiments, a proscription that lasted more than a century. In the interim, several incarnations were found but never officially installed. The incarnation lineage includes:

1. Grags pa seng ge (Drakpa Senge, 1283–1349)

2. Mkha' spyod dbang po (Kachö Wangpo, 1350–1405)
3. Chos dpal ye shes (Chöpal Yeshe, 1406–1452)
4. Chos grags ye shes (Chödrak Yeshe, 1453–1524)
5. Dkon mchog yan lag (Könchok Yanlak, 1525–1583)
6. Gar dbang Chos kyi dbang phyug (Garwang Chökyi Wangchuk, 1584–1630)
7. Ye shes snying po (Yeshe Nyingpo, 1631–1694)
8. Dpal chen chos kyi don grub (Palchen Chökyi Döndrup, 1695–1732)
9. Dkon mchog dge ba'i 'byung gnas (Könchok Gewe Jungne, 1733–1740)
10. Chos grub rgya mtsho (Chödrup Gyatso, 1741–1792) [interruption of lineage]
11. 'Jam dbyangs Rin po che (Jamyang Rinpoche, 1892–1946)
12. 'Phrin las kun khyab (Trinle Kunkhyap, 1948–1950)
13. Mi pham smra ba'i go cha (Mipam Mawe Gocha, b. 1952)

Zhwa lu. (Shalu). A modest but important monastery near the Tibetan city of Gzhis ka tse (Shigatse), famous as the seat of fourteenth-century polymath [BU STON RIN CHEN GRUB](#), and renowned for its unusual architectural features. The earliest foundations were laid circa 997 by Lo ston Rdo rje dbang phyug (Lotön Dorje Wangchuk, b. tenth century), an active teacher during the outset of the later dissemination ([PHYI DAR](#)) of Buddhism in Tibet. His disciple, Lce btsun Shes rab 'byung gnas (Chetsün Sherap Jungne, d.u.), established a larger structure in 1027, having promised his master to construct a temple “as large as a small hat,” from which its name is derived. The project was completed just prior to a visit of the illustrious Bengali scholar [ATISA DIPAMKARASRIJNANA](#). During the thirteenth century, Zhwa lu formed close ties with the ruling [SA SKYA](#) hierarchs and their Mongol patrons. In 1306, the Yuan emperor Temür (1265–1307) appointed Grags pa rgyal mtshan (Drakpa Gyaltsen, d.u.) as prelate, under whom the institution flourished. Bu ston's rise to the abbacy in 1320 is

traditionally viewed as the beginning of a new lineage, the so-called Zhwa lu pa (“Those of Zhwa lu”) or Bu lugs tshul (“Tradition of Bu [ston]”). It was at Zhwa lu that Bu ston famously redacted the several hundred volumes that would comprise his influential edition of the Tibetan Buddhist canon. The monastery is equally famous for its unique blend of Tibetan and Chinese architecture (most notably, its pagoda-style roof of glazed turquoise tiles) and murals executed under the direction of Newar artist-disciples of the master Newari artisan Arniko.

Zibo. (C) (紫柏) (1543–1603). See [DAGUAN ZHENKE](#).

Zimen jingxun. (J. Shimon kyōkun/Shimon keikun; K. Ch’imun kyōnghun 緇門警訓). In Chinese, “Admonitions for Those in the Dark-(Robed) School”; an important Buddhist primer, in nine rolls, compiled in 1313 by the [CHAN](#) monk [YONGZHONG](#) (d.u.) in the [LINJI ZONG](#) lineage of [ZHONGFENG MINGBEN](#). Yongzhong’s text is an expansion of an earlier one-roll primer entitled *Zilin baoxun* (“Precious Admonitions to the Forest of the Dark-[Robed]”), by the Song-dynasty monk Zexian (d.u.). In 1474, the monk Rujin (d.u.) of the monastery of Zhenrusi added some additional work of his own to Yongzhong’s text and published the compilation as *Zimen jingxun*, in a total of ten rolls. The text contains 170 anecdotes, instructions, admonitions, and suggestions to neophytes, derived from eminent monks who lived between the Northern Song and the Ming dynasties. The author admonishes Chan students to observe the Buddhist precepts and to exert themselves in the study of Buddhism. Citing such Confucian classics as the *Lunyu* (“Analects of Confucius”) and the *Shijing* (“Book of Poetry”), Yongzhong admonishes students to be diligent in their learning, even encouraging them to study Confucianism and Daoism in order better to promote Buddhism, just as ancient eminent masters had done. He provides several masters’ detailed instructions on Chan meditation, including proper physical posture, and offers instructions on the proper way of reading Buddhist scriptures. Finally, Yongzhong includes the instructions of many renowned Chan masters, as conveyed in their sermons ([SHANGTANG](#)) and letters ([SHUZHUANG](#)). Rujin’s edition of Yongzhong’s work continues to be widely used today to instruct novices and neophytes. In Korea, Yongzhong’s nine-roll version has been republished several times since [T’AEGO POU](#) (1301–1381) imported it to the peninsula during the Koryŏ period.

Zimmè Paññāsa. In Burmese, lit. “Chiangmai Fifty”; the Burmese recension of

the *Paññāsajātaka*, or “Fifty [Apocryphal] Birth Stories.” See [PAÑÑĀSAJĀTAKA](#).

Zlum brtsegs lha khang. (Dumtsek Lhakang). A large, three-floored [STŪPA](#) constructed in 1421 by the renowned Tibetan adept [THANG STONG RGYAL PO](#) (Tangtong Gyalpo), located in Bhutan’s Spa gro (Paro) Valley. According to traditional biographies, the master erected this structure at a geomantically powerful location in order to restrain a malignant demoness dwelling in the region. It was restored and enlarged in 1841 by the twenty-fifth head abbot (rje mkhan po) of Bhutan, Shes rab rgyal mtshan (Sherap Gyaltzen, served 1836–1839).

zong. (J. shū; K. chong 宗). A polysemous term in Chinese, which can refer to the “core teaching,” “cardinal doctrine,” or central “axiom” of a text or scholastic philosophy, or to a “school,” “tradition,” or even “lineage.” Because of the denotation of zong as a cardinal doctrine, the term is used to translate the Sanskrit [SIDDHANTA](#), an “axiom” or principal “tenet” of the various schools of Indian philosophy (both Buddhist and non-Buddhist). Although commonly translated as “school” (“sect” is incorrect in a Chinese Buddhist context), this rendering is only appropriate for those scholastic and practice traditions that trace themselves back through an unbroken lineage of ancestors to a specific founding “patriarch” ([ZUSHI](#)), such as the [Tiantai Zong](#), [Huayan Zong](#), and [Chan Zong](#). Commentarial traditions focused upon the exegesis of a specific text, such as the [Dilun](#) ([Daśabhūmikasūtra](#)), [She Lun](#) ([Mahāyānasamgraha](#)), or [Chengshi Lun](#) (*[Tattvasiddhi](#)), do not qualify as true schools of Chinese Buddhism, since they neither claim to derive from a single founder nor posit an exclusive lineage of successors; they might more correctly be termed “scholastic traditions.”

Zongjing lu. (J. Sugyōroku; K. Chonggyōng nok 宗鏡錄). In Chinese, “Records of the Mirror of the Source”; composed c. 961 by the Song-dynasty [Chan](#) master [Yongming Yanshou](#) (904–975), in one hundred rolls; also called “Records of the Mirror of the Mind” (*Xinjing lu*). The “source” (zong), Yanshou says in the preface to the *Zongjing lu*, refers to the “one mind” ([Yixin](#)), which functions like a mirror that is able to reflect all dharmas. This comprehensive collection offers an exhaustive elaboration of the Chan teaching of “one mind” by systematizing the doctrinal and meditative positions of the various Chan traditions of past and present. The *Zongjing lu* consists of three main sections: exemplifications of the source (biaozong zhang), questions and answers (wenda chang), and citations

(yinzheng chang). The first section, which comprises much of the first roll, offers a general overview of the treatise, focusing on Chan’s “source” in the one mind. The massive second section, corresponding to the second half of the first roll through the ninety-third roll, offers various explanations on the one mind through a question raised at the beginning of each section, followed by Yanshou’s detailed response. His explanations are typically accompanied by extensive citations from various sūtras and commentaries, such as the [YUANJUE JING](#) and the [DAZHIDU LUN](#). Throughout this exhaustive survey and explanation of doctrinal matters, Yanshou underscores the importance of the one mind or one dharma as the underlying source of all external phenomena. The third and final section, which comprises the last seven rolls of the collection, validates the previous explanations through quotations of hundreds of scriptures and sayings of eminent Chan masters; its aim is to help those of inferior spiritual capacity give rise to faith. Many of these quotations are from materials that are no longer extant, thus providing an important overview of Chan during Yanshou’s time. Yanshou’s goal throughout this work is to present his distinctive vision of Chan as a pansectarian tradition that subsumes not only the different Chan lineages, but also such doctrinal traditions as [Tiantai](#), [Huayan](#), and [Faxiang](#). Much of the source material that Yanshou compiled in the *Zongjing lu* may derive from [Guifeng Zongmi](#)’s similarly massive *Chanyuan ji* (“Chan Collection”), only the prolegomenon to which survives (see [Chanyuan Zhuquanji Duxu](#)). The collection was influential not only in China, but also in Koryŏ-period Korean [Sŏn](#) and the five mountain ([Gozan](#)) schools of Ashikaga-period Japanese [Zen](#).

[Zongli zhongjing mulu](#). (J. Sōri shūkyō mokuroku; K. Chongni chunggyōng mongnok 綜理衆經目錄). A scriptural catalogue ([Jinglu](#)) compiled by the Eastern Jin monk [Dao’an](#) (312–385); often referred to by its abbreviated title, *An lu*, or “An’s Catalogue.” The complete catalogue is no longer extant, but is partially preserved within the [Chu sanzang jiji](#). The catalogue covers texts translated between the Han dynasty to the year 374 and provides the titles, translators’ names, and the dates of the translations, wherever possible. As one of the first such scriptural catalogues compiled in East Asia, Dao’an’s compilation served as the model for all future such endeavors.

[Zongmen huomen](#). (J. Shūmon wakumon; K. Chongmun hongmun 宗門或問). In Chinese, “Some Inquiries into the [Chan] Tradition,” composed by the [Chan](#) master [Zhanran Yuandeng](#) in the [Caodong zong](#). In 1605, Zhanran replied to

inquiries he had received from Chan neophytes about the school's distinctive teachings and practices and edited together fifty-two of these exchanges as the *Zongmen huomen*. (The *zongmen* of the title is a common designation for the [CHAN ZONG](#), especially in Song-dynasty and later materials.) As Zhanran explains in his preface, he wrote this text because it is difficult for neophytes to understand Chan since there are so many different Chan teachings and practices. For example, to the question of what is most essential in Chan meditation and how one should begin in Chan practice, Zhanran answers that one must aspire to investigate the matter of birth-and-death. As to how to investigate the matter of birth-and-death, he answers that one has to arouse three states of mind: (1) the mind of great faith; (2) the mind of ferocious effort (cf. [YONGMAENG CHÖNGJIN](#)) and nonretrogression; and (3) the mind of great doubt (see [YIQING](#)). (Cf. [SANYAO](#)). In the course of his exposition, Zhanran also covers other Buddhist practices, including recitation of the Buddha's name ([NIANFO](#)), but he is adamant that Chan is the best and most direct way to enlightenment. In addition to the series of exchanges, Zhanran also appends the following related texts to the *Zongmen huomen*: the *Canchan shinan* ("Difficulties in Investigating Chan"), *Huomen* ("Some Inquiries"), *Buyi* ("Appended Sayings"), *Daming Dingzi men* ("Clear Replies to Dingzi's Inquiries"), and the *Daguan heshang zhaoyang zhuan* ("Tale of the Monk Daguan's Invitation to Disaster"), a fervent defense of the renowned Chan master [DAGUAN ZHENKE](#) (a.k.a. [ZIBO](#)), who died amid political intrigue at court.

[Zongmen liandeng huiyao](#). (J. Shūmon rentōeyō; K. Chongmun yōndǔng hoeyo 宗門聯燈會要). In Chinese, "Essential Collection of the Lamplight Connections within the [Chan] Tradition"; composed by Huiweng Wuming (d.u.), a third-generation disciple of the [CHAN](#) master [DAHUI ZONGGAO](#), in 1183. This work is a collection of anecdotes and teachings culled from the biographies and discourse records ([YULU](#)) of over six hundred patriarchs and teachers ([ZUSHI](#)) of the Chan tradition. Huiweng begins the collection with the seven buddhas of the past ([SAPTABUDDHA](#)), the twenty-eight Indian patriarchs, and the six patriarchs of China (see [CHUANDENG LU](#)). His collections also include the various lineages and collateral lines that split off from the sixth patriarch ([LIUZU](#)) [HUINENG](#)'s disciples [QINGYUAN XINGSI](#) (up to the seventeenth generation) and [NANYUE HUAIKANG](#) (up to the fifteenth generation). In addition to its role as a genealogical history, the *Zongmen liandeng huiyao* was favored by many followers of Chan as a reliable and convenient collection of Chan cases

([GONG'AN](#)).

[Zongmen shigui lun](#). (J. Shūmon jikkiron; K. Chongmun sipkyu non 宗門十規論). In Chinese, “Treatise on the Ten Rules of the [Chan] Tradition,” composed by [CHAN](#) master [FAYAN WENYI](#) (885–958); also known as the *Fayan chanshi zongmen shigui lun*, *Jinghui Fayan chanshi zongmen shigui lun*, and simply *Shigui lun*. The *Zongmen shigui lun* warns against ten maladies to which those in the Chan tradition are susceptible, viz., (1) assuming the role of teacher without first purifying one’s own mind, (2) sectarian disputes, (3) positing the main points of Chan without knowing the specific contexts, (4) answering without consideration of time and situation, (5) failure to distinguish defiled from pure, (6) baseless interpretations of the sayings of the masters of old, (7) memorizing slogans and not being able to use them at the right moment, (8) miscitations by not mastering the canon, (9) improperly composing songs and verses before one’s understanding has matured, and (10) defending one’s own shortcomings and indulging in disputes. The *Zongmen shigui lun* is also the first text to mention the names of the five houses (see [WU JIA QI ZONG](#)) of the mature Chan tradition.

[Zongmi](#). (C) (宗密). See [GUIFENG ZONGMI](#).

[Zongze](#). (C) (宗頤). See [CHANGLU ZONGZE](#).

[Zuihō](#). (J) (瑞方) (1683–1769). See [MENZAN ZUIHŌ](#).

[zuishangsheng Chan](#). (J. saijōjōzen; K. ch’oesangsŏng Sŏn 最上乘禪). In Chinese, lit. “supreme vehicle Chan,” referring to one of the styles of practice and pedagogy associated with the [CHAN](#) school; often considered to be equivalent to “unconventional Chan” ([GEWAI CHAN](#)). Supreme vehicle Chan is one of the five categories of Chan listed by [GUIFENG ZONGMI](#) (780–841) in his [CHANYUAN ZHUJUAN JI DUXU](#) (“Prolegomena to the Source of Chan Collection”). According to Zongmi’s treatment, “supreme vehicle Chan” refers to meditation practices that rely on sudden approaches to awakening ([DUNWU](#)) and generate an initial insight into the true nature of mind, i.e., the original purity of mind that is shared by both sentient beings and buddhas. The text equates this form of Chan with the “pure Chan of the [TATHĀGATAS](#)” (rulai qingjing Chan), also known by its abbreviated name, tathāgata Chan (rulai Chan); it also is said to be equivalent to “single-practice [SAMĀDHI](#)” ([YIXING SANMEI](#)) and the “samādhi of suchness”

(zhenru sanmei), since “supreme vehicle Chan” is the root of all kinds of samādhi. The text also defines supreme vehicle Chan as the “Chan transmitted from [BODHIDHARMA](#)”; this latter form of Chan is subsequently named “patriarchal Chan” (zushi Chan) in the Song-dynasty Chan collections, such as the [JINGDE ZHUANDENG LU](#) (“Record of the Transmission of the Lamplight Published during the Jingde Era”) and Puji’s (1179–1253) *Wudeng huiyuan* (“Collected Essentials of the Five Lamplight Histories”), which in turn redefines “tathāgata Chan” as subordinate to “patriarchal Chan.”

zuochan. (J. zazen; K. chwasŏn 坐禪). In Chinese, “seated meditation.” Zuochan is a combination of the Chinese term “to sit” (zuo) and the character [CHAN](#), a transcription of the Sanskrit term [DHYĀNA](#) (meditation); often referred to in English-language sources by the Japanese pronunciation zazen. As its etymology implies, zuochan refers to sitting with legs folded on top of each other and eyes slightly closed in meditation. This meditative practice may be generically considered to be directed at samādhi, one of the three trainings (C. sanxue; S. śikṣātraya), along with morality ([ŚĪLA](#)) and wisdom ([PRAJÑĀ](#)), or alternatively at dhyāna, one of the six [PĀRAMITĀS](#) emblematic of [BODHISATTVA](#) practice, along with charity ([DĀNA](#)), precepts (śīla), forbearance ([KSĀNTI](#)), effort ([VĪRYA](#)), and wisdom (prajñā). Sitting has long held pride of place within the Buddhist tradition as the archetypal position ([ĪRYĀPATHA](#)) most suited to sustained meditation training. The prototype for zuochan is the Buddha’s own seated meditation under the [BODHI TREE](#), as well as the legendary Indian monk [BODHIDHARMA](#)’s “wall gazing” ([BIGUAN](#)) for nine years in a cave. Because of these associations with both the Buddha and Bodhidharma, the founder of the Chan school, zuochan was widely considered to be the primary practice within the [CHAN](#), [SŌN](#), and [ZEN](#) traditions. In China, zuochan came to be viewed as such a stereotypical aspect of the Chan school, broadly conceived, that Chan teachers began to critique its necessity and importance; these critiques suggested instead that Chan practice was not to be confined just to zuochan, but should also be conducted throughout the three other standard departments of walking, standing, and lying down. For example, the [LIUZU TANJING](#) (“Platform Sūtra”), attributed to the sixth patriarch [HUINENG](#), includes such a rectification of the meaning of zuochan when it says that “‘seated’ means, externally, to refrain from generating thoughts related to wholesome or unwholesome objects; ‘meditation’ means, internally, to see that the self-nature is unmoving.” In this redefinition, zuochan means not just “seated meditation” but instead encompasses a way of

understanding that is to be carried through all aspects of one’s experience.

Zur chung pa. (Zur chung Shes rab grags pa) (1014–1074). A [RNYING MA](#) master, the disciple of [ZUR PO CHE](#) (Shākya ’byung gnas, 1002–1062) and father of Zur Shākya seng ge (also known as Sgro sbug pa, 1074–1135). Because he was a poor novice, Zur po che encouraged him to marry the daughter of a wealthy patron, which he reluctantly did. He is said to have spent thirteen years meditating in a cave. His most famous work is his final testament, the *Zhal gdams brgyad cu pa* (“Eighty Oral Instructions”).

Zur po che. ([alt. Zur chen] Shākya ’byung gnas) (1002–1062). A [RNYING MA](#) master of the Zur clan. His disciple [ZUR CHUNG PA](#), and Zur Shākya seng ge (also known as Sgro sbug pa, 1074–1135) are known with him as the three Zur (Zur rnam pa gsum), with Zur po che as the founding figure. He was a disciple of Nyang Ye shes ’byung gnas and was renowned especially for his practice and teaching of the “magical net” ([MĀYĀJĀLA](#)) class of [TANTRAS](#), the *Dgongs pa ’dus pa’i mdo*, and the [SĀDHANA](#) of [VAJRAKĪLAYA](#). As such, he holds an important place in the transmission of [RDZOGS CHEN](#) and [SEMS SDE](#) teachings. He was ordained by the famous [VINAYA](#) master Bla chen Dgongs pa rab gsal and also studied extensively with [GNUBS CHEN SANGS RGYAS YE SHES](#). During the time of the later dissemination of Buddhism to Tibet, he is credited with organizing the Rnying ma tantras in such a way that a particular tantra, its commentaries, sādhanas, and ritual manuals were grouped together. He identified the *Dgongs pa ’dus pa’i mdo* as the root tantra of [ANUYOGA](#), the [GUHYAGARBHA](#) as the root tantra of [MAHĀYOGA](#), and the [KUN BYED RGYAL PO](#) as the root tantra of [ATIYOGA](#). He is also credited with the fundamental division of the Rnying ma teachings in [BKA’ MA](#) (words) and [GTER MA](#) (treasures). He founded the monastery of ’Ug pa lung (Owl Land) located to the east of Gzhis ka rtse (Shigatse).

zushi. (J. soshi; K. chosa 祖師). In Chinese, “patriarch” (lit. “ancestral teacher”), referring to eminent teachers in lineages that are claimed to trace back to [ŚĀKYAMUNI](#) Buddha or even earlier buddhas. Indian Sanskrit texts dating from the 2nd century CE onward refer to a tradition of five “masters of the dharma” (dharmācārya) who succeeded the Buddha as head of the [SAMGHA](#): [MAHĀKĀŚYAPA](#), [ĀNANDA](#), [MADHYĀNTIKA](#), [ŚĀNAKAVĀSIN](#), and [UPAGUPTA](#). Later sources expand this list into a roster of nine eminent masters who “handed down the lamplight of wisdom successively through the generations.” Often, these

genealogies were extended as far back as the seven buddhas of antiquity ([SAPTATATHĀGATA](#)). It is widely presumed that this notion of dharma-transmission lineages developed from the earlier [VINAYA](#) concept of the “preceptor” ([UPĀDHYĀYA](#)), a senior monk who confers the lower ordination (pravrajyā, see [PRAVRAJITA](#)) to new novices ([ŚRĀMANERA](#)) and higher ordination ([UPASAMPADĀ](#)) to monks ([BHIKSU](#)). This personal connection between preceptor and disciple created incipient ordination families connected to specific preceptors, connections that later could be extended to dharma transmission as well. ¶ In East Asia, these lists of Indian dharma masters continued to be expanded and elaborated upon so that they also included the preeminent indigenous figures within each lineage, thus connecting the Chinese patriarchs of each lineage with their Indian predecessors. Most of the indigenous traditions of East Asian Buddhism, including the [CHAN ZONG](#), [TIANTAI ZONG](#), [JINGTU ZONG](#), and [HUAYAN ZONG](#), draw their legitimacy at least partially from their claims that their teachings and practices derive from an unbroken lineage of authoritative teachers that can be traced back geographically to India and temporally to the person of the Buddha himself. The specific names and numbers of patriarchs recognized within each lineage typically change over time and vary widely between the different traditions. Of these lists, the list of patriarchs recognized in the Chan school has received the lion’s share of scholarly attention in the West. This Chan list varies widely, but a well-established roster includes twenty-eight Indian and six Chinese patriarchs. These six Chinese patriarchs (liu zu)—[BODHIDHARMA](#), [HUIKE](#), [SENGCAN](#), [DAOXIN](#), [HONGREN](#), and [HUINENG](#)—are credited by the classical tradition with the development and growth of Chan in China, but early records of the Chan school, such as the [LENGQIE SHIZU JI](#) and [LIDAI FABAO JI](#), reveal the polemical battles fought between disparate contemporary Chan communities to place their own teachers on this roster of patriarchal orthodoxy. It is important to note that all of these various lists of patriarchs, in all the different traditions, are created retrospectively as a way of legitimizing specific contemporary lineages or teachers and verifying the authenticity of their teachings; thus their accounts of the chronology and history of their lineages must be used critically. The compound zushi can mean either “patriarch” (lit., ancestral teacher) or in other contexts “patriarchs and teachers,” as in the stock phrase “all the buddhas of the three time-periods and patriarchs and teachers throughout successive generations” (sanshi zhufu lidai zushi), which explicitly traces a school’s ancestral lineage from the past to the present and into the future. Some modern Buddhists, especially in the West, deplore the

sexism inherent in the term “patriarch,” preferring instead to render it with the gender-neutral term “ancestor.” See also [CHUANDENG LU](#); [FASI](#); [PARAMPARĀ](#); [YINKE](#).

[Zutang ji](#). (J. Sodōshū; K. Chodang chip 祖堂集). In Chinese, “Anthology of the Patriarchs’ Hall.” See [CHODANG CHIP](#).

[Zuting qianchui lu](#). (J. Sotei kantsuiroku; K. Chojōng kyōmch’u nok 祖庭鉗錘錄). In Chinese, “Record of Forceps and Hammers of the Patriarchs’ Hall,” edited by the [CHAN](#) master [FEIYIN TONGRONG](#) (1593–1661) of the [LINJI ZONG](#) during the late Ming dynasty. This collection includes over fifty anecdotes considered to be essential for the training of students. These anecdotes focus on the enlightenment stories of several renowned Tang-and Song-dynasty [LINJI ZONG](#) masters, such as [LINJI YIXUAN](#), Shoushan Shengnian (926–993), Fenyang Shanzhao (947–1024), Shishuang Chuyuan (986–1039), [YUANWU KEQIN](#), and [DAHUI ZONGGAO](#), but also include a few stories concerning renowned masters in the [YUNMEN ZONG](#) and [CAODONG ZONG](#). Most of these stories are excerpted from Chan texts published during the Song dynasty, especially Puji’s (1179–1253) *Wudeng huiyuan* (“Collected Essentials of the Five Lamplight Histories”). Each story is accompanied by Feiyin’s own short prose commentary (pingchang). Four additional exchanges between a certain master Wang Jing and the monk Fohui Faquan (d.u.) concerning the history of the Chan tradition are included as an appendix.

[Zuting shiyuan](#). (J. Sotei jion; K. Chojōng sawōn 祖庭事苑). In Chinese, “Garden of Matters from the Patriarchs’ Hall,” edited in eight rolls by Mu’an Shanxiang (d.u.) in 1108; the oldest encyclopedia of the Chinese [CHAN](#) tradition. This collection includes over 2,400 items related to Chan pedagogy, culled from Buddhist and secular stories, proverbs, numerological lists, personal names, local dialects, and so forth. Mu’an is said to have embarked on this project in response to the growing number of monks who were unable to understand the rich content and context of the many [GONG’AN](#) exchanges found in Chan literature. Mu’an’s material is drawn from over twenty important Chan sources, such as the discourse records ([YULU](#)) of [YUNMEN WENYAN](#), [XUEDOU CHONGXIAN](#), and [FAYAN WENYI](#), and [YONGJIA XUANJUE](#)’s popular [ZHENGDAO GE](#). The encyclopedia functions as a glossary for these works, offering explanations for their difficult technical terms and obscure names (which are not necessarily Chan or Buddhist in origin), and drawing his explanations from Buddhist,

Confucian, and Daoist materials, as well as such secular sources. For example, the first roll of the encyclopedia provides a glossary of the *Yunmen lu*, which discusses the author Yunmen Wenyan, offers definitions of terms and explanations of names appearing in the text, drawing on sources ranging from the *Shiji* (“Book of History”) to the *AGAMA SŪTRAS*, and fills out the myriad numerical lists that appear in the text, such as the three vehicles (C. *sansheng*; S. [TRİYĀNA](#)), the three baskets of the canon (C. *sanzang*; S. [TRIPITAKA](#)), the eight teachings of Tiantai (see [WUSHI BAJIAO](#)), *etc.* Mu’an’s exhaustive collection meticulously traces the source of each item and provides a detailed commentary on each. The *Zuting shiyuan* was republished in 1154, and numerous editions were published during the Tokugawa period in Japan.

List of Lists

This roster provides some of the most important numerical lists used in the Buddhist traditions. Generally, we include the equivalencies only in Sanskrit, Tibetan, and Chinese, since in most cases these will be adequate to trace the terms back to the relevant entries in the dictionary. In instances where there are several variations of a list, we seek to provide only one common form. In addition, the various languages often provide different interpretations of a particular term, making it difficult to provide a single English translation. For ease in tracing terms back to their main dictionary entries, the numeric elements in the foreign-language names of each list have not been provided; the exceptions are those lists in which numerals are included in the main dictionary entries (for example, *daśabhūmi*).

ONES

one vehicle. (S. *ekayāna*; T. *theg pa gcig pa*; C. *yisheng* 一乘)

TWOS

two accesses/entrances. (C. *er ru* 二入)

1. access of principle (C. *liru* 理入)
2. access of practice (C. *xingru* 行入)

two accumulations/equipments. (S. *saṃbhāra*; T. *tshogs*; C. *ziliang* 資糧)

1. accumulation/equipment of merit (S. *puṇyasam̐bhāra*; T. *bsod nams kyi tshogs*; C. *fuziliang* 福資糧)
2. accumulation/equipment of wisdom (S. *jñānasam̐bhāra*; T. *ye shes kyi tshogs*; C. *zhiziliang* 智資糧)

two aspects of esoteric Buddhism. (C. *er mi* 二密)

1. esoteric as to principle (*li mi* 理密)
2. esoteric as to practices (*shi mi* 事密)

two attainments. (S. siddhi; T. dngos grub; C. chengjiu/xidi 成就/悉地)

1. mundane attainments (S. sādharmaṇasiddhi; T. thun mong gi dngos grub; C. gongtong chengjiu/xidi 共同成就/悉地)
2. supreme attainment (S. uttamasiddhi; T. mchog gi dngos grub; C. zuishang chengjiu/xidi 最上成就/悉地)

two benefits. (S. artha; T. don; C. li 利)

1. benefitting oneself (S. svārtha/ātmahita; T. rang don; C. zili 自利)
2. benefitting others (S. parārtha/parahita; T. gzhan don; C. lita 利他)

two bodies (of a buddha). (S. kāya; T. sku; C. shen 身)

1. truth body (S. dharmakāya; T. chos sku; C. fashen 法身)
2. physical body (S. rūpakāya; T. gzugs sku; C. shengshen 生身)

twofold generation of the aspiration to enlightenment. (S. bodhicittotpāda; T. byang chub kyi sems bskyed; C. fa putixin 發菩提心)

1. attitude of aspiration (S. prañidhicittotpāda; T. smon pa'i sems bskyed; C. yuan putixin 願菩提心)
2. attitude of undertaking (S. prasthānacittotpāda; T. 'jug pa'i sems bskyed; C. xing putixin 行菩提心)

two karmic retributions. (C. er bao 二報)

1. retribution proper [viz. one's own actions] (zheng bao 正報)
2. adjunct retribution [viz. environmental factors] (yi bao 依報)

two means of knowledge. (S. pramāṇa; T. tshad ma; C. liang 量)

1. direct perception (S. pratyakṣa; T. mngon sum; C. xianliang 現量)
2. inference (S. anumāna; T. rjes dpag; C. biliang 比量)

two obstructions. (S. āvaraṇa; T. sgribs pa; C. zhang 障)

1. afflictive obstructions (S. kleśāvaraṇa; T. nyon mongs pa'i sgrib ba; C. fannaο zhang 煩惱障)
2. cognitive or noetic obstructions [to omniscience] (S. jñeyāvaraṇa; T. shes bya'i sgrib ba; C. suozhi zhang 所知障)

two stages. (S. krama; T. rim pa; C. cidi 次第)

1. stage of generation (S. utpattikrama; T. bskyed rim; C. shengqi cidi 生起次第)
2. stage of completion (S. niṣpannakrama; T. rdzogs rim; C. yuanman cidi 圓滿次第)

two supreme ones. (T. mchog gnyis)

1. Nāgārjuna
2. Asaṅga

OR

1. Guṇaprabha
2. Śākyaprabha

two truths. (S. satyadvaya; T. bden pa gnyis; C. er di 二諦)

1. conventional truth (S. saṃvṛtisatya; T. kun rdzob bden pa; C. sudi/shisu di 俗諦/世俗諦)
2. absolute truth/ultimate truth (S. paramārthasatya; T. don dam bden pa; C. zhendi/shengyi di/diyiyi di 真諦/勝義諦/第一義諦)

two types of nonself. (S. nairātmya; T. bdag med; C. wuwo 無我)

1. nonself of the person (S. pudgalanairātmya; T. gang zag gi bdag med; C. ren wuwo 人無我)
2. nonself of phenomena (S. dharmanairātmya; T. chos kyī bdag med; C. fa wuwo 法無我)

two vehicles. (S. yānadvaya; T. theg pa gnyis; C. er sheng 二乘)

1. vehicle of disciples (S. śrāvakayāna; T. nyan thos kyī theg pa; C. shengwen sheng 聲聞乘)
2. vehicle of solitary buddhas (S. pratyekabuddhayāna; T. rang rgyal gyī theg pa; C. yuanjue sheng 緣覺乘)

OR

1. great vehicle (S. mahāyāna; T. theg pa chen po; C. dasheng 大乘)

2. lesser vehicle (S. hīnayāna; T. theg pa dman pa; C. xiaosheng 小乘)

THREES

three actions. (S. karman; T. las; C. ye 業)

1. wholesome/virtuous (S. kuśāla; T. dge ba; C. shan 善)
2. unwholesome/unvirtuous (S. akuśāla; T. mi dge ba; C. bushan 不善)
3. neutral/indeterminate (S. avyākṛta; T. lung ma bstan; C. wuji 無禮)

three afflictions. (S. kleśa; T. nyon mongs; C. fannao 煩惱)

1. desire/greed (S. rāga; T. 'dod chags; C. tan 貪)
2. hatred/aversion (S. dveṣa; T. zhe sdang; C. chen 瞋)
3. delusion (S. moha; T. gti mug; C. chi 癡)

three baleful destinies. (S. apāya/durgati; T. ngan song; C. equ 惡趣)

1. animals (S. tiryak; T. dud 'gro; C. chusheng 畜生)
2. ghosts (S. preta; T. yi dwags; C. egui 餓鬼)
3. hell denizens (S. nāraka; T. dmyal ba; C. diyu 地獄)

three baskets of the canon. (S. tripiṭaka; T. sde snod gsum; C. sanzang 三藏)

1. basket of discourses (S. sūtrapīṭaka; T. mdo sde'i sde snod; C. jingzang 經藏)
2. basket of discipline (S. vinayapīṭaka; T. 'dul ba'i sde snod; C. lüzang 律藏)
3. basket of abhidharma/scholastic exegesis (S. abhidharmapīṭaka/*śāstrapīṭaka; T. chos mngon pa'i sde snod; C. lünzang 論藏)

three becomings. (S. bhava; T. srid pa; C. you 有)

1. becoming in the sensual realm (S. kāmabhava; T. 'dod pa'i srid pa; C. yuyou 欲有)
2. becoming in the realm of subtle materiality (S. rūpabhava; T. gzugs kyi srid pa; C. seyous 色有)
3. becoming in the immaterial realm (S. ārūpyabhava; T. gzugs med kyi srid pa; C. wuseyou 無色有)

three bodies [of a buddha]. (S. trikāya; T. sku gsum; C. san shen 三身)

1. truth body (S. dharmakāya; T. chos sku; C. fashen 法身)
2. enjoyment body (S. saṃbhogakāya; T. longs spyod rdzogs pa'i sku; C. baoshen 報身)
3. emanation body (S. nirmāṇakāya; T. sprul pa'i sku; C. huashen 化身)

three classes of atiyoga. (T. rdzogs chen sde gsum)

1. mental class (T. sems sde)
2. instruction class (T. man ngag sde)
3. expanse class (T. klong sde)

three contaminants. (āsrava; T. zag pa; C. lou 漏)

1. contaminant of sensuality (S. kāmāsrava; T. 'dod pa'i zag pa; C. yu lou 欲漏)
2. contaminant of becoming (S. bhavāsrava; T. srid pa'i zag pa; C. you lou 有漏)
3. contaminant of ignorance (S. avidyāsrava; T. ma rig pa'i zag pa; C. wuming lou 無明漏)

three enlightenments. (S. bodhi; T. byang chub; C. puti 菩提)

1. enlightenment of the disciples (S. śrāvakabodhi; T. nyan thos kyi byang chub; C. shengwen puti 聲聞菩提)
2. enlightenment of the pratyekabuddhas (S. pratyekabodhi; T. rang rgyal gyi byang chub/rang sangs rgyas kyi byang chub; C. yuanjue puti 緣覺菩提)
3. complete perfect enlightenment [of the buddhas] (S. anuttarasamyaksaṃbodhi; T. bla na med pa yang dag par rdzogs pa'i byang chub; C. anouduoluo sanmiao sanputi 阿耨多羅三藐三菩提)

three families, lords of. (S. trikulanātha; T. rigs gsum mgon po; C. sanbu huzhu 三部護主)

1. Avalokiteśvara (T. Spyan ras gzigs; C. Guanshiyin 觀世音)
2. Mañjuśrī (T. 'Jam dpal; C. Wenshu 文殊)
3. Vajrapāṇi (T. Phyag na rdo rje; C. Jingangshou 金剛手)

threefold contemplation. (C. sanguan 三觀)

1. contemplation of emptiness (C. kongguan 空觀)
2. contemplation of conventional existence (C. jiaguan 假觀)
3. contemplation of their mean (C. zhongguan 中觀)

three gates. [viz. types of karmic activity] (S. dvāra; T. sgo; C. men 門)

1. body (S. kāya; T. lus; C. shen 身)
2. speech (S. vāc; T. ngag; C. kou 口)
3. mind (S. manas; T. yid; C. yi 意)

three gates to deliverance. (S. vimokṣamukha; T. rnam thar sgo; C. jietuo men 解脫門)

1. emptiness (S. śūnyatā; T. stong pa nyid; C. kong 空)
2. signlessness (S. ānimitta; T. mtshan ma med pa; C. wuxiang 無相)
3. wishlessness (S. apraṇihita; T. smon pa med pa; C. wuyuan/wuzuo 無願/無作)

three inner tantras. (T. nang rgyud sde gsum)

1. mahāyoga (T. rnal 'byor chen po)
2. anuyoga (T. rjes su rnal 'byor)
3. atiyoga (T. shin tu rnal 'byor)

three jewels. (S. ratnatraya; T. dkon mchog gsum; C. sanbao 三寶)

1. the buddha (T. sang rgyas; C. fo/fotuo 佛/佛陀)
2. the teachings (S. dharma; T. chos; C. fa/damo 法/達磨)
3. the community (S. saṃgha; T. dge 'dun; C. seng/sengqie 僧/僧伽)

three knowledges. (S. trividya; T. rig pa gsum; C. sanming 三明)

1. recollection of past lives (S. pūrvanivāsānusmṛti; T. sngon gyi gnas rjes su dran pa; C. suzhu suinian/suming ming 宿住隨念/宿命明)
2. “the divine eye”/clairvoyance (S. divyacakṣus; T. lha'i mig; C. tianyan ming 天眼明)
3. the extinction of the contaminants (S. āsravakṣaya; T. zag pa zad pa shes pa; C. loujin ming 漏盡明)

three means of knowledge. (S. pramāṇa; T. tshad ma; C. liang 量)

1. direct perception (S. pratyakṣa; T. mngon sum; C. xianliang 現量)
2. inference (S. anumāna; T. rjes dpag; C. biliang 比量)
3. scripture (S. āgama; T. lung; C. shengyan liang/shengjiao liang 聖言量/聖教量)

three natures. (S. trisvabhāva; T. mtshan nyid gsum/ngo bo nyid gsum/rang bzhin gsum; C. sanxing 三性)

1. imaginary/imputed (S. parikalpita; T. kun btags; C. pianji suozhi xing 遍計所執性)
2. dependent (S. paratantra; T. gzhan dbang; C. yitaqi xing 依他起性)
3. perfected/consummate (S. pariniṣpanna; T. yongs su grub pa; C. yuanchengshi xing 圓成實性)

three poisons. (S. triviṣa; T. dug gsum; C. sandu 三毒)

1. desire/greed (S. rāga; T. 'dod chags; C. tan 貪)
2. hatred/aversion (S. dveṣa; T. zhe sdang; C. chen 瞋)
3. delusion (S. moha; T. gti mug; C. chi 癡)

three realms. [of existence] (S. traidhātuka; T. khams gsum; C. san jie 三界)

1. sensuous realm/desire realm (S. kāmadhātu; T. 'dod khams; C. yu jie 欲界)
2. realm of subtle materiality/form realm (S. rūpadhātu; T. gzugs khams; C. se jie 色界)
3. immaterial realm/formless realm (S. ārūpyadhātu; T. gzugs med khams; C. wuse jie 無色界)

three refuges. (S. triśaraṇa; T. skyabs gsum; C. san gui/san guiyi 三歸/三歸依)

1. the buddha (T. sang rgyas; C. fo/fotuo 佛/佛陀)
2. the teachings (S. dharma; T. chos; C. fa/damo 法/達磨)
3. the community (S. saṃgha; T. dge 'dun; C. seng/sengqie 僧/僧伽)

three roots. (S. mūla; T. rtsa ba)

1. teacher (S. guru; T. bla ma)
2. tutelary deity (T. yi dam)
3. ḍākinī (S. ḍākinī; T. mkha' 'gro ma)

three sages of Huayan. (C. Huayan sansheng 華嚴三聖)

1. Vairocana Buddha (C. Piluzhena zunfo 毗盧遮那尊佛)
2. Samantabhadra bodhisattva (C. Puxian pusa 普賢菩薩)
3. Mañjuśrī bodhisattva (C. Wenshu pusa 文殊菩薩)

three sufferings. (S. duḥkha; T. sdug bsngal; C. ku 苦)

1. suffering of [physical and mental] pain (S. duḥkhaduḥkhatā; T. sdug bsngal gyi sdug bsngal; C. kuku 苦苦)
2. suffering inherent in change (S. vipariṇāmaduḥkatā; T. 'gyur ba'i sdug bsngal; C. huaiku 壞苦)
3. suffering inherent in conditionality (S. saṃskāraduḥkhatā; T. 'du byed kyi sdug bsngal; C. xingku 行苦)

three times. (S. trikāla; T. dus gsum; C. sanshi 三世)

1. past (S. atīta; T. 'das pa; C. guoqushi 過去世)
2. present (S. vartamāna; T. da lta ba; C. xianzaishi 現在世)
3. future (S. anāgata; T. ma 'ongs pa; C. weilaishi 未來世)

three trainings. (S. triśikṣā; T. bslab pa gsum; C. sanxue 三學)

1. morality/higher morality (S. śīla/adhiśīlaśikṣā; T. tshul khriṃs/lhag pa'i tshul khriṃs kyi bslab pa; C. jie/zengshangjie xue 戒/增上戒學)
2. concentration/higher concentration (S. samādhi/adhisamādhiśikṣā; T. ting nge 'dzin/lhag pa'i ting nge 'dzin gyi bslab pa; C. ding/zengshangxin xue 定/增上心學)
3. wisdom/higher wisdom (S. prajñā/adhiprajñāśikṣā; T. shes rab/lhag pa'i shes rab kyi bslab pa; C. hui/zengshanghui xue 慧/增上慧學)

three truths/judgments. [of the Tiantai school] (C. sandi 三諦)

1. truth of emptiness (C. kongdi 空諦)
2. truth of being provisionally real (C. jiadi 假諦)
3. truth of the mean (C. zhongdi 中諦)

three turnings of the wheel of the law. (S. dharmacakrapravartana; T. chos 'khor rim pa; C. zhuan falun 轉法輪)

1. the dharma-wheel of the four noble truths (S. catuḥsatyadharmacakra; T. bden pa bzhi'i chos 'khor; C. sidi falun 四諦法輪)
2. the dharma-wheel of the absence of defining characteristics (S. alakṣaṇadharmacakra; T. mtshan nyid med pa'i chos 'khor; C. wuxiang falun 無相法輪)
3. the dharma-wheel of thorough delineations (S. *suvibhaktadharmacakra/pravicayadharmacakra; T. legs par rnam par phye ba'i chos 'khor; C. [shan] fenbie falun/shan bian falun [善]分別法輪/善辯法輪)

three vehicles. (S. triyāna; T. theg pa gsum; C. san sheng 三乘)

1. śrāvakayāna (T. nyan thos kyi theg pa; C. shengwen sheng 聲聞乘)
2. pratyekabuddhayāna (T. rang sangs rgyas kyi theg pa; C. yuanjue sheng/pizhi fo sheng 緣覺乘/辟支佛乘)
3. bodhisattvayāna (T. byang chub sems dpa'i theg pa; C. pusa sheng 菩薩乘)

three restraints. (S. saṃvara; T. sdom pa; C. lüyi/sanbaluo 律儀/三跋羅)

1. the disciplinary rules of a monk or nun (S. prātimokṣasaṃvara; T. so so thar pa'i sdom pa; C. boluotimuchahu/biejietuo lüyi 波羅提木叉護/別解脫律儀)
2. the restraint that is engendered by meditative absorption (S. dhyānajasamvara; T. bsam gtan skyes pa'i sdom pa; C. chanlüyi 禪律儀)
3. the restraint that derives from being free from the contaminants (S. anāsravasamvara; T. zag pa med pa'i sdom pa; C. wuloulüyi 無漏律儀).

OR

three vows. (S. trisaṃvara; T. sdom gsum; C. san lüyi 三律儀)

1. the disciplinary rules of a monk or nun (S. prātimokṣasaṃvara; T. so so thar pa'i sdom pa; C. boluotimuchahu/biejietuo lüyi 波羅提木叉護/別解脫律儀)
2. bodhisattva vows (S. bodhisattvasamvara; T. byang sems kyi sdom pa; C. pusa lüyi 菩薩律儀)
3. secret mantra vows (S. guhyamantrasamvara; T. gsang sngags kyi sdom pa; C. mizhou lüyi 密咒律儀)

three wisdoms. (S. prajñā; T. shes rab; C. hui 慧)

1. wisdom derived from learning (S. śrutamayīprajñā; T. thos pa las byung

- ba'i shes rab; C. wenhui 聞慧)
2. wisdom derived from reflection (S. cintāmayīprajñā; T. bsam pa las byung ba'i shes rab; C. sihui 思慧)
 3. wisdom derived from cultivation (S. bhāvanāmayīprajñā; T. bsgoms pa las byung ba'i shes rab; C. xiuhui 修慧)

FOURS

four absorptions. (S. dhyāna; T. bsam gtan; C. chan/ding 禪/定)

1. first absorption (S. prathamadhyāna; T. bsam gtan dang po; C. chuchan 初禪)
2. second absorption (S. dvitīyadhyāna; T. bsam gtan gnyis pa; C. erchan 二禪)
3. third absorption (S. tṛtīyadhyāna; T. bsam gtan gsum pa; C. sanchan 三禪)
4. fourth absorption (S. caturthadhyāna; T. bsam gtan bzhi pa; C. sichan 四禪)

four activities. (S. karman; T. las; C. shiye 事業)

1. pacification (S. śāntika; T. zhi ba'i las; C. xizai 息災)
2. enrichment (S. pauṣṭika; T. rgyas pa'i las; C. zengyi 增益)
3. control (S. vaśīkaraṇa; T. bdang gi las; C. huai'ai 懷愛)
4. wrath (S. abhicāra; T. drag po mngon spyod; C. xiangfu 降伏)

four aids to penetration. (S. nirvedhabhāgīya; T. nges par 'byed pa'i cha mthun; C. shunjuezefen 順決擇分)

1. heat (S. ūṣman; T. drod; C. nuan 煖)
2. summit (S. mūrdhan; T. rtse mo; C. ding 頂)
3. receptivity/acquiescence (S. kṣānti; T. bzod pa; C. ren 忍)
4. supreme worldly dharmas (S. laukikāgradharma; T. 'jig rten pa'i chos kyi mchog; C. shi diyi fa 世第一法)

four analytical knowledges. (S. pratisamṃvid; T. so so yang dag par rig pa; C. wu'ai jie/wu'ai bian 無礙解/無礙辯)

1. of factors (S. dharma; T. chos; C. fa 法)
2. of meaning (S. artha; T. don; C. yi 義)
3. of etymology or language (S. nirukti; T. nges pa'i tshig; C. ci/ci 詞/辭)

4. of eloquence (S. pratibhāna; T. spobs pa; C. leshuo 樂說)

four baleful destinies. (S. apāya/durgati; T. ngan song; C. equ 惡趣)

1. demigods (S. asura; T. lha ma yin; C. axiuluo qu 阿修羅趣)
2. animals (S. tiryak; T. dud 'gro; C. chusheng qu 畜生趣)
3. ghosts (S. preta; T. yi dwags; C. egui qu 餓鬼趣)
4. hell denizens (S. nāraka; T. dmyal ba; C. diyu qu 地獄趣)

four bases of psychic power. (S. ṛddhipāda; T. rdzu 'phrul gyi rkang pa; C. shenzu/ruyizu 神足/如意足)

1. aspiration (S. chanda; T. 'dun pa; C. yu 欲)
2. vigor/effort (S. vīrya; T. brtson 'grus; C. qin 勤)
3. thought/concentration (S. citta; T. bsam pa; C. xin 心)
4. analysis (S. mīmāṃsā; T. dpyod pa; C. siwei/guan 思惟/觀)

four bodies [of a buddha]. (S. kāya; T. sku; C. shen 身)

1. dharma body (S. dharmakāya; T. chos sku; C. fashen 法身)
2. enjoyment body (S. saṃbhogakāya; T. longs spyod rdzogs pa'i sku; C. baoshen 報身)
3. emanation body (S. nirmāṇakāya; T. sprul pa'i sku; C. huashen 化身)
4. essence body (S. svābhāvikakāya; T. ngo bo nyid kyi sku; C. zixing shen 自性身)

four bonds/fetters. (S. grantha/saṃyojana; T. 'ching ba; C. jie/fu 結/縛)

1. covetousness (S. abhidhyā; T. brnab sems; C. yu'ai 欲愛)
2. ill-will (S. vyāpāda; T. gnod sems; C. chenhui 瞋恚)
3. attachment to rules and rituals (S. śīlavrataparāmarśa; T. tshul khrims dang brtul zhugs mchog tu 'dzin pa; C. jiejinqu 戒禁取)
4. attachment to views/dogmatic fanaticism (S. drṣṭiparāmarśa/idamṣatyābhīniveśa; T. lta ba mchog tu 'dzin pa; C. wojianqu 我見取)

four boundless states/immeasurables. (S. apramāṇa; T. tshad med; C. wuliang xin 無量心)

1. loving-kindness (S. maitrī; T. byams pa; C. ci 慈)
2. compassion (S. karuṇā; T. snying rje; C. bei 悲)
3. empathetic joy (S. muditā; T. dga' ba; C. xi 喜)
4. equanimity (S. upekṣā; T. btang snyoms; C. she 捨)

four characteristics of all conditioned objects. (S. saṃskṛtalakṣaṇa/caturlakṣaṇa; T. 'dus byas kyi mtshan nyid/mtshan nyid bzhi; C. youwei xiang/sixiang 有爲相/四相)

1. origination/birth (S. jāti; T. skye ba; C. sheng 生)
2. maturation/continuance (S. sthiti; T. gnas pa; C. zhu 住)
3. senescence/decay/aging (S. jarā; T. rga ba; C. yi 異)
4. desinence/extinction (S. anitya [alt. anityatā]; T. mi rtag pa; C. mie 滅)

four conditions. (S. pratyaya; T. rkyen; C. yuan 緣)

1. causal condition (S. hetupratyaya; T. rgyu rkyen; C. yin yuan 因緣)
2. immediate antecedent condition (S. samanantarapratyaya; T. de ma thag pa'i rkyen; C. dengwujian yuan 等無間緣)
3. objective-support condition (S. ālambanapratyaya; T. dmigs rkyen; C. suoyuan yuan 所緣緣)
4. predominant condition (S. adhipatipratyaya; T. bdag rkyen; C. zengshang yuan 增上緣)

four contaminants. (S. āsrava; T. zag pa; C. lou 漏)

1. contaminant of sensuality (kāṃāsrava; T. 'dod pa'i zag pa; C. yu lou 欲漏)
2. contaminant of becoming (bhavāsrava; T. srid pa'i zag pa; C. you lou 有漏)
3. contaminant of ignorance (avidyāsrava; T. ma rig pa'i zag pa; C. wuming lou 無明漏)
4. contaminant of views (drṣṭyāsrava; T. lta ba'i zag pa; C. jian lou 見漏)

four continents. (S. dvīpa; T. gling; C. [da][bu]zhou [大][部]洲)

1. videha [east] (T. lus 'phags; C. dong shengshen zhou 東勝身洲)
2. Jambudvīpa [south] (T. 'dzam bu gling; C. nan Shanbu zhou 南瞻部洲)
3. godānīya [west] (T. ba glang spyod; C. xi niuhuo zhou 西牛貨洲)
4. uttarakuru [north] (T. sgra mi snyan; C. bei julu zhou 北俱盧洲)

four “defeat” offenses. (S. pārajika; T. phas pham pa; C. poluoyi 波羅夷)

1. sexual intercourse (S. abrahmacarya; T. mi tshangs pa spyod pa; C. yin 淫)
2. theft (S. adattādāna; T. ma byin par len pa; C. dao 盜)
3. killing [of a human being] (S. vadha; T. gsod pa; C. sha 殺)
4. lying about one’s higher spiritual achievements (S. uttaramanuṣyadharmapralāpa; T. mi’i chos bla mar smra ba; C. wang 妄)

four deportments/postures. (S. īryāpatha; T. spyod lam; C. weiyi 威儀)

1. walking (S. caṅkrama; alt. gamana; T. ’chag pa; C. xing 行)
2. standing (S. sthāna; sthita; T. ’g reng ba; C. zhu 住)
3. sitting (S. niṣaṇṇa; T. ’dug pa; C. zuo 坐)
4. lying down (S. śayana; T. nyal ba; C. wo 臥)

four divine abidings. (S. brahmavihāra; T. tshang pa’i gnas; C. fanzhu 梵住)

1. loving-kindness (S. maitrī; T. byams pa; C. ci 慈)
2. compassion (S. karuṇā; T. snying rje; C. bei 悲)
3. empathetic joy (S. muditā; T. dga’ ba; C. xi 喜)
4. equanimity (S. upekṣā; T. btang snyoms; C. she 捨)

four empowerments. (S. abhiṣeka; T. dbang; C. guanding 灌頂)

1. vase empowerment (S. kalaśābhiṣeka; T. bum dbang; C. baoping guanding 寶瓶灌頂)
2. secret empowerment (S. guhyābhiṣeka; T. gsang dbang; C. mimi guanding 秘密灌頂)
3. wisdom–knowledge empowerment (S. prajñājñānābhiṣeka; T. shes rab ye shes kyi dbang; C. zhihui guanding 智慧灌頂)
4. word empowerment (S. śabdābhiṣeka; T. tshig dbang/dbang bzhi pa; C. mingci guanding 名詞灌頂)

four fearlessnesses/self-confidences. (S. vaiśārya; T. mi ’jigs pa; C. wusuowei 無所畏)

The Tathāgata’s self-confidence derives from:

1. his knowledge of all phenomena (S. sarvadharmābhisambodhivaiśārya; T. chos thams cad mkhyen pa la mi ’jigs pa; C. zhufa xiandengjue wuwei 諸

法現等覺無畏)

2. his knowledge that all the contaminants are destroyed (S. sarvāsraṅṅakṣayaññānavaiśāradya; T. zag pa zad pa thams cad mkhyen pa la mi 'jigs pa; C. yiqie loujinzhi wuwei 一切漏盡智無畏)
3. his correct identification of all the obstacles to liberation (S. antarāyikadharmānanyathātvaniścitavyākaraṅṅavaiśāradya; T. bar du gcod pa'i chos rnams bzhan du mi 'gyur bar nges pa'i lung bstan pa la mi 'jigs pa; C. zhangfa buxu jue ding shouji wuwei 障法不虛決定授禮無畏)
4. his realization of all the marvelous qualities that are to be achieved through completing the path to liberation (S. sarvasampadadhigamāyanairyāṅṅikapratipattathātvavaiśāradya; T. phun sum tshogs pa thams cad thob par 'gyur bar nges par 'byung ba'i lam de bzhin du gyur ba la mi 'jigs pa; C. weizheng yiqie juzu chudao ruxing wuwei 為證一切具足出道如性無畏)

four floods. (S. ogha; T. chu bo; C. puliu 瀑流)

1. craving for sensuality (S. kāmarāga; T. 'dod pa la 'dod chags; C. yu'ai 欲愛)
2. craving for continued existence (S. bhavarāga; T. srid pa'i 'dod chags; C. you'ai 有愛)
3. ignorance (S. avidyā; T. ma rig pa; C. wuming 無明)
4. views (S. drṣṭi; T. lta ba; C. jian 見)

four foundations of mindfulness. (S. smṛtyupasthāna; T. dran pa'i nyer bzhag; C. nianchu 念處)

1. mindfulness of the body (S. kāyasmṛtyupasthāna; T. lus dran pa nye bar bzhag pa; C. shen nianchu 身念處)
2. mindfulness of sensations (S. vedanāsmṛtyupasthāna; T. tshor ba dran pa nye bar bzhag pa; C. shou nianchu 受念處)
3. mindfulness of mental states (S. cittasmṛtyupasthāna; T. sems dran pa nye bar bzhag pa ; C. xin nianchu 心念處)
4. mindfulness of phenomena (S. dharmasmṛtyupasthāna; T. chos dran pa nye bar bzhag pa; C. fa nianchu 法念處)

four fruitions. [of sanctity] (S. phala; T. 'bras bu; C. guo [zheng/wei] 果[證/位])

1. stream-enterer (S. srotaāpanna; T. rgyun du zhugs pa; C. yuliu

- guo/xutuohuan guo 預流果/須陀洹果)
2. once-returner (S. sakṛdāgāmin; T. lan cig phyir 'ong ba; C. yilai guo/situohan guo 一來果/斯陀含果)
 3. non-returner (S. anāgāmin; T. phyir mi 'ong ba; C. buhuan guo/anahan guo 不還果/阿那含果)
 4. worthy one (S. arhat; T. dgra bcom pa; C. wuxue guo/aluohan guo 無學果/阿羅漢果)

four graspings. (S. upādāna; T. nyer len; C. qu 取)

1. of sensuality (S. kāmopādāna; T. 'dod pa nye bar len pa; C. yuqu 欲取)
2. of wrong views (S. drṣṭyupādāna; T. lta ba nye bar len pa; C. jianqu 見取)
3. of rules and rituals (S. śīlavratopādāna; T. tshul khriims dang brtul zhugs mchog 'dzin nye bar len pa; C. jie[jin] qu 戒[禁]取)
4. of the concept “self” (S. ātmavādotopādāna; T. bdag lta nye bar len pa; C. woyu qu 我語取)

four great elements. (S. mahābhūta; T. 'byung ba chen po; C. da 大)

1. earth/solidity (S. pṛthivī; T. sa; C. di 地)
2. water/cohesion (S. āpas; T. chu; C. shui 水)
3. fire/warmth (S. tejas; T. me; C. huo 火)
4. air/mobility (S. vāyu; T. rlung; C. feng 風)

four guardian kings. (S. mahārājan/lokapāla; T. rgyal chen; C. [hushi] tianwang/huguo tianwang [護世]天王/護國天王)

1. Dhṛtarāṣṭra; in the east (T. Yul 'khor srung; C. Chiguo 持國)
2. Virūḍhaka; in the south (T. 'Phags skyes po; C. Zengzhang 增長)
3. Virūpākṣa; in the west (T. Spyan mi bzang; C. Guangmu 廣目)
4. Vaiśravaṇa; in the north (T. Rnam thos sras; C. Duowen 多聞)

four immaterial absorptions. (S. ārūpyāvacaradhyāna; T. gzugs med pa'i snyoms 'jug; C. wuse ding 無色定) See [FOUR IMMATERIAL REALMS](#) (s.v.).

four immaterial realms. (S. ārūpyadhātu; T. gzugs med khams pa'i gnas; C. wuse jie 無色界)

1. infinite space (S. ākāśānantyāyatana; T. nam mkha' mtha' yas skye mched;

- C. kong wubian chu 空無邊處)
2. infinite consciousness (S. vijñānānantyāyatana; T. rnam shes mtha' yas skye mched; C. shi wubian chu 識無邊處)
 3. nothingness (S. ākiñcanyāyatana; T. ci yang med pa'i skye mched; C. wu suoyou chu 無所有處)
 4. neither perception nor nonperception (S. naivasamjñānāsamjñāyatana; T. 'du shes med 'du shes med min skye mched; C. feixiang feifeixiang chu 非想非非想處)

four intentions. (S. abhiprāya; T. dgongs pa; C. yiqu/miyi 意趣/密意)

1. intention directed towards sameness (S. samatābhiprāya; T. mnyam pa nyid la dgongs pa; C. pingdeng yiqu 平等意趣)
2. intention directed towards other meanings (S. arhāntarābhiprāya; T. don gzhan la dgongs pa; C. bieyi yiqu 別義意趣)
3. intention directed towards other times (S. kālāntarābhiprāya; T. dus gzhan la dgongs pa; C. bieshi yiqu 別時意趣)
4. intention directed towards other individuals (S. pudgalāntarābhiprāya; T. gang zag gzhan la dgongs pa; C. buteqieluo yiyao yiqu 補特伽羅意樂意趣)

four intermediate states. (S. antarābhava; T. bar do)

1. intermediate state of the birth (S. jātyantarābhava; T. skye gnas kyi bar do)
2. intermediate state of the moment of death (S. mumūrṣāntarābhava; T. 'chi kha'i bar do)
3. intermediate state of dharmatā (S. dharmatāntarābhava; T. chos nyid bar do)
4. intermediate state of rebirth (S. bhavāntarābhava; T. srid pa bar do)

four Māras. (S. māra; T. bdud; C. mo 魔)

1. Māra of the aggregates (S. skandhamāra; T. phung po'i bdud; C. yinmo 陰魔)
2. Māra of the afflictions (S. kleśamāra; T. nyon mongs pa'i bdud; C. fannao mo 煩惱魔)
3. Māra of death (S. mṛtyumāra; T. 'chi bdag gi bdud; C. simo 死魔)
4. Māra the deity (S. Devaputramāra; T. Lha'i bu bdud; C. Tianzimo 天子魔)

four means of conversion. (S. saṃgrahavastu; T. bsdu dngos; C. sheshi; shefa 攝事/攝法)

1. generosity (S. dāna; T. sbyin pa; C. bushi 布施)
2. kind words (S. priyavādita; T. snyan par smra ba; C. aiyu 愛語)
3. helpfulness; viz. teaching others to fulfill their aims (S. arthacaryā; T. don spyod pa; C. lixing 利行)
4. consistency between words and deeds (S. samānārthatā; T. don mthun pa; C. tongshi 同事)

four modes of birth. (S. yoni; T. skye gnas rigs; C. sheng 生)

1. oviparous birth (S. aṇḍaja; T. sgo nga las skye ba; C. luansheng 卵生)
2. viviparous birth (S. jarāyuja; T. mngal nas skye ba; C. taisheng 胎生)
3. moisture-born (S. saṃsvedaja; T. drod sher las skye ba; C. shisheng 濕生)
4. metamorphic or transformative birth; viz. spontaneous generation [as of divinities] (S. upapāduka; T. brdzus te skye ba; C. huasheng 化生)

four noble ones. (S. ārya; T. 'phags pa; C. sheng 聖)

1. śrāvaka (T. nyan thos; C. shengwen 聲聞)
2. pratyekabuddha (T. rang rgyal; C. yuanjue 緣覺)
3. bodhisattva (T. byang chub sems dpa'; C. pusa 菩薩)
4. buddha (T. sang rgyas; C. fo 佛)

four noble persons. (S. āryapudgala; T. 'phags pa'i gang zag; C. xiansheng 賢聖)

1. stream-enterer (S. srotaāpanna; T. rgyun du zhugs pa; C. yuliu guo/xutuohuan guo 預流果/須陀洹果)
2. once-returner (S. sakṛdāgāmin; T. lan cig phyir 'ong ba; C. yilai guo/situohan guo 一來果/斯陀含果)
3. non-returner (S. anāgāmin; T. phyir mi 'ong ba; C. buhuan guo/anahan guo 不還果/阿那含果)
4. worthy one (S. arhat; T. dgra bcom pa; C. wuxue guo/aluohan guo 無學果/阿羅漢果)

four noble truths. (S. āryasatya; T. 'phags pa'i bden pa; C. shengdi 聖諦)

1. truth of suffering (S. duḥkhasatya; T. sdug bsngal gyi bden pa; C. kudi 苦諦)

2. truth of origination (S. samudayasatya; T. kun 'byung gi bden pa; C. jidi 集諦)
3. truth of cessation (S. nirodhasatya; T. 'gog pa'i bden pa; C. miedi 滅諦)
4. truth of the path (S. mārgasatya; T. lam gyi bden pa; C. daodi 道諦)

four persons. (S. pudgala; T. gang zag; C. buteqieluo 補特伽羅)

1. ordinary persons (S. pṛthagjana; T. so so skye bo; C. fanfu 凡夫)
2. disciples (S. śrāvaka; T. nyan thos; C. shengwen 聲聞)
3. solitary buddhas (S. pratyekabuddha; T. rang rgyal; C. yuanjue 緣覺)
4. bodhisattvas (T. byang chub sems dpa'; C. pusa 菩薩)

four perverted views. (S. viparyāsa; T. phyin ci log; C. diandao 顛倒)

1. to view as permanent what is actually impermanent (S. nityaviparyāsa; T. mi rtag pa la rtag par 'dzin pa; C. chang diandao 常顛倒)
2. to view as pleasurable what is actually suffering (S. sukhaviparyāsa; T. sdug bsngal ba la bde bar 'dzin pa; C. le diandao 樂顛倒)
3. to view as pure what is actually tainted (S. śuciviparyāsa; T. mi gtsang ba la gtsang bar 'dzin pa; C. jing diandao 淨顛倒)
4. to view as self what is actually nonself (S. ātmaviparyāsa; T. bdag med pa la bdag tu 'dzin pa; C. wo diandao 我顛倒)

four philosophical systems. (S. siddhāntabheda; T. grub mtha' smra ba)

1. Vaibhāṣika [Sarvāstivāda] (T. Bye brag tu smra ba; C. Piposha bu 毘婆沙部)
2. Sautrāntika (T. Mdo sde pa; C. Jingliang bu 經量部)
3. Vijñānavāda/Cittamātra (T. Rnam shes su smra ba/Sems tsam pa; C. Weishi 唯識)
4. Madhyamaka (Dbu ma pa; C. Zhongguan 中觀)

four realms of reality [dharmadhātu]. (C. si fajie 四法界)

1. dharmadhātu of phenomena (C. shi fajie 事法界)
2. dharmadhātu of principle (C. li fajie 理法界)
3. dharmadhātu of the unimpeded interpenetration between principle and phenomena (C. lishi wu'ai fajie 理事無礙法界)
4. dharmadhātu of unimpeded interpenetration of phenomenon and phenomena (C. shishi wu'ai fajie 事事無礙法界)

four reliances. (S. pratisaraṇa; T. rton pa; C. yi 依)

1. reliance on the meaning rather than the words (S. arthapratisaraṇena bhavitavyaṃ na vyañjanapratisaraṇena; T. don la rton par bya yi tshig 'bru la rton par mi bya; C. yiyi buyi yu 依義不依語)
2. reliance on the teaching rather than on the person [who delivers the teaching] (S. dharmapratisaraṇena bhavitavyaṃ na pudgalapratisaraṇena; T. chos la rton par bya yi gang zag la rton par mi bya; C. yifa buyi ren 依法不依人)
3. reliance on wisdom rather than [ordinary] consciousnesses (S. jñānapratisaraṇena bhavitavyaṃ na vijñānapratisaraṇena; T. ye shes la rton par bya yi rnam shes la rton par mi bya; C. yizhi buyi shi 依智不依識)
4. reliance on the definitive meaning rather than the provisional meaning (S. nītārthasūtrapratisaraṇena bhavitavyaṃ na neyārthasūtrapratisaraṇena; T. nges don la rton par bya yi drang don la rton par mi bya; C. yiliaoyi buyi buliaoyi 依了義不依不了義)

four right efforts. (S. samyakpradhāna/samyakprahāṇa; T. spong pa; C. zhengqin 正勤)

1. to bring about the (future) non-production of evil and unwholesome dharmas that have not yet been produced (S. anutpannānāṃ pāpakānāṃ akuśalānāṃ dharmāṇāṃ anutpādāya cchandaṃ janayati/anutpannānāṃ akuśalānāṃ samrakṣaṇaṃ; T. mi dge ba ma skyes pa mi bkyed pa; C. weisheng e ling busheng 未生惡令不生)
2. the abandonment of those evil and unwholesome dharmas that have been produced (S. utpannānāṃ pāpakānāṃ akuśalānāṃ dharmāṇāṃ prahāṇāya cchandaṃ janayati/utpannānāṃ akuśalānāṃ prahāṇaṃ; T. mi dge ba skyes pa spong ba; C. yisheng e ling yongduan 已生惡令永斷)
3. the production of wholesome dharmas that have not yet been produced (S. anutpannānāṃ kuśalānāṃ dharmāṇāṃ utpādāya cchandaṃ janayati; T. dge ba ma skyes pa bskyed pa; C. weisheng shan ling sheng 未生善令生)
4. the increase of those wholesome dharmas that have been produced (S. utpannānāṃ kuśalānāṃ dharmāṇāṃ sthitaye bhūyobhāvāya asaṃpramoṣāya paripūraṇāya cchandaṃ janayati/anutpannānāṃ punarutpāda; T. dge ba skyes pa spel ba; C. yisheng shan ling zengzhang 已生善令增長)

four seals. (S. mudrā; T. phyag rgya; C. yin 印)

1. pledge seal (S. samayamudrā; T. dam tshig phyag rgya; C. sanmoye yin 三摩耶印)
2. dharma seal (S. dharmamudrā; T. chos kyi phyag rgya; C. fa yin 法印)
3. action seal (S. karmamudrā; T. las kyi phyag rgya; C. jiemo yin 羯磨印)
4. great seal (S. mahāmudrā; T. phyag rgya chen po; C. da yin 大印)

four seals indicative of the Buddhist view. (S. caturmudrā/dṛṣṭinimittamudrā; T. phyag rgya bzhi/bka' rtags kyi phyag rgya; C. siyin/fayin 四印/法印)

1. all that is compounded is impermanent (S. sarvasaṃskārānityatāḥ; T. 'dus byas thams cad mi rtag pa; C. zhuxing wuchang 諸行無常)
2. all that is contaminated is suffering (S. sarvasaṃskārāduḥkhāḥ; T. zag cas thams cad sdug bsngal ba; C. yiqie jie ku 一切皆苦)
3. all phenomena are without self (S. sarvadharmā anātmānaḥ; T. chos thams cad bdag med pa; C. zhufa wuwo 諸法無我)
4. nirvāṇa is peace (S. nirvāṇaśānta; T. mya ngan las 'das pa zhi ba; C. niepan jijing 涅槃寂靜)

four tantra classes. (S. tantra; T. rgyud sde)

1. action tantra (S. kriyātantra; T. bya ba'i rgyud)
2. performance tantra (S. caryātantra; T. spyod pa'i rgyud)
3. yoga tantra (S. yogatantra; T. rnal 'byor gyi rgyud)
4. unexcelled yoga tantra (S. anuttarayogatantra; T. rnal 'byor bla na med pa'i rgyud)

FIVES

five acts that bring immediate retribution. (S. ānantaryakarman; T. mtshams med pa; C. wujian ye [nizui/zhongzui] 無間業 [逆罪/重罪])

1. matricide (S. māṭṛghāta; T. ma gsod pa; C. hai mu/sha mu 害母/殺母)
2. patricide (S. pitṛghāta; T. pha gsod pa; C. hai fu/sha fu 害父/殺父)
3. killing an arhat (S. arhadghāta; T. dgra bcom pa gsod pa; C. hai aluohan/sha aluohan 害阿羅漢/殺阿羅漢)
4. maliciously spilling a buddha's blood (S. tathāgatasyāntike duṣṭacittarudhirotpādanam; T. de bzhin gshegs pa'i sku la ngan sems kyis khrag 'byin pa; C. [exin] chu foshen xie [惡心]出佛身血)

5. creating a schism in the order (S. saṃghabheda; T. dge 'dun gyi dbyen byas pa; C. poseng 破僧)

five aggregates. (S. skandha; T. phung po; C. yun/yin 蘊/陰)

1. aggregate of materiality (S. rūpaskandha; T. gzugs kyi phung po; C. se yun/se yin 色蘊/色陰)
2. aggregate of sensation (S. vedanāskandha; T. tshor ba'i phung po; C. shou yun/shou yin 受蘊/受陰)
3. aggregate of perception (S. saṃjñāskandha; T. 'du shes kyi phung po; C. xiang yun/xiang yin 想蘊/想陰)
4. aggregate of conditioning factors (S. saṃskāraskandha; T. 'du byed kyi phung po; C. xing yun/xing yin 行蘊/行陰)
5. aggregate of consciousness (S. vijñānaskandha; T. rnam shes kyi phung po; shi yun/shi yin 識蘊/識陰)

five aids to liberation. (S. mokṣabhāgīya; T. thar pa cha mthun; C. shunjietuofen 順解脫分)

1. faith (S. śraddhā; T. dad pa; C. xin 信)
2. effort (S. vīrya; T. brtson 'grus; C. jingjin/qin 精進/勤)
3. mindfulness (S. smṛti; T. dran pa; C. nian 念)
4. concentration (S. samādhi; T. ting nge 'dzin; C. ding 定)
5. wisdom (S. prajñā; T. shes rab; C. hui 慧)

five buddha families. (S. pañcakula; T. rigs lnga; C. wu bu/jia 五部/家)

1. tathāgata family (S. tathāgatakula; T. de bzhin gshegs pa'i rigs; C. rulai bu 如來部)
2. vajra family (S. vajrakula; T. rdo rje'i rigs; C. jingang bu 金剛部)
3. jewel family (S. ratnakula; T. rin chen rigs; C. bao bu 寶部)
4. lotus family (S. padmakula; T. padma rigs; C. lianhua bu 蓮華部)
5. action family (S. karmakula; T. las kyi rigs; C. ye bu 業部)

five buddhas. (S. pañcatathāgata; T. de bzhin gshegs pa lnga; C. wuzhi rulai/wu fo 五智如來/五佛)

1. Vairocana (T. Rnam par snang mdzad; C. Dari rulai/Piluzhena 大日如來/毗盧遮)

2. Akṣobhya (T. Mi bskyod pa; C. Achu fo 阿閼佛)
3. Ratnasambhava (T. Rin chen 'byung gnas; C. Baosheng rulai 寶生如來)
4. Amitābha (T. 'Od dpag med; C. Amituo fo/Wuliangshou fo 阿彌陀佛/無量壽佛)
5. Amoghasiddhi (T. Don yod grub pa; C. Bukong Chengjiu rulai fo 不空成就如來佛)

five destinies [of rebirth]. (S. gati; T. 'gro ba; C. qu/dao 趣/道)

1. divinities (S. deva; T. lha; C. tian 天)
2. humans (S. manuṣya; T. mi; C. ren 人)
3. animals (S. tiryak; T. dud 'gro; C. chusheng 畜生)
4. ghosts (S. preta; T. yi dwags; C. egui 餓鬼)
5. hell denizens (S. nāraka; T. dmyal ba; C. diyu 地獄)

five effects. (S. pañcaphala; T. 'bras bu lnga; C. wu guo 五果)

1. correlative effect (S. niṣyandaphala; T. rgyu mthun gyi 'bras bu; C. dengliu guo 等流果)
2. retributive effect (S. vipākaphala; T. rnam smin gyi 'bras bu; C. yishu guo 異熟果)
3. separation effect (S. viṣaṃyogaphala; T. bral ba'i 'bras bu; C. liji guo 離繫果)
4. effect caused by human action (S. puruṣakārāphala; T. skyes bus byed pa'i 'bras bu; C. shiyong guo 士用果)
5. predominant effect (S. adhipatiphala; T. bdag po'i 'bras bu; C. zengshang guo 增上果)

five elements. (S. mahābhūta/dhātu; T. 'byung po chen po; C. da[zhong] 大[種])

1. earth/solidity (S. pṛthivī; T. sa; C. di 地)
2. water/cohesion (S. āpas; T. chu; C. shui 水)
3. fire/warmth (S. tejas; T. me; C. huo 火)
4. air/mobility (S. vāyu; T. rlung; C. feng 風)
5. space (S. ākāśa; T. nam mkha'; C. kong 空)

five eyes. (S. cakṣus; T. spyen; C. yan 眼)

1. fleshly eye (S. māṃsacakṣus; T. sha'i spyen; C. rouyan 肉眼)

2. divine eye/clairvoyance (S. divyacakṣus; T. lha'i spyan; C. tianyan 天眼)
3. wisdom eye (S. prajñacakṣus; T. shes rab kyi spyan; C. huiyan 慧眼)
4. dharma eye (S. dharmacakṣus; T. chos kyi spyan; C. fayan 法眼)
5. buddha eye (S. buddhacakṣus; T. sangs rgyas kyi spyan; C. foyan 佛眼)

five factors of meditative absorption. (S. dhyānāṅga; T. bsam gtan gyi yan lag; C. chanzhi/dingzhi 禪支/定支)

1. applied thought/initial application of attention (S. vitarka; T. rtog pa; C. xun 尋)
2. sustained thought/sustained attention (S. vicāra; T. dpyod pa; C. si 伺)
3. physical rapture (S. prīti; T. dga' ba; C. xi 喜)
4. mental ease (S. sukha; T. bde ba; C. le 樂)
5. one-pointedness (S. cittaikāgratā; T. sems rtse gcig pa; C. xin yijing xing 一心境性)

five faculties/dominants. (S. indriya; T. dbang po; C. gen 根)

1. faith (S. śraddhā; T. dad pa; C. xin 信)
2. effort (S. vīrya; T. brtson 'grus; C. jingjin/qin 精進/勤)
3. mindfulness (S. smṛti; T. dran pa; C. nian 念)
4. concentration (S. samādhi; T. ting nge 'dzin; C. ding 定)
5. wisdom (S. prajñā; T. shes rab; C. hui 慧)

five hindrances [to dhyāna]. (S. nīvaraṇa; T. sgrib pa; C. gai 蓋)

1. sensual desire (S. kāmacchanda; T. 'dod pa la 'dun pa ; C. tanyu 貪欲)
2. malice (S. vyāpāda; T. gnod sems; C. chenhui 瞋恚)
3. sloth and torpor (S. styānamiddha; T. rmugs pa dang gnyid; C. shuimian/huanchen 睡眠/昏沈)
4. restlessness and worry (S. auddhatyakaukr̥tya; T. rgod pa dang 'gyod pa; C. diaoju/sanluan/ezuo/hui 掉舉/散亂/惡作/悔)
5. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)

Five Huayan classifications of the teachings. (C. Huayan wujiao 華嚴五教)

Earlier division, according to Dushun and Fazang:

1. hīnayāna teachings/śrāvakayāna teachings (C. xiaosheng

- jiao/shengwensheng jiao 小乘教/聖聞乘教)
2. elementary teachings [of Mahāyāna] (C. shijiao 始教)
 3. advanced/final teachings [of Mahāyāna] (C. zhongjiao 終教)
 4. sudden teachings (C. dunjiao 頓教)
 5. perfect teachings/consummated teachings (C. yuanjiao 圓教)

Later division, according to Guifeng Zongmi:

1. teachings for divinities and humans (C. rentian jiao 人天教)
2. hīnayāna teachings (C. xiaosheng jiao 小乘教)
3. dharma-characteristics teachings of Mahāyāna (C. dasheng faxiang jiao 大乘
法相教)
4. characteristics-negating teachings of Mahāyāna (C. dasheng poxiang jiao 大
乘破相教)
5. The nature-revealing teaching of the one vehicle (C. yisheng xianxing jiao
一乘顯性教)

five lineages. (S. gotra; T. rigs pa; C. zhongxing 種姓/性)

1. tathāgata lineage (S. tathāgatayānābhisamayagotra; T. de bzhin gshegs pa'i
theg pa mngon par rtogs pa'i rigs; C. rulai sheng zhongxing 如來乘種性)
2. pratyekabuddha lineage (S. pratyekabuddhayānābhisamayagotra; T. rang
rgyal gyi theg pa mngon par rtogs pa'i rigs; C. dujue sheng zhongxing 獨覺
乘種性)
3. śrāvakayāna lineage (S. śrāvakayānābhisamayagotra; T. nyan thos kyi theg
pa mngon par rtogs pa'i rigs; C. shengwen sheng zhongxing 聲聞乘種性)
4. uncertain lineage (S. aniyatagotra; T. ma nges pa'i rigs; C. buding
zhongxing 不定種性)
5. no lineage [viz. icchantika] (S. agotraka; T. rigs med pa; C. wu zhongxing
無種性)

five nectars. (S. amṛta; T. bdud rtsi; C. ganlu 甘露)

1. semen (S. bodhicitta; T. byang sems; C. nanjing 男精)
2. blood (S. rakta; T. rak ta; C. nüxie 女血)
3. urine (S. mūtra; T. dri chu; C. niao 尿)
4. excrement (S. purīṣa; T. dri chen; C. shi 屎)
5. flesh (S. māṃsa; T. sha; C. gusui 骨髓)

five paths. (S. pañcamārga; T. lam lnga; C. wuwei 五位)

1. path of equipment/accumulation (S. saṃbhāramārga; T. tshogs lam; C. ziliang wei 資糧位)
2. path of preparation (S. prayogamārga; T. sbyor lam; C. jiaxing wei 加行位)
3. path of vision (S. darśanamārga; T. mthong lam; C. jiandao wei 見道位)
4. path of cultivation (S. bhāvanāmārga; T. bsgom lam; C. xiudao wei 修道位)
5. adept path (where there is nothing more to learn) (S. aśaikṣamārga; T. mi slob lam; C. wuxue wei 無學位)

five periods and eight teachings. [according to the Tiantai school] (C. wushi bajiao 五時八教)

The five major chronological periods of the Buddha's teaching (C. wushi 五時):

1. Huayan period (C. Huayan shiqi 華嚴時期)
2. āgamas/Deer Park period (C. ahan shiqi 阿含時期/Luyuan shiqi 鹿苑時期)
3. expansive (vaipulya) Mahāyāna period (C. Fangdeng shiqi 方等時期)
4. perfection of wisdom (prajñāpāramitā) period (C. bore shiqi 般若時期)
5. Lotus (*Saddharmapuṇḍarīkasūtra*) and Nirvāṇa (*Mahāparinirvāṇasūtra*) scriptures period (C. Fahua Niepan shiqi 法華涅槃時期)

Fourfold division of the teaching according to means of conversion (C. huayi sijiao 化儀四教):

1. sudden [Huayan jing] (C. dunjiao 頓教)
2. gradual [āgamas, vaipulya, prajñāpāramitā] (C. jianjiao 漸教)
3. indeterminate (C. puding jiao 不定教)
4. secret/esoteric (C. mimi jiao 祕密教)

Fourfold division of the teaching according to content [and based on the capacity of the audience] (C. huafa sijiao 化法四教):

1. tripitaka, viz., hīnayāna (C. sanzang jiao 三藏教)
2. common/shared [by both hīnayāna and Mahāyāna] (C. tongjiao 通教)
3. distinct/separate [Mahāyāna] (C. biejiao 別教)
4. perfect/consummate [Lotus and Nirvāṇa sutras] (C. yuanjiao 圓教)

five powers. (S. bala; T. stobs; C. li 力)

1. power of faith (S. śraddhābala; T. dad pa'i stobs; C. xin li 信力)
2. power of effort (S. vīryabala; T. brtson 'grus kyi stobs; C. jingjin li/qin li 精進力/勤力)
3. power of mindfulness (S. smṛtibala; T. dran pa'i stobs; C. nian li 念力)
4. power of concentration (S. samādhibala; T. ting nge 'dzin gyi stobs; C. ding li 定力)
5. power of wisdom (S. prajñābala; T. shes rab kyi stobs; C. hui li 慧力)

five precepts. [of the laity] (S. pañcaśīla; T. tshul khirms lnga; C. wujie 五戒)

1. to abstain from killing living creatures (S. prāṇātipāta-virati; T. srog gcod pa spong ba; C. bu shasheng/li shasheng 不殺生/離殺生)
2. to abstain from taking what is not given (S. adattādāna-virati; T. ma byin par len pa spong ba; C. bu toudao/li buyu qu 不偷盜/離不與取)
3. to abstain from engaging in sexual misconduct (S. kāmamithyācāra-virati; T. 'dod pas log par g.yem pa spong ba; C. bu xieyin/li yu xiexing 不邪淫/離欲邪行)
4. to abstain from lying (often explained as lying about the possession of high states of attainment or superhuman powers) (S. mṛṣāvāda-virati; T. rdzun du smra ba spong ba; C. bu wangyu/li xukuang yu 不妄語/離虛誑語)
5. to abstain from intoxicants (S. madyapāna-virati; T. myos par 'gyur ba'i btung ba spong pa; C. bu yinjiu/li yinjiu 不飲酒/離飲酒)

five pure abodes. (S. śuddhāvāsa; T. gtsang gnas; C. jing jutian 淨居天)

1. free from afflictions (S. avṛha; T. mi che ba; C. wufan tian 無煩天)
2. not burning/without torment (S. atapa; T. mi gdung ba; C. wure tian 無熱天)
3. perfect form (S. sudṛśa; T. gya nom snang ba; C. shanxian tian 善現天)
4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian 善見天)
5. highest (S. akaniṣṭha; T. 'og min; C. se jiuqing tian 色究竟天)

five royal treasure revealers. (T. gter ston rgyal po lnga)

1. Nyang ral Nyi ma 'od zer
2. Guru Chos kyi dbang phyug
3. Rdo rje gling pa
4. Pad ma gling pa
5. 'Jam dbyang mkhyen brtse dbang po

five sciences. (S. pañcavidyā; T. rig pa lnga; C. wuming 五明)

1. manual arts (S. śilpakarma[vidyā]; T. bzo gnas kyi rig pa; C. gongqiao ming 工巧明)
2. grammar (S. śabdavidyā; T. sgra'i rig pa; C. shengming 聲明)
3. medicine (S. cikitsāvidyā; T. gso ba'i rig pa; C. yifangming 醫方名)
4. logic (S. hetuvidyā; T. gtan tshigs kyi rig pa; C. yinming 因明)
5. inner knowledge (S. adhyātmavidyā; T. nang gi rig pa; C. neiming 內明)

five supranormal powers. (S. abhijñā; T. mngon shes; C. shentong 神通)

1. psychic powers (S. ṛddhividhābhijñā; T. rdzu 'phrul gyi bya ba shes pa; C. shenjing zhizheng tong 神境智證通)
2. “the divine eye”/clairvoyance (S. divyacakṣus; T. lha'i mig; C. tianyan 天眼)
3. “the divine ear”/clairaudience (S. divyaśrotra; T. lha'i rna ba; C. tian'er 天耳)
4. knowledge of others' minds (S. paracittajñāna; T. pha rol gyi sems shes pa; C. taxin tong 他心通)
5. knowledge of past lives (S. pūrvanivāsānusmṛti; T. sngon gyi gnas rje su dran pa; C. suzhu suinian/suming tong 宿住隨念/宿命通)

five turbidities/degenerations. (S. kaṣāya; T. snyigs ma; C. zhuo 濁)

1. turbidity of the lifespan (S. ayuhkaṣāya; T. tshe'i snyigs ma; C. min zhuo 命濁)
2. turbidity of views (S. drṣṭikaṣāya; T. lta ba'i snyigs ma; C. jian zhuo 見濁)
3. turbidity of afflictions (S. kleśakaṣāya; T. nyon mongs kyi snyigs ma; C. fannao zhuo 煩惱濁)
4. turbidity of sentient beings (S. sattvakaṣāya; T. sems can gyi snyigs ma; C. zhongsheng zhuo 衆生濁)
5. turbidity of the age (S. kalpakaṣāya; T. dus kyi snyigs ma; C. jie zhuo 劫濁)

five wheels/cakras. (S. cakra; T. 'khor lo; C. lun 輪)

1. great bliss wheel [at the forehead] (S. mahāsukhacakra; T. spyi bde chen gyi 'khor lo; C. dalelun/dinglun 大樂輪/頂輪)
2. enjoyment wheel [at the throat] (S. sambhogacakra; T. mgrin pa longs spyod kyi 'khor lo; C. baolun/shouyonglun/houlun 報輪/受用輪/喉輪)

3. dharma wheel [at the heart] (S. dharmacakra; T. snying ka chos kyi 'khor lo; C. falun/xinlun 法輪/心輪)
4. emanation wheel [at the navel] (S. nirmāṇacakra; T. lte ba sprul pa'i 'khor lo; C. huanhualun/qilun 幻化輪/臍輪)
5. bliss protecting wheel [at the perineum] (S. sukhapālacakra; T. bde skyong gi 'khor lo; C. hulelun 護樂輪)

five wisdoms/knowledges. (S. pañcajñāna; T. ye shes lnga; C. wuzhi 五智)

1. wisdom of the dharmadhātu (S. dharmadhātujñāna; T. chos dbyings kyi ye shes; C. fajie tixing zhi 法界體性智)
2. mirror-like wisdom/great perfect mirror wisdom (ādarśajñāna/mahādarśajñāna; T. me long gi ye shes; C. da yuanjing zhi 大圓境智)
3. wisdom of equality/knowledge of impartiality (S. samatājñāna; T. mnyam nyid kyi ye shes; C. pingdeng xing zhi 平等性智)
4. wisdom of specific knowledge (S. pratyavekṣaṇājñāna; T. so sor rtog pa'i ye shes; C. miao guan zhi 妙觀察智)
5. wisdom of having accomplished what was to be done (S. kṛtyānuṣṭhānajñāna; T. bya ba grub pa'i ye shes; C. cheng suo zhi 成所作智)

SIXES

six aspects [of all phenomena in Huayan]. (C. liuxiang 六相)

1. generic/universal aspect (C. zongxiang 總相)
2. constituent/particular aspect (C. biexiang 別相)
3. identity/similarity aspect (C. tongxiang 同相)
4. differentiated aspect (C. yixiang 異相)
5. integrated/collective aspect (C. chengxiang 成相)
6. disintegration/instantiated aspect (C. huaixiang 壞相)

six causes. (S. ṣaḍhetu; T. rgyu drug; C. liu yin 六因)

1. efficient cause (S. kāraṇahetu; T. byed pa'i rgyu; C. nengzuo yin 能作因)
2. coexistent cause (S. sahabhūhetu; T. lhan cig 'byung ba'i rgyu; C. juyou yin 俱有因)

3. conjoined cause (S. samprayuktahetu; T. mtshungs ldan gyi rgyu; C. xiangying yin 相應因)
4. homogeneous cause (S. sabhāgahetu; T. skal mnyam gyi rgyu; C. tonglei yin 同類因)
5. all-pervasive cause (S. sarvatragahetu; T. kun gro'i rgyu; C. bianxing yin 遍行因)
6. retributive cause (S. vipākahetu; T. nam smin gyi rgyu; C. yishu yin 異熟因)

six consciousnesses. (S. vijñāna; T. nam par shes pa; C. shi 識)

1. visual consciousness (S. cakṣurvijñāna; T. mig gi nam shes; C. yanshi 眼識)
2. auditory consciousness (S. śrotravijñāna; T. ma ba'i nam shes; C. ershi 耳識)
3. olfactory consciousness (S. ghrānavijñāna; T. sna'i nam shes; C. bishi 鼻識)
4. gustatory consciousness (S. jihvāvijñāna; T. lce'i nam shes; C. sheshi 舌識)
5. tactile consciousness (S. kāyavijñāna; T. lus kyi nam shes; C. shenshi 身識)
6. mental consciousness (S. manovijñāna; T. yid kyi nam shes; C. yishi 意識)

six destinies. [of rebirth] (S. gati; T. 'gro ba; C. dao/qu 道/趣)

1. divinities (S. deva; T. lha; C. tian 天)
2. demigods (S. asura; T. lha ma yin; C. axiuluo 阿修羅)
3. humans (S. manuṣya; T. mi; C. ren 人)
4. animals (S. tiryak; T. dud 'gro; C. chusheng 畜生)
5. ghosts (S. preta; T. yi dwags; C. egui 餓鬼)
6. hell denizens (S. nāraka; T. dmyal ba; C. diyu 地獄)

six doctrines of Nāropa. (S. Nādapādadharmā; T. Nā ro chos drug)

1. inner heat (S. caṇḍaliyoga; T. gtum mo)
2. illusory body (S. māyākāyayoga; T. sgyu lus)
3. dreams (S. svapanayoga; T. rmi lam)
4. clear light (S. prabhāsvarayoga; T. 'od gsal)
5. intermediate state (S. antarābhavayoga; T. bar do)
6. transference (S. samkrāntiyoga; T. 'pho ba)

six elements. (S. dhātu; T. khams; C. da/jie 大/界)

1. earth/solidity (S. pṛthivī; T. sa; C. di 地)
2. water/cohesion (S. āpas; T. chu; C. shui 水)
3. fire/warmth (S. tejas; T. me; C. huo 火)
4. wind/mobility (S. vāyu; T. rlung; C. feng 風)
5. space (S. ākāśa; T. nam mkha'; C. kong 空)
6. consciousness (S. vijñāna; T. mam shes; C. shi 識)

six heavens of the sensuous realm. (S. kāmadhātu-deva; T. 'dod pa'i kham kyil ha; C. Yujie tian 欲界天)

1. four great kings (S. cāturmahārājika; T. rgyal chen rigs bzhi; C. siwang tian 四王天)
2. divinities of the thirty-three (S. trāyastriṃśa; T. sum cu rtsa gsum; C. daoli tian/sanshisan tian 忉利天/三十三天)
3. free from conflict (S. yāma; T. 'thab bral; C. yemo tian 夜摩天)
4. contented (S. tuṣita; T. dga' ldan; C. doushuai[tuo] tian 兜率[陀]天)
5. enjoyment of creation (S. nirmāṇarati; T. 'phrul dga'; C. huale tian 化樂天)
6. divinities who have power over the creations of others/divinities who partake of the pleasures created in other heavens (S. paranirmitavaśavartin; T. gzhan 'phrul dbang byed; C. tahua zizai tian 他化自在天)

six intermediate states. (S. antarābhava; T. bar do)

1. intermediate state of the present lifetime (S. jatyantārābhava; T. skye gnas rang bzhin gyi bar do)
2. intermediate state of absorption (S. samādhyantarābhava; T. bsam gtan gyi bar do)
3. intermediate state of dreams (S. svapanāntarābhava; T. rmi lam gyi bar do)
4. intermediate state of the moment of death (S. mumūrṣāntarābhava; T. 'chi kha'i bar do)
5. intermediate state of dharmatā (S. dharmatāntarābhava; T. chos nyid bar do)
6. intermediate state of existence (S. bhavāntarābhava; T. srid pa bar do)

six-limbed yoga [of the *Kālacakra* tantra]. (S. ṣaḍaṅgayoga; T. sbyor drug)

1. retraction (T. sor sdud)
2. concentration (T. bsam gtan)

3. breath control (T. srog 'dzin)
4. retention of the complete deity (T. sku ril bur 'dzin pa)
5. recollection (T. rjes su dran pa)
6. contemplation (T. ting nge 'dzin)

six non-Buddhist teachers. (S. tīrthika-sāstr; T. mu stegs can gyi ston pa; C. waidaoshi 外道師)

1. Pūraṇa-Kāśyapa (T. 'Od srung rdzogs byed; C. Fulanna jiashe 富蘭那迦葉)
2. Maskarin Gośālīputra (T. Kun tu rgyu gnag lhas kyi bu; C. Moqieli jusheli/Moqieli jushelizi 末伽梨拘舍梨/末伽梨拘睺梨子)
3. Ajita Keśakambala (T. Mi pham sgra'i la ba can; C. Aqiduo chishe qinpoluo 阿耆多翅舍欽婆羅)
4. Kakuda Kātyāyana (T. Ka tya'i bu nog can; C. Jialuo jiutuo jiazhanyan 迦羅鳩駄迦旃延)
5. Nirgrantha-Jñātīputra (T. Gcer bu pa gnyen gyi bu; C. Nijiantuo Ruotizi 尼乾陀若提子/尼撻陀若提子)
6. Sañjaya Vairāṭīputra (T. Smra 'dod kyi bu mo'i bu yang dag rgyal ba can; C. Shanduye pilyu zhizi 珊闍耶毗羅胝子)

six ornaments of the world. (T. 'dzam gling rgyan drug)

1. Nāgārjuna (T. Klu sgrub)
2. Āryadeva (T. 'Phags pa lha)
3. Asaṅga (T. Thogs med)
4. Vasubandhu (T. Dbyig gnyen)
5. Dignāga (T. Phyogs glang)
6. Dharmakīrti (T. Chos kyi grags pa)

six perfections. (S. pāramitā; T. pha rol tu phyin pa; C. du/boluomi 度/波羅蜜)

1. giving/generosity (S. dāna, T. sbyin pa; C. bushi/tan 布施/檀)
2. morality (S. śīla; T. tshul khirms; C. chijie/shiluo 持戒/尸羅)
3. patience/forbearance (S. kṣānti; T. bzod pa; C. renru/chanti 忍辱/羶提)
4. effort/vigor (S. vīrya; T. brtson 'grus; C. jingjin/piliye 精進/毗梨耶)
5. meditative absorption (S. dhyāna; T. bsam gtan; C. jinglü/chan 靜慮/禪)
6. wisdom (S. prajñā; T. shes rab; C. zhihui/bore 智慧/般若)

six recollections. (S. anusmṛti; T. rjes su dran pa; C. nian 念)

1. recollection of the buddha (S. buddhānusmṛti; T. sangs rgyas rjes su dran pa; C. nianfo 念佛)
2. recollection of the dharma (S. dharmānusmṛti; T. chos rjes su dran pa; C. nianfa 念法)
3. recollection of the saṃgha (S. saṃghānusmṛti; T. dge 'dun rjes su dran pa; C. nianseng 念僧)
4. recollection of morality (S. śīlānusmṛti; T. tshul khriṃs rjes su dran pa; C. nianjie 念戒)
5. recollection of charity (S. tyāgānusmṛti; T. gtong ba rjes su dran pa; C. nianshi 念施)
6. recollection of the divinities (S. devatānusmṛti; T. lha rjes su dran pa; C. niantian 念天)

six sense faculties/sense bases. (S. indriya; T. dbang po; C. gen 根)

1. visual faculty (S. cakṣurindriya; T. mig gi dbang po; C. yangen 眼根)
2. auditory faculty (S. śrotrendriya; T. rna ba'i dbang po; C. ergen 耳根)
3. olfactory faculty (S. ghrāṇendriya; T. sna'i dbang po; C. bigen 鼻根)
4. gustatory faculty (S. jihvendriya; T. lce'i dbang po; C. shegen 舌根)
5. tactile faculty (S. kāyendriya; T. lus kyi dbang po; C. shengen 身根)
6. mental faculty (S. manendriya; T. yid kyi dbang po; C. yigen 意根)

six superknowledges/supramundane powers. (S. abhijñā; T. mngon par shes pa; C. shentong 神通)

1. psychic powers (S. ṛddhividhi; T. rdzu 'phrul gyi bya ba shes pa'i mngon shes; C. shenjing/shenzu [zhizheng] tong 神境/神足[智證]通)
2. “the divine eye”/clairvoyance (S. divyacakṣus; T. lha'i mig gi mngon shes; C. tianyan [zhizheng] tong 天眼[智證]通)
3. “the divine ear”/clairaudience (S. divyaśrotra; T. lha'i rna ba'i mngon shes; C. tian'er [zhizheng] tong 天耳[智證]通)
4. knowledge of other's minds (S. paracittāñjāna; T. pha rol gyi sems shes pa'i mngon shes; C. taxin [zhizheng] tong 他心[智證]通)
5. knowledge of past lives (S. pūrvanivāsānusmṛti; T. sngon gyi gnas rje su dran pa'i mngon shes; C. suzhu suinian zhizheng tong/suming [zhizheng] tong 宿住隨念[智證]通/宿命[智證]通)

6. knowledge of the extinction of the contaminants (S. āsravakṣayajñāna; T. zag pa zad pa'i mngon shes; C. loujin [zhizheng] tong 漏盡[智證]通)

six tantras. (T. rgyud sde drug; C. dateluo 怛特羅)

1. kriyātantra (T. bya rgyud)
2. caryātantra (T. spyod rgyud)
3. yogatantra (T. rnal 'byor rgyud)
4. mahāyogatantra (T. rnal 'byor chen po'i rgyud)
5. anuyogatantra (T. rje su rnal 'byor rgyud)
6. atiyogatantra (T. shin tu rnal 'byor rgyud)

SEVENS

seven-branch service. (S. saptāṅgavidhi; T. yan lag bdun pa; C. qizhi zuofa 七支作法)

1. obeisance (S. vandanā; T. phyag 'tshal ba; C. lijing zhufu 禮敬諸佛)
2. offerings (S. pūjana; T. mchod pa phul ba; C. guangxiu gongyang 廣修供養)
3. confession of transgressions (S. pāpadeśanā; T. sdig pa bshags pa; C. chanhui yezhang 懺悔業障)
4. admiration/joy (S. anumodana; T. rjes su yi rang ba; C. suixi gongde 隨喜功德)
5. request [to turn the wheel of dharma] (S. saṃcodana; T. bskul ba; C. qing zhuan falun 請轉法輪)
6. request [to remain in the world] (S. prārthanā; T. gsol ba; C. qingfo zhushi 請佛住世)
7. dedication of merit (S. pariṇāmanā; T. bsngo ba; C. pujie huixiang 普皆迴向)

seven buddhas [of the past]. (S. saptatathāgata; T. sangs rgyas rabs bdun; C. qifo 七佛)

1. Vipaśyin (T. Rnam gzigs; C. Piposhi[fo] 毘婆尸[佛])
2. Śikhin (T. Gtsug gtor can; C. Shiqi[fo] 尸棄[佛])
3. Viśvabhū (T. Kun skyobs; C. Pishepo[fo] 毘舍婆[佛])
4. Krakucchanda (T. Log pa dang sel; C. Juliusun[fo] 拘留孫[佛])
5. Kanakamuni (T. Gser thub; C. Junahanmouni[fo] 拘那含牟尼[佛])
6. Kāśyapa (T. 'Od srung; C. Jiashe[fo] 迦葉[佛])

7. Śākyamuni (T. Shākya thub pa; C. Shijiamouni 釋迦牟尼)

seven factors of enlightenment/limbs of awakening. (S. bodhyaṅga; T. byang chub yan lag; C. juezhi/putifen 覺支/菩提分)

1. mindfulness (S. smṛti; T. dran pa; C. nian 念)
2. investigation of states (S. dharmapracicaya; T. chos rab tu rnam par 'byed pa; C. zefa 擇法)
3. perseverance/energy (S. vīrya; T. brtson 'grus; C. jingjin 精進)
4. rapture/bliss (S. prīti; T. dga' ba; C. xi 喜)
5. tranquility (S. praśrabdhi; T. shin yu sbyangs pa; C. qingan 輕安)
6. concentration (T. samādhi; T. ting nge 'dzin; C. ding 定)
7. equanimity (S. upekṣā; T. btang snyoms; C. she 捨)

seven jewels [of a cakravartin]. (S. ratna; T. rin chen; C. [lunwang]bao [輪王]寶)

1. wheel [chariot] (S. cakraratna; T. 'khor lo rin po che; C. lunbao 輪寶)
2. precious jewel (S. maṇiratna; T. nor bu rin po che; C. [moni]zhubao [末尼]珠寶)
3. queen (S. strīratna; T. btsun mo rin po che; C. nübao 女寶)
4. minister (S. pariṇāyakarātna; T. blon po rin po che; C. jushi bao/zhuzang bao 居士寶/主藏寶)
5. elephant (S. hastiratna; T. glang po rin po che; C. xiangbao 象寶)
6. general (S. senāpatiratna; T. dmag dpon rin po che; C. zhubingchen bao/jiangjun bao 主兵臣寶/將軍寶)
7. horse (S. aśvarātna; T. rta mchog rin po che; C. mabao 馬寶)

seven men who were tested. (T. sad mi mi bdun)

The first monks ordained in Tibet:

1. Sba khri gzigs, ordained as Śrīghoṣa (Dpal dbyangs)
2. Sba gsal snang, ordained as Jñānendra (Ye shes dbang po)
3. Sba khri bzher/bzhir
4. Ba gor Vairocana, or Vairocanarakṣita
5. Rma rin chen mchog
6. Rgyal ba mchog dbyangs

7. 'Khon Klu'i dbang po srung ba, or Nāgendrarakṣita

seven-point posture of Vairocana. (T. Rnam snang gi chos bdun)

1. legs in the vajra posture (T. rkang ba skyil krung)
2. hands in the positions of equipoise (T. lag pa mnyam bzhag)
3. spine straight (T. sgal tshigs drang por bsrang ba)
4. neck slightly bent (T. mgrin cung zad gug pa)
5. shoulders spread like the wings of a vulture (T. dpung ba rgod gshog ltar brkyangs pa)
6. gaze resting at the tip of the nose (T. mig sna rtser phabs pa)
7. tongue touching the palate (T. lce ya rkan la sbyar ba)

seven riches/prizes. (S. saptadhana; T. 'phags pa'i nor bdun; C. qi cai 七財)

1. faith/confidence (S. śraddhā; T. dad pa; C. xin 信)
2. vigor/effort (S. vīrya; T. brtson 'grus; C. jingjin 精進)
3. morality (S. śīla; T. tshul khirms; C. jie 戒)
4. shame and fear of blame/decency and modesty (S. hrīapatrāpya; T. ngo tsha shes pa khrel yod pa; C. cankui 慚愧)
5. learning (S. śruta; T. thos pa; C. wen 聞)
6. relinquishment/renunciation (S. prahāṇa/tyāga; T. spang ba/gtong ba; C. duan/shi 斷/施)
7. wisdom (S. prajñā; T. shes rab; C. hui 慧)

EIGHTS

eight classes of non-human beings. (S. aṣṭasenā; T. lha srin sde brgyad/mi ma yin; C. tianlong babu 天龍八部)

1. divinities (S. deva; T. lha; C. tian 天)
2. serpents (S. nāga; T. klu; C. long 龍)
3. demons (S. yakṣa; T. gnod sbyin; C. yecha 夜叉)
4. demigods (S. asura; T. lha ma yin; C. axiuluo 阿修羅)
5. divine musicians (S. gandharva; T. dri za; C. gantapo 乾闥婆)
6. mythical birds (S. garuḍa; T. khyung, mkha' lding; C. jialouluo 迦樓羅)
7. half-horse, half-human beings (S. kiṃnara; T. mi 'am ci; C. jinnaluo 緊那羅)

8. great snakes (S. mahorāga; T. lto 'phye chen po; C. mohouluojia 摩睺羅迦)

eight close sons. See [EIGHT GREAT BODHISATTVAS](#).

eight common accomplishments. (S. sādharmaṣiddhi; T. thun mong gi dngos grub; C. gongtong chenjiu 共同成就)

1. medicinal pills (S. gulikā; T. ril bu; C. miaodan 妙丹)
2. eye medicine (S. añjana; T. mig sman; C. yanyao 眼藥)
3. swift-footedness (S. jaṅghākara; T. rkang mgyogs; C. tuzu 塗足)
4. going beneath the earth (S. pātāla; T. sa 'og; C. tuxing 土行)
5. enchanted sword (S. khaḍga; T. ral gri; C. baojian 寶劍)
6. traveling through the sky (S. khecara; T. rnam mkha' phur ba; C. kongxing 空行)
7. invisibility (S. antardhāna; T. mi snang ba; C. yinxing 隱形)
8. immortality (S. amṛta; T. 'chi med; C. busi 不死)

eight consciousnesses. (S. vijñāna; T. rnam shes; C. shi 識)

1. visual consciousness (S. cakṣurvijñāna; T. mig gi rnam shes; C. yanshi 眼識)
2. auditory consciousness (S. śrotravijñāna; T. rna ba'i rnam shes; C. ershi 耳識)
3. olfactory consciousness (S. ghrānavijñāna; T. sna'i rnam shes; C. bishi 鼻識)
4. gustatory consciousness (S. jihvāvijñāna; T. lce'i rnam shes; C. sheshi 舌識)
5. tactile consciousness (S. kāyavijñāna; T. lus kyi rnam shes; C. shenshi 身識)
6. mental consciousness (S. manovijñāna; T. yid kyi rnam shes; C. yishi 意識)
7. afflicted mental consciousness (S. kliṣṭāmanas; T. nyon yid; C. mona shi 末那識)
8. storehouse consciousness (S. ālayavijñāna; T. kun gzhi'i rnam shes; C. alaiye shi 阿賴耶識)

eight episodes in the life of a buddha. (S. aṣṭabuddhakārya, T. sangs rgyas kyi mdzad pa brgyad; C. baxiang 八相)

1. descending from tuṣita heaven (T. dga' ldan gyi gnas nas 'pho ba; C. doushuai jiangshi 兜率降世)
2. entry into the womb (T. lhums su zhugs pa; C. rutai 入胎)
3. birth (T. sku bltams pa; C. chutai 出胎)

4. renouncing the world (T. rab tu byung ba; C. chujia 出家)
5. subjugating Māra (T. bdud btul ba; C. xiangmo 降魔)
6. attaining enlightenment (T. mngon par rdzogs par sangs rgyas pa; C. chengdao 成道)
7. turning the wheel of the dharma (dharmacakrapravartana) (T. chos kyi 'khor lo bskor ba; C. zhuan falun 轉法輪)
8. passing into parinirvāṇa (T. mya ngan las 'das pa; C. ru niepan 入涅槃)

eightfold noble path. (S. āryāṣṭāṅgamārga; T. lam yan lag brgyad; C. bazhengdao/bashengdao 八正道/八聖道)

1. right views (S. samyagdrṣṭi; T. yang dag pa'i lta ba; C. zhengjian 正見)
2. right intention (S. samyaksamkalpa; T. yang dag pa'i rtog pa; C. zhengzhi/zhengsiwei 正志/正思維)
3. right speech (S. samyagvāk; T. yang dag pa'i ngag; C. zhengyu 正語)
4. right action (S. samyakkarmānta; T. yang dag pa'i las kyi mtha'; C. zhengye 正業)
5. right livelihood (S. samyagājīva; T. yang dag pa'i 'tsho ba; C. zhengming 正命)
6. right effort (S. samyagvyāyāma; T. yang dag pa'i rtsol ba; C. zhengqin/zhengjingjin 正勤/正精進)
7. right mindfulness (S. samyaksmr̥ti; T. yang dag pa'i dran pa; C. zhengnian 正念)
8. right concentration (S. samyaksamādhi; T. yang dag pa'i ting nge 'dzin; C. zhengding 正定)

eight great bodhisattvas. (S. mahā-upaputra; T. nye sras; C. bada suifo dizi/bada fozi 八大隨佛弟子/八大佛子)

1. Mañjuśrī (T. 'Jam dpal; C. Wenshu pusa 文殊菩薩)
2. Vajrapāṇi (T. Phyag na rdo rje; C. Jingan shou pusa 金剛手菩薩)
3. Avalokiteśvara (T. Spyan ras gzigs dbang phyug; C. Guanyin pusa 觀音菩薩)
4. Kṣitigarbha (T. Sa'i snying po; C. Dizang pusa 地藏菩薩)
5. Sarvanīvaraṇaviṣkambhin (T. Sgrib pa thams cad rnam par sel ba; C. Chu gaizhang pusa 除蓋障菩薩)
6. Ākāśagarbha (T. Nam mkha'i snying po; C. Xukongzang pusa 虛空藏菩薩)
7. Maitreya (T. Byams pa; C. Mile pusa 彌勒菩薩)

8. Samantabhadra (T. Kun tu bzang po; C. Puxian pusa 普賢菩薩)

eight great chariots of the practice lineage. (T. sgrub brgyud shing rta chen po brgyad)

1. ancient translation tradition (T. sna' 'gyur rnying ma)
2. tradition of precepts and instructions (T. bka' gdams)
3. tradition of the path and result (T. lam 'bras)
4. tradition of the transmitted precepts of Marpa (T. Mar pa bka' brgyud)
5. tradition of the transmitted precepts of the Shang Valley (T. Shangs pa bka' brgyud)
6. traditions of pacification and severance (T. zhi byed gcod)
7. tradition of vajrayoga (T. rdo rje'i rnal 'byor)
8. propitiation and attainment of the three adamantine states (T. rdo rje gsum gyi bsnyen sgrub)

eight great charnel grounds. (S. mahāśmaśāna, śmaśāna; T. dur khrod chen po; C. da shilin/ da hanlin 大尸林/大寒林)

1. most fierce (S. caṇḍogrā; T. gtum drag; C. baonue hanlin 暴虐寒林)
2. dense thicket (S. gahvara; T. tshang tshing 'khrigs pa; C. micong hanlin 密叢寒林)
3. blazing vajra (S. vajrajvala; T. rdo rje bar pa; C. jingangyan hanlin 金剛焰寒林)
4. endowed with skeletons (S. karaṅkin; T. keng rus can; C. gusuo hanlin 骨鎖寒林)
5. cool grove (S. śītavana; T. bsil bu tshal; C. hanlin 寒林)
6. black darkness (S. ghorāndhakāra; T. mun pa nag po; C. youan hanlin 幽暗寒林)
7. resonant with “kilikili” (S. kilikilāra; T. ki li ki lir sgra sgrog pa; C. jiujiu hanlin 啾啾寒林)
8. cries of “ha ha” (S. aṭṭahāsa; T. ha ha rgod pa; C. kuangxiao hanlin 狂笑寒林)

eight great fears. (S. mahābhaya; T. 'jigs pa chen po; C. nan 難)

1. lions (S. siṃha; T. seng ge; C. shi nan 獅難)
2. elephants (S. hastināga; T. glang po che; C. xiang nan 象難)
3. fire (S. agni; T. me; C. huo nan 火難)

4. snakes (S. sarpa; T. sbrul ; C. duchong nan 毒蟲難)
5. thieves (S. taskara; T. rkun po; C. zei nan 賊難)
6. violent waters (S. jalārṇava; T. chu bo; C. shui nan 水難)
7. imprisonment (S. nigāḍa; T. lcags sgrog; C. lao[yu] nan 牢[獄]難)
8. demons (S. piśāca; T. sha za; C. feiren nan/mo nan 非人難/魔難)

eight liberations. (S. vimokṣa; T. rnam thar ; C. jietuo/beishe 解脫/背捨)

1. embodied, one sees forms [of the realm of subtle materiality] (S. rūpī rūpāṇi paśyati; T. gzugs can gzugs rnam la lta ba'i rnam thar; C. neiyou sexiang guan zhuse 內有色想觀諸色)
2. without perceiving inward form [viz., one's own physical body], one sees outward forms [of the realm of subtle materiality] (S. adhyātmarūpasamjñī bahirdhā rūpāṇi paśyati; T. nang gzugs med par 'du shes las phyi rol gyi gzugs rnam la lta ba'i rnam thar; C. nei wusexiang guan waise 內無色想觀外色)
3. one develops determination by contemplating the beautiful/one becomes resolved on what is lovely (S. śubham ity evādhimukto bhavati; T. sdug pa'i rnam thar; C. jing jietuo shenzuozheng juzu zhu 淨解脫身作證具足住)
4. the sphere of infinite space (S. ākāśānāntyaīyatana; T. nam mkha' mtha' yas skye mched kyi rnam thar; C. ru wubiankong kong wubianchu juzu zhu/kong wubianchu juzu zhu 入無邊空空無邊處具足住/空無邊處具足住)
5. the sphere of infinite consciousness (S. vijñānāntyaīyatana; T. rnam shes mtha' yas skye mched kyi rnam thar; C. ru wubian shi shiwubian chu juzu zhu/shi wubianchu juzu zhu 入無邊識識無邊處具足住/識無邊處具足住)
6. the sphere of nothingness (S. ākiñcanyāyatana; T. ci yang med pa'i skye mched kyi rnam thar; C. ru wusuoyou wu suoyouchu juzu zhu/wusuoyouchu juzu zhu 入無所有無所有處具足住/無所有處具足住)
7. the sphere of neither perception nor nonperception (S. naivasamjñānāsamjñāyatana; T. 'du shes med 'du shes med min skye mched kyi rnam thar; C. ru feixiang feifeixiangchu juzu zhu/feixiang feifeixiangchu juzu zhu 入非想非非想處具足住/非想非非想處具足住)
8. the cessation of perception and sensation (S. samjñāvedayitanirodha; T. 'du shes dang tshor ba 'gog pa'i rnam thar; C. ru shouxiangmie shenzuozheng juzu zhu/miexiangshouding juzu zhu 入受想滅身作證具足住/滅想受定具足住)

eight manifestations of the Guru [Rin po che]. (T. guru mtshan brgyad)

1. Padmākara
2. Padmasambhava
3. Blo ldan mchog sred
4. Shākya Seng ge
5. Seng ge sgra grogs
6. Padma rgyal po
7. Rdo rje gro lod
8. Nyi ma 'od zer

eight noble persons. (S. aṣṭāryapudgala; T. 'phags pa'i gang zag brgyad; C. baxiansheng 八賢聖)

1. candidate for the fruit of stream-enterer (S. srotaāpannaphalapatipannaka; T. rgyun du zhugs pa'i 'bras bu la zhugs pa; C. yuliu xiang 預流向)
2. recipient of the fruit of stream-enterer (S. srotaāpannaphalastha; T. rgyun du zhugs pa'i 'bras bu la gnas pa; C. zheng yuliu guo 證預流果)
3. candidate for the fruit of once-returner (S. sakṛdāgāmiphapratipannaka; T. phyir 'ong gi 'bras bu la zhugs pa; C. yilai xiang 一來向)
4. recipient of the fruit of once-returner (S. sakṛdāgāmiphaplastha; T. phyir 'ong gi 'bras bu la gnas pa; C. zheng yilai guo 證一來果)
5. candidate for the fruit of non-returner (S. anāgāmiphapratipannaka; T. phyir mi 'ong gi 'bras bu la zhugs pa; C. buhuan xiang 不還向)
6. recipient of the fruit of non-returner (S. anāgāmiphaplastha; T. phyir mi 'ong gi 'bras bu la gnas pa; C. zheng buhuan guo 證不還果)
7. candidate for worthy one (S. arhatphapratipannaka; T. dgra bcom pa'i 'bras bu la zhugs pa; C. aluohan xiang 阿羅漢向)
8. worthy one (S. arhat; T. dgra bcom pa; C. zheng aluohan guo 證阿羅漢果)

eight opportune births. (S. kṣaṇa; T. dal ba; C. yuanli banan/yuanli ba wuxia 遠離八難/遠離八無暇)

Freedom from rebirth:

1. as a denizen of the hells (S. nāraka; T. dmyal ba; C. zai diyu nan 在地獄難)
2. as a ghost (S. preta; T. yi dwags; C. zai egui nan 在餓鬼難)
3. as an animal (S. tiryak; T. dud 'gro; C. zai chusheng nan 在畜生難)
4. as a long-lived divinity (S. dīrghāyurdeva; T. lha tshe ring bo; C. zai changshou tian nan 在長壽天難)

5. in a border region (S. pratyantajanapada; mtha' 'khob kyī mi; C. zai biandi zhi yudanyue nan 在邊地之鬱單越難)
6. with impaired sense faculties (S. indriyavaikalya; T. dbang po ma tshang ba; C. manglong yinya nan 盲聾瘖瘂難)
7. holding erroneous views (S. mithyādarśana; T. log par lta ba; C. shizhi congbian nan 世智聰辯難)
8. in a land where a tathāgata has not appeared (S. tathāgatānutpāda; T. de bzhin gshegs pa ma byung ba; C. shengzai foqian fohou nan 生在佛前佛後難)

eight precepts. [of the laity on upoṣadha days] (S. aṣṭāṅgasamanvāgatam upavāsam/poṣadhaśīla; T. bsnyen gnas yan lag brgyad; C. baguan zhai jie/ba zhajie/ba guan zhai/ba jiezhai 八關齋戒/八齋戒/八關齋/八戒齋)

1. not to kill living beings (S. prāṇātipāta-virati; T. srog gcod pa spong ba; C. li shasheng 離殺生)
2. not to steal (S. adattādāna-virati; T. ma byin par len pa spong ba; C. li buyu qu 離不與取)
3. not to engage to sexual activity (S. abrahmacarya-virati; T. mi tshangs par spyod pa spong pa; C. li feifanxing 離非梵行)
4. not to lie [about spiritual attainments] (S. mṛṣāvāda-virati; T. rdzun du smra ba spong ba; C. li xukuangyu 離虛誑語)
5. not to use intoxicants (S. madyapāna-virati; T. myos par 'gyur ba'i btung ba spong pa; C. li yin zhujiu 離飲諸酒)
6. not to eat at improper times [viz. after twelve noon] (S. vikālabhojana-virati; T. dus ma yin pa'i kha zas spong pa; C. li feishi shi 離非時食)
7. not to use perfumes, garlands, or cosmetics and not to sing, dance, play music, or attend entertainments (S. gandhamālyavilepanavarṇakadhāraṇa-virati [nrtyagīta-virati]; T. spos dang kha dog dang byug pa dang phreng ba thogs pa spong pa [glu gar spong pa]; C. li tushi xingman[li gewu guanting] 離塗飾香鬘[離歌舞觀聽])
8. not to sleep on high and luxurious beds (S. uccaśayanamahāśayana-virati; T. khri stan mthon po dang khri stan chen po spong pa; C. li yanzuo gaoguang yanli chuangzuo 離眼坐高廣嚴麗牀座)

eight similes of illusion. (S. aṣṭamāyopamā; T. sgyu ma'i dpe brgyad; C. ruhuan yu 如幻喻)

Dharmas lack inherent nature (svabhāva), because they are like a:

1. dream (S. svapna; T. rmi lam; C. meng 夢)
2. illusion (S. māyā; T. sgyu ma; C. huanjing 幻景)
3. optical illusion (S. pratibhāsa; T. mig yor; C. guangying 光影)
4. mirage (S. marīci; T. smig rgyu; C. yangyan 陽燄)
5. reflection of the moon in water (S. udakacandra; T. chu zla; C. shui zhong yue 水中月)
6. echo (S. pratiśabda; T. brag cha; C. yuxiang 谷響)
7. city of the gandharvas (S. gandharvanagara; T. dri za'i grong khyer; C. xunxiang cheng/gantapo cheng 尋香城/乾闥婆城)
8. phantom (S. nirmīta; T. sprul pa; C. huashen 化身)

eight stūpas. (S. stūpa; T. mchod rten; C. dalingta 大靈塔)

1. heap of lotuses stūpa (T. pad spungs mchod rten), commemorating the Buddha's birth at Lumbinī
2. enlightenment stūpa (T. byang chub mchod rten) at Bodhgayā
3. many auspicious doors stūpa (bkra shis sgo mang mchod rten), commemorating the first turning of the wheel of the dharma at Rṣipatana/Sārnāth
4. display of miracles stūpa (T. cho 'phrul mchod rten), commemorating the Buddha's display of the paired miracles at Śrāvastī
5. divine descent stūpa (T. lha babs mchod rten), commemorating the Buddha's descent from the trāyastriṃśa heaven at Saṃkāśya.
6. settling of disputes stūpa (T. dbyen bsdums mchod rten), commemorating the Buddha's healing of the schism caused by Devadatta
7. victory stūpa (T. rnam rgyal mchod rten), commemorating the Buddha's extension of his life by three months at the Cāpālacaitya
8. nirvāṇa stūpa (T. myang 'das mchod rten), commemorating the Buddha's passage into parinirvāṇa at Kuśinagarī.

eight sufferings. (S. aṣṭaduḥkha; T. sdug bsngal rgyad; C. baku 八苦)

1. birth (S. jāti; T. skye ba; C. shengku 生苦)
2. aging (S. jarā; T. rga ba; C. laoku 老苦)
3. sickness (S. vyādhi; T. na ba; C. bingku 病苦)
4. death (S. maraṇa; T. 'chi ba; C. siku 死苦)
5. separation from what is dear (S. priyaviprayoga; T. sdug pa dang bral ba; C.

- ai bieli ku 愛別離苦)
6. encountering what is not dear (S. apriyasamprayoga; T. mi sdug pa dang phrad pa; C. yuanzeng hui ku 怨憎會苦)
 7. not finding what one seeks (S. yad apīcchayā paryeṣamāṇo na labhate; T. 'dod pa btshal gyang ma rnyed pa; C. qiu bude ku 求不得苦)
 8. the five aggregates that are objects of clinging (S. pañcopādānaskandha; T. nye bar len pa'i phung po; C. wu quyun ku 五取蘊苦)

eight vidyādharaṣ. (T. rig 'dzin brgyad)

1. Vimalamitra
2. Hūṃkara
3. Mañjuśrīmitra
4. Nāgārjuna
5. Padmasambhava
6. Dhanasamskṛta
7. Rambuguhya-Devacandra
8. Śāntigarbha

eight worldly concerns. (S. lokadharmā; T. 'jig rten chos; C. [shi]feng [世]風)

1. gain (S. lābha; T. rnyed pa; C. li 利)
2. loss (S. alābha; T. ma rnyed pa; C. shuai 衰)
3. pleasure (S. sukha; T. bde ba; C. le 樂)
4. pain (S. duḥkha; T. sdug bsnyal; C. ku 苦)
5. fame (S. yaśas; T. snyan grags; C. yu 譽)
6. disgrace (S. ayaśas; T. ma grags pa; C. hui 毀)
7. praise (S. praśamsā; T. bstod pa; C. cheng 稱)
8. blame (S. nindā; T. smad pa; C. ji 譏)

NINES

nine attainments of successive stations of equipoise. (S. anupūrvavihārasamāpatti; T. mthar gyis gnas pa'i snyoms par 'jug pa; C. ru jiuqing chan/cidi ding 入究竟禪/次第定)

- (1–4) the four absorptions of the realm of subtle materiality (S.

- dhyāna/rūpāvacaradhyāna; T. bsam gtan bzhi; C. sichan/ding 四禪/定)
- (5–8) the four absorptions of the immaterial realm (S. ārūpyāvacaradhyāna; T. gzhugs med bzhi; C. si wuse ding 四無色定)
- (9) attainment of the cessation of perception and sensation/equipoise of cessation (S. saṃjñāvedayitanirodha/alt. nirodhasamāpatti; T. 'gog pa'i snyoms par 'jug pa; C. xiangshou mie[jin] ding/ shouxiang mie[jin] ding 想受滅[盡]定/受想滅[盡]定)

nine categories of scripture. (BHS. navāṅga[pravaçana]; T. gsung rab yan lag dgu; C. jiu bu jing 九部經)

1. discourses (S. sūtra; T. mdo; C. qijing/changhang 契經/長行)
2. aphorisms in mixed prose and verse (S. geya; T. dbyangs bsnyad; C. yingsong 應頌)
3. prophetic teachings (S. vyākaraṇa; T. lung bstan; C. jibie/shouji 禮別/授禮)
4. verses (S. gāthā; T. tshig bcad; C. fengsong/guqi 諷頌/孤起)
5. utterances/meaningful expressions (S. udāna; T. ched du brjod pa; C. zishuo 自說)
6. framing stories (S. nidāna/itivṛttaka; T. gleng gzhi; C. yinyuan 因緣)
7. expanded teachings (S. vaipulya; T. shin tu rgyas pa; C. fangguang 方廣)
8. tales of previous lives (S. jātaka; T. skyes rabs; C. bensheng 本生)
9. marvelous events (S. adbhutadharma; T. rmad du byung ba; C. xifa 希法)

nine foulness contemplations/nine contemplations on the impure. (S. aśubhabhāvanā/aśubhasaṃjñā; T. mi sdug pa'i 'du shes; C. bujing guan/bujing xiang 不淨觀/不淨想)

Contemplation of:

1. a swollen corpse [bloating and tumefaction] (S. vyādhmātakasaṃjñā; T. rnam par bam pa'i 'du shes; C. zhangxiang 脹想)
2. a worm-eaten, rotting corpse (S. vipadumakasaṃjñā; T. rnam par 'bus gzhig pa'i 'dus shes; C. huaixiang 壞想)
3. a festering corpse [discharging pus] (S. vipūyakasaṃjñā; T. rnam par rnags pa'i 'dus shes ; C. nonglan xiang 膿爛想)
4. a bloody corpse (S. vilohitakasaṃjñā; T. rnam par dmar ba'i 'du shes; C. xietu xiang 血塗想)
5. a blueish corpse [mottled discoloration] (S. vinīlakasaṃjñā; T. rnam par

- bsngos pa'i 'du shes; C. qingyu xiang 青瘀想)
6. a corpse being devoured by worms and maggots (S. vikhāditakasamjñā; T. nam par zos ba'i 'du shes; C. danxiang 噉想)
 7. a scattered corpse [dissolution of flesh and exposure of bones and sinews] (S. vikṣiptakasamjñā; T. nam par mthor ba'i 'du shes; C. sanxiang 散想)
 8. a burned corpse [cremated remains] (S. vidagdhakasamjñā; T. nam par tshig pa'i 'du shes; C. shaoxiang 燒想)
 9. a skeleton (S. asthisamjñā; T. rus gong gi 'du shes; C. guxiang 骨想)

nine similes [for the presence of the tathāgatagarbha]. (S. navodāharaṇāni; T. dpe dgu; C. jiu yu 九喻)

The tathāgatagarbha is present:

1. like a statue of the buddha in a soiled lotus (S. buddhaḥ kupadme; T. sangs rgyas pad ngan; C. weihua zhong zhufu 萎華中諸佛)
2. like honey in beehives (S. madhu makṣikāsu; T. sbrang rtsi sbrang ma la; C. zhongfeng zhong meimi 衆蜂中美蜜)
3. like kernels in husks (S. tuṣeṣu sārāṇi; T. sbun pa snying po; C. pi deng zhong shi 皮等中實)
4. like gold in filth (S. aśucau suvarṇam; T. mi gtsang nang na gser; C. fenhui zhong zhenjin 糞穢中真金)
5. like treasure under the ground (S. nidhiḥ kṣitau; T. sa la gter; C. di zhong zhenbao zang 地中珍寶藏)
6. like the stages beginning with the sprout in a tiny seed (S. alpaphale 'ṅkurādi; T. myug sogs 'bras chung; C. zhu guozi zhong ya 諸果子中芽)
7. like a conqueror's body in sodden clothes (S. praklinnavastreṣu jinātmabhāvaḥ; T. gos hrul nang na rgyal ba'i sku; C. xiugu bihuai yi changuo zhenjin xiang 朽故弊壞衣纏裹真金像)
8. like royalty in the womb of a common woman (S. jaghanyanārījaṭhare nṛpatvaṃ; T. bud med ngan ma'i lto na mi bdag; C. pinjian choulou nü huai zhuanlun shengwang 貧賤醜陋女懷轉輪聖王)
9. like a precious image buried in the mud (S. mṛtsu ca ratnabimbam; T. sa la rin chen gzugs; C. jiaohei nimo zhong youshang miaobao xiang 焦黑泥模中有上妙寶像)

nine vehicles. (S. yāna; T. theg pa dgu)

1. śrāvakayāna (T. nyan thos kyi theg pa)
2. pratyekabuddhayāna (T. rang rgyal gyi theg pa)
3. bodhisattvayāna (T. byang sems kyi theg pa)
4. kriyātantra (T. bya rgyud kyi theg pa)
5. caryātantra (T. spyod pa'i rgyud kyi theg pa)
6. yogatantra (T. mal 'byor gyi rgyud kyi theg pa)
7. mahāyogatantra (T. rnal 'byor chen po'i rgyud kyi theg pa)
8. anuyogatantra (T. rjes su rnal 'byor gyi rgyud kyi theg pa)
9. atiyogatantra (T. shin tu rnal 'byor gyi rgyud kyi theg pa)

TENS

ten dharma activities. (S. dharmacarya; T. chos spyod; C. faxing 法行)

1. writing (S. lekhaṇa; T. yi ge 'bri pa; C. shuxie 書寫)
2. worship (S. pūjā; T. mchod pa; C. gongyang 供養)
3. charity (S. dāna; T. sbyin pa; C. shita 施他)
4. listening/learning (S. śravaṇa; T. nyan ba; C. tingwen 聽聞)
5. reading (S. vācana; T. klog pa; C. pidu 披讀)
6. comprehending (S. udgrahaṇa; T. 'dzin pa; C. shouchi 受持)
7. instructing (S. prakāśana; T. rab tu ston pa; C. kaiyan 開演)
8. reciting (S. svādhyāya; T. kha 'don byed pa; C. fengsong 諷誦)
9. contemplation (S. cintana; T. sems pa; C. siwei 思惟)
10. meditation (S. bhāvanā; T. sgom pa; C. xiuxi 修習)

ten directions. (S. daśadiś; T. phyogs bcu; C. shifang 十方)

1. east (S. pūrvā; T. shar; C. dong 東)
2. southeast (S. pūrvadakṣiṇā; T. shar lho; C. dongnan 東南)
3. south (S. dakṣiṇā; T. lho; C. nan 南)
4. southwest (S. dakṣiṇapaścimā; T. lho nub; C. xinan 西南)
5. west (S. paścimaḥ; T. nub; C. xi 西)
6. northwest (S. paścimōttarā; T. nub byang; C. xibei 西北)
7. north (S. uttaraḥ; T. byang; C. bei 北)
8. northeast (S. uttarapūrvā; T. byang shar; C. dongbei 東北)
9. zenith (S. ūrdhvaḥ; T. bla ma; C. shang 上)
10. nadir (S. adhaḥ; T. 'og; C. xia 下)

ten endowments. (T. 'byor ba bcu)

One has taken rebirth:

1. as a human (T. mi)
2. in a central land (T. yul dbus)
3. with complete sense faculties (T. dbang po tshang ba)
4. not engaging in mistaken actions (T. las kyi mtha' ma log pa)
5. having faith (T. gnas la dad pa) and when:
 1. a buddha has appeared in the world (T. sangs rgyas 'jig rten du byon pa)
 2. he has taught the dharma (T. des dam pa'i chos ston pa)

3. his teaching remains (T. bstan pa gnas pa)
4. it has followers (T. de'i rjes su 'jug pa)
5. they kindly act on behalf of others (T. gzhan phyir snying brtse ba)

ten fetters. (S. saṃyojana; T. kun tu sbyor ba; C. jie 結)

1. view of a perduring self (S. satkāyadr̥ṣṭi; T. 'jig lta; C. shenjian 身見)
2. attachment to rules and rituals (S. śīlavrataparāmarśa; T. tshul khrims brtul zhugs mchog 'dzin; C. jiejin qu 戒禁取)
3. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)
4. craving for sensual gratification (S. kāmacchanda; T. 'dod pa'i 'dun pa; C. tanyu 貪欲)
5. malice (S. vyāpāda; T. zhe sdang; C. chenhui 瞋恚)
6. craving for the realm of subtle materiality (S. rūparāga; T. gzugs kyi sred pa; C. seai 色愛)
7. craving for the immaterial realm (S. ārūpyarāga; T. gzugs med pa na spyod pa'i sred pa; C. wuseai 無色愛)
8. conceit (S. māna; T. nga rgyal; C. man 慢)
9. delusion (S. moha; gti mug; C. wuming 無明)
10. restlessness (S. auddhatya; T. rgod pa; C. diaoju 掉舉)

ten fundamental afflictions. (S. mūlakleśa; T. rtsa nyon; C. shi/huo/genben fannaο 使/惑/根本煩惱)

1. sensuality/greed (S. rāga; T. 'dod chags; C. tan 貪)
2. anger (S. pratigha; T. khong khro; C. chen 瞋)
3. conceit (S. māna; T. nga rgyal; C. man 慢)
4. ignorance (S. avidyā; T. ma rig pa; C. wuming 無明)
5. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)
6. view of a perduring self (S. satkāyadr̥ṣṭi; T. 'jig lta; C. shenjian 身見)
7. extreme views (S. antagrāhadr̥ṣṭi; T. mthar lta; C. bianjian 邊見)
8. attachment to one's own point of view (S. dr̥ṣṭiparāmarśa; T. lta ba mchog 'dzin; C. jianqu jian 見取見)
9. wrong views (S. mithyādr̥ṣṭi; T. log lta; C. xiejian 邪見)

ten masteries. (S. vaśitā; T. dbang; C. zizai 自在)

1. lifespan (S. āyuh; T. tshe; C. ming zizai 命自在)

2. actions (S. karman; T. las; C. ye zizai 業自在)
3. necessities of life (S. pariṣkāra; T. yo byad; C. cai zizai 財自在)
4. determination (S. adhimukti; T. mos pa; C. shengjie zizai 勝解自在)
5. aspiration (S. prañidhāna; T. smon lam; C. yuan zizai 願自在)
6. psychic powers (S. ṛddhi; T. rdzu 'phrul; C. shentong zizai 神通自在)
7. birth (S. upapatti; T. skye ba; C. sheng zizai 生自在)
8. phenomena/teachings (S. dharma; T. chos; C. fa zizai 法自在)
9. mind (S. citta; T. sems; C. xin zizai 心自在)
10. wisdom (S. jñāna; T. ye shes; C. zhi zizai 智自在)

ten meanings [of unimpeded interpenetration in the Huayan school]. (C. Huayan shiyi 華嚴十義)

1. teachings and their meanings/significance (C. jiaoyi 教義)
2. principle and phenomena (C. lishi 理事)
3. understanding and implementation (C. jiexing 解行)
4. causes and fruitions (C. yinguo 因果)
5. the “persons” who expound the dharma and the “dharma” they expound (C. renfa 人法)
6. the “distinction” and “unity” between discrete things (C. fenqi jingwei 分齊境位)
7. the “teacher,” his “disciple,” the “dharma” that is imparted, and the “wisdom” that the disciple develops (C. shidi fazhi 師弟法智)
8. the “dominant” and “subordinate,” “primary” and “secondary” relations that pertain between things (C. zhuban yizheng 主伴依正)
9. the enlightened sages who “respond” to the spiritual maturity of their audiences and the audiences whose spiritual maturity “solicited” the appearance of the enlightened sages in the world (C. suishenggen yushixian 遂生根欲示現)
10. “autonomy” with regard to spiritual “obstacles” and their “antidotes,” the “essence” of phenomena and their “functions” (C. nishun tiyong zizai 逆順體用自在).

ten perfections. (S. pāramitā; T. pha rol tu phyin pa; C. du/ boluomi 度/波羅蜜)

1. perfection of generosity/giving (S. dānapāramitā; T. sbyin pa'i pha rol tu phyin pa; C. [bu]shi [布]施)

2. perfection of morality (S. śīlapāramitā; T. tshul khrims kyi pha rol tu phyin pa; C. [chi]jie [持]戒)
3. perfection of patience/forbearance (S. kṣāntipāramitā; T. bzod pa'i pha rol tu phyin pa; C. ren[ru] 忍[辱])
4. perfection of effort/vigor (S. vīryapāramitā; T. brtson 'grus kyi pha rol tu phyin pa; C. jinjing 精進)
5. perfection of meditative absorption (S. dhyānapāramitā; T. bsam gtan gyi pha rol tu phyin pa; C. chan[ding] 禪[定])
6. perfection of wisdom (S. prajñāpāramitā; T. shes rab kyi pha rol tu phyin pa; C. bore 般若)
7. perfection of skillful means (S. upāyapāramitā; T. thabs kyi pha rol tu phyin pa; C. fangbian 方便)
8. perfection of aspiration (S. praṇidhānapāramitā; T. smon lam gyi pha rol tu phyin pa; C. yuan 願)
9. perfection of powers (S. balapāramitā; T. stobs kyi pha rol tu phyin pa; C. li 力)
10. perfection of knowledge (S. jñānapāramitā; T. ye shes kyi pha rol tu phyin pa; C. zhi 智)

ten powers of a bodhisattva. (S. bala; T. byang chub sems dpa'i stobs; C. pusa li 菩薩力)

1. power of reflection (S. āśayabala; T. bsam pa'i stobs; C. shenxin li/zhixin li 深心力/直心力)
2. power of superior aspiration (S. adhyāśayabala; T. lhag bsam pa'i stobs; C. zengshang shenxin li 增上深心力)
3. power of application (S. prayogabala; T. sbyor ba'i stobs; C. fangbian li 方便力)
4. power of wisdom (S. prajñābala/jñānabala; T. shes rab/ye shes stobs; C. zhi[hui] li 智[慧]力)
5. power of their vow (S. praṇidhānabala; T. smon lam gyi stobs; C. yuanli 願力)
6. power of vehicle (S. yānabala; T. theg pa'i stobs; C. shengli 乘力)
7. power of conduct (S. caryābala; T. spyod pa'i stobs; C. xingli 行力)
8. power of transformation (S. vikurvaṇabala; T. mam par 'phrul pa'i stobs; C. shenbian li/youxi shentong li 神變力/遊戲神通力)

9. power of enlightenment (S. bodhibala; T. byang chub kyi stobs; C. puti li 菩提力)
10. power of turning the wheel of the dharma (S. dharmacakrapravartanabala; T. chos kyi 'khor lo bskor ba'i stobs; C. zhuan falun li 轉法輪力)

ten powers of a tathāgata. (S. tathāgatabala; T. de bzhin gshegs pa'i stobs; C. rulai li 如來力)

1. power of knowing the positive and negative contingencies of things (S. sthānāsthānajñānabala; T. gnas dang gnas ma yin pa mkhyen pa'i stobs; C. chu feichu zhili 處非處智力)
2. power of knowing the maturation of deeds (S. karmavipākajñānabala; T. las kyi rnam smin mkhyen pa'i stobs; C. ye yishou zhili 業異熟智力)
3. power of knowing diverse aspirations (S. nānādhimuktijñānabala; T. mos pa sna tshogs mkhyen pa'i stobs; C. zhongzhong shengjie zhili 種種勝解智力)
4. power of knowing diverse dispositions (S. nānādhātujñānabala; T. kham sna tshogs mkhyen pa'i stobs; C. zhongzhong jie zhili 種種界智力)
5. power of knowing those who are of superior acumen and those who are not (S. indriyaparāparajñānabala; T. dbang po mchog dang mchog ma yin pa mkhyen pa'i stobs; C. gen shangxia zhili 根上下智力)
6. power of knowing the paths going everywhere (S. sarvatragāmanīpratipajñāna; T. thams cad du 'gro ba'i lam mkhyen pa'i stobs; C. bianquxing zhili 遍趣行智力)
7. power of knowing absorption, liberation, concentration, trance, affliction, purification, and acquisition (S. sarvadhyanāvimokṣasamādhisamāpattisamkleśavyavadānavyutthānajñānabala; T. bsam gtan dang rnam thar dang ting nge 'dzin dang snyoms par 'jug pa dang kun nas nyon mongs pa dang rnam par byang ba dang ldan pa thams cad mkhyen pa'i stobs; C. jinglü jietuo dengchi dengzhi zhili 靜慮解脫等持等至智力)
8. power of recollecting past lives (S. pūrvanivāsānusmṛtijñānabala; T. sngon gyi gnas rjes su dran pa mkhyen pa'i stobs; C. suzhu suinian zhili/suming zhili 宿住隨念智力/宿命智力)
9. power of knowing death and rebirth (S. cyutyupattijñānabala; T. 'chi 'pho bo dang skye ba mkhyen pa'i stobs; C. sisheng zhili 死生智力)
10. power of knowing the cessation of the contaminants (S. āsravakṣayajñānabala; T. zag pa zad pa mkhyen pa'i stobs; C. loujin zhili 漏

盡智力)

ten precepts. [of novices] (*daśaśīla/śrāmaṇerasaṃvara; T. dge tshul gyi sdom pa; C. [shami] shijie [沙彌]十戒)

1. not to kill living beings (S. prāṇātipāta-virati; T. srog gcod pa spong ba; C. bu shasheng jie 不殺生戒)
2. not to steal (S. adattādāna-virati; T. ma byin par len pa spong ba; C. bu toudao jie 不偷盜戒)
3. not to engage in sexual activity (S. kāmamithyācāra-virati/abrahmacarya-virati; T. 'dod pas log par g.yem pa spong ba/mi tshangs par spyod pa spong pa; C. bu xieyin jie/li fei fanxing jie 不邪淫戒/離非梵行戒)
4. not to lie [about spiritual attainments] (S. mṛṣāvāda-virati; T. rdzun du smra ba spong ba; C. bu wangyu jie 不妄語戒)
5. not to use intoxicants (S. madyapāna-virati; T. myos par 'gyur ba'i btung ba spong pa; C. bu yinjiu jie 不飲酒戒)
6. not to eat at improper times [after twelve noon] (S. vikālabhojana-virati; T. dus ma yin pa'i kha zas spong pa; C. bu feishi shi jie 不非時食戒)
7. not to use perfumes, garlands, or cosmetics (S. gandhamālyavilepanavarṇakadhāraṇavirati; T. spos dang kha dog dang byug pa dang phreng ba thogs pa spong pa; C. bu tushi xiangman jie 不塗飾香鬘戒)
8. not to sing, dance, play music, or attend entertainments (S. nṛtyagīta-virati; T. glu gar spong pa; C. bu gewu guanting jie 不歌舞觀聽戒)
9. not to sleep on high and luxurious beds (S. uccaśayanamahāśayana-virati; T. khri stan mthon po dang khri stan chen po spong pa; C. bu zuo gaoguang dachuang jie 不坐高廣大牀戒)
10. not to handle gold and silver/money (S. jātarūparajatapratigrahaṇavirati; T. gser dang dngul la reg pa spong pa; C. bu xu jinyinbao jie 不蓄金銀寶戒)

ten realms of reality [dharmadhātu]. (C. shi fajie 十法界)

1. divinities (S. deva; T. lha; C. tian 天)
2. demigods (S. asura; T. lha ma yin; C. axiuluo 阿修羅)
3. humans (S. manuṣya; T. mi; C. ren 人)
4. animals (S. tiryak; T. dud 'gro; C. chusheng 畜生)
5. ghosts (S. preta; T. yi dwags; C. egui 餓鬼)

6. hell denizens (S. nāraka; T. dmyal ba; diyu 地獄)
7. disciples (S. śrāvaka; T. nyan thos; C. shengwen 聲聞)
8. solitary buddhas (S. pratyekabuddha; T. rang rgyal; C. yuanjue 緣覺)
9. bodhisattvas (T. byang chub sems dpa'; C. pusa 菩薩)
10. buddhas (T. sang rgyas; C. fo 佛)

ten recollections. (S. anusmṛti; T. rjes su dran pa; C. nian/suinion 念/隨念)

1. the Buddha (T. sangs rgyas rjes su dran pa; C. nianfo/fo suinion 念佛/佛隨念)
2. the dharma (T. chos rjes su dran pa; C. nianfa/fa suinion 念法/法隨念)
3. the saṃgha (T. dge 'dun rjes su dran pa; C. nianseng/seng suinion 念僧/僧隨念)
4. morality (S. śīla; T. tshul khriṃs rjes su dran pa; C. nianjie/jie suinion 念戒/戒隨念)
5. renunciation/generosity (S. tyāga; T. gtong ba rjes su dran pa; C. nianshi/shi suinion 念施/施隨念)
6. the divinities (S. devatā; T. lha rjes su dran pa; C. niantian/tian suinion 念天/天隨念)
7. breathing (S. ānāpāna; T. dbugs phyi nang du rgyu ba rjes su dran pa; C. nian anban/ruchuxi suinion 念安般/入出息隨念)
8. disgust (S. udvega; T. skyo ba rjes su dran pa; C. yan sui nian 厭隨念)
9. death (S. maraṇa; T. 'chi ba rjes su dran pa; C. niansi/si suinion 念死/死隨念)
10. what concerns the body (S. kāyagatā; T. lus kyi mam pa rjes su dran pa; C. nianshen/shen suinion 念身/身隨念)

ten stages [of the bodhisattva path]. (S. daśabhūmi; T. sa bcu; C. shidi 十地)

1. joyful (S. pramuditā; T. rab tu dga' ba; C. jixidi/huanxi di 極喜地/歡喜地)
2. immaculate/stainless (S. vimalā; T. dri ma med pa; C. ligou di/wugou di 離垢地/無垢地)
3. luminous (S. prabhākarī; T. 'od byed pa; C. faguang di 發光地)
4. radiant (S. arciṣmatī; T. 'od 'phro ba; C. yanhui di 焰慧地)
5. invincible (S. sudurjayā; T. sbyang dka' ba; C. [ji]nansheng di [極]難勝地)
6. immediacy/coming face-to-face (S. abhimukhī; T. mngon du byed pa; C. xianqian di 現前地)
7. far-reaching/transcendent (S. dūraṅgamā; T. ring du song ba; C. yuanxing di 遠行地)

8. immovable/steadfast (S. *acalā*; T. *mi g.yo ba*; C. *budong di* 不動地)
9. eminence/auspicious intellect (S. *sādhumatī*; T. *legs pa'i blo gros*; C. *shanhui di* 善慧地)
10. cloud of dharma (S. *dharmameghā*; T. *chos kyi sprin pa*; C. *fayun di* 法雲地)

ten unwholesome courses of action. (S. *akuśala-karmapatha*; T. *mi dge ba*; C. *e yedao* 惡業道)

1. killing (*prāṇātipāta*; T. *srog bcod pa*; C. *sha[sheng]* 殺[生])
2. stealing (S. *adattādāna*; T. *ma byin par len pa*; C. *[tou]dao* [偷]盜)
3. sexual misconduct (*kāmamithyācāra*; T. *'dod pas log par g.yem pa*; C. *xieyin* 邪淫)
4. lying (S. *mṛṣāvāda*; T. *rdzun du smra ba*; C. *wangyu* 妄語)
5. malicious speech (*paiśunyavāda*; T. *phra ma*; C. *liangshe* 兩舌)
6. verbal abuse (*pārūṣyavāda*; T. *tshig rtsub*; C. *ekou* 惡口)
7. frivolous prattle/idle gossip (*saṃbhinnapralāpa*; T. *ngag 'khyal ba*; C. *qiyu* 綺語)
8. covetousness (S. *abhidhyā*; T. *brnab sems*; C. *tan[yu]/qiantan* 貪[欲]/慳貪)
9. malice/ill-will (S. *vyāpāda*; T. *gnod sems*; C. *chen[hui]* 瞋恚)
10. wrong views (S. *mithyādr̥ṣṭi*; T. *log lta*; C. *xiejian/yuchi* 邪見/愚痴)

ten visualization devices. (S. **kṛtsnāyatana*; P. *kaṣiṇa*; T. *zad par gyi skye mched*; C. *bianchu* 遍處)

1. earth (S. *pṛthivī*; T. *sa*; C. *di* 地)
2. water (S. *āpas*; T. *chu*; C. *shui* 水)
3. fire (S. *tejas*; T. *me*; C. *huo* 火)
4. wind (S. *vāyu*; T. *rlung*; C. *feng* 風)
5. empty-space (S. *ākāśa*; T. *nam mkha'*; C. *kong* 空)
6. blue (S. *nīla*; T. *sngon po*; C. *qing* 青)
7. yellow (S. *pīta*; T. *ser po*; C. *huang* 黃)
8. red (S. *lohita*; T. *dmar po*; C. *chi* 赤)
9. white (S. *avadāta*; T. *dkar po*; C. *bai* 白)
10. light (S. *āloka/tejas*; T. *'od/me*; C. *guangming/huo* 光明/火)/[alt.]
consciousness (S. *vijñāna*; T. *mam shes*; C. *shi* 識)

ten wholesome courses of action. (S. kuśala-karmapatha; T. dge ba bcu; C. shanyedao 善業道) Abstention from the [TEN UNWHOLESOME COURSES OF ACTION](#) (s.v.).

ELEVENS

eleven cognitions. (S. jñāna; T. shes pa; C. zhi 智)

1. of suffering (S. duḥkhajñāna; T. sdug bsngal shes pa; C. kuzhi 苦智)
2. of origination (S. samudayajñāna; T. kun 'byung ba shes pa; C. jizhi 集智)
3. of cessation (S. nirodhajñāna; T. 'gog pa shes pa; C. miezhi 滅智)
4. of the path (S. mārgajñāna; T. lam shes pa; C. daozi 道智)
5. of extinction (S. kṣayajñāna; T. zad pa shes pa; C. jinzi 盡智)
6. of nonproduction (S. anutpādayajñāna; T. mi skye ba shes pa; C. wusheng zhi 無生智)
7. of factors (S. dharmajñāna; T. chos shes pa; C. fazhi 法智)
8. of subsequent cognition (S. anvayajñāna; T. rjes su rtogs par shes pa; C. leizhi 類智)
9. of worldly conventions (S. saṃvṛtījñāna; T. kun rdzob shes pa; C. shisu zhi 世俗智)
10. of others' minds (S. paracittajñāna; T. gzhan gyi sems shes pa; C. taxin zhi 他心智)
11. of things-as-they-are (S. yathābhūtajñāna; T. yang dag pa ji lta ba bzhin du yongs su shes pa; C. rushi zhi 如實智)

TWELVES

twelve ascetic practices. (S. dhūtaguṇa; P. dhutaṅga; T. sbyangs pa'i yon tan; C. shi'er toutuo xing 十二頭陀行)

1. wears rag clothing from dust-heaps (S. pāṃśukūlika; T. phyag dar khrod pa; C. zhuo fensao yi/zhuo bina yi 著糞掃衣/著弊納衣)
2. possesses only three robes (S. traicīvarika; T. chos gos gsum pa; C. dan sanyi 但三衣)
3. does not eat after midday (S. khalupaścādbhaktika; T. zas phyis mi len pa;

- C. zhonghou bude yinjiang 中後不得飲漿)
4. eats only alms (S. paiṇḍapātika; T. bsod snyoms pa; C. cidi qishi 次第乞食)
 5. eats one meal in a single sitting (S. aikāsanika; T. stan gcig pa; C. shou yishi fa 受一食法)
 6. restricts the amount of food consumed (S. nāmantika; T. 'phyings pa pa; C. jieliang shi 節量食)
 7. dwells in isolation in the forest (S. āraṇyaka; T. dgon pa ba; C. alanruo chu zhu 阿蘭若處住)
 8. dwells at the foot of a tree (S. vṛkṣamūlika; T. shing drung pa; C. shuxia zhi 樹下止)
 9. dwells in open, unsheltered places (S. ābhyavakāśika; T. bla gab med pa; C. ludi zuo 露地坐)
 10. dwells in charnel grounds (S. śmāśānika; T. dur khrod pa; C. zhongjian zhu 塚間住)
 11. never lies down to sleep (S. naiṣyadika; T. cog bu pa; C. changzuo buwo 長坐不臥)
 12. does not omit any house on the almsround (S. yathāsamstarika; T. gzhi ji bzhin pa; C. changxing qishi 常行乞食)

twelve categories of scripture. (S. dvādaśāṅga[pravacana]; T. gsung rab yan lag bcu gnyis; C. shi'erbu jing/shi'erfen jiao 十二部經/十二分教)

1. discourses (S. sūtra; T. mdo; C. qijing/changhang 契經/長行)
2. aphorisms in mixed prose and verse (S. geya; T. dbyangs bsnyad; C. yingsong 應頌)
3. prophecies (S. vyākaraṇa; T. lung bstan; C. jibie/shouji 禮別/授禮)
4. verses (S. gāthā; T. tshig bcad; C. fengsong/guqi 諷頌/孤起)
5. utterances/meaningful expressions (S. udāna; T. ched du brjod pa; C. zishuo 自說)
6. framing stories (S. nidāna; T. gleng gzhi; C. yinyuan 因緣)
7. expanded teachings (S. vaipulya; T. shin tu rgyas pa; C. fanguang 方廣)
8. tales of previous lives (S. jātaka; T. skyes rabs; C. bsheng 本生)
9. marvelous events (S. adbhutadharmā; T. rmad du byung; C. xifa 希法)
10. narratives (S. avadāna; T. rtogs pa brjod pa; C. piyu 譬喻)
11. fables (S. itivṛttaka; T. de lta bu byung ba; C. benshi 本事)
12. instructions (S. upadeśa; T. gtan phab; C. lunyi 論議)

twelve deeds of a buddha. (S. dvādaśabuddhakārya; T. sangs rgyas kyi mdzad pa bcu gnyis; C. shi'er xiang chengdao 十二相成道)

1. descent from tuṣita heaven (T. dga' ldan gyi gnas nas 'pho ba; C. doushuai jiangshi 兜率降世)
2. entry into the womb (T. lhums su zhugs pa; C. rutai 入胎)
3. taking birth (T. sku bltams pa; C. chutai 出胎)
4. proficiency in the arts (T. bzo yi gnas la mkhas pa; C. shanxian jiyi 善爛技藝)
5. enjoyment of consorts (T. btsun mo'i 'khor dgyes rol ba; C. shouyong feijuan 受用妃眷)
6. renouncing the world (T. rab tu byung ba; C. chujia 出家)
7. practicing asceticism (T. dka' ba spyad pa; C. xiu kuxing 修苦行)
8. going to the bodhimaṇḍa (T. byang chub snying por gshegs pa; C. qu jingang zuo 趨金剛座)
9. subjugating Māra (T. bdud btul ba; C. xiangmo 降魔)
10. attaining enlightenment (T. mngon par rdzogs par sangs rgyas pa; C. chengdao 成道)
11. turning the wheel of the dharma (S. dharmacakrapravartana; T. chos kyi 'khor lo bskor ba; C. zhuan falun 轉法輪)
12. passing into parinirvāṇa (T. mya ngan las 'das pa; C. ru niepan 入涅槃)

twelfefold chain of dependent origination. (S. pratīyasamutpāda; T. rten cing 'brel bar 'byung ba; C. yuanqi 緣起)

1. ignorance (S. avidyā; T. ma rig pa; C. wuming 無明)
2. predispositions/habituations (S. saṃskāra; T. 'du byed; C. xing 行)
3. consciousness (S. vijñāna; T. mam shes; C. shi 識)
4. name and form/mentality and materiality (S. nāmarūpa; T. ming gzugs; C. mingse 名色)
5. six sense-bases (S. ṣaḍāyatana; T. skye mched drug; C. liuru 六入)
6. sensory contact (S. sparśa; T. reg pa; C. chu 觸)
7. sensations (S. vedanā; T. tshor ba; C. shou 受)
8. craving/thirst (S. tṛṣṇā; T. sred pa; C. ai 愛)
9. clinging (S. upādāna; T. len pa; C. qu 取)
10. existence/process of becoming (S. bhava; T. srid pa; C. you 有)
11. [re]birth (S. jāti; T. skye ba; C. sheng 生)

12. old age and death (S. jarāmarāṇa; T. rga shi; C. laosi 老死)

twelve sense-fields/bases of cognition. (S. āyatana; T. skye mched; C. ru/chu/ruchu 入/處/入處)

1. the sense-field of the visual sense-base (S. cakṣurāyatana; T. mig gi skye mched; C. yan 眼)
2. the sense-field of visual objects (S. rūpāyatana; T. gzugs kyi skye mched; C. se 色)
3. the sense-field of the auditory sense-base (S. śrotrāyatana; T. rna ba'i skye mched; C. er 耳)
4. the sense-field of auditory objects (S. śabdāyatana; T. sgra'i skye mched; C. sheng 聲)
5. the sense-field of the olfactory sense-base (S. ghrāṇāyatana; T. sna'i skye mched; C. bi 鼻)
6. the sense-field of olfactory objects (S. gandhāyatana; T. dri'i skye mched; C. xiang 香)
7. the sense-field of the gustatory sense-base (S. jihvāyatana; T. lce'i skye mched; C. she 舌)
8. the sense-field of gustatory objects (S. rasāyatana; T. ro'i skye mched; C. wei 味)
9. the sense-field of the tactile sense-base (S. kāyāyatana; T. lus kyi skye mched; C. shen 身)
10. the sense-field of tactile objects (S. spraṣṭavyāyatana; T. reg bya'i skye mched; C. chu 觸)
11. the sense-field of the mental sense-base (S. manāyatana; T. yid kyi skye mched; C. yi 意)
12. the sense-field of mental objects (S. dharmāyatana; T. chos kyi skye mched; C. fa 法)

FOURTEENS

fourteen indeterminates/unanswerable questions. (S. avyākṛta; T. lung du ma bstan pa'i chos; C. wuji 無禮)

1. Is the world eternal? (S. śāśvato lokah; T. 'jig rten rtag pa; C. shi chang 世)

常)

2. Is the world not eternal? (S. aśāsvato lokah; T. 'jig rten mi rtag pa; C. shi wuchang 世無常)
3. Is the world both eternal and not eternal? (S. śāsvataś cāśsvataś ca; T. 'jig rten rtag kyang rtag la mi rtag kyang mi rtag pa; C. shi yi chang yi wuchang 世亦常亦無常)
4. Is the world neither eternal nor not eternal? (S. naiva śāsvato nāśāsvataś ca; T. 'jig rten rtag pa yang ma yin mi tag pa yang ma yin; C. shi feichang feiwuchang 世非常非無常)
5. Is the world endless (viz. infinite)? (S. antavānlokaḥ; T. 'jig rten mtha' yod pa; C. shi youbian 世有邊)
6. Is the world not endless (viz. finite)? (S. anantavānlokaḥ; T. 'jig rten mtha' yod pa ma yin; C. shi wubian 世無邊)
7. Is the world both endless and not endless? (S. antavāṃś cānantavānlokaś ca; T. 'jig rten mtha' yod kyang yod la mtha' med kyang med; C. shi yi youbian yi wubian 世亦有邊亦無邊)
8. Is the world neither endless nor not endless? (S. naivāntavān nānantavāṃś ca; T. 'jig rten mtha' yod pa yang ma yin med pa yang ma yin; C. shi feiyoubian feiwubian 世非有邊非無邊)
9. Does the tathāgata exist after death? (S. bhavati tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas yod; C. rulai sihou weiyou 如來死後爲有)
10. Does the tathāgata not exist after death? (S. na bhavati tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas med; C. rulai sihou feiyou 如來死後非有)
11. Does the tathāgata both exist and not-exist after death? (S. bhavati ca na bhavati ca tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas yod kyang yod la med kyang med; C. rulai sihou yi you yi feiyou 如來死後亦有亦非有)
12. Does the tathāgata neither exist nor not-exist after death? (S. naiva bhavati na na bhavati tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas yod pa yang ma yin med pa yang ma yin; C. rulai sihou feiyou fei feiyou 如來死後非有非非有)
13. Are the life-force and the body identical? (S. sa jīvas tac charīram; T. srog de lus yin; C. mingzhe jishen 命者即身)
14. Are the life-force and the body different? (S. anyo jīvo 'nyac charīram; T. srog kyang gzhan la lus kyang gzhan; C. mingzhe yishen 命者異身)

fourteen root violations of the tantric commitments.

1. contradicting one's guru
2. contradicting or denigrating the teachings of the Buddha or one's guru
3. quarreling with others on the same path
4. violating the bodhisattva vows (in action, word, or thought)
5. violating the sacred drops in the heart cakra through illicit sexual activity
6. denigrating the teachings and paths of other systems
7. revealing secrets to non-initiates or those not ready to receive them
8. viewing the five aggregates that compose the psycho-physical continuum as impure
9. doubting one's entrance into the path
10. having the ability to perceive the mental continuum of others and recognizing that someone will commit great harm to others, but not taking action
11. holding either of the extreme views of eternalism or annihilationism
12. refusing to teach someone who asks for teachings and is qualified to receive those teachings
13. superficial or dualistic clinging to appearances of pure/impure; good/bad, *etc.*
14. verbally or mentally denigrating women

SIXTEENS

sixteen arhats. (S. *ṣoḍaśasthavira*; T. *gnas brtan bcu drug*; C. *shiliu luohan* 十六羅漢)

According to the East Asian tradition:

1. Piṇḍola Bhāradvāja (T. *Bha ra dhwa dza bsod snyoms len*; C. *Bintoulu Baluoduo* 賓頭盧跋羅墮)
2. Kanakavatsa (T. *Gser gyi be'u*; C. *Jianuojiafacuo* 迦諾迦伐蹉)
3. Kanaka Bhāradvāja (T. *Bha ra dhwa dza gser can*; C. *Jianuojialiduoshe* 迦諾迦跋釐墮闍)
4. Subinda [alt. *Suvinda*]/Abhedā (T. *Mi phyed pa*; C. *Supintuo* 蘇頻陀)
5. Bakkula [alt. *Nakula/Vakula*] (T. *Ba ku la*; C. *Bojuluo* 薄拘羅)

6. Bhadra (T. Bzang po; C. Batuoluo 跋陀羅)
7. Kālika [alt. Karīka] (T. Dus ldan; C. Jialijia 迦里迦)
8. Vajraputra (T. Rdo rje mo'i bu; C. Fasheluofuduoluo 伐闍羅弗多羅)
9. Jīvaka (T. 'Tsho byed; C. Qipo/Shubojia 耆婆/戍博迦)
10. Panthaka [alt. Mahāpanthaka] (T. Lam chen bstan; C. Bantuojia 半託迦)
11. Rāhula (T. Sgra gcan 'dzin; C. Luohouluo 羅睺羅)
12. Nāgasena (T. Klu sde; C. Naqixina 那伽犀那)
13. Aṅgaja (T. Yan lag 'byung; C. Yinjietuo 因揭陀)
14. Vanavāsin (T. Nags na gnas; C. Fanaposi 伐那婆斯)
15. Ajita (T. Ma pham pa; C. Ayiduo 阿逸多)
16. Cūḍapanthaka [alt. Cūḷapantha] (T. Lam phran bstan; C. Zhutubantuojia 注荼半托迦)

sixteen aspects of the four noble truths. (S. ākāra; T. bden bzhi'i nram pa; C. xingxiang 行相)

1. impermanence (S. anitya; T. mi rtag pa; C. wuchang 無常)
2. suffering (S. duḥkha; T. sdug bsngal ba; C. ku 苦)
3. emptiness (S. śūnyatā; T. stong pa nyid; C. kong 空)
4. selflessness (S. anātmaka; T. bdag med pa; C. wuwo/feiwo 無我/非我)
5. origination (S. samudaya; T. kun 'byung ba; C. ji 集)
6. production/process (S. prabhava; T. rab tu skye ba; C. sheng 生)
7. cause (S. hetu; T. rgyu; C. yin 因)
8. conditions (S. pratyaya; T. rkyen; C. yuan 緣)
9. cessation (S. nirodha; T. 'gog pa; C. mie 滅)
10. serenity (S. śānta; T. zhi ba; C. jing 靜)
11. sublimity (S. praṇīta; T. gya nom pa; C. miao 妙)
12. deliverance (niḥsaraṇa; T. nges par 'byung ba; C. li 離)
13. path (S. mārga; T. lam; C. dao 道)
14. correctness (S. nyāya; T. rigs pa; C. ru 如)
15. achievement (S. pratipatti; T. sgrub pa; C. xing 行)
16. release (S. nairyāṇika; T. nges par 'byin pa; C. chu 出)

sixteen elders. (S. ṣoḍaśasthavira; T. gnas brtan bcu drug; C. shiliu zunzhe 十六尊者). See [SIXTEEN ARHATS](#).

sixteen emptinesses. (S. śūnyatā; T. stong pa nyid; C. kong 空)

1. emptiness of the internal (S. adhyātmaśūnyatā; T. nang stong pa nyid; C. nei kong 內空)
2. emptiness of the external (S. bahirdhāśūnyatā; T. phyi stong pa nyid; C. wai kong 外空)
3. emptiness of both the internal and external (S. adhyātmabahirdhāśūnyatā; T. phyi nang stong pa nyid; C. neiwai kong 內外空)
4. emptiness of emptiness (S. śūnyatāśūnyatā; T. stong pa nyid stong pa nyid; C. kongkong 空空)
5. emptiness of the great (S. mahāśūnyatā; T. chen po stong pa nyid; C. dakong 大空)
6. emptiness of the ultimate (S. paramārthaśūnyatā; T. don dam pa stong pa nyid; C. shengyi kong 勝義空)
7. emptiness of the compounded (S. saṃskṛtaśūnyatā; T. 'dus byas stong pa nyid; C. youwei kong 有為空)
8. emptiness of the un compounded (S. asaṃskṛtaśūnyatā; T. 'dus ma byas stong pa nyid; C. wuwei kong 無為空)
9. emptiness of the infinite (S. atyantaśūnyatā; T. mtha' las 'das pa stong pa nyid; C. bijing kong 畢竟空)
10. emptiness of the beginningless and endless (S. anavarāgraśūnyatā; T. thog ma dang mtha' ma med pa stong pa nyid; C. wuji kong 無際空)
11. emptiness of what cannot be repudiated (S. anavakāraśūnyatā; T. dor ba med pa stong pa nyid; C. wusan kong 無散空)
12. emptiness of essential nature (S. prakṛtiśūnyatā; T. rang bzhin stong pa nyid; C. benxing kong 本性空)
13. emptiness of all dharmas (S. sarvadharmāśūnyatā; T. chos thams cad stong pa nyid; C. yiqiefa kong 一切法空)
14. emptiness of intrinsic marks (S. lakṣaṇaśūnyatā; T. mtshan nyid stong pa nyid; C. zixiang kong 自相空)
15. emptiness of the unobservable (S. anupalambhaśūnyatā; T. mi dmigs pa stong pa nyid; C. bu kede kong 不可得空)
16. emptiness of the nature of nonexistence (S. abhāvasvabhāvaśūnyatā; T. dngos po med pa'i ngo bo nyid stong pa nyid; C. wuzixing zixing kong 無自性自性空)

sixteen moments of the path of vision. (S. darśanamārgakṣaṇa; T. mthong lam shes bzod skad cig ma; C. [jiandao wei] shiliu xin [見道位]十六心)

1. acquiescence to the cognition of dharma with regard to suffering in the sensuous realm (S. duḥkhe dharmajñānakṣāntiḥ; T. sdug bsngal chos bzod; C. kufa ren 苦法忍)
2. cognition of dharma with regard to suffering in the sensuous realm (S. duḥkhe dharmajñānam; T. sdug bsngal chos shes; C. kufa zhi 苦法智)
3. acquiescence to the subsequent cognition with regard to suffering in the subtle-materiality and immaterial realms (S. duḥkhe 'nvayajñānakṣāntiḥ; T. sdug bsngal rjes bzod; C. kulei ren 苦類忍)
4. subsequent cognition with regard to suffering in the subtle-materiality and immaterial realms (S. duḥkhe 'nvayajñānam; T. sdug bsngal rjes shes; C. kuleizhi 苦類智)
5. acquiescence to the cognition of dharma with regard to origination in the sensuous realm (S. samudaye dharmajñānakṣāntiḥ; T. kun 'byung chos bzod; C. jifa ren 集法忍)
6. cognition of dharma with regard to origination in the sensuous realm (S. samudaye dharmajñānam; T. kun 'byung chos shes; C. jifa zhi 集法智)
7. acquiescence to the subsequent cognition of origination in the subtle-materiality and immaterial realms (S. samudaye 'nvayajñānakṣāntiḥ; T. kun 'byung rjes bzod; C. jilei ren 集類忍)
8. subsequent cognition of origination in the subtle-materiality and immaterial realms (S. samudaye 'nvayajñānam; T. kun 'byung rjes shes; C. jilei zhi 集類智)
9. acquiescence to the cognition of dharma with regard to cessation in the sensuous realm (S. nirodhe dharmajñānakṣāntiḥ; T. 'gog pa chos bzod; C. miefa ren 滅法忍)
10. cognition of dharma with regard to cessation in the sensuous realm (S. nirodhe dharmajñānam; T. 'gog pa chos shes; C. miefa zhi 滅法智)
11. acquiescence to subsequent cognition with regard to cessation in the subtle-materiality and immaterial realms (S. nirodhe 'nvayajñānakṣāntiḥ; T. 'gog pa rjes bzod; C. mielei ren 滅類忍)
12. subsequent cognition with regard to cessation in the subtle-materiality and immaterial realms (nirodhe 'nvayajñānam; T. 'gog pa rjes shes; C. mielei zhi 滅類智)
13. acquiescence to the cognition of dharma with regard to the path in the

- sensuous realm (S. mārge dharmajñānakṣāntiḥ; T. lam chos bzod; C. daofa ren 道法忍)
14. cognition of dharma with regard to the path in the sensuous realm (S. mārge dharmajñānam; T. lam chos shes; C. daofa zhi 道法智)
15. acquiescence of subsequent cognition with regard to the path in the subtle-materiality and immaterial realms (S. mārge 'nvayajñānakṣāntiḥ; T. lam rjes bzod; C. daolei ren 道類忍)
16. subsequent cognition with regard to the path in the subtle-materiality and immaterial realms (S. mārge 'nvayajñānam; T. lam rjes shes; C. daolei zhi 道類智)

SEVENTEENS

seventeen heavens of the realm of subtle materiality. (S. rūpadhātunivāsa; T. gzugs khams gnas ris; C. sejie shiqi tian 色界十七天)

FIRST DHYĀNA:

1. Brahmā's retainers (S. brahmakāyika; T. tshangs ris; C. fanzhong tian 梵衆天)
2. Brahmā's ministers (S. brahmapurohita; T. tshangs pa mdun na 'don; C. fanfu tian 梵輔天)
3. Great Brahmā (S. mahābrahmā; T. tshangs pa chen po; C. dafan tian 大梵天)

SECOND DHYĀNA:

1. lesser radiance (S. parīttābha; T. 'od chung; C. shaoguang tian 少光天)
2. immeasurable radiance (S. apramāṇābha; T. tshad med 'od; C. wulianguang tian 無量光天)
3. ultimate radiance (S. ābhāsvara; T. 'od gsal; C. guangyin tian/jiguangjing tian 光音天/極光淨天)

THIRD DHYĀNA:

1. lesser purity (S. parīttasubha; T. dge chung; C. shaojing tian 少淨天)
2. immeasurable purity (S. apramāṇasubha; T. tshad med dge; C. wuliangjing tian 無量淨天)

3. pervasive purity (S. śubhakṛtsna; T. dge rgyas; C. bianjing tian 遍淨天)
4. cloudless (S. anabhṛaka; T. sprin med; C. wuyun tian 無雲天)
5. meritorious birth (S. puṇyaprasava; T. bsod nams 'phel; C. fusheng tian 福生天)
6. extensive fruition (S. bṛhatphala; T. 'bras bu che; C. guangguo tian 廣果天)

FOURTH DHYĀNA (THE FIVE PURE ABODES, [ŚUDDHĀVĀSA](#)):

1. free from afflictions (S. avṛha; T. mi che ba; C. wufan tian 無煩天)
2. not burning/without torment (S. atapa; T. mi gdung pa; C. wure tian 無熱天)
3. perfect form (S. sudṛśa; T. gya nom snang ba; C. shanxian tian 善現天)
4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian 善見天)
5. highest (S. akaniṣṭha; T. 'og min; C. sejiujing tian 色究竟天)

EIGHTEENS

eighteen elements/bases of cognition. (S. dhātu; T. khams bco brgyad; C. jie 界)

1. visual sense-base (S. cakṣurdhātu; T. mig gi khams; C. yan 眼)
2. visual sense-object (S. rūpadhātu; T. gzugs kyi khams; C. se 色)
3. visual consciousness (S. cakṣurvijñānadhātu; T. mig gi rnam par shes pa'i khams; C. yanshi 眼識)
4. auditory sense-base (S. śrotradhātu; T. ma ba'i khams; C. er 耳)
5. auditory sense-object (S. śabdadhātu; T. sgra'i khams; C. sheng 聲)
6. auditory consciousness (S. śrotravijñānadhātu; T. ma ba'i rnam par shes pa'i khams; C. ershi 耳識)
7. olfactory sense-base (S. ghrāṇadhātu; T. sna'i khams; C. bi 鼻)
8. olfactory sense-object (S. gandhadhātu; T. dri'i khams; C. xiang 香)
9. olfactory consciousness (S. ghrāṇavijñānadhātu; sna'i rnam par shes pa'i khams; C. bishi 鼻識)
10. gustatory sense-base (S. jihvādhātu; T. lce'i khams; C. she 舌)
11. gustatory sense-object (S. rasadhātu; T. ro'i khams; C. wei 味)
12. gustatory consciousness (S. jihvāvijñānadhātu; T. lce'i rnam par shes pa'i khams; C. sheshi 舌識)
13. tactile sense-base (S. kāyadhātu; T. lus kyi khams; C. shen 身)
14. tactile sense-object (S. spraṣṭavyadhātu; T. reg bya'i khams; C. chu 觸)

15. tactile consciousness (S. kāyavijñānadhātu; T. lus kyi nam par shes pa'i kham; C. shenshi 身識)
16. mental sense-base (S. manodhātu; T. yid kyi kham; C. yi 意)
17. mental sense-object (S. dharmadhātu; T. chos kyi kham; C. fa 法)
18. mental consciousness (S. manovijñānadhātu; T. yid kyi nam par shes pa'i kham; C. yishi 意識)

eighteen emptinesses. (S. śūnyatā; T. stong pa nyid bco brgyad; C. kong 空)

1. emptiness of the internal (S. adhyātmaśūnyatā; T. nang stong pa nyid; C. nei kong 內空)
2. emptiness of the external (S. bahirdhāśūnyatā; T. phyi stong pa nyid; C. wai kong 外空)
3. emptiness of both the internal and external emptiness (S. adhyātmabahirdhāśūnyatā; T. phyi nang stong pa nyid; C. neiwai kong 內外空)
4. emptiness of emptiness (S. śūnyatāśūnyatā; T. stong pa nyid stong pa nyid; C. kongkong 空空)
5. emptiness of the great (S. mahāśūnyatā; T. chen po stong pa nyid; C. dakong 大空)
6. emptiness of the ultimate (S. paramārthaśūnyatā; T. don dam pa stong pa nyid; C. shengyi kong 勝義空)
7. emptiness of the compounded (S. saṃskṛtaśūnyatā; T. 'dus byas stong pa nyid; C. youwei kong 有為空)
8. emptiness of the un compounded (S. asaṃskṛtaśūnyatā; T. 'dus ma byas stong pa nyid; C. wuwei kong 無為空)
9. emptiness of the infinite (S. atyantaśūnyatā; T. mtha' las 'das pa stong pa nyid; C. bijing kong 畢竟空)
10. emptiness of the beginningless and endless (S. anavarāgraśūnyatā; T. thog ma dang mtha' ma med pa stong pa nyid; C. wuji kong 無際空)
11. emptiness of what cannot be repudiated (S. anavakāraśūnyatā; T. dor ba med pa stong pa nyid; C. wusan kong 無散空)
12. emptiness of essential nature (S. prakṛtiśūnyatā; T. rang bzhin stong pa nyid; C. benxing kong 本性空)
13. emptiness of all dharmas (S. sarvadharmāśūnyatā; T. chos thams cad stong pa nyid; C. yiqiefa kong 一切法空)

14. emptiness of intrinsic marks (S. lakṣaṇaśūnyatā; T. mtshan nyid stong pa nyid; C. zixiang kong 自相空)
15. emptiness of the unobservable (S. anupalambhaśūnyatā; T. mi dmigs pa stong pa nyid; C. bu kede kong 不可得空)
16. emptiness of the nature of nonexistence (S. abhāvasvabhāvaśūnyatā; T. dngos po med pa'i ngo bo nyid stong pa nyid; C. wuxing zixing kong 無性自性空)
17. emptiness of existence (S. bhāvaśūnyatā; T. dngos bo'i stong pa nyid; C. youxing kong 有性空)
18. emptiness of nonexistence (S. abhāvaśūnyatā; T. dngos po med pa'i stong pa nyid; C. wuxing kong 無性空)

eighteen mainstream Buddhist schools. (S. aṣṭadaśanikāya; T. sde pa bco brgyad; C. shiba bupai 十八部派)

1. Sarvāstivāda (T. Thams cad yod par smra ba; C. Shuo yiqie you bu 說一切有部)
 1. Mūlasarvāstivāda (T. Gzhi thams cad yod par smra ba'i sde; C. Genben shuo yiqie you bu 根本說一切有部)
 2. Kāśyapīya (T. 'Od srung pa'i sde; C. Yinguang bu 飲光部)
 3. Mahīśāsaka (T. Sa ston sde; C. Huadi bu 化地部)
 4. Dharmaguptaka (T. Chos srung sde; C. Fazang bu 法藏部)
 5. Bahuśrutīya (T. Mang du thos pa'i sde; C. Duowen bu 多聞部)
 6. Tāmraśāṭīya (T. Gos dmar sde; C. Tongxie bu 銅鑠部)
 7. Vibhajyavādin (T. Rnam par phye ste smra ba'i sde; C. Fenbieshuo bu 分別說部)
2. Saṃmitīya (T. Kun gyis bkur ba; C. Zhengliang bu 正量部)
 1. Kaurukullaka (T. Sar sgrog rigs kyi sde; C. Julujuluo bu/Xuandi bu 拘屢拘羅部/宣地部)
 2. Avantaka (T. Bsrung ba pa'i sde; C. Bukeqi bu 不可棄部)
 3. Vātsīputrīya (T. Gnas ma bu pa'i sde; C. Duzi bu 犢子部)
3. Mahāsāṃghika (T. Dge 'dun phal chen; C. Dazhong bu 大眾部)
 1. Pūrvaśaila (T. Shar gyi ri bo'i sde; C. Dongshanzhu bu 東山住部)
 2. Aparāśaila (T. Nub kyi ri bo'i sde; C. Xishanzhu bu 西山住部)
 3. Haimavata (T. Gang ri bo'i sde; C. Xueshan bu 雪山部)

4. Lokottaravāda (T. 'Jig rten 'das smra'i sde; C. Shuo chushi bu 說出世部)
5. Prajñaptivāda (T. Btags par smra ba'i sde; C. Shuojia bu 說假部)
4. *Sthaviranikāya (T. Gnas brtan sde; C. Shangzuo bu 上座部)
 1. Mahāvihāravāsa (T. Gtsug lag khang chen gnas sde; C. Dasizhu bu 大寺住部)
 2. Jetavanīya (T. Rgyal byed tshal gnas pa'i sde; C. Zhiduolin zhu bu 祇多林住部)
 3. Abhayagirivāsa (T. 'Jigs med ri gnas sde; C. Wuweishan zhu bu 無畏山住部)

eighteen sciences. (S. vidyāsthāna; T. rig gnas)

1. music (S. gandharva; T. rol mo)
2. erotic arts (S. vaiśika; T. 'khrig thabs)
3. livelihood (S. vārttā; T. 'tsho chas)
4. accounting (S. saṃkhyā; T. grangs can)
5. grammar (S. śabda; T. sgra)
6. medicine (S. cikitsitā; T. gso dpyad)
7. law (S. nīti; T. chos lugs)
8. the arts (S. śilpa; T. bzo)
9. archery (S. dhanurveda; T. 'phong dpyad)
10. reasoning (S. hetu; T. gtan tshigs)
11. yoga (T. rnal 'byor)
12. learning (S. śruti; T. thos pa)
13. memorization (S. smṛti; T. dran pa)
14. astronomy (S. jyotiṣa; T. skar ma'i dpyad)
15. astrology (S. gaṇita; T. rtsis)
16. magic (S. māyā; T. mig 'phrul)
17. legend (S. purāṇa; T. sngon gyi rabs)
18. history (S. itihāsaka; T. sngon byung)

eighteen unshared factors [distinct attributes] of the buddhas. (S. āveṇikabuddhadharma; T. sangs rgyas kyi chos ma 'dres pa bco brgyad/ma 'dres pa'i chos; C. bugong[fo]fa 不共[佛]法)

1. their actions are without error (S. nāsti [tathāgatasya] skhalitam; T. 'khrul pa med pa; C. shen wushi 身無失)
2. their speech is not noisy (S. nāsti ravitam; T. ca co med pa; C. kou wushi 口

- 無失)
3. they are never forgetful (S. nāsti muṣitasmṛtitā; T. bsnyel ba med pa; C. nian wushi 念無失)
 4. their mind is never not in equipoise (S. nāsty asamāhitacittam; T. sems mnyam par ma gzhaq pa med pa; C. wu yixiang 無異想)
 5. their perception is free from discursiveness (S. nāsti nānātvasaṃjñā; T. tha dad pa'i 'du shes med pa; C. wu buding 無不定)
 6. their equanimity is not due to a lack of discernment (S. nāsty apratisaṃkhyāyopekṣā; T. so sor ma rtogs pa'i btang snyoms med pa; C. wu buzhi she 無不知捨)
 7. they do not regress in their zeal (S. nāsti cchandasya hāniḥ; T. 'dun pa nyams pa med pa; C. yu wumie 欲無減)
 8. they do not regress in their effort (S. nāsti vīryasya hāniḥ; T. brtson 'grus nyams pa med pa; C. jingjin wumie 精進無減)
 9. they do not regress in their recollection (S. nāsti smṛtihāniḥ; T. dran pa nyams pa med pa; C. nian wumie 念無減)
 10. they do not regress in their concentration (S. nāsti samādhihāniḥ; T. ting nge 'dzin nyams pa med pa; C. ding wumie 定無減)
 11. they do not regress in their wisdom (S. nāsti prajñāhāniḥ; T. shes rab nyams pa med pa; C. hui wumie 慧無減)
 12. they do not regress in their liberation (S. nāsti vimuktiḥāniḥ; T. rnam par grol ba nyams pa med pa; C. jietuo zhijian wumie 解脫知見無減)
 13. all their physical actions are preceded by gnosis and remain in conformity with gnosis (S. sarvakāyakarmajñānapūrvagamam jñānānuparivarti; T. lus kyi las thams cad ye shes kyi sngon du 'gro shing ye shes kyi rjes su 'brang ba; C. yiqie shenye sui zhihui xing 一切身業隨智慧行)
 14. all their verbal actions are preceded by gnosis and remain in conformity with gnosis (S. sarvavākkarmajñānapūrvagamam jñānānuparivarti; T. ngag gi las thams cad ye shes kyi sngon du 'gro shing ye shes kyi rjes su 'brang ba; C. yiqie kouye sui zhihui xing 一切口業隨智慧行)
 15. all their mental actions are preceded by gnosis and remain in conformity with gnosis (S. sarvamaṅgalkarmajñānapūrvagamam jñānānuparivarti; T. yid kyi las thams cad ye shes kyi sngon du 'gro shing ye shes kyi rjes su 'brang ba; C. yiqie yiye sui zhihui xing 一切意業隨智慧行)
 16. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the past (S. atīte 'dhvany asaṅgam apratihataṃ

jñānadarśanaṃ pravartate; T. 'das pa'i dus la ma chags ma thogs pa'i ye shes gzigs par 'jug pa; C. zhihui zhi guoqushi wu'ai 智慧知過去世無礙)

17. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the future (S. anāgate 'dhvany asaṅgam apratihataṃ jñānadarśanaṃ pravartate; T. ma 'ongs pa'i dus la ma chags ma thogs pa'i ye shes gzigs par 'jug pa; C. zhihui zhi weilaishi wu'ai 智慧知未來世無礙)

18. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the present (S. pratyutpanne 'dhvany asaṅgam apratihataṃ jñānadarśanaṃ pravartate; T. da ltar gyi dus la ma chags ma thogs pa'i ye shes gzigs par 'jug pa; C. zhihui zhi xianzaishi wu'ai 智慧知現在世無礙)

TWENTIES

twenty-eight classes of divinities. (S. deva; T. lha; C. tian 天)

SENSUOUS REALM (KAMADHĀTU):

1. four great kings (S. cāturmahārājakāyika; T. rgyas chen rigs bzhi; C. siwang tian 四王天)
2. divinities of the thirty-three (S. trāyastriṃśa; T. sum cu rtsa gsum; C. daoli tian/sanshisan tian 忉利天/三十三天)
3. free from conflict (S. yāma; T. 'thab bral; C. yemo tian 夜摩天)
4. contented (S. tuṣita; T. dga' ldan; C. doushuai[tuo] tian 兜率[陀]天)
5. enjoyment of creation (S. nirmāṇarati; T. 'phrul dga'; C. huale tian 化樂天)
6. divinities who have power over the creations of others/divinities who partake of the pleasures created in other heavens (S. paranirmitavaśavartin; T. gzhan 'phrul dbang byed; C. tahua zizai tian 他化自在天)

REALM OF SUBTLE MATERIALITY (RŪPADHĀTU):

FIRST DHYĀNA:

1. Brahmā's retainers (S. brahmakāyika; T. tshangs ris; C. fanzhong tian 梵眾天)
2. Brahmā's ministers (S. brahmapurohita; T. tshangs pa mdun na 'don; C.

fanfu tian 梵輔天)

3. Great Brahmā (S. mahābrahmā; T. tshangs pa chen po; C. dafan tian 大梵天)

SECOND DHYĀNA

1. lesser radiance (S. parīttābha; T. 'od chung; C. shaoguang tian 少光天)

2. immeasurable radiance (S. apramāṇābha; T. tshad med 'od; C. wuliang guang tian 無量光天)

3. ultimate radiance (S. ābhāsvara; T. 'od gsal; C. guangyin tian/jiguangjing tian 光音天/極光淨天)

THIRD DHYĀNA

1. lesser purity (S. parīttāśubha; T. dge chung; C. shaojing tian 少淨天)

2. immeasurable purity (S. apramāṇāśubha; T. tshad med dge; C. wuliangjing tian 無量淨天)

3. pervasive purity (S. śubhakṛtsna; T. dge rgyas; C. bianjing tian 遍淨天)

4. cloudless (S. anabhṛaka; T. sprin med; C. wuyun tian 無雲天)

5. meritorious birth (S. puṇyaprasava; T. bsod nams 'phel; C. fusheng tian 福生天)

6. extensive fruition (S. bṛhatphala; T. 'bras bu che; C. guanguo tian 廣果天)

7. nonperception (S. asaṃjñisattva; T. 'du shes med pa'i lha; C. wuxiang tian 無想天) [Note: This heaven is sometimes added to the list of seventeen heavens of the realm of subtle materiality and is included on this list for comprehensiveness.]

FOURTH DHYĀNA (THE FIVE PURE ABODES,, [ŚUDDHĀVĀSA](#))

1. free from afflictions (S. avṛha; T. mi che ba; C. wufan tian 無煩天)

2. without torment (S. atapa; T. mi gdung pa; C. wure tian 無熱天)

3. perfect form (S. sudṛśa; T. gya nom snang ba; C. shanxian tian 善現天)

4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian 善見天)

5. highest (S. akaniṣṭha; T. 'og min; C. sejiujing tian 色究竟天)

IMMATERIAL REALM (ĀRŪPYADHĀTU)

1. infinite space (S. ākāśānantyāyatana; T. nam mkha' mtha' yas skye mched; C. kong wubian chu tian 空無邊處天)

2. infinite consciousness (S. vijñānānantyāyatana; T. rnam shes mtha' yas skye mched; C. shi wubian chu tian 識無邊處天)

3. nothingness (S. ākiñcanyāyatana; T. ci yang med pa'i skye mched; C. wusuoyou chu tian 無所有處天)
4. neither perception nor nonperception (S. naivasamjñānāsamjñāyatana; T. 'du shes med 'du shes med min skye mched; C. feixiang feifeixiang tian 非想非非想天)

twenty varieties of the saṃgha. (S. viṃśatiprabhedasaṃgha; T. dge 'dun nyi shu; C. ershi sengqie/shengwen cidi, 二十僧伽/聲聞次第)

1. srotaāpanna (T. rgyun du zhugs pa; C. yuliu [guo]/xutuohuan 預流[果]/須陀洹)
2. one who takes up to seven existences (S. saptakṛdbhavaparama; T. re ltar thogs na srid pa lan bdun pa; C. jiqi fanyou 極七返有)
3. one who goes from family to family (S. kulamkula; T. rigs nas rigs su skye ba; C. wang tianshang/jiajia 往天上/家家)
4. once-returner (S. sakṛdāgāmin; T. lan gcig phyir 'ong ba; C. yilai/situohan 一來/斯陀含)
5. one who has a single obstacle (S. ekavīcika; T. bar chad gcig pa; C. yijian, 一間)
6. non-returner (S. anāgāmin; T. phyir mi 'ong ba; C. bu huan/bu lai/anahan 不還/不來/阿那含)
7. one who achieves nirvāṇa in the intermediate state (S. antarāparinirvāyin; T. bar ma dor yongs su mya ngan las 'das ba; C. zhong ban/zhong banniepan 中般/中般涅槃)
8. one who achieves nirvāṇa at birth (S. upapadyaparinirvāyin; T. skyes nas yongs su mya ngan las 'das ba; C. sheng ban/sheng banniepan 生般/生般涅槃)
9. one who achieves nirvāṇa through effort (S. sābhisamskāraparinirvāyin; T. mngon par 'du byed dang bcas pas yongs su mya ngan las 'das ba; C. youxing ban/youxing banniepan 有行般/有行般涅槃)
10. one who achieves nirvāṇa without effort (S. anabhisamskāraparinirvāyin; T. mngon par 'du byed pa med par yongs su mya ngan las 'das ba; C. wuxing ban/wuxing banniepan 無行般/無行般涅槃)
11. one who goes higher/upstreamer (S. ūrdhvasrotas; T. gong du 'pho ba; C. shangliu ban/shangliu banniepan 上流般/上流般涅槃)
12. bodily witness (S. kāyasākṣin; T. lus kyi mngon sum du byed pa; C. shenzheng 身證)
13. follower through faith (S. śraddhānusārin; T. dad pa'i rjes su 'brang ba; C.

- suixin xing 隨信行)
14. follower through doctrine (S. dharmānusārin; T. chos kyi rjes su 'brang ba; C. suifa xing 隨法行)
 15. one who aspires through faith (S. śraddhādhimukta; T. dad pas lhag par mos pa; C. xinjie 信解)
 16. one who attains through seeing (S. dr̥ṣṭiprāpta; T. mthong bas thob pa; C. jianzhi/jiande 見至/見得)
 17. one who is liberated dependent upon a specific occasion (S. samayavimukta; T. dus dang sbyor bar rnam par grol ba; C. shi jietuo 時解脫)
 18. one who is liberated regardless of occasion (S. asamayavimukta; T. dus dang mi sbyor bar rnam par grol ba; C. bushi jietuo 不時解脫)
 19. one who is liberated through wisdom (S. prajñāvimukta; T. shes rab kyis rnam par grol ba; C. hui jietuo 慧解脫)
 20. one who is liberated both ways (S. ubhayatobhāgavimukta; T. gnyis ga'i cha las rnam par grol ba; C. ju jietuo 俱解脫)

THIRTIES

thirty-two marks of a great man. (S. mahāpuruṣalakṣaṇa; T. skyes bu chen po'i mtshan sum bcu rtsa gnyis/mtshan bzang so gnyis; C. daren xiang 大人相)

1. his feet stand firmly on the ground (S. supraṭiṣṭhitapāda; T. zhabs shin tu gnas pa; C. zu shan anzhu xiang 足善安住相)
2. he has thousand-spoked wheels on the palms of his hands and the soles of his feet (S. cakrāṅkitahastapādātala; T. phyag dang zhabs kyi mthil 'khor lo'i mtshan dang ldan pa; C. shouzu lunxiang 手足輪相)
3. the heels of his feet are broad (S. āyatapādapārṣṇi; T. zhabs kyi mthil rting pa yangs pa; C. zugen fuchang xiang 足跟跌長相)
4. he has long fingers (S. dīrghāṅguli; T. sor mo ring ba; C. xianzhang zhi xiang 纖長指相)
5. his hands and feet are smooth (S. mṛdutaruṇahastapāda; T. phyag dang zhabs kyi mthil 'jam shing gzhon sha chags pa; C. shouzu xiruan xiang 手足細軟相)
6. his hands and feet are webbed (S. jālahastapāda; T. phyag dang zhabs dra

- bas 'brel ba; C. shouzu wangman xiang 手足網縵相)
7. his legs are long [alt. his ankles are not prominent] (S. utsaṅgapāda; T. zhabs kyi long bu mi mngon pa; C. zufu gaoman xiang 足趺高滿相)
 8. he has thighs like an antelope (S. aiṇeyajaṅgha; T. byin pa ri dwags e na ya'i 'dra; C. yiniye chuai xiang 羴泥耶蹄相)
 9. his arms extend below the knees (S. sthitānavanata-pralambabāhu; T. bzhengs bzhin du ma btud par phyag pus mor slebs pa; C. lishou moxi xiang 立手摩膝相)
 10. his penis is retracted (S. kośopagata-vastiguhya; T. 'doms kyi sba ba sbubs su nub pa; C. shifeng zangmi xiang 勢峰藏密相)
 11. his brow is broad and even (S. samalalāta; T. dpral ba'i dbyes mnyams pa; C. e guangping qi 額廣平齊)
 12. his skin is smooth and golden (S. sūkṣmasuvarṇacchavi; T. pags pa srab cing mdog gser 'dra ba; C. pifu xihua xiang 皮膚細滑相)
 13. he has one hair in each pore of his body (S. ekaikaroma; T. spu re re nas skyes shing g.yas su 'khyil ba; C. shenzhu maokong yiyi maosheng xiang 身諸毛孔一一毛生相)
 14. the hairs of his body stand erect (S. ūrdhvāgraroma; T. sku'i spu gyen du phyogs pa; C. shenmao shangmi xiang 身毛上靡相)
 15. his thighs are well rounded (S. suvartitoru; T. brla legs par zlum pa; C. tui meiyuan xiang 腿美圓相)
 16. the seven parts of his body are well-proportioned (S. saptotsada; T. bdun mtho ba; C. qichu jieman xiang 七處皆滿相)
 17. the upper part of his body is like a lion's (S. simhapūrvārdhakāya; T. ro stod seng ge'i 'dra ba; C. shen shang ban ru shiziwang xiang 身上半如師子王相)
 18. he has broad shoulders (S. citāntarāṃsa; T. thal gong rgyas pa; C. bojian chongshi xiang 膊間充實相)
 19. his body and limbs are perfectly proportionate and thus shaped like a fig tree (S. nyagrodhaparimaṇḍala; T. shing nya gro dha ltar chu zheng gab pa; C. shenxiang yuanman runuojutuo 身相圓滿如諾瞿陀)
 20. he has full, round shoulders (S. susaṃvṛttaskandha; T. dpung mgo shin tu zlum pa; C. jianshan yuanman xiang 肩善圓滿相)
 21. he has an excellent sense of taste (S. rasarasāgra; T. ro bro ba'i mchog dang ldan pa; C. yu zhuwei zhong de zui shangwei 於諸味中得最上味)
 22. he has a jaw like a lion's (S. simhahanu; T. 'gram pa seng ge'i 'dra ba; C.

- han ru shizi xiang 額如師子相)
23. he has forty teeth (S. catvāriṃśaddanta; T. tshems bzhi bcu mnga' ba; C. jusishichi 具四十齒)
24. his teeth are even (S. samadanta; T. them mnyam pa; C. chi qiping 齒齊平)
25. his teeth are evenly spaced (S. aviraladanta; T. tshems thags bzang ba; C. chi wuxi 齒無隙)
26. his teeth are white (S. suśukladanta; T. tshems shin tu dkar ba; C. chi xianbai 齒鮮白)
27. his tongue is long and broad (S. prabhūtatanujihva; T. ljags shin tu ring zhing srab pa; C. she guangbo 舌廣薄)
28. his voice is like Brahmā's (S. brahmasvara; T. tshangs pa'i dbyangs; C. da fanyin 大梵音)
29. his eyes are deep blue with eyelashes like a bull (S. abhinīlanetrāgopakṣma; T. spyān mthon mthing la ba'i rdzi ma lta bu; C. mu ganqing jie ru niuwang 目紺青睫如牛王)
30. he has a white tuft of hair between his eyebrows (S. ūrṇākeśa; T. mdzod spu; C. meijian baihao xiang 眉間白毫相)
31. the hair on his head turns to the right (S. pradakṣiṇāvarttakeśa; T. dbu skra g.yas su 'khyil ba; C. toufa youxuan 頭髮右旋)
32. he has a protrusion on the crown of the head (S. uṣṇīṣaśīrṣa; T. dbu gtsug tor dang ldan pa; C. dingshang xian wusenisha 頂上現烏瑟膩沙)

thirty-seven wings of enlightenment/factors pertaining to awakening. (S. bodhipākṣikadharmā; T. byang chub kyi phyogs kyi chos; C. daopin/puti fen 道品/菩提分)

1. four applications of mindfulness (S. smṛtyupasthāna; T. dran pa nye bar bzhag pa bzhi; C. si nianchu 四念處)
2. four right efforts (S. samyakpradhāna/samyakprahāṇa; T. yang dag par spong ba bzhi; C. si zhengqin 四正勤)
3. four bases of psychic power (S. ṛddhipāda; T. rdzu 'phrul gyi rkang pa bzhi; C. si shenzu/si ruyi zu 四神足/四如意足)
4. five [spiritual] faculties/dominants (S. indriya; T. dbang po lnga; C. wugen 五根)
5. five powers (S. bala; T. stobs lnga; C. wuli 五力)
6. seven factors of enlightenment (S. bodhyaṅga; T. byang chub yan lag bdun;

- C. qi puti fen/qi juezhi 七菩提分/七覺支)
7. eightfold [noble] path (S. āryāṣṭāṅgamārga; T. 'phags lam yan lag brgyad;
C. ba zhengdao 八正道)

FIFTIES

fifty-one/fifty-two mental concomitants. (S. caitta; P. cetasika; T. sem byung lnga bcu rtsa gcig; C. xin suoyou fa 心所有法). See EIGHTY-TWO DHAMMAS OF THE STHAVIRANIKĀYA/THERAVĀDA SCHOOL; [ONE-HUNDRED DHARMAS OF THE YOGĀCĀRA SCHOOL](#).

SEVENTIES

seventy-five dharmas of the Sarvāstivāda school. (S. pañcasaptatidharma; T. chos don lnga; C. qishiwu fa 七十五法)

1. eleven material factors (S. rūpa; T. gzugs; C. sefa 色法)
 1. visual faculty (S. cakṣurindriya; T. mig gi dbang po; C. yangen 眼根)
 2. auditory faculty (S. śrotrendriya; T. rna ba'i dbang po; C. ergen 耳根)
 3. olfactory faculty (S. ghrāṇendriya; T. sna'i dbang po; C. bigen 鼻根)
 4. gustatory faculty (S. jihvendriya; T. lce'i dbang po; C. shegen 舌根)
 5. tactile faculty (S. kāyendriya; T. lus kyi dbang po; C. shengen 身根)
 6. visual objects (S. rūpa; T. gzugs; C. se 色)
 7. sound (S. śabda; T. sgra; C. sheng 聲)
 8. scent (S. gandha; T. dri; C. xiang 香)
 9. flavor (S. rasa; T. ro; C. mei 味)
 10. contact (S. spraṣṭavya; T. reg bya; C. chu 觸)
 11. unmanifest materiality (S. avijñaptirūpa; T. rnam par rig byed ma yin pa'i gzugs; C. wubiao se 無表色)
2. mind (S. citta; T. sems; C. xinwang 心王)
3. forty-six mental concomitants (S. caitta; T. sems byung; C. xin suoyou fa 心所有法)
 1. ten omnipresent mental factors (S. mahābhūmika; T. sems kyi sa mang;

C. dadi fa 大地法)

1. sensation (S. vedanā; T. tshor ba; C. shou 受)
 2. perception (S. saṃjñā; T. 'du shes; C. xiang 想)
 3. volition/intention (S. cetanā; T. sems pa; C. si 思)
 4. sensory contact (S. sparśa; T. reg pa; C. chu 觸)
 5. zeal/desire-to-act (S. chanda; T. 'dun pa; C. yu 欲)
 6. discernment (S. mati; T. shes rab; C. hui 慧)
 7. mindfulness/memory (S. smṛti; T. dran pa; C. nian 念)
 8. attention (S. manaskāra; T. yid la byed pa; C. zuoyi 作意)
 9. determination (S. adhimokṣa; T. mos pa; C. shengjie 勝解)
 10. concentration (S. samādhi; T. ting nge 'dzin; C. ding 定)
2. ten omnipresent wholesome factors (S. kuśalamahābhūmika; T. dge ba'i sa mang; C. da shan di fa 大善地法)
1. faith (S. śraddhā; T. dad pa; C. xin 信)
 2. heedfulness/vigilance (S. apramāda; T. bag yod pa; C. bu fangyi 不放逸)
 3. tranquillity/serenity (S. praśrabdhi; T. shin tu sbyangs pa; C. [qing] an [輕]安)
 4. equanimity (S. upekṣā; T. btang snyoms; C. xingshe 行捨)
 5. shame/decency/propriety (S. hrī; T. ngo tsha shes pa; C. can 慚)
 6. fear of blame/modesty (S. apatrāpya; T. khrel yod pa; C. kui 愧)
 7. absence of craving (S. alobha; T. ma chags pa; C. wu tan 無貪)
 8. absence of ill-will (S. adveṣa; T. zhe sdang med pa; C. wu chen 無瞋)
 9. absence of harmful intentions (S. avihiṃsā; T. rnam par mi 'tshes ba; C. bu hai 不害)
 10. effort/vigor (S. vīrya; T. brtson 'grus; C. qin/jingjin 勤/精進)
3. six omnipresent afflicted factors (S. kleśamahābhūmika; T. nyon mongs chen po'i sa mang; C. da fannao di fa 大煩惱地法)
1. delusion (S. moha; T. ma rig pa; C. chi 癡)
 2. heedlessness (S. pramāda; T. bag med pa; C. fangyi 放逸)
 3. lassitude (S. kausīdya; T. le lo; C. xiedai 懈怠)
 4. lack of faith (S. āśraddhya; T. ma dad pa; C. bu xin 不信)
 5. sloth (S. styāna; T. rmugs pa; C. [hun]shen [昏]沈)
 6. restlessness (S. auddhatya; T. rgod pa; C. diaoju 掉舉)

4. two major omnipresent unwholesome factors (S. akuśalamahābhūmika; T. mi dge ba'i sa mang; C. da bushan di fa 大不善地法)
1. lack of shame/decency/propriety (S. āhrikyā; T. ngo tsha med pa; C. wucan 無慚)
 2. lack of fear of blame/lack of modesty (S. anapatrāpya; T. khrel med pa; C. wukui 無愧)
5. ten minor afflicted factors of wide extent (S. parīttakleśabhūmika; T. nyon mongs chung ngu'i sa mang; C. xiao fannao di fa 小煩惱地法)
1. anger (S. krodha; T. khro ba; C. fen 忿)
 2. disparagement/hypocrisy/concealing (S. mrakṣa; T. 'chab pa; C. fu 覆)
 3. selfishness/stinginess (S. mātsarya; T. ser sna; C. qian 慳)
 4. envy (S. īrṣyā; T. phrag dog; C. ji 嫉)
 5. vexation (S. pradāśa; T. 'tshig pa; C. nao 惱)
 6. hostility (S. vihiṃsā; T. rnam par 'tshes ba; C. hai 害)
 7. enmity/resentment (S. upanāha; T. 'khon 'dzin; C. hen 恨)
 8. deception (S. śāṭhya; T. g.yo; C. chan 諂)
 9. deceit (S. māyā; T. sgyu; C. kuang 誑)
 10. arrogance (S. mada; T. rgyags pa; C. jiao 驕)
6. eight indeterminate mental factors (S. aniyata; T. gzhan 'gyur; C. buding 不定)
1. applied thought (S. vitarka; T. rtog pa; C. xun 尋)
 2. sustained thought (S. vicāra; T. dpyod pa; C. si 伺)
 3. worry (S. kaukr̥tya; T. 'gyod pa; C. ezuo 惡作)
 4. torpor (S. middha; T. gnyid; C. shuimian 睡眠)
 5. sensuality (S. rāga; T. 'dod chags; C. tan 貪)
 6. hatred (S. pratigha; T. khong khro; C. chen 瞋)
 7. pride (S. māna; T. nga rgyal; C. man 慢)
 8. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)
4. fourteen conditioned forces dissociated from thought (S. cittaviprayuktasaṃskāra; T. ldan min 'du byed; C. xin bu xiangying xing fa 心不相應行法)
1. possession (S. prāpti; T. 'thob pa; C. de 得)
 2. nonpossession (S. aprāpti; T. 'thob pa med pa; C. feide 非得)

3. homogeneity (S. sabhāgatā/nikāyasabhāga; T. rigs 'thun pa; C. zhong tongfen 衆同分)
 4. state of nonperception (S. āsaṃjñika; T. 'du shes med pa; C. wuxiang guo/wuxiang bao/wuxiang shi 無想果/無想報/無想事)
 5. equipoise of nonperception (S. asaṃjñāsamāpatti; T. 'du shes med pa'i snyoms 'jug; C. wuxiang ding 無想定)
 6. equipoise of cessation (S. nirodhasamāpatti; T. 'gog pa'i snyoms 'jug; C. mie jin ding 滅盡定)
 7. vitality (S. jīvitendriya; T. srog gi dbang po; C. ming gen 命根)
 8. origination/birth (S. jāti; T. skye ba; C. sheng 生)
 9. continuance/maturation (S. sthiti; T. gnas pa; C. zhu 住)
 10. senescence/decay (S. jarā; T. rga ba; C. yi/lao 異/老)
 11. desinence/extinction (S. anityatā; T. mi rtag pa; C. mie/wuchang 滅/無常)
 12. name set (S. nāmakāya; T. ming gi tshogs; C. ming shen 名身)
 13. phrase set (S. padakāya; T. tshig gi tshogs; C. ju shen 句身)
 14. syllable set (S. vyañjanakāya; T. yi ge'i tshogs; C. wen shen 文身)
5. three uncompound factors (S. asaṃskṛta; T. 'dus ma byas kyi chos; C. wuwei [fa] 無爲[法])
 1. space (S. ākāśa; T. nam mkha'; C. xukong 虛空)
 2. analytical cessation (S. pratisaṃkhyānirodha; T. so sor brtags 'gog pa; C. zemie 擇滅)
 3. nonanalytical suppression (S. apratisaṃkhyānirodha; T. so sor brtags min gyi 'gog pa; C. feizemie 非擇滅)

EIGHTIES

eighty secondary marks [of a mahāpuruṣa]. (S. anuvyañjana; T. dpe byad bzang po; C. bashi zhong hao 八十種好)

1. copper-colored nails (S. ātāmrānakhāḥ; T. sen mo zangs kyi mdog lta bu; C. zhizhao hongtong xiang/zhizhao chitong se 指爪紅銅相/指爪赤銅色)
2. glossy nails (S. snigdhanakhāḥ; T. sen mo mdog snum pa; C. zhise huaze 指色滑澤)
3. raised nails (S. tuṅganakhāḥ; T. sen mo mtho ba; C. zhizhao gao 指爪高)

4. rounded fingers and toes (S. vṛttāṅgulih; T. sor mo rnams zlum pa; C. zhuzhi yuanxiang/zhichang xianyuan 諸指圓相/指長纖圓)
5. tapered fingers and toes (S. anupūrvāṅgulih; T. sor mo byin gyis phra ba; C. zhuzhi xirou (xiang)/zhuzhi jianxi 諸指細柔(相)/諸指漸細)
6. full fingers and toes (S. citāṅgulih; T. sor mo rnams rgyas pa; C. zhuzhi fengman xiang 諸指豐滿相)
7. veins are not visible (S. nigūḍhaśiraḥ; T. rtsa mi mngon pa; C. maijin bulou 脈筋不露)
8. veins are free from knots (S. nirgranthiśiraḥ; T. rtsa mdud med pa; C. erwu maijie/jinmai wujie 而無脈結/筋脉無結)
9. anklebones do not protrude (S. gūḍhagulphaḥ; T. long bu mi mngon pa; C. zu buxian gu/huai buxian 足不顯骨/踝不現)
10. feet [and hands] do not differ in size (S. aviṣamapādaḥ; T. zhabs mi mnyam pa med pa; C. zu wubuping/shouzu ruyi 足無不平/手足如意)
11. walks with the stride of a lion (S. siṃhavikrāntagāmī; T. seng ge'i stabs su gshegs pa; C. xing ru shizi/wei yi ru shizi 形如獅子/威儀如獅子)
12. walks with the stride of an elephant (S. nāgavikrāntagāmī; T. glang po che'i stabs su gshegs pa; C. xingan ru xiang/jinzhi ru xiangwang 形安如象/進止如象王)
13. walks with the stride of a goose (S. haṃsavikrāntagāmī; T. ngang pa'i stabs su gshegs pa; C. xing ru e/xingfa ru ewang 形如鵝/行法如鵝王)
14. walks with the stride of a bull (S. vṛṣabhavikrāntagāmī; T. khyu mchog gi stabs su gshegs pa; C. xing ru shengqun/jinzhi ru niuwang 形如勝群/進止如牛王)
15. walks turning toward the right side (S. pradakṣiṇāvartagāmī; T. g.yas phyogs su ldog cing gshegs pa; C. xiangyou/huishen gushi bijie youxuan 向右/回身顧視必皆右旋)
16. walks elegantly (S. cārugāmī; T. mdzes par gshegs pa; C. weimiao xiang/xingxiang mei/xingbu yansu 微妙相/行相美/行步嚴肅)
17. walks without swaying (S. avakragāmī; T. mi g.yo bar gshegs pa; C. bu waixie/xingbu duanzheng 不歪邪/行步端正)
18. well-rounded body (S. vṛttagātraḥ; T. sku 'khril bag chags pa; C. shen zhongxi/shen zichu wei yi 身重習/身自持透迤)
19. cleansed body (S. mṛṣṭagātraḥ; T. sku byi dor byas pa; C. shen guangze ru diaozhuo/guangze ming ligou 身光澤如彫琢/光澤明離垢)
20. well-proportioned body (S. anupūrvagātraḥ; T. sku rim par 'tsham pa; C.

- shen jubei/shenti xiangcheng 身具備/身體相稱)
21. clean body (S. śucigātraḥ; T. sku gtsang ba; C. shen jiejing/shenti qingjie 身潔淨/身體清潔)
22. supple body (S. mṛdugātraḥ; T. sku 'jam pa; C. shen rouruan 身柔軟)
23. pure body (S. viśuddhagātraḥ; T. sku rnam par dag pa; C. qingjing shen/shen qingjing 清淨身/身清淨)
24. has perfect genitals (S. paripūrṇavyañjanaḥ; T. mtshan yong su rdzogs pa; C. juzu xiang/shen manzu 具足相/身滿足)
25. broad and magnificent frame (S. pṛthucārumaṇḍalagātraḥ; T. sku kho lag yangs shing bzang ba; C. shenzhi qimiao/shen runze/miao guangxia xiangcheng 身肢奇妙/身潤澤/妙廣狹相稱)
26. walks with an even pace (S. samakramaḥ; T. gom pa snyoms pa; C. xingbu zhengzhi 行步正直)
27. youthful body (S. sukumāragātraḥ; T. sku shin tu gzhon mdog can; C. shense nenruan/rongyan qimiao changruo shaonian 身色嫩軟/容顏奇妙常若少年)
28. unimpaired body (S. adīnagātraḥ; T. sku zhum pa med pa; C. shen wu tuiqu/shenti buqu 身無退屈/身體不曲)
29. broad body (S. unnatagātraḥ; T. sku rgyas pa; C. shen fengman/ruyi fengman 身豐滿/如意豐滿)
30. firm body (S. susaṃhitagātraḥ; T. sku shin tu grims pa; C. shenzhi anshang buqing/zhuchu wu nengdong zhe/shenzhi jianshi 身肢安上不傾/住處無能動者/身肢堅實)
31. limbs and features are well-proportioned (S. suvibhaktāṅgapratyaṅgaḥ; T. yan lag dang nying lag shin tu rnam par 'byed pa; C. zhijie junping/gujie ru gousuo 支節均平/骨節如鉤鎖)
32. sight is free from disease and clear (S. vitimiraviśuddhālokaḥ; T. gzigs pa rab rib med cing rnam par dag pa; C. mu qingjing wu buming 目清淨無不明)
33. round belly (S. vṛttakukṣiḥ; T. dku zlum pa; C. fu yuan 復圓)
34. clean belly (S. mṛṣṭakukṣiḥ; T. dku skabs phyin pa; C. shen wu buxiu 身無不修)
35. belly is free from defects (S. abhugnakukṣiḥ; T. dku ma myongs pa; C. fu wu aotu 服無凹凸)
36. flat belly (S. kṣāmodarah; T. phyal phyang nge ba; C. fu yuanxiang 復圓相)
37. deep navel (S. gaṃbhīranābhiḥ; T. lte ba zab pa; C. qi shen/qi shen yuanhao 臍深/臍深圓好)
38. navel turns to the right (S. pradakṣiṇāvartanābhiḥ; T. lte ba g.yas phyogs

- su 'khyil ba; C. qi youxuan 臍右旋)
39. beautiful from all sides (S. samantaprāsādikaḥ; T. kun nas mdzes pa; C. guan wuyan zu 觀無厭足)
40. conduct is pure (S. śucisamācāraḥ; T. kun tu spyod pa gtsang ba; C. xingshi jiejing 行事潔淨)
41. body has no black moles (S. vyapagatatilakakālagātraḥ; T. sku la sme ba dang gnag bag med pa; C. shen wu zhidian 身無痣點)
42. hands are soft like cotton (S. tūlasadṛśasukumārapāṇiḥ; T. phyag shing bal ltar shin tu 'jam pa; C. shouruan ru mian 手軟如綿)
43. lustrous lines on his hands (S. snigdhapāṇilekhaḥ; T. phyag gi ri mo mdangs yod pa; C. shouwen juguang[se] 手文具光[色])
44. deep lines on his hands (S. gambhīrapāṇilekhaḥ; T. phyag gi ri mo zab pa; C. shouwen sheshen 手文甚深)
45. long lines on his hands (S. āyatapāṇilekhaḥ; phyag gi ri mo ring ba; C. shouwen chang 手文長)
46. face is not too long (S. nātyāyatavadanaḥ; T. shal ha cang yang mi ring ba; C. mian bu changda 面不長大)
47. lips the color of a bimba fruit (S. bimboṣṭhi; T. mchu bim ba ltar dmar ba; C. chun hong ru xiangxiangsi guo 唇紅如相想思果)
48. supple tongue (S. mṛdujihvaḥ; T. ljags mnyen pa; C. she ruanmei/she meiruan 舌軟美/舌美軟)
49. slender tongue (S. tanujihvaḥ; T. ljags srab pa; C. she ruan/she boguang 舌軟/舌薄廣)
50. red tongue (S. raktajihvaḥ; T. ljags dmar ba; C. she xianhong/she sechi 舌鮮紅/舌色赤)
51. voice resonates like an elephant and like thunder (S. gajagarjitajīmūtaghoṣaḥ; T. glang po che'i nga ro dang 'brug gi sgra dang ldan pa; C. ju xiangyu leiying/xiangsheng longyin 具象語雷音/象聲龍音)
52. sweet, pleasing, and gentle voice (S. madhuracārumañjusvaraḥ; T. gsung snyan cing mnyen la 'jam pa; C. yinyun meihao/yinyun hechang 音韻美好/音韻和暢)
53. round canine teeth (S. vṛttadamṣṭraḥ; T. mche ba zlum pa; C. ya yuan 牙圓)
54. sharp canine teeth (S. tīkṣṇadamṣṭraḥ; T. mche ba rno ba; C. ya kuaili 牙快利)
55. white canine teeth (S. śukladamṣṭraḥ; T. mche ba dkar ba; C. ya bai 牙白)
56. even canine teeth (S. samadamṣṭraḥ; T. mche ba mnyam pa; C. ya fang/ya

- pingzheng 牙方/牙平正)
57. tapered canine teeth (S. anupūrvadaṃṣṭraḥ; T. mche ba byin gyis phra ba; C. ya jianxi 牙漸細)
58. high nose (S. tuṅganāsaḥ; T. shangs mtho ba; C. bi gao/bikong buxian 鼻高/鼻孔不現)
59. clean nose (S. śucināsaḥ; T. shangs gtsang pa; C. bi qingjing 鼻清淨)
60. clear eyes (S. viśuddhanetraḥ; T. spyen nam par dag pa; C. mu qingjing 目清淨)
61. wide eyes (S. viśālanetraḥ; T. spyen yangs pa; C. mu guang 目廣)
62. thick eyelashes (S. citrapakṣmāḥ; T. rdzi ma stug pa; C. yanmao meihao 眼毛美好)
63. the iris and sclera of his eyes contrast like the petals and stamen of a blue lotus (S. sitāsitakamaladalaśakalanayaṇaḥ; T. spyen dkar nag 'byes shing pad ma'i 'dab ma'i mdangs pa lta bu; C. mu heibai fenqingmei ru lianhua xingxiang/mu heibai mei ru lianhua xingxiang 目黑白分清美如蓮華形相/目黑白美如蓮華形相)
64. long eyebrows [like a young crescent moon] (S. āyatabhrūḥ; T. smin tshugs ring ba; C. meimao xiuchang/mei ru chuyue 眉毛修長/眉如初月)
65. soft eyebrows (S. ślakṣṇabhrūḥ; T. smin ma 'jam pa; C. shuangmei nenruan 雙眉嫩軟)
66. eyebrows with even hairs (S. samaromabhrūḥ; T. smin ma spu mnyam pa; C. meimao pingqi 眉毛平齊)
67. lustrous eyebrows (S. snigdhabhrūḥ; T. smin ma snum pa; C. meimao run 眉毛潤)
68. full and long ears (pīnāyatakaṇaḥ; T. snyan shal stug cing ring ba; C. er hou xiuchang 耳厚修長)
69. even ears (S. samakaṇaḥ; T. snyan mnyam pa; C. er qiping 耳齊平)
70. unimpaired sense of hearing (S. anupahatakaṇendriyaḥ; T. snyan gyi dbang po ma nyams pa; C. ergen pingjun 耳根平均)
71. well-developed forehead (S. supariṇatalalāṭaḥ; T. dpral ba legs par dbyes pa; C. e guang yuanman 額廣圓滿)
72. broad forehead (S. pṛthulalāṭaḥ; T. dpral ba dbyes che ba; C. e kuan pingzheng 額寬平正)
73. large head (S. suparipūrṇa-uttamāṅgaḥ; T. dbu shin tu rgyas pa; C. tou ru motuona guo 頭如摩陀那果)
74. hair on the head is black as a bee (S. bhramarasadrśakeśaḥ; T. dbu skra

- bung ba ltar gnag pa; C. fa se ganqing ru fengwang 髮色紺青如蜂王)
75. thick hair on the head (S. citakeśaḥ; T. dbu skra stug pa; C. fa mei 髮美)
76. soft hair on the head (S. ślakṣṇakeśaḥ; T. dbu skra 'jam pa; C. fa nenruan 髮嫩軟)
77. hair on the head is not disheveled (S. asaṃlulitakeśaḥ; T. dbu skra ma 'dzings pa; C. fa buluan 髮不亂)
78. hair on the head is not rough (S. aparūṣakeśaḥ; T. dbu skra mi gshor ba; C. shoufa zhengqi 首髮整齊)
79. fragrant hair on the head (S. surabhikeśaḥ; T. dbu skra dri zhim pa; C. shoufa xiangfu 首髮香馥)
80. hands and feet are adorned with such auspicious symbols as the śrīvatsa [endless knot]; svastika [swastika]; and nandyāvarta [elaborated swastika form] (S. śrīvatsasvastikanandyāvartalalitapāṇipādaḥ; T. phyags dang zhabs dpal gyi be'u dang bkra shis g.yung drung 'khyil bas brgyan pa; C. shouzu youru xiangdu jiangu/shouzu jixiang dexiang miaohao juzu 手足猶如祥犢堅固/手足吉祥德相妙好具足)

eighty-two dhammas of the *Sthaviranikāya/Theravāda school.

1. twenty-eight material factors (P. rūpa)
 1. four primary elements (P. mahābhūta)
 1. earth/solidity (P. paṭhavī[dhātu])
 2. water/cohesion (P. āpo[dhātu])
 3. fire/heat (P. tejo[dhātu])
 4. air/mobility (P. vāyo[dhātu])
 2. twenty-four types of derived materiality (P. upādārūpa)
 1. eye/visual faculty (P. cakkhu)
 2. ear/auditory faculty (P. sota)
 3. nose/olfactory faculty (P. ghāna)
 4. tongue/gustatory faculty (P. jivhā)
 5. body/tactile faculty (P. kāya)
 6. visual objects (P. rūpa)
 7. sound (P. sadda)
 8. scent (P. gandha)
 9. flavor (P. rasa)

10. femininity (P. itthindrya)
 11. masculinity (P. purisindriya)
 12. [physical] vitality/life-force (P. jīvita, [rūpa]jīvitindriya)
 13. heart [as the physical basis of mentality] (P. hadaya[vatthu])
 14. bodily intimation (P. kāyaviññatti)
 15. verbal intimation (P. vacīviññatti)
 16. limitation/space element (P. pariccheda, ākāsadhātu)
 17. lightness/buoyancy (P. lahutā)
 18. malleability (P. mudutā)
 19. wieldiness (P. kammaññatā)
 20. birth/development (P. upacaya)
 21. continuity (P. santati)
 22. senescence/decay (P. jaratā)
 23. desinence/extinction/impermanence (P. aniccatā)
 24. nutriment (P. āhāra)
2. mind (citta)
 1. mind/consciousness/mentality (P. citta, viññāṇa, manas)
 3. fifty-two mental concomitants (P. cetasika)
 1. thirteen morally indeterminate (P. avyākata)
 1. seven general/universal (P. sabbacittasādhāraṇa)
 1. contact (P. phassa)
 2. sensation (P. vedanā)
 3. perception (P. saññā)
 4. intention (P. cetanā)
 5. one-pointedness (P. ekaggatā)
 6. [mental] vitality/life-force (P. jīvita, [nama]jīvitindriya)
 7. attention (P. manasikāra)
 2. six secondary (P. pakīṇṇaka)
 1. applied thought (P. vittaka)
 2. sustained thought (P. vicāra)
 3. determination/resolution (P. adhimokkha)
 4. energy (P. viriya)

5. rapture (P. pīti)
6. zeal (P. chanda)
2. twenty-five wholesome (P. kusala)
 1. nineteen sobhanasādhāraṇa (universal splendid mental factors)
 1. faith/confidence (P. saddhā)
 2. mindfulness (P. sati)
 3. shame/propriety/decency (P. hiri)
 4. fear of blame/modesty (P. ottappa)
 5. nongreed (P. alobha)
 6. nonhatred (P. adosa)
 7. equanimity (P. tatramajjhataṭṭā)
 8. tranquillity of mental body (P. kāyapassaddhi)
 9. tranquillity of consciousness (P. cittapassaddhi)
 10. lightness of mental body (P. kāyalahutā)
 11. lightness of consciousness (P. cittalahutā)
 12. malleability of mental body (P. kāyamudutā)
 13. malleability of consciousness (P. cittamudutā)
 14. wieldiness of mental body (P. kāyakammaññatā)
 15. wieldiness of consciousness (P. cittakammaññatā)
 16. proficiency of mental body (P. kāyapāguññatā)
 17. proficiency of consciousness (P. cittapāguññatā)
 18. rectitude of mental body (P. kāyujjukatā)
 19. rectitude of consciousness (P. cittujjukatā)
 2. three abstinences (virati)
 1. abstinence from physical misconduct (P. kāyaduccaritavirati); alt. right action (P. sammākammanta)
 2. abstinence from verbal misconduct (P. vacīduccaritavirati); alt. right speech (P. sammāvācā)
 3. abstinence from mental misconduct (P. manoduccaritavirati); alt. abstinence from wrong livelihood (P. ājīvaduccaritavirati), viz. right livelihood (P. sammājīva)
3. two illimitables (appamañña)
 1. compassion (P. karuṇā)

- 2. empathetic joy (P. muditā)
- 4. one wisdom faculty (P. paññindriya)
 - 1. wisdom (P. paññā)
- 3. fourteen unwholesome (P. akusala)
 - 1. delusion (P. moha)
 - 2. lack of shame or lack of decency (P. ahirika)
 - 3. lack of fear of blame or lack of modesty (P. anottappa)
 - 4. restlessness (P. uddhacca)
 - 5. greed (P. lobha)
 - 6. wrong view (P. diṭṭhi)
 - 7. pride/conceit (P. māna)
 - 8. hatred (P. dosa)
 - 9. envy (P. issā)
 - 10. selfishness/stinginess (P. macchariya)

 - 12. sloth (P. thīna)
 - 13. torpor (P. middha)
 - 14. skeptical doubt (P. vicikicchā)
- 4. uncompoundable (P. asaṅkhata)
 - 1. nirvāṇa (P. nibbāna)

eighty-four mahāsiddhas. (T. grub thob brgyad bcu rtsa bzhi)

When the Tibetan is not provided, the Tibetan typically transliterates the Indic name.

- 1. Lūyipa (T. Nya'i rgyu ma za ba)
- 2. Līlapa (T. Sgeg pa)
- 3. Virūpa
- 4. Ḍombipa
- 5. Śavaripa
- 6. Saraha (T. Mda' snun)
- 7. Kankaripa
- 8. Mīnapa (T. Nya bo pa)

9. Gorakṣa (T. Ba glang bsrung)
10. Caurāṅgi (T. Chom rkun gyu yan lag)
11. Vīnapa (T. Pi vang pa)
12. Śāntipa
13. Tantipa (T. Thags mkhan)
14. Camaripa (T. Lham mkhan)
15. Khadḡapa (T. Ral gri pa)
16. Nāgārjuna (T. Klu sgrub)
17. Kāṅḡapa (T. Nag po spyod pa)
18. Karṇaripa/Āryadeva ('Phags pa lha)
19. Thagnapa (T. Rdzun smra ba)
20. Nāropa (T. Rtsa bshad pa)
21. Śalipa (T. Spyan ki pa)
22. Tilopa (T. Snum pa)
23. Catrapa
24. Bhadrapa (T. Bzang po)
25. Dhukhandi (T. Gnyis gcig tu byed pa)
26. Ajokipa (T. Le lo can)
27. Kalapa (T. Smyon pa)
28. Dhombipa (T. Khrus khan)
29. Kaṅkana (T. Gdu bu can)
30. Kambala (T. Lwa ba pa)
31. Ṭeṅgipa (T. 'Bras rdung ba)
32. Bhandhepa (T. Nor la 'dzin pa)
33. Tandhepa (T. Cho lo pa)
34. Kukkuripa
35. Kucipa (T. Ltag lba can)
36. Dharmapa (T. Thos pa'i shes rab bya ba)
37. Mahipa (T. Ngar rgyal can)
38. Acinta (T. Bsam mi khyab pa)
39. Babhahi (T. Chu las 'o ma len)
40. Nalina (T. Pad ma'i rtsa ba)
41. Bhusuku (T. Zhi lha)
42. Indrabhūti (T. Dbang po'i blo)

43. Mekopa
44. Koṭali (T. Tog rtse zhabs)
45. Kaṃparipa (T. Mgar pa)
46. Jālandhari (T. Dra ba 'dzin pa)
47. Rāhula
48. Dharmapa (T. Chos pa)
49. Dhokaripa (T. Rdo ka ri)
50. Medhina (T. Thang lo pa)
51. Paṅkaja (T. 'Dam skyes)
52. Ghaṇḍhapa (T. Dril pu pa)
53. Yogipa
54. Caluki
55. Gorura (T. Bya ba)
56. Lucika
57. Niguṇa (T. Yon tan med pa)
58. Jayānanda (T. Rgyal ba mtha' med)
59. Pacari (T. 'Khur ba 'tsong ba)
60. Campaka
61. Bhikṣana (T. So gnyis pa)
62. Telopa (T. Mar nag 'tshong mkhan)
63. Kumaripa (T. Rdza mkhan)
64. Caparipa
65. Maṇibhadrā
66. Mekhalā
67. Kanakhalā
68. Kalakala (T. Ku co can)
69. Kantali (T. Tshem bu pa)
70. Dhahuli (T. Rtswa thag can)
71. Udheli (T. Phur pa)
72. Kapalapa (T. Thod pa can)
73. Kirava (T. Rnam rtog spang ba)
74. Sakara (T. Mtsho skyes)
75. Sarvabhakṣa (T. Thams cad za ba)
76. Nāgabodhi (T. Klu'i byang chub)

- 77. Dārika (T. Smad 'tshong can)
- 78. Putali (T. Rgyan slang ba)
- 79. Panaha (T. Mchil lham can)
- 80. Kokali (T. Ko la la'i skad du chags)
- 81. Anaṅga
- 82. Lakṣmīnkarā (Legs smin kara)
- 83. Samudra (T. Rgya mtsho nas nor bu len mkhan)
- 84. Vyali

HUNDREDS

one-hundred dharmas of the Yogācāra school. (S. śatadharmā; T. chos brgya; C. baifa 百法)

- 1. eight consciousnesses (S. vijñāna; T. rnam par shes pa; C. xinfā/shi 心法/識)
 - 1. visual consciousness (S. cakṣurvijñāna; T. mig gi rnam par shes pa; C. yanshi 眼識)

 5. wisdom/cognition (S. prajñā; T. shes rab; C. hui 慧)
3. eleven wholesome mental comcomitants (S. kuśāla; T. dge ba; C. shan 善)

1. faith (S. śraddhā; T. dad pa; C. xin 信)
2. shame/decency/propriety (S. hrī; T. ngo tsha shes pa; C. can 慚)
3. fear of blame/modesty (S. apatrāpya; T. khrel yod pa; C. kui 愧)
4. lack of craving (S. alobha; T. ma chags pa; C. wu tan 無貪)
5. lack of ill-will (S. adveṣa; T. zhe sdang med pa; C. wu chen 無瞋)
6. lack of delusion (S. amoha; T. gti mug med pa; C. wu chi 無癡)
7. vigor (S. vīrya; T. brtson 'grus; C. qin/jingjin 勤/精進)
8. tranquillity/serenity (S. praśrabdhi; T. shin tu sbyangs pa; C. [qing] an [輕]安)
9. vigilance (S. apramāda; T. bag yod pa; C. bu fangyi 不放逸)
10. equanimity (S. upekṣā; T. btang snyoms; C. xingshe 行捨)
11. absence of harmful intentions (S. avihiṃsā; T. rnam par mi 'tshe ba; C. bu hai 不害)

4. six root afflictions (S. mūlakleśa; T. rtsa nyon; C. genben fannao 根本煩惱)

1. sensuality/lust (S. rāga; T. 'dod chags; C. tan 貪)
2. anger (S. pratigha; T. khong khro; C. chen 瞋)
3. ignorance (S. avidyā; T. ma rig pa; C. chi/wuming 癡/無明)

4. pride (S. māna; T. nga rgyal; C. man 慢)
5. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)
6. wrong views (S. drṣṭi; T. lta ba nyon mongs can; C. jian 見)
5. twenty secondary afflictions (S. upakleśa; T. nye nyon; C. sui fannao 隨煩惱)

1. anger (S. krodha; T. khro ba; C. fen 忿)
2. resentment (S. upanāha; T. 'khon 'dzin; C. hen 恨)
3. vexation/maliciousness (S. pradāśa; T. 'tshig pa; C. nao 惱)
4. disparagement/hypocrisy (S. mrakṣa; T. 'chab pa; C. fu 覆)
5. deception (S. māyā; T. sgyu; C. kuang 誑)
6. deceit (S. śāṭhya; T. g.yo; C. chan 詔)
7. arrogance (S. mada; T. rgyags pa; C. jiao 驕)
8. hostility (S. vihiṃsā; T. rnam par 'tshe ba; C. hai 害)
9. envy (S. īrṣyā; T. phrag dog; C. ji 嫉)
10. selfishness/stinginess (S. mātsarya; T. ser sna; C. qian 慳)
11. lack of shame/decency/propriety (S. āhrīkyā; T. ngo tsha med pa; C. wucan 無慚)
12. lack of fear of blame/lack of modesty (S. anapatrāpya; T. khrel med pa; C. wukui 無愧)
13. lack of faith (S. āśraddhya; T. ma dad pa; C. bu xin 不信)
14. lassitude (S. kausīdya; T. le lo; C. xiedai 懈怠)
15. heedlessness (S. pramāda; T. bag med pa; C. fangyi 放逸)
16. sloth (S. styāna; T. rmugs pa; C. hunchen 昏沈)
17. restlessness (S. auddhatya; T. rgod pa; C. diaoju 掉舉)
18. forgetfulness (S. muṣitasmṛtitā; T. brjed nges pa; C. shinian 失念)
19. lack of circumspection (S. asaṃprajanya; T. shes bzhin ma yin pa; C. bu zhengzhi 不正知)
20. distraction (S. vikṣepa; T. rnam par g.yeng ba; C. sanluan 散亂)
6. four indeterminate factors (S. aniyata; T. gzhan 'gyur; C. buding [fa] 不定[法])

1. torpor/drowsiness (S. middha; T. gnyid; C. shuimian 睡眠)
2. worry/remorse (S. kaukr̥tya; T. 'gyod pa; C. ezuo 惡作)
3. applied thought (S. vitarka; T. rtog pa; C. xun 尋)
4. sustained thought (S. vicāra; T. dpyod pa; C. si 伺)

3. eleven material factors (S. rūpa; T. gzugs; C. shiyi sefa 色法)

1. visual faculty (S. cakṣurindriya; T. mig gi dbang po; C. yangen 眼根)
2. auditory faculty (S. śrotrendriya; T. rna ba'i dbang po; C. ergen 耳根)
3. olfactory faculty (S. ghrāṇendriya; T. sna'i dbang po; C. bigen 鼻根)
4. gustatory faculty (S. jihvendriya; T. lce'i dbang po; C. shegen 舌根)
5. tactile faculty (S. kāyendriya; T. lus kyi dbang po; C. shengen 身根)
6. visual objects (S. rūpa; T. gzugs; C. se 色)
7. sound (S. śabda; T. sgra; C. sheng 聲)
8. scent (S. gandha; T. dri; C. xiang 香)
9. flavor (S. rasa; T. ro; C. mei 味)

10. contact (S. spraṣṭavya; T. reg bya; C. chu 觸)

11. materiality associated with the sphere of mental factors [e.g.; materiality generated in meditative states] (S. dharmāyatanarūpa; T. chos kyi skye mched pa'i gzugs; C. fachu suoshe se 法處所攝色)

4. twenty-four conditioned forces dissociated from thought (S.

cittaviprayuktasamkāra; T. ldan min 'du byed; C. xin bu xiangying xing fa 心不相應行法)

1. possession (S. prāpti; T. 'thob pa; C. de 得)
2. vitality (S. jīvitendriya; T. srog gi dbang po; C. ming gen 命根)
3. homogeneity (S. nikāyasabhāga; T. rigs 'thun pa; C. zhong tongfen 衆同分)
4. nature of ordinary people (S. pṛthagjanatva; T. so so skye bo nyid; C. yisheng xing 異生性)
5. equipoise of nonperception (S. asaṃjñāsamāpatti; T. 'du shes med pa'i snyoms 'jug; C. wuxiang ding 無想定)
6. equipoise of cessation (S. nirodhasamāpatti; T. 'gog pa'i snyoms 'jug; C. mie jin ding 滅盡定)
7. state of nonperception (S. āsaṃjñika; T. 'du shes med pa; C. wuxiang guo/wuxiang bao/wuxiang shi 無想果/無想報/無想事)
8. name set (S. nāmakāya; T. ming gi tshogs; C. ming shen 名身)
9. phrase set (S. padakāya; T. tshig gi tshogs; C. ju shen 句身)
10. syllable set (S. vyañjanakāya; T. yi ge'i tshogs; C. wen shen 文身)
11. origination/birth (S. jāti; T. skye ba; C. sheng 生)
12. continuance/maturation (S. sthiti; T. gnas pa; C. zhu 住)
13. senescence/decay (S. jarā; T. rga ba; C. yi/lao 異/老)

14. desinence/extinction (S. anityatā; T. mi rtag pa; C. mie/wuchang 滅/無常)
 15. continuity (S. pravṛtti; T. 'jug pa; C. liuzhuan 流轉)
 16. distinction (S. pratiniyama; T. so sor nges pa; C. dingyi 定異)
 17. association (S. yoga; T. 'byor 'grel; C. xiangying 相應)
 18. instantaneity (S. jāva; T. 'gyogs pa; C. shisu 勢速)
 19. order (S. anukrama; T. go rim; C. cidi 次第)
 20. direction/area (S. deśa; T. yul; C. fang 方)
 21. time (S. kāla; T. dus; C. shi 時)
 22. number (S. saṃkhyā; T. grangs; C. shu 數)
 23. complete assemblage [of the causes and conditions that lead to the production of dharmas] (S. sāmāgrī; T. tshogs pa; C. hehe xing 和合性)
 24. incomplete assemblage (S. asāmāgrī; T. ma tshogs pa; C. bu hehe xing 不和合性)
5. six uncompound factors (S. asaṃskṛtadharmā; T. 'dus ma byas kyi chos; C. wuwei fa 無爲法)
1. space (S. ākāśa; T. nam mkha'; C. xukong 虛空)
 2. analytical cessation (S. pratisaṃkhyānirodha; T. so sor brtags 'gog pa; C. zemie 擇滅)
 3. nonanalytical suppression (S. apratisaṃkhyānirodha; T. so sor brtags min gyi 'gog pa; C. feizemie 非擇滅)
 4. motionlessness (S. āniñjya; T. mi g.yo ba; C. budong 不動)
 5. cessation of perception and sensation (S. saṃjñāvedayitanirodha; T. 'du shes dang tshor ba 'gog pa; C. xiangshou mie 想受滅)
 6. suchness (S. tathatā; Tib. de bzhin nyid; C. zhenru 眞如)
